A "Doggie" residing on Dublin street makes a "whine" to the Examiner, to the effect that one of the town officials, while riding his wheel on the sidewalk from the corner of Dublin and George streets, to Union street came into painful contact (for the dog) with his canine highness. The Chief pleads "not guilty" to the charge, but says if "Doggie" will report the name of the offending officer, the guilty one will be punished.

DUTTON'S MARKET.

MR. CHAS. WHITEN GOES TO TORONTO.

Accepted Position With Messrs P. W. Ellis & Company.

An announcement which will cause both pleasure and regret to his many friends is that Mr. Chas. J. Whiten has severed his connection with the jewelry establishment of W. A. Sanderson and has accepted a similar one with the wholesale jewelry house of Messrs. P. W. Ellis & Co., of Toronto. Mr. Whiten has been employed in town for about five years, and has during that time made good progress at his chosen business. Mr. Whiten was an active and useful member of George street Epworth League and was secretary treasurer of the Trent Valley Canoe Club, both of which organizations benefitted by his faithful services. He enters upon his new sphere with the best wishes of his many friends.

UNION OF CANADIAN MUNICIPALITIES.

Convention in Ottawa To-morrow—Mayor Roger and Alderman Best Present.

His Worship Mayor Roger and Ald. Best left this morning for Ottawa to be present at the convention of the Union of Canadian Municipalities which will be held in the city hall at the metropolis beginning to-morrow. The president of the Union is O. H. Howland, K. C., C. M. G., ex-mayor of Toronto, while Mayor Roger is one of the vice-presidents, besides being a member of the executive committee which will meet this evening.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases.

THE Y. M. C. A. BATHS.

The Y.M.C.A. baths were re-opened on Monday, after having been closed a week during which time they have undergone extensive repairs and been thoroughly renovated and painted. The work has been done under the direction of the physical committee and their present renewed condition reflects great credit on them and the Physical Director.

The walls have been painted in a blue tint for a distance of five feet from the floor; the floor of the dressing room has been painted in grey and the swimming baths and shower baths whitened with a special water proof preparation.

No pains have been spared to make this privilege a most attractive one and the result should be a large increase in the already large number of men making use of the same. An invitation is extended to members and non-members to inspect them. Those who are not members would do well to join at once. The single ticket of $3.00 includes the use of the baths.

The physical committee have decided to lay special emphasis this year on swimming and an instructor has been secured and classes formed for the teaching of this valuable art.

The committee regret that the members have been of necessity denied the privilege of the baths while these improvements have been going on, but the loss is more than made up for in the better facilities that will be afforded in the future by the changes made.

Is Your Piano in Tune?

The change of seasons affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

A JOINT MEETING OF CHRISTIAN ENDEAVOURERS.

St. Pauls and St. Andrews Societies Unite in a Very Pleasant Gathering.

A very pleasant and profitable joint meeting of the Christian Endeavour Societies of St. Andrew's and St. Paul's was held in St. Paul's school room last night. Both societies were well represented.

Miss Williamson, who attended the Summer School at Knox College, Toronto, presided, and the general subject, "Echoes from the Summer School," was subdivided as follows: (1) Basis of Success in C. E. work; (2) Duties of officers; (3) Helpfulfulness of Good Music; (4) Requirements of the Social Committee; (5) Have results reached expectations?

The special music provided was of a high order and was furnished in a very pleasing manner by Miss S. Cameron, who sang "Count your Blessings," and Miss Knox, whose contribution was entitled "Face to Face." A male quartette from St. Andrew's sang "Sing them over Again to Me."

Refreshments served formed a pleasant prelude to the conclusion of a very profitable and enjoyable evening.

ENCOUNTER WITH BRUIN.

Hunters at Burleigh bag big Luck.

(Special to the Examiner.)

Mr. Walter Crowe, son of Mr. Christopher Crowe, of upper Kawartha Lake, and Messrs. Philips and Johnston, of Havelock, were out snipe shooting one day last week on the Burleigh shore near Eels Creek, when Walter was confronted with a large female bear weighing about 350 poundes, and raising his rifle to that unerring eye, he with only three shots, brought the bear to bay. Walter, when a boy of from ten to fifteen years of age, spent his spare time with sling and buckshot. Hundreds of rabbits and partridges fell victims to his skill. Practising making perfect, he was able to bring down the big game with his rifle.

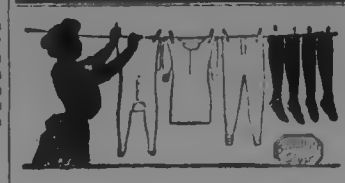
Begun in Earnest

For the benefit of country as well as town shoppers, attention is directed to the Peterborough Bookstore's Red Ticket Sale, now under full headway. Everyone looking for money-saving chances should embrace this opportunity. Vastness of stock a feature. In buying at the Peterborough Bookstore there always is the pleasing satisfaction of knowing that goods are perfectly new as well as up-to-date. A. H. Stratton & Co.

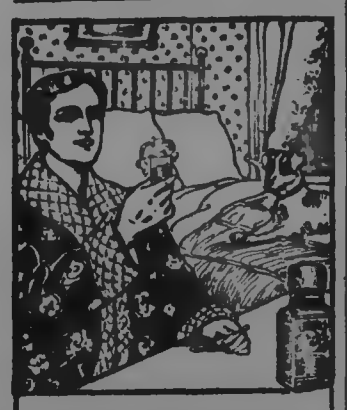
—Call and look over our stock of Purses and Hand Bags. Some new lines at remarkably low prices. By the way, we are selling fishing tacle at cost to clear. Sailsbury & Co.

St. Johns Festival.

St. John's Harvest Festival will be held on Thursday, Sept 17th. The church will be decorated to-morrow morning and afternoon. Contributions to the decorations will be thankfully received.



You won't harden or shrink woolens with Sunlight Soap. The purity of the oils and fats and the absence of free alkali prevent that. 28



Brim-full of Health and Energy.

Life is worth living when one can awake after a good night's sleep—ready for anything the day may bring. Eye clear; tongue clean; liver active; stomach right; hand steady and every nerve vibrating with that splendid sense of the power of perfect health. Too few enjoy this enviable morning awakening, but

Abbey's Effervescent Salt

can always be depended upon to restore the system to its natural condition and keep you in good sound health. A gentle laxative it helps nature to rid the system of poisonous impurities, stimulates the liver and tones up the digestive organs.

SURVEYING TOUR IN NEW ONTARIO.

Interesting Recital of the Chief Features of the Journey.

Mr. J. A. Fife, B. A., Tells the Story of His Travels.

Below is the first of a series of articles, which Mr. J. A. Fife, B. A., of the Collegiate Institute staff, has kindly consented to furnish for the instruction and entertainment of the readers of the Examiner. They will appear from time to time till the account is concluded:

NUMBER ONE.

Having for some time been desirous of visiting our northern heritage (New Ontario) I was glad to avail myself of the opportunity of joining Mr. A. J. Cameron's party, bound for the district of Nipissing to engage in surveying the townships of Walker and Clergue, which according to our map, were to lie around the junction of the Abitibi and Black rivers. I had the idea that we would reach our destination in about seven days from Toronto, or about five days from the northern end of Lake Temiscamingue. Leaving Toronto on the evening of July 11th we arrived, in about eight hours at North Bay, a thriving railway town of about 3,600 inhabitants pleasantly situated at the eastern end of Lake Nipissing. Building operations here were in full swing and the town had every appearance of enjoying a very healthy boom, due in part no doubt, to the fact that the Provincial Government railway was being rapidly pushed forward from the town towards New Liskeard at the north end of Lake Temiscamingue.

North Bay had previously had good railway facilities, being situated at the junction of the main line of the C. P. R. and G. T. R. and some idea of the railway traffic may be formed from the fact that we counted eighteen large C. P. R. engines in the yard at once while we were there. The Imperial Ottawa and Traders' Banks have branches here and seem to have a fair amount of business.

THE SURROUNDING COUNTRY.

Is unfit for cultivation being rocky and sandy. We spent Sunday in the town and, strolling around the railway station in the afternoon, we met an old Scotchman from St. Thomas bound for Winnipeg on a visit to friends. He seemed inclined to talk and the conversation drifted on to a theme ever dear to the Scotchman's heart—the poetry of Robbie Burns—with which he was literally full to overflowing, for he began with "The Cotter's Saturday Night," and recited almost the entire poem; then followed "To a Mouse," "To a Mountain Daisy," "Tam o' Shanter" and "John Anderson, My Jo." Truly it was delightful to listen to the old man and to see his face shine with the feelings which these beautiful lines stirred within him.

Leaving North Bay the same evening, we reached Mattawa after about two hours' run down the main line of the C. P. R. The town lies about a mile north of the station a tthe junction of the Mattawa and Ottawa rivers. It has a population of about 1,800, mostly French and Irish Roman Catholics whose fine stone church occupies the most elevated site in the place; around it, or rather along side of it are the separate school, hospital and the priest's residence, all beautiful buildings. The Ottawa here is a swift stream and rapids are to be seen just above the town. The Quebec shore rises almost perpendicularly about 250 feet formed of red granite rock, thickly wooded with scrubby pine and small poplar. We were met at the station by Mr. John Longhrin, late M. P. P., and now registrar for the district, who also carries on a successful hardware business in the town.

A SOURCE OF INFORMATION.

Mr. Longhrin gave us much valuable information about our route northward and also as to the best way of transporting our supplies; he also obtained for us three experienced axe and canoe men for the trip. Before leaving Mattawa we found that our canoes were too small to carry all our outfit, so arrangements were made with a Dutch trader to take what we were compelled to leave (some 3,000 pounds) from Klocks Depot, a place to which reference will be made later, to his own place on Lake Abitibi which would be within 45 miles of the scene of our labours. Our party was now complete and consisted of the following: A. J. Cameron, P. L. S., Peterborough; Frank Caddy, Frid Anderson, Jas. Emlan, Campbellford; O. B. Holmes, Selkirk, Ont; J. A Patterson, Jack Cameron, Peterborough; Jos. Burns, Bewdley; Frank Des Armeau, Mattawa; "Bateese," "Dave," French halfbreeds, Mattawa; J. A. Fife, Peterborough. Before proceeding further we stored all unnecessary clothing, such as collars, ties, fine shoes, etc., and equipped ourselves with oil tanned shoe packs, blue duck overalls and very dark blue kerchiefs. It might be well to add by way of explanation that we were instructed to reduce our impedimenta to the least possible, and as soap, starch and smoothing irons are articles of considerable density we thought it advisable to dispense with them as far as possible. To supply the place of the several articles of clothing with which we had dispensed each man provided himself with several ounces of mosquito oil, of which interesting compound I shall state the ingredients as provided me by a Peterborough citizen. Three ounces of castor oil; three ounces of pine tar. Heat until the mixture commences to boil and add one ounce of pennyroyal or, I suppose, any other equally vile-smelling stuff. Apply as may be required, and if not satisfactory lubricate the exposed parts freely with Canada Balsam. It sticks splendidly and the only difficulty we found in using it was that it rather spoiled the complexion for a time, but that does not count in the north country. Thus armed against what we considered would be our worst enemy we left Mattawa on the morning of July 14th and, after a very pleasant run up the Quebec side of the Ottawa for about forty miles we reached Temiscamingue, situated at the southern end of the lake of the same name. The scenery along both shores of the Ottawa on this part of the route was beautiful, particularly the Ontario side, which is thickly clad with small pine and poplar. The railway skirts the Quebec shore all the way and in some parts overhangs the water. The river here is not navigable on account of the numerous rapids, chief of which is the Long Sault, which extends for a distance of six miles.

A DELIGHTFUL TRIP TO A WONDERFUL LAND.

An Ohio Clergyman Enthusiastic Story of Northwest Canada.

He Regards Canada as the Modern Land of Promise.

Rev Dr. Atkinson, of Norwalk, Ohio, writes to the Norwalk Weekly Reflector as follows:—

I have just returned from the land of enchantment, from a trip more wonderful than the old world's best, a trip along the entire length of the world's greatest railroad, the Canadian Pacific, whose marvellous roadbed seems to skirt the most majestic scenery ever viewed by man. From coast to coast is a long journey, but comfort, even to the point of luxury, is in evidence all along the line. When nightfall shuts out the ever-changing landscape, the snow-white berth-wooes, slumber, and the ever-courteous porter leaves no wish ungratified, and the morning matin comes not so much from the tree-tops as from the immaculately dressed steward, who calls out, in cheery accents, "First call for breakfast in the dining car." What a memory those meals have left behind them. One would think the Canadian Pacific owned the garden of the universe and had robbed it of its best for transcontinental travelers. Nothing of the boarding house, but a meal fit for any epicure, and where dining cars disappeared, the Chalet or Canadian Pacific railroad hotel welcomed beneath its roof long enough to enjoy, with leisure, every comfort of home, sweet home.

There is no other place in all the world so full of scenic grandeur; there is no other railroad more interested in the welfare and safety of its passengers than the Canadian Pacific, whose bands of steel gird the Atlantic and the Pacific into a sight-seer's paradise. If one is weary-brained, the ozone, the scenery, and the company on board the Imperial Limited will form a trinity of rest. England's noble sons and daughters, scions of the historic past, cultured, traveled, entertaining, full of the wine of good cheer, make a traveler forget that there are any uneventful miles as the palace on wheels takes him through historic Quebec, Ontario, the old and stately; through new Ontario, teeming with possibilities, when the axe shall have had the right of way. What vistas of woodland, of lake and river. Hunters and fishermen, unable to exaggerate "Nimrod was a mighty hunter," it is recorded. Poor fellow, if he could only have seen the happy hunting and fishing grounds within a stone's throw of this railroad, imagination fails in even forecasting what he might have been. Sportsman, go north and west, to get not bear stories, but your bear. The fish market has no visit from the poorest angler on his return to camp, the only explanation he needs is the string of fish he carries. Out there the lucky man is he who can even carry into camp his catch.

Leaving new Ontario, the prairies, like a sea of emerald, stretch a thousand miles beyond the horizon, where browse the roast beef of old England, and where the breadloaf of the empire nods a welcome to the traveler. Manitoba, the home of plenty, with Winnipeg, the young giantess of the new west, the home of business, culture and refinement, we find in her the gateway to a vast and undreamed-of rich domain. Fourteen hundred miles away from Montreal a like distance from Vancouver, a city of great achievements, yet in its infancy. Beyond Manitoba, Assiniboia, just awakening, her open arms have clasped a multitude of American farmers who have gone there to plant crops and secure a fertile homestead. They have taken with them the old flag, and its flutter seems to hint an engagement, if not marriage is at hand.

Canada seems to enjoy the favour of the Almighty. A climate unrivaled, a soil as rich as any on the globe. Land for the asking, or at less price than a year's rental elsewhere, it is no wonder the influx is unparelleled. To the homeless, "Get a farm in Canada" is an injunction full of good advice. To hint at the resources of Alberta, the Saskatchewan, or even Afar-away Athabasca, would take a volume. Go and see it for yourself. At Calgary the mountains loom up like great sky sentinels at the gateway of the Gods. As the train speeds on, the marvels grow, the everlasting hills stand up before us in silent majesty. Talk about Switzerland, or any other European mountains! They would not make even decent foothills along and among the five hundred miles of uninterrupted grandeur, snow capped and full of word-defying wonders, which fill with silence the observation car. What mighty cataracts and foaming rivers! No wonder our train has so many nationalities among the travelers, for nowhere else may so many gigantic, weird and fascinating scenes be found.

At Banff, the Beautiful, the village without a rival in scenic splendor unless some other planet is more glorious than our own, thirty-two mountain peaks protect it as it nestles at their base. The Hot Springs, the Cave, the famous C.P.R. Hotel, the cataract, and last but not least, the world's most famous travelers, who forsake all other places to pay homage to this most picturesque place on earth.

Then there is Laggan, and Lake Louise—among the clouds—too glorious to describe; Glacier and Field, both worth the journey of a lifetime. These scenes along the Canadian Pacific are not in duplicate elsewhere. Of course Vancouver and Victoria will be visited and all that is best and fairest in England, save ruins, are to be found here. The Pacific ocean, in whose waters a splash is worth a king's ransom, will be tonic for all who trust their welfare to its deep. Returning, the Kootenay invites you; and from Revelstoke south through the mountain lakes the C. P. R. steamers take you swiftly, with all the comforts of the greyhounds of the sea.

How elaborate the furnishings, and how dainty the cuisine! The officers are painstakingly obliging, and nothing occurs to mar the journey save the rude awakening that it soon must end. What scenery! No poet ever lived who could describe it. Nothing but a railroad and steamship ticket over the Canadian Pacific ever began to tell the sights one may behold. To tell it all would be the business of a lifetime. Go and see it, fellow tourist, for yourself; make your next outing plans to spend a summer in Western Canada.

It has been mine to see much of Europe, to have visited the far east where the Himalayas lift their snow-capped heads high above the Simla plains. The remembrance of the desert sands of Egypt and the ruins of her fallen palaces are before me, yet in all of thirteen countries visited I found nothing to compare in grandeur, nothing in interest to equal the Canadian northwest. In the journey just completed we found Italian skies and Norway sunsets; the air of Colorado improved; the twilight of England stretched nearly to the mid-night hour; Switzerland a hundred folded; the Rhine outdone by the mountain-guarded Columbia; the cataract at Ladore multiplied by ten. Lake Louise has taken the coronet from the brow of Lake Geneva, and the Kicking Horse is more noble than the Lion of Lucerne. What an outing! No wonder the Canadian Pacific Railway is so crowded with tourists going to see this eighth wonder of the world, and if it were mine to advise any and all of my friends as to their next vacation it would be—and be emphatically—Western Canada.

W. D. ATKINSON.

Brick Dust Deposit in the Urine Indicates Kidney Disease,

Kidney-Wort Tablets

Used at Once Will Heal, Tone and Nourish the Kidneys,

A warning that cannot be mistaken, is brick dust deposit in the urine. If you notice it, act at once; use Dr. Pettingill's Kidney-Wort Tablets and avoid the constant torture of a gravel victim. Kidney-Wort Tablets quickly stop the formation of gravel and stone. They work effectually and rapidly; they cure when all alcohol liquid medicines fail. Kidney-Wort Tablets have worked marvellous cures for men and women in the past; they will assuredly meet your case. Guaranteed by all Druggists. Price 50 cents a bottle or six bottles for $2.50.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other powders, as it is both soap and disinfectant. 34

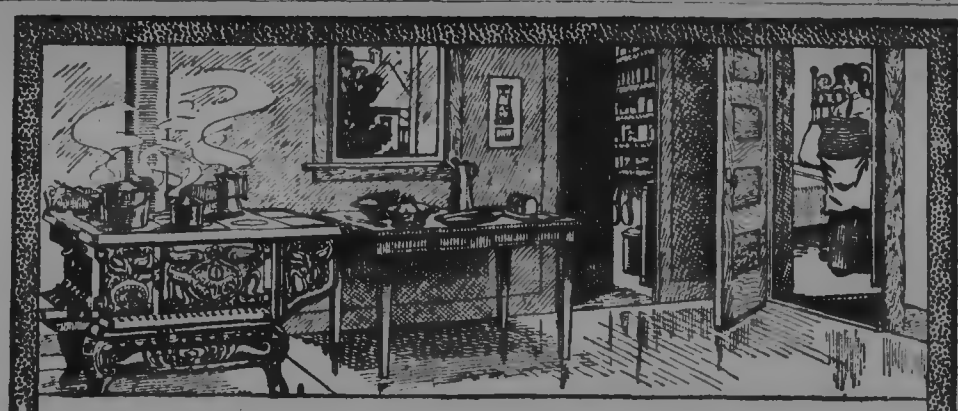
If you are "afraid of laxatives," here is one that really will not draw you into the laxative habit. Little medicine tablets that cure Indigestion and Constipation—gently, naturally, permanently.

IRON-OX

TINY TONIC TABLETS

—little pellets that cure you and keep you cured. A tonic that will build up the stomach and bowels, purify the blood, invigorate brain and nerves. Why not try?

Fifty Iron-ox Tablets, in an attractive aluminum pocket case, 25 cents at druggists, or sent, postpaid, on receipt of price. The Iron-ox Remedy Co., Limited, Walkerville, Ont.



Pandora Range

Does its Work while You do Yours

You do not have to constantly watch the Pandora range when cooking or baking. Arrange the fire, put on your pots and set the damper—the range does the rest.

While dinner is cooking you can do your other work, just the same as the woman in the picture, and know positively that your cooking is being done right.

The Pandora range is entirely new and has many new features and devices for regulating the fire, extracting all the heat possible from the fuel consumed and using it to the best advantage.

Special flue construction forces all the heat around the oven twice and directly under every pot-hole—only the smoke goes up the chimney.

Oven is roomy, ventilated, fitted with thermometer, lined with sheet steel, and is a perfect baker and a perfect cooker at the same time.

Sold by all enterprising dealers. Booklet free.

McClary's

London, Toronto, Montreal, Winnipeg, Vancouver, St. John, N.B.

Cornfield Philosophy.

A book of sketches and essays that are full of quaint, homely philosophy of the lumbermen, the farm and the city, that will make you feel better and be better; "not intended to reform anybody or to turn the world upside down," the author says.

Finely illustrated, handsomely printed and bound—at half the price of most books. $1.00 postpaid on receipt of money.

"As good as David Harum," a noted critic says.

ACTION OF CABINET.

Appears to Be a Power-Holding Compromise by Balfour Ministry.

AN INQUIRY BY COMMISSION

No Startling Developments, But Whole Fiscal Question Will Be Investigated —Conflicting Accounts of What Really Did Take Place—According to Telegraph Cabinet Crisis May Come To-night.

(Canadian Associated Press Cable.)

London, Sept. 15.—Your correspondent learns from a reliable source that the result of yesterday's Cabinet meeting was that a decision was arrived at on the fiscal question. There were no startling developments, but the impression now prevails that a royal commission will be appointed to inquire into the whole fiscal question. The meeting lasted three hours.

Hon. Mr. Chamberlain on arriving yesterday at Downing street found enemies and friends among the crowd of spectators. He was greeted with groans and cheers. To-day's Cabinet meeting is not an adjourned one from yesterday, but one summoned to discuss the South African war report.

Most Conflicting Accounts.

London, Sept. 15.—The Ministers kept secret the discussions of yesterday's Cabinet council so effectively that the speculation as to the results is almost nugatory, and the Government press organs this morning offer the most conflicting accounts of what took place.

The Daily Telegraph, which is probably the best informed, asserts that the Cabinet crisis was postponed until to-night, and that discussion of the fiscal question will be continued at the resumed meeting to-day, but that whatever may be the upshot, Premier Balfour will neither resign, dissolve Parliament, nor summon an autumn session. The Daily Telegraph also scouts the idea of a royal commission being appointed to consider the whole fiscal question.

The Standard asserts equally positively that the fiscal inquiry was finished, and that the adjourned meeting will deal with the foreign policy. It understands that the question of imposing preferential tariff or any innovation in Great Britain's fiscal policy has been shelved until an appeal can be made to the country, and that during the existence of the present Parliament the action of the Ministers will be confined to discussion and inquiry.

Amid these conflicting reports an agreement is found in the most authoritative quarters on one point, namely, that Premier Balfour has again succeeded in inducing his colleagues to agree to some sort of compromise which will keep the present Ministry in office, though it will probably be slightly re-organized, and that this compromise is most likely a confirmation of the policy of "inquiry."

The Times Is Silent.

London, Sept. 15.—The Graphic says the reason for the rumor that a Royal Commission will be appointed to enquiry into the fiscal question is that such was recommended by a unanimous vote of the Chambers of Commerce Congress at Montreal. Such a recommendation, influentially supported, could scarcely be ignored by the Cabinet.

The Times makes no reference, editorially, to yesterday's Cabinet meeting.

Be Quick.

Not a minute should be lost after a child shows symptoms of cholera infantum. The first unusual looseness of the bowels should be sufficient warning. If immediate and proper treatment is given, serious consequences will be averted. Chamberlain's Colic, Cholera and Diarrhoea Remedy is the sole reliance of thousands of mothers and by its aid they have often saved their children's lives. Every household should have a bottle at hand. Get it to-day. It may save a life. For sale by all druggists.

Report Not Confirmed.

London, Sept. 15.—Nothing has been received here confirmatory of the rumor current Sunday, that a transport carrying a regiment of British troops to India foundered during the gale which swept over the British coast last Thursday. The Admiralty and other departments of the Government likely to receive such news have heard nothing regarding any mishap to a transport.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

THE NOR'-WEST SNOW STORM.

Eight Inches Fell Sunday in Some Manitoba Localities.

Winnipeg, Sept. 15.—The storm which swept over Western and Northwestern Manitoba on Saturday and Sunday was the most severe that has been recorded in several years at this season Snow to the depth of 8 inches fell in some localities, but it is impossible to gain accurate information owing to many of the wires being down. In this city nearly 2 inches of rain fell.

Most of the grain has been harvested, and the damage, it is thought, will not be great. The grain in stock will be damaged by discoloration unless the weather turns warm, when there is danger of its sprouting.

In many parts of the province there was eight degrees of frost. Standing grain will be frosted, but the chief damage will be from damp, muggy weather. The storm was not so severe in the Territories, though it is impossible to secure information from the far west owing to the wires being down.

Two Feet of Snow.

Minot, N. D., Sept. 15.—Two feet of snow covers the ground here and railroad traffic is delayed. Similar conditions prevail in other parts of the State. The storm is the worst in three years.

Damage of Millions.

St. Paul, Minn., Sept. 15.—Snow and rain has damaged crops in the Northwest during the past week to the extent of millions o, dollars. Nearly all the grain in stock, estimated at 50 per cent., and all the standing grain, much of it flax, is buried under snow and water. The rainfall has been 8 inches in 48 hours.

Was Hovering Between Life and Death

A few days trial of Lactated Food will convince any intelligent mother that it is the right form of nourishment for her weak and puny baby. No other food can give such prompt and happy results at a time when the little one is hovering between life and death. A Montreal lady last August wrote as follows — "My baby was so weak and sickly a few weeks ago that we despaired of her life. We tried nourishment of every kind, but could not get anything to remain on its stomach. We heard of Lactated Food, and commenced its use. There was an improvement the very first week, and to-day our baby is well and strong. Lactated Food saved her life." Sold at all Drug stores.

WORST TO COME YET

Evidence in the Boer War Scandal Was Suppressed.

ST. LAWRENCE NAVIGATION.

Keynote of Commercial Relations Between Canada and the United Kingdom —British Honduras in Line With Canada For Empire Day—Canadian Military Men With London Friends.

(Canadian Associated Press Cable.)

London, Sept. 15.—It is stated that considerable portions of the evidence and some documents have been omitted from the report of the South African War Commission issued to the public. Some copies of the evidence as given, and not as edited, were printed for the use of members of the Cabinet, and it is alleged they tell a more damaging story than that contained in the blue books.

Canadian Colonels With Gen. French.

London, Sept. 15.—A letter received from Colonel Evans of the Canadian Mounted Rifles, who, with Colonel Drury, of Kingston, is attached to Sir John French's staff for the military manoeuvres, says he and his brother officers have had a very cordial reception. This week they will be occupied in the active work connected with the movements of General French's staff.

St. Lawrence Navigation.

London, Sept. 15.—F. Bradshaw, reading a paper at the British Association meeting at Southport on "The Commercial Relations Between Canada and the United States," after an historical sketch, said that the St. Lawrence navigation was the crux of the whole question. The canals could be improved till the cost of transporting a bushel of wheat from Port Arthur to Liverpool was only 12 cents. If a preference to Canadian wheat was given, improvement would take place before the American demand arose. If the American demand came first the improvement would never take place.

Lord Alverstone the Pivot.

London, Sept. 15.—The Manchester Guardian says: Considering the strong feelings in Canada and the Western States, it would be rather surprising, in the face of such sentiment, if either of the two Canadian Commissioners or any of the three from the States voted against the claims of the respective countries. Lord Alverstone is to a greater degree independent of popular feeling, and if he should be converted to the American view of the case his vote will determine the controversy.

Mr. Courtney in London.

London, Sept. 15.—J. M. Courtney, Canadian Deputy Minister of Finance, arrived in London Sunday, after a fast passage on the Allan Liner Tunisian, on business connected with the lapsing Dominion loans.

Follows Canada's Lead.

London, Sept. 15.—British Honduras has followed Canada's example in making May 24 Empire Day.

Rich, red blood is produced by Miller's Compound Iron Pills. Sold by all druggists.

THE STREET RAILWAY PRACTICALLY ASSURED.

By-law Authorizing Execution of Agreement was Passed.

COMPREHENSIVE HISTORY OF NEGOTIATIONS.

Street Lighting Contract for 10 Years to be a Condition of Acceptance of Agreement—Whole Matter Thoroughly Discussed at Council Meeting Last Night.

The Street Railway, which has been the subject of so much consideration on the part of every citizen of Peterborough, is now practically an assured fact. The agreement, published in full in the Examiner during the last few days, has been ratified by the council, and now requires only the signatures of the parties concerned, to bring it into effect.

At the special meeting of the Town Council held last night the bylaw authorizing the execution of an agreement between the town of Peterborough and the Peterborough Radial Railway Company, by which the latter is to build, equip and operate a street railway in the town of Peterborough, the said railway to be in operation not later than July 1904, was given its second and third readings, and passed, on the following division:

Yeas — Aldermen Batten, Corkery, Finnie, Morrison, O'Connell, Rush and Shortly, and Mayor Roger.

Nays — Aldermen Best and Clinkscale.

As it was generally known that the street railway matter would come up for discussion at this meeting of the council, a number of citizens were present, and the citizens' gallery was filled.

Alderman Morrison, as chairman of the Franchise Committee, moved the second reading of the bylaw, and in a speech of more than an hour's length, explained fully the steps leading up to the proposed granting of the franchise, and defended the position of the council, as being wholly in the interests of the town. In speaking of the circumstances under which the council was first approached with reference to the street railway, he said the company had made it perfectly plain from the beginning that the street lighting contract must be given to the Peterborough Light and Power Company as a condition of the Railway Company undertaking to operate the railway. The Power Company had offered to light the streets at a net cost of $46.66 per light of 2000 candle power per year, which he maintained was a reasonable figure, and quoted the prices charged in other towns in support of this claim.

Those who were opposed to the granting of the franchise were represented by Mr. R. R. Hall, who also at some length pointed out some of the disadvantages, and spoke particularly to the street lighting contract, which it was proposed to give to an associated company at a higher price per light than the Otonabee Power Company offered to do the lighting for. He also contended that the rights of the town had not been properly safeguarded in the proposed franchise, especially in giving an exclusive franchise of the streets of the town.

The bylaw however passed its final reading on the above division, and the matter of a street railway is practically settled.

* * * * * * * * *

A special meeting of the Town Council was held last night in the Council Chamber with the following members present: Messrs. G. M. Roger, Mayor; and Aldermen Morrison, Shortly, Rush, Finnie, Batten, Clinkscale, Best, Corkery and O'Connell.

The minutes of the last meeting were on motion taken as read, and adopted.

COMMUNICATIONS.

Communications were read and dealt with as follows:

From H. C. Rogers, postmaster, stating that the crossing at the entrance to the post office yard was in a bad condition and asking that it be remedied.—Board of Works.

From John Williams and others, asking for the construction of a sewer on Reid street from Charlotte to King street.—Board of Works.

From A. M. Austin, asking permission to cut down a large tree in front of his residence, 180 Weller street, as it kept his lawn and those of his neighbours, in a constant litter.—Board of Works with power to act.

From owners of property, asking that a pipe sewer be laid on Sherbrooke street, from the manhole on Aylmer street, 60 feet east. — Board of Works.

From Adam Dawson, John Kincaid, John Moloney, Wm. Miller, Jas. Heal and F. S. Schneider, asking that their names be withdrawn from the protest presented to the council at the last meeting referring to the proposed street railway franchise.—Received.

From Thos. Mahoney, asking for reduction of taxes.—Court of Revision.

From Mrs. O'Connor, calling the attention of the council to the need of a sewer on Hunter street between Aylmer and Stewart streets, and asking the council to take steps to have one constructed as above. — Board of Works.

From A. Brown, asking permission of the council to run a siding into his property on Bethune street, between Sherbrooke and Dalhousie streets.—Board of Works.

ACCOUNTS.

The following accounts were presented and were referred to the Finance Committee:

Dickson Company	20 00
Adam Hall	15 15
The Salisbury Company	16 80

REPORTS OF COMMITTEES.

Ald. Best presented the following report of the Board of Works, recommending:

1. That Wm. Jobe be permitted to place a lamp in front of his store at No. 445 George street, to be placed under the supervision of the town engineer and be removed when a request to do so is made by the council.

2. That the engineer's report on the proportions of the materials to be used in granolithic sidewalks be adopted except that the wearing surface be one inch thick and of one part of cement to three parts of other material, to be paid for by twenty year debentures subject to the approval of the engineer and solicitor.

3. That it be a condition of all future contracts that the contractor shall employ on the work continuously a minimum number of workmen to be specified in the contract or otherwise pay the cost of inspection.

4. That having examined petitions for Granolithic sidewalks on the following streets and found them sufficiently signed we recommend that they be granted, namely: Aylmer street, west side between Murray and McDonnel streets; Reid street, west side, between King and Charlotte streets; Dawson street, west side, from Brock to Hunter streets; Reid street, west side, from King to Sherbrooke streets.

5. That the engineer be instructed to report as to whether there is a cheap way in which Parnell street can be improved.

6. That the street commissioner be authorized to purchase some stone from D. Mahony if he can do so at a satisfactory price, the stone to be paid for on his certificate.

7. That the council proceed with the construction of sewers on Hunter street from Aylmer street to Stewart street; on Rubidge street from Charlotte street to Rink street; on King street from Park street to Rubidge street and on Bethune street from Smith street to London street as recommended by the Board of Health and that the town engineer be instructed to make estimates, measurements and assessments therefor as recommended by the town solicitor.

8. That the construction of the granolithic sidewalks on the east side of Rubidge street from Brock street to Murray street and on the north side of Brock street from Rubidge street to Stewart street, of which notice was given by the council, be proceeded with, and that they be built outside the tree line if the engineer approves of this.

9. That a sidewalk be built of old plank on Cedar street from the foot of the hill to Cambridge street, about 200 feet.

10. That no action be taken on the petition for a granolithic sidewalk on the west side of George street north from Smith street until the property owners agree as to the line on which it should be built.

11. That the engineer be authorized to repair the sidewalk in front of number 420 Water street.

12. That the offer of Richard Revington to deliver on Park street good gravel at 60 cents a yard be accepted and that the gravel be paid for on the certificate of the town engineer.

13. That the contract for the construction of the drain on Hunter street from George street to the creek be awarded to Richard Sheehy at his tender. Tenders for this work were as follows:

J. E. Hayes, 15 inch pipe at $1.24 per foot; 9 inch pipe at 90 cents per foot.
Henry & Gibson, 15 inch pipe at $1.35 per foot, nine inch pipe at 70 cents per foot.
Leteillier & Mahony for the 15 and 9 inch pipe, $1.27 per foot.
R. Sheehy, 15 inch pipe, $1.19 per foot; 9 inch pipe, 89 cents per foot.

There will be in the drain 612 feet of the 15 inch pipe and 70 feet of the 9 inch pipe.

14. That the tender of Henry & Gibson be accepted for the construction of granolithic sidewalks on the following parts of streets- Stewart street, west side from King to Dalhousie; Reid west side from Charlotte to King streets; Rubidge street, east side, from Brock to Murray streets; Brock street, north side, from Rubidge to Stewart streets; Aylmer street, west side, from Murray to McDonnel streets; Harvey street, west side from Dublin to McDonnel streets; and at the market square. The tenders were as follows per square foot-

Street	Henry & Gibson	Rich. Sheehy	J. E. Hayes
Stewart	11c	14 3-8c	14c
Reid	11	14 3-8	13
Rubidge	11	14 3-8	13 1-2
Brock	11	14 3-8	13 3-4
Aylmer	11	14 3-8	13
Harvey	11	14 3-8	13 1-2
Market sq.	14	15 3-8	15

15. That W. H. White be appointed inspector of the construction of sidewalks at $3.00 per day to be paid on the certificate of the town engineer.

16. That the request of the Peterborough Light & Power Co. for permission to place four poles on the south side of Weller street be granted subject to the approval of the town engineer.

17. That the sewer from Townsend street south be treated, as regards connections, in the same way as the other parts of the sewer system under the by-laws respecting the making of connections.

18. That the town treasurer be authorized to issue a cheque to A. I. Choate for one-third of the cost of the construction of a drain on Stewart street, namely $22.80, the total cost having been $68.42.

19. That the application of the Otonabee Power Co. for permission to place poles on the following streets be granted, namely- Aylmer street, east side, Perry to Wolfe streets, 11 poles; Aylmer street, east side, Murray to Brock streets, 4 poles; Parnell street, north side 7 poles; Donegal street west side, Hunter to Brock streets, 3 poles; Brock street, north side, Donegal to Park streets, 2 poles; Lake street, south side, from the Cordage Co's works to George street, 8 poles; provided an amended plan is filed to correspond with the application, the poles to be placed subject to the approval of the town engineer.

20. That the payment of $45.00 to E. Archambault on the certificate of the town engineer for work done on the corner of Rubidge and Murray streets be confirmed.

21. That in the meantime the proposed sidewalk on the west side of Reid street from King to Sherbrooke streets be left out of the contract.

22. That Water street be graded at G. H. Duncan's house.

23. That Leteillier & Mahony be given an extension of time of fifteen days to complete the sewer on Dalhousie street.

24. That, having examined the petitions for granolithic sidewalks as local improvements on the north and south sides of Dublin street from Water street to Harvey street and found them sufficiently signed, that they be granted.

25. That having examined the petition for a granolithic sidewalk as a local improvement on the west side of Harvey street from Dublin street to McDonnell street and found it sufficiently signed we recommend that it be granted.

26. That $50.00 be accepted from the village of Stouffville for the use of the road roller.

27. That the petition from A.E. Dixon and others asking that part of the township of Smith be included in the town be referred to a committee of the whole council.

28. That having examined the petition for a sewer on Weller street from Walton street to Mercer Avenue as a local improvement and found it sufficiently signed we recommend that it be granted.

The report was on motion adopted.

A motion to the effect that the sewer on Weller and Edinburgh

present light and power lines, one of which is that the current carried by the light and power lines in Peterborough is very high and dangerous to workmen; this would render the municipality liable in case of accidents. Then trouble is usually experienced where two companies are using the same poles. Mr. Philip then went on to say that the town could put up a similar new pole line for 100 arc lights to what they have at present for about $10,000; this does not include lamps and hangers. Modern lamps would cost erected $33 each or $3300 per 100 lamps, making a total cost for line complete of $13,300. The cost of erecting new power house and making alterations to dam at each side would be $20,000. And for pole line from dam to distributing point about $1,600, making a total cost of $34,900 for a new municipal plant. The cost of operating and carrying out such a plant would be as follows:

Interest on investment at 5 per cent.	$1745 00
Average depreciation at 8 per cent.	2793 00
Labour, 3 employees	2500 00
Carbons and supplies	500 00
	$7537 00

If the city erected a pole line and bought current at $10 per horse power as offered by the Otonabee Power Company, the cost would be as follows:

100 h.p. at $10	$ 1000 00
Interest on pole line, $10,000 at 5 per cent.	500 00
Depreciation on pole line at 7 1-2 per cent.	750 00
Cost of labour, 2 employees	1300 00
Carbons, globes, etc.	300 00
Interest on lamps at $33 each 5 per cent.	165 00
Depreciation on lamps at 10 per cent.	330 00
Total cost	$4345 00

Or $43.45 per lamp per annum.

The total cost of operating a new plant on the present pole line would be approximately $7,320, calculated on the same basis as in the other cases, making a cost of $70.20 per lamp, less the rental of pole line to the present company for power, which I would estimate in the neighbourhood of $2,000 per year, making the actual cost per lamp of about $52.20 per annum. The offer of $32 per lamp per annum is very cheap. In fact they cannot supply the class of apparatus I have figured on and pay for their water power, and operate, without a loss.

MUNICIPAL PLANT IMPRACTICABLE.

Alderman Morrison stated that from information gained in the report it was found that a municipal plant would not pay, and from the report they gathered that the cheapest bargain which the town could get would be to accept the offer of the Otonabee Power Company, in view of the fact that in the establishment of a municipal plant, considerable expense would be incurred, as it was found that to conform to the rules of the Underwriters' Association, a lighting plant could not be installed in the pumping station, as had at first been contemplated. As a further means of becoming thoroughly informed as to the relative values of the offers made by the two companies, they sent letters to a number of towns asking for information referring to the cost of street lighting in each, and replies from some of the towns give the following figures:

Hamilton uses Manhattan series alternating arc lamps of 2000 c. p., which they consider far superior to the open arc; the cost per annum per lamp is up to 400 lamps, $85, (Belleville uses 30 arc lights of 2000 c.p., costing per year $58 each.

Kingston, with 115 lights, pays $72.60 per light.

Galt has 51 lights which burn until midnight and during five months in the year some hours in the morning; they cost $70 each.

Ottawa with 472 lights, of 2000 c.p. pays $65.

Guelph, with 70 lights, pays $65 also.

Brantford with 120 lights of 1500 c.p. pays $60; and St. Catharines, with 78 lights of 2000 c.p., pays $72.50 each per year.

Hull, which is heralded as being a town enjoying cheap light; owns their own street plant, and pays $25 per light for the current alone, and has to bear the expense of trimming and repairing.

Lindsay, which was reported as having cheap light, paid $50.00 per year for lamps of 1500 c.p., as compared with the proposed contract with the Peterborough Light and Power Company, the net price of which would be $46.66. He cited the case of Orillia which it was stated, got it light free and, quoting from a letter received from the town clerk of that town, he showed that the cost per year for lamps of 1500 c.p., for a midnight service, was $35.00, equal to $46.66 for lamps of 2000 c.p., and that only a midnight service.

RELATIVE MERITS OF LAMPS.

There was a difficulty in the way of accepting the tender of the Otonabee Power Company, in the fact that the Company would practically have to repole the town, which would mean a duplication of the already numerous poles on the streets. The Council had wanted to take over all the poles in town and rent them to the different companies who wished to carry current through the town, but the Legislature had defeated them in this. The Council felt that it would only be right that the Otonabee Power Company should be given the right to erect all poles necessary to supply power and light for domestic and commercial uses. Speaking of the lamps, Ald. Morrison said that those which the Otonabee Power Company had offered to install were nominally of 2000 c.p., 7 1-2 amperes, and of the closed alternating style, while those at present on the streets were the open direct current. Speaking of the relative lighting qualities of the lamps, he said that the Mayor, with himself, had visited Toronto Junction, where the closed lamps were in use, and found that while the light was better diffused, a greater number of lamps was necessary to produce the same volume of light. He asserted that in this opinion Ald. Best concurred, on information which the latter gained with respect to Sault Ste. Marie, which town also used the closed lamp. They had also received the advice of experts on the question, who told them that the closed alternating current lamp was not as good as either the open or enclosed direct current lamp, as at least 1-3 more lamps would be required.

Then the committee had considered the Street Railway question. He believed he was right in his assertion that the citizens generally were in favour of a street railway. Ald. Morrison then entered into a lengthy defence of his claim that the Street Railway would be for the general good of the town, enumerating the many advantages which it would give the town, and said that he was free to assert that if the Council did not grapple with the street railway problem, the ratepayers would consider them guilty of culpable negligence of their duties as the people's representatives. The probabilities were that if the Railway were operated, it would radiate to different points outside of the town, which would have the effect of centralizing business here. He believed that the Council had public opinion behind it in its effort to secure the Railway, and he felt safe in saying that if the price per street light were $60.00 per year as a condition of obtaining the Railway, the Council would be justified in entering into the agreement. Ald. Morrison then read letters from the Board of Trade and Federal Labour Union, No. 9,240, Outside Workers, endorsing the proposal of the Council and urging it to grant the franchise. The Council, he said, spurred on by public sentiment, had endeavoured to negotiate with the Street Railway Company without reference to the street lighting. They had also asked the Otonabee Power Company if it were in a position to offer them anything in the way of a Street Railway agreement, but were told in a letter from the Company which he read, that it was not in a position to enter into the question of a Street Railway. He also read a letter from Mr. Stuart, of the Cereal Company, which stated that the Company were not going into the Street Railway business from choice, but explained that as the power would be available they wanted to utilize it. There was, it is true, an alternative proposition to that of awarding the street lighting contract, namely,—that the Council guarantee the Bonds of the Railway at 6 per cent. This would mean on an investment of $100,000, which amount it was thought would be necessary, a yearly guarantee of $6,000, which, particularly during the early part of the life of the franchise, would be a serious undertaking for the Council, and one which they felt reluctant to accept. At this time the best offer of the Company for street lighting was $60.00 per lamp per year. The committee met and decided to make the Company an offer of $50.00 less the amount of pole rent, which would make net cost $46.66, which offer the latter accepted. The Council then gave the committee the authority to negotiate the terms of the franchise. In doing this they had previously granted franchises to guide them. They drafted one which appeared to them as being most favourable and submitted it to an expert in Toronto, who was asked to carefully consider it and make any alterations necessary to safeguard the interests of the town. The result of this was a franchise which was an ideal one from the point of view of the town. This agreement provided that the Street Railway Company should clean all the snow from the streets. To this clause the Company raised strenuous objections, and it looked for a time as if the whole matter would be dropped. The committee referred the question to the Committee of the Whole Council, when representatives of the Company met the Council and a compromise was effected, and clause 24 was drafted as follows:—

24. That whenever it shall be necessary to remove any snow or ice from the track of the railway, the same shall not be left in heaps but spread evenly over the street as shall be directed by the officer of the Corporation for the time being charged with the supervision of the streets and the Corporation shall when the said officer deems necessary remove the snow lying between the outer rails of the roadbed and the kerb on all streets in the said Town upon which the cars of the Company are operated, to such depths and when and in the manner directed by the said he borne by the Corporation and the Company, as follows:—During the first five years of the term of the franchise hereby granted to be borne by the Corporation; during the next five years of said term one-quarter of the expense to be borne by the Company and three-

THE STREET RAILWAY IS PRACTICALLY ASSURED

(Continued from fourth page.)

streets, as petitioned for, be constructed under the direction of the Board of Works, was carried.

BYLAWS.

Bylaws authorizing the construction of granolithic pavements on streets as recommended in the report of the Board of Works, the construction of sewers on streets also recommended in the same report, to authorize the execution of an agreement with R. Sheehy to construct a drain on Hunter street to carry off storm and surface water, and one to authorize the construction of a granolithic pavement on the west side of Downie street, were presented, and after having been given the necessary number of readings, were passed.

THE STREET RAILWAY.

Alderman Morrison then moved the second reading of a bylaw to authorize the execution of an agreement between the corporation of the town of Peterborough and the Peterborough Radial Railway Company, whereby the latter is to construct and operate a street railway on the streets of the town, the first reading of which was taken at the last meeting of the council. In moving its second reading, Alderman Morrison said he thought it but just on the part of the council to take the public into their confidence, and with this end in view he wished to give a statement as to the circumstances surrounding the application for the franchise, and the motives influencing the Franchise Committee in recommending the granting of it. At the beginning of the year the committee started out with the idea of endeavouring to establish a municipal lighting plant, under the impression that a plant of that kind would be the most economical for the town. As the first step in this direction they sought the opinion of the town solicitor on the matter, and reading an extract of an exhaustive report on the legal aspect of the proposition, Alderman Morrison pointed out that our statute provides that the municipality if desiring to go into municipal lighting, where an electric light plant is already in existence, must buy out the street plant of the company then in the business of street lighting. Then, too, they had thought of going into the commercial lighting business, but in this they were disappointed, as the Legislature had refused to pass the necessary special act to enable them to embark in that field. As a means of obtaining an idea as to the probable cost to the town of the plant they sought to procure the services of an expert who could give them a correct valuation of the plant were sought, and in this they found difficulty in securing a competent man. After consulting with various towns, many of whom related their troubles along this line, they were able, upon the recommendation of the Mayor of Berlin, to secure Mr. E. J. Philip of Toronto, after having seen him, and receiving the impression that he was a practical man. He came to the town, and investigated the circumstances, and presented his report. In the meantime, the American Cereal Company and the Otonabee Power Company had each sent in offers to accept contracts for the street lighting of the town. These letters were as follows:

THE TWO PROPOSITIONS.

Gentlemen,—I am instructed by the Peterborough Light and Power Co. and the Peterborough Radial Railway Co. to make application for a thirty year franchise and right to build and operate a street railway in the town of Peterborough upon terms and conditions to be settled in detail.

The amalgamated companies will build and operate at least five miles of railway in the town. It is proposed to run over the old line, to extend it to the river Otonabee, to build on Park street and to extend a spur line to Jackson Park.

As a part of the proposition my client's request a renewal of the street lighting contract which they now hold, for a period of ten years, from the first day of January next. They are prepared to operate the railway just as soon as the details can be arranged and equipment procured.

I have the honour to be, sirs,
Your obedient servant,
R. M. DENNISTOUN

Peterborough, April 1st, 1903.

G. M. Roger, Esq.:

Dear sir,—In reply to your request to us to state more clearly our offer to supply light for street lighting purposes, we beg to say that our company offer to supply street lighting to the town at $35 per lamp for one hundred lamps or over as stated in our former offer to which has to be added any pole rental imposed on our poles by the town. Under this offer we do not ask for any exemption from taxation on our property. The lamps we propose to instal have a full capacity of 2,000 candle power and are what are known as the seven and one-half ampere enclosed arc lamp of the capacity of 480 watts and are the latest and most modern lamp on the market. The specifications of the lamp we propose to instal ae enclosed herewith.

Yours respectfully,
OTONABEE POWER CO, LTD.
W. H. MELDRUM,
Managing Director.

April 8th, 1903.

AN EXPERT'S OPINION.

Alderman Morrison then read the report of Mr. Philip, the electrical expert, in substance as follows: It would be, he said, unwise to put up a power plant in the present pumping station, as the space is limited. If the town contemplated a new plant it would be better to put one in a separate station at the other end of the dam. The Peterborough Light and Power Co. have a splendid pole line, and better than could be expected from the town if they put in a new one. There are several objections to the town operating the

Bulgaria's Clear-Cut Note to the European Powers.

TO PREVENT THE MASSACRES

Christian Population Massacred by Turkish Soldiers—If Continued, Bulgaria May Be Forced to Depart From That Attitude, and Then War With Turkey Would Result—Villages Burned.

Sofia, Sept. 15.—The Bulgarian Government, through its foreign representatives, has addressed a note to the powers declaring that the Porte is systematically devastating Macedonia and massacreing the Christian population. Further, it says, Turkey has mobilized her whole army, which can not possibly be for the sole purpose of suppressing the revolution. Therefore, the Bulgarian Government appeals to the humane sentiment of Europe to prevent the continuance of the massacres and devastation and to stop the mobilization of the Turkish army.

The memorandum concludes with the plain statement that unless the powers intervene Bulgaria will be forced to take such measures as she may deem necessary.

The Bulgarian Ministry, there appears to be little doubt, in face of the strongest pressure, has endeavored to maintain strict neutrality, but it appears very possible that the Government may now depart from this position.

Warned by previous disastrous experiences, the revolutionary leaders have decided to adopt only guerilla tactics in Eastern Macedonia, which is expected to exhaust the Turks much sooner.

The insurgents now have nearly 3,000 men armed with rifles in Eastern Macedonia, and thousands of peasants are ready to join their forces when a general rising has been proclaimed. This step is being delayed for arms and ammunition. The Turkish forces now in Eastern Macedonia are estimated at 17,000.

In the conflicts in the mountains of Pirin, the Turks are reported to have lost heavily.

A panic prevails in Veles. The soldiers permit no one to leave the town, and the peasants in the surrounding villages have all been killed and their villages destroyed.

Severe fighting has occurred near the Town of Okrida, in which the Turks lost heavily, but the insurgents were forced to retire. An engagement between the Turks and insurgents has taken place at Ribartzi, near Kitschevo, and there again the Turks had many killed and wounded, while the insurgent casualties amounted to three. The Villages of Tzetina and Skotchivir, in the same district, have been destryed and their inhabitants massacred.

Annihilated a Battalion.

Salonica, Sept. 15.—The insurgents claim to have annihilated a Turkish battalion at Roupel.

SHE HAD TO SIT UP IN A CHAIR.

Mr. Jas. Kinsella Cured by Dodd's Kidney Pills.

Peculiar Medical Case Ends in Another Victory for the Great Kidney Remedy.

St. Malachie, Dorchester Co., Que., Sept. 14.—Special.—A medical case of particular interest, especially to women, is causing much talk here. Mrs. James Kinsella suffered from Kidney Disease, which so affected her that she could not sleep and she was obliged for two summers to pass her nights sitting in a chair. To-day she is practically a well woman. Interviewed regarding her cure she said:

"I had a pain in my right hip, in the back and was swollen all down that side of the abdomen. I could not sleep at night and I was obliged to sit up in a chair for two summers.

"Reading of cures by Dodd's Kidney Pills I bought one box. That gave me such relief that I continued to use them. They did me a world of good and now I can go to bed like other people. I have never had to sit up in a chair since I used Dodd's Kidney Pills."

Female complaints are caused by Kidneys. Dodd's Kidney Pills never fail to cure them.

Ran on the Rocks.

St. John's, Nfld., Sept. 15.—The steamer E. N. Graham, with the Newfoundland Supreme Circuit Court aboard, ran on the rocks near Little Bay Sunday. The judges and court officials were rescued from their perilous position.

Banker Nasmith Dead.

Kingston, Sept. 15.—Thomas H. Nasmith, Deseronto, banker, town treasurer, and member of the High School Board, was found dead in his bath-room on Sunday afternoon. He had been unwell for some time.

Sarony Is Dead.

New York, Sept. 15.—Otto Sarony, who, for nearly 80 years has had an international reputation for his work in portrait photography, died Sunday at a hospital in this city from phthisis.

Great Things From Little Causes Grow.

It takes very little to derrange the stomach. The cause may be slight, a cold, something eaten or drunk, anxiety, worry, or some other simple cause. But if precauutions be not taken, this simple cause may have serious consequences. Many a chronically debilitated constitution to-day owes its destruction to simple causes not dealt with in time. Keep the digestive apparatus in healthy condition and all will be well. Parmelee's Vegetable Pills are better than any other for the purpose.

Symptoms
Weakness of the Back, Backache, or Pain in Back, Swelling of Feet, Ankles or Wrists, Pain in Joints or Hips, Constipation, Urinary Troubles, Chills, Feverishness.
Cause
These indicate that the kidneys are out of order. If a remedy is not soon found, the evil may develop into one or more of the following diseases: Inflammation of Kidneys or Bladder, Calculus, Gravel or Stone, Rheumatism in one of its distressing forms, Diabetes, Bright's Disease of the Kidneys.
Remedy
The latest and best remedy for Kidney irregularities, which are the cause of so many ailments and diseases, is
Trade-Mark
Bu=Ju
The Kidney Pill That Cures
It possesses all the advantages of other remedies without the objectionable features of any. Bu-Ju is the result of the latest scientific study, compounded with the highest skill. It is sold by all druggists in boxes of 50 pills for 50 cents. Do not waste money and valuable time on substitutes.
Remember
In kidney troubles time is peculiarly valuable. Get the best remedy at once; there is great danger in delay.

MARKET REPORTS.

Grain Markets Close Firm on Both Liverpool and Chicago Exchanges—Live Stock—The Latest Quotations.

Monday Evening, Sept. 14.

Liverpool wheat futures steady, closed ¾d higher than Saturday; and corn futures ½d to ⅝d higher.

At Chicago to-day December wheat closed ⅛c higher than Saturday; December corn ⅝c higher and December oats ⅛c higher.

FOREIGN MARKETS.

London, close—Wheat—On passage, nominally unchanged. Parcels No. 1 Northern Manitoba, shipment within month, 32s. Maize—On passage, quiet and steady; spot, American mixed, 22s 3d. Flour—Spot, Minn., 27s 6d.

Paris, close—Wheat—Tone firm; Sept., 20f 85c; January and April, 21f 15c. Flour—

Antwerp—Wheat—Spot—Tone firm; September, 19f 45c; January and April, 20f 15c.

THE VISIBLE SUPPLY.

As compared with a week ago, the visible supply of wheat in Canada and the United States has increased 820,000 bushels; corn increased 476,000 bushels; oats decreased 430,000 bushels. Following is a comparative statement for the week ending to-day, the preceding week and the corresponding week of last year:

	Sept. 14, '03.	Sept. 8, '03.	Sept. 15, '02.
Wheat, bu	14,176,000	13,350,000	22,056,000
Oats, bu	7,422,000	7,446,000	5,214,000
Corn, bu	6,025,000	6,447,000	2,204,000

To recapitulate the visible supply of wheat in Canada and the United States, together with that afloat to Europe, is 41,066,000 bushels, against 38,870,000 bushels a week ago, and 52,984,000 bushels a year ago.

LIVERPOOL GRAIN AND PRODUCE.

Liverpool, Sept. 14.—Wheat—Spot, No. 2 red western winter quiet, 6s 2½d; No. 1 northern spring steady, 6s 9d; futures quiet; September, 6s 5¼d; October, 6s 5½d; December, 6s 6¼d. Corn—Spot, American mixed quiet, 4s 6¼d; futures steady; September, 4s 6¼d; October, 4s 6¼d.

Hams—Short cut dull, 58s. Bacon—Short rib steady, 51s 6d; clear bellies steady, 52s 6d; shoulders, square, dull, 52s. Hops at London—Pacific coast steady, £5 10s to £6. Rosin—Common steady, 5s 6d.

Imports of wheat into Liverpool last week were 320,400 quarters from Atlantic ports, none from Pacific ports and 60,000 from other ports.

Cotton seed oil—Hull refined, spot, dull, 23s 1½d. Tallow—Australian in London firm, 30s.

CATTLE MARKETS.

Cables Steady—Good Demand and Montreal Prices Slightly Higher.

London, Sept. 14.—Live cattle steady at 11¾c to 12c per lb. for American steers, dressed weight; Canadian steers 10¾c to 11c per lb; refrigerator beef, 9c to 9¼c per lb. Sheep, 11½c to 12½c.

MONTREAL LIVE STOCK.

Montreal, Sept. 14.—About 800 head of butchers' cattle, 60 calves and 500 sheep and lambs were offered for sale at the East-end Abattoir to-day. There was a good demand and slightly higher prices paid for good to prime cattle, but the common stock were dull of sale. Lambs were scarce and higher in price. Fat hogs are also higher in price. Shippers bought all the large steers on the market, paying from 4c to 4½c per pound. Good medium steers sold at about 4c; ordinary medium at about 3½c and the common stock at from 2¼c to 3c per lb., while the small bulls sold at about 2c per lb. Grass-fed calves sold at from 2½c to 3c per lb; good veals brought from 4c to 4½c per lb. Sheep sold at from 3c to 3½c and lambs at from 3½c to 4½c per lb. Good lots of fat hogs sold at about 6c per lb. Selects up to 6¼c per lb.

EAST BUFFALO CATTLE MARKET.

East Buffalo, Sept. 14.—Cattle—Receipts, 6850 head; steady to strong on desirable kinds, others barely steady; prime steers, $5.40 to $5.65; shipping steers, $4.50 to $5.30; butchers' steers, $4.25 to $5.15; heifers, $3.50 to $4.75; canners, $3 to $4; bulls, $2.50 to $4; feeders and stockers, $3 to $4.10; stock heifers, $2.25 to $3.25; fresh cows and springers, $2 to $5 higher; good to choice, $45 to $55; medium to good, $35 to $42; common, $20 to $30. Veals—Receipts, 1163 head; strong; $5.25 to $6.50. Hogs—Receipts, 17,000 head; active, 5c to 10c lower; heavy, $6.25 to $6.35; mixed, $6.15 to $6.20; Yorkers, $6.25 to $6.35; pigs, $5.10 to $6; roughs, $5 to $5.40; stags, $4 to $4.75.

POPE TO WORKING PEOPLE.

"Be Satisfied With Your Condition, Care For Your Own."

Rome, Sept. 15.—The Pope Sunday held his first reception of any importance, over two thousand persons, for the most part working people, from the quarters around St. Peters, being admitted to his presence in the court yard of La Pigna, inside the Vatican. The Pontiff said that the workingman who is satisfied with his condition finds in it a true pleasure, shedding brightness about him: "These words," continued Pope Pius, "are the first that I address to the Romans. Be satisfied with your condition, provide and care for your children, and I assure you the blessing of God, which I so much invoke for you and your families, will be given."

Editor Pirie Left $32,000.

Hamilton, Sept. 15.—The will of Alexander Fraser Pirie, of Dundas, newspaper publisher, was entered for probate by Prof. Alfred Baker, of the University of Toronto. The estate is valued at $32,600, made up as follows: Real estate in Toronto, $6,000; real estate in Northwest Territories, $800; Dundas Banner and plant, $9,700; household goods, $1,800; book debts and notes, $2,260; stocks, $2,750; cash in hand and bank, $1,006.95; moneys secured by mortgage, $888.05; life insurance, $7,395. The children receive the income for their maintenance and education, and as each attains 21 he or she receives the principal. Mrs. Ada Murdock, a sister, and James H. Pirie, a brother, (so long as he remains unmarried), receive the rents of the Toronto property.

Senator's Stables Burn.

Montreal, Sept. 15.—The large stables of Senator Drummond, at Beaconsfield, the finest in Quebec, were burned yesterday morning. Most of the stock was saved, but "Bantam," a prize bull, purchased from King Edward's stables, was lost. All the horses were saved. Loss about $40,000.

Mays in No Way to Blame.

Hamilton, Sept. 15.—The inquest on the body of Osborne Taylor, the wrestler killed in Friday's bout at the Belmont Hotel, began last Monday night, was finished last night, and it took the jury only a few minutes to decide that Harry Mays was in no way to blame for the fatal result.

Lost a Foot.

Belleville, Sept. 15.—William Johnson of Madoc was brought to this city on Saturday suffering with a smashed ankle. On Saturday afternoon the injured member was amputated at the hospital. Johnson is a middle-aged man with a large family.

Bleeding Piles and Erysipelas.
Two Severe Cases Which Illustrate the Extraordinary Soothing, Healing Virtues of
Dr. Chase's Ointment.
Scores of people do not think of trying Dr. Chase's Ointment for bleeding piles because they have used so many other treatments in vain and do not believe their ailment curable. It is by curing when others fail that Dr. Chase's Ointment has won such a record for itself. It will not fail to promptly relieve and completely cure any form of piles, no matter how severe or of how long standing.
Mr. James Uriah Pye, Marie Joseph, Guysborough Co., N.S., writes: "I was bad with bleeding piles for about four years and could get no help. Dr. Chase's Ointment cured me in a very short time, and I cannot prise it too highly for this cure. Mrs. Thomas Smith was troubled with erysipelas in the feet and legs and was all swollen up. I gave her some of the ointment, which took out the swelling and healed all the sores. She had tried many treatments before, but none seemed to do her any good. I am telling my friends about the wonderful cures which Dr. Chase's Ointment made for Mrs. Smith and myself, and would say that it is only a pleasure for me to recommend so excellent a preparation."
Wherever there is irritation, inflammation, ulceration or itching of the skin Dr. Chase's Ointment will bring quick relief and will ultimately heal and cure. On this account it is useful in scores of ways in every home for the cure of eczeme, salt rheum, tetter, scald head, itching peculiar to women, pin worms, piles and all sorts of skin diseases and eruptions.
Dr Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his remedies. 6

STRENUOUS OLD DAYS.

Col. Sam Hughes Tells of the Lacrosse Games That Used to Be Played in This Province.

Colonel Otter is down on rough playing in lacrosse, says Day by Day in Toronto News. If he has some criticisms to make on lacrosse as it is played nowadays, Colonel Sam Hughes has something more. He has on tap a stock of something like denunciation. Not long ago Colonel Sam and a couple of friends sat on the terrace down at Ottawa, and watched the pages of the House of Commons playing the national game. The Colonel heaved a sigh, and proceeded to debate on the events of the game as played in the middle seventies. "I don't often go to see them play nowadays," said he. "I'm too busy. And I don't think they played as well as we did. Look at the passing we used to do! We'd throw that ball from man to man just as hard as we could sling it. There was no lobbing in those days. And as for body-checking, why, those little fellows who play nowadays haven't the strength to give an opponent a decent toss! You can bet we could though. We had a lot of big fellows on the teams, and the body-check was one of our favorite methods of getting the ball away. I know they believe that there is better combination work done now, but that is rot. We had just as good team work—better, in fact, for we had strength as well as speed and skill. I remember how Ross Mackenzie, who stood six feet four and weighed something like two hundred and thirty in condition, used to knock the boards off the old Jarvis street fence. How did he do it? Simplest thing in the world: he used to body-check his opponent through the fence. You see, the boards were nailed on the outside of the joint, and all Ross had to do was to body his man hard enough to draw three or four nails. He did it nearly every match, and the other fellows were usually in such condition that it did them little harm."

Colonel Sam's younger auditors looked pensively at the Langevin block, and wondered whether Ross Mackenzie could have knocked it down with a Shamrock or Montrealer used as a missile. His questioning did not take the form of words, however, for although Col. Hughes has passed the meridian, he is still hale and muscular. "Yes," the Colonel pursued, "we played strenuous lacrosse in those days. There was many a free fight in both Toronto and Montreal. Religious feeling ran a good deal higher than it does today, thanks be, and the Shamrocks did not like us of Toronto, their ground being that we were all Orangemen, which we weren't. And I am free to say that we had no overpowering love for the Shamrocks. When we went to Montreal to play them, we were always ready for war, and sometimes we got it. I don't mean to say that the Shamrocks laid themselves out to slay us. The matches usually began good naturedly enough, but when a scrap began it was not unusual for the spectators to manifest a desire to take a hand in. The officers of the Shamrocks soon fixed that, though, by enlisting the aid of the police. The ill-feeling seldom or never lasted, and at the hotel both teams fraternized. We had not in those days the baggy sticks now used by the defence players. The 'crosses had a considerable swayback or curve along the back, and the top was a regular semicircle, instead of being straight, as it is nowadays. If, in trying to lift the ball on the run, the ball was not touched exactly at the top of the semicircle, the play was a failure. And the sticks were ever so much heavier than they are to-day. So you see that we did about as well as the players do now, and we had much clumsier sticks to handle. Of course, the 'crosse has been improved. Accurate shooting is easier, and catching, for the defence, is easier, too. And we had not the perfectly fitting shoes that are worn to-day, although the model began to be used in my time. The first white lacrosse players, who took up the game when I was about twelve or fourteen, wore mocassins. These were not satisfactory. They gave little protection for the foot, and the grounds were not so smooth in those days. Some genius conceived the idea of wearing ordinary rubbers—goloshes, not overshoes, of course. They were worn on the naked foot, with a tie string from the back around the ankle. Of course, they were both clumsy and uncomfortable. But they had in them the germ of the idea of the light and durable lacrosse shoe of to-day. It did not take long for a shoe manufacturer to think the plan of making all but the sole and a narrow edging out of canvas. For a long time the only roughening on the sole was the faint reticulation that is on the bottom of the ordinary rubber. As years went on the lozenges got larger, and finally came the rubber spikes of to-day."

"But this is not being a statesman," said the Colonel, as he arose and stretched the mighty arms that used to hurl the ball across Wellesley street. "Those days are gone. And I must be gone, too—to the House to earn my indemnity."

Woman's Weakness

A woman's reproductive organs are in the most intense and continuous sympathy with her kidneys. The slightest disorder in the kidneys brings about a corresponding disease in the reproductive organs. Dodd's Kidney Pills, by restoring the kidneys to their perfect condition, prevent and cure those fearful disorders peculiar to women. Heights of Birds' Flight.

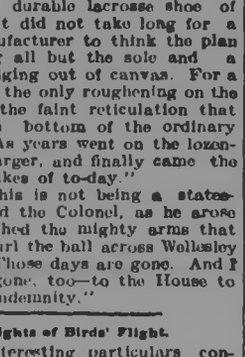
Some interesting particulars concerning the flight of different birds are published by a contemporary. An eagle was observed by Hergesal, of Strasburg, to fly at a height of nine thousand feet. A lark was detected at an altitude of 1,000 feet. Aeronauts have encountered crows as high as 4,200 feet from the earth. These, however, are exceptional altitudes for birds to attain. As a rule, 1,800 feet seems to be the limit. The German Ornithological Society has been conducting experiments with pigeons, and finds that when liberated at a height of 9,000 feet down to as little as 2,700 feet, they drop rapidly to a much lower region of the atmosphere.

Irreverence is the brand of ignorance.

TEARFUL OR CHEERFUL?

Whether a woman is tearful or cheerful depends not on what she has materially, but what she is physically. Many an indulgent husband is driven almost to despair by the tearful outburst of a wife who has "everything she wants." He wants to know what's the matter. But the wife can't tell. She only knows that she is depressed and despondent.



Such a condition is usually related to some form of womanly disease. The mental depression has its corresponding womanly weakness.

Doctor Pierce's Favorite Prescription changes tearful women to cheerful women by curing the diseases which cause physical weakness and depression of spirits. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration, and cures female weakness.

Mrs. Alice Adams, of Laboratory, Washington Co., Pa., says: "With many thanks I write to let you know how I am. I can say by God's help and your help I am well. I have taken six bottles of Dr. Pierce's Favorite Prescription and two of his 'Golden Medical Discovery,' and I can do all my work. I can't praise your medicine too highly. I will recommend your medicines as long as I live. If any one doubts this give them my address."

"Favorite Prescription" makes weak women strong and sick women well. Accept no substitute for the medicine which works wonders for weak women.

Keep the bowels healthy by the timely use of Doctor Pierce's Pleasant Pellets.

DICKENS IN THE SLUMS.

Great Novelist Made Himself Personally Acquainted With His Types.

Everybody knows that the great Charles Dickens was usually in the habits of drawing the scenes and characters that appear in his novels from actual life. He would make himself personally acquainted with the places he intended to describe, and would go far out of his way to come into contact with a personage or type that seemed to him suitable for his purpose. But it is not generally known that, in the latter case he would sometimes run very considerable risk. Of one of these "sprees" of Dickens (for so he looked upon them), which has lately been described in his memoirs by the well-known actor, James R. Anderson, there is a brief account, so characteristic is it of the renowned author's optimistic, almost dare-devil, fearlessness.

After a night rehearsal of "Henry V." Mr. Anderson had supper with Dickens, Maclise and Forster, and, at about 2 a. m., the trio went on a visit to some awful slums, called "The Rookery," a famous resort of the worst kind of thieves. Dickens, luckily, as it turned out, had secured a friendly detective to show him the place and the people he wanted to see for descriptive purposes. Dickens and his friends found "The Rookery" crowded with "the most hideous-looking roughs."

They stood drinks all round, but without avail; the mob, instead of growing friendlier, grew more and more rowdy and hostile, and, being worsted in a battle of chaff, finally lost their temper and began to use brute force on the unwelcome visitors.

One huge ruffian got hold of Dickens by the throat, and was about to land him a tremendous blow with the fist in his face, when Mr Anderson pulled him away, just in the nick of time. Straightway the fellow went for the actor "like a wild beast"; but Mr. Anderson happened to be a first-rate boxer, and in first-rate fighting trim, and knocked his opponent clean off his heels on to the sanded floor of the room.

Immediately the lights were put out, and there was a perfect blizzard of bottles and glasses. "The shouts and oaths, smashing of chairs and benches, and the noise in the dark, made it impossible to tell friends from foes"; and had it not been for the detective, who opened the door of the "pub," dragged them into the street, and warned them to run for their lives, while he himself held on to the floor and kept the roughs at bay inside, Dickens and his party would have fared badly indeed.

As it was, they all appear to have escaped without a scratch. In fact, they arranged to breakfast together the next day, and they were all at the rendezvous in good time, "not a man of us," adds Mr. Anderson, "anything the worse for the overnight adventure."

His Solitary Satisfaction.

"Does Jawley chew gum habitually?"

"No. Why?"

"I never see him that his jaw isn't wagging."

"Oh, that's because he delights in saying to himself the things he would say to his wife if he dared."

Where She Missed It.

Tess—Poor May! Jack Mistry asked her if she would care to be satisfied with love in a cottage with him.

Jess—And she refused him?

Tess—Yes, and the next day she discovered the cottage was at Newport.—Exchange.

A Beauty.

"Is she pretty?" asked Languide.

"Quite," replied Statisticus, "fully 50 per cent as pretty as she thinks she is, I should say."

A STORY OF WHISTLER.

The Picture That Was His Even Though It Had Been Sold.

A certain Lady So-and-so, who admired Whistler's genius to the extent of purchasing one of his pictures, never was able to obtain possession of her property. One day she drove to the studio in her victoria. Mr. Whistler went out to the sidewalk to greet her.

"Mr. Whistler," she said, "two years ago I bought one of your pictures, a beautiful thing, and I have never been able to hang it on my walls. It has been loaned to one exhibition or another. Now today I have my carriage with me, and I would like to take it home with me. I am told it is in your possession."

"Dear lady," returned Whistler, "you ask the impossible. I will send it to you when I have it again, but it is not here. You have been misinformed." And so forth, and so forth, to the same effect, and the lady drove off without her picture.

After she had departed Whistler commenced to poke around the studio, and, to the great astonishment of a friend who had been an involuntary listener to the above conversation, he brought forth a canvas.

"Here it is," he said. "She was right about one thing—it is beautiful." And it was beautiful.

"But the impudence of these people," he continued, "who think that because they pay a few paltry hundred pounds they own my pictures. Why, it merely secures them the privilege of having them in their houses now and then! The pictures are mine!"

Weird Music of Moro.

Moro music is strangely unrhythmical to European ears, says a writer in Everybody's Magazine. It consists mainly of a monotonous reiteration of sound, even a supposed change of air being almost imperceptible to an ear unaccustomed to the barbarous lack of tone. The Moro piano is a wooden frame shaped like the runners of a child's sled, on which small kettledrums are balanced by means of cords and sticks laid horizontally. These rather resemble pots for the kitchen range than musical instruments, but each is roughly tuned, forming the eight notes of the scale. Women crouching on the ground before this instrument beat out a wailing sound from it with shaped sticks, while from larger kettledrums, hung by ropes from a wooden railing at one side, two men accompanied the piano, and one old woman in the background drummed out an independent air of her own on an empty tin pan.

THE LATEST NEWS OF LOCAL SPORT.

Rugby Teams Elect Their Officers.

Athletics to go to Markham To-morrow to Play Sudden Death With Elora.

The Sporting Editor of the Examiner invites contributions from secretaries and managers of amateur sporting organizations, containing reports of games played or other matters in connection with the clubs which will be of general interest. All such communications will be carefully considered, and incorporated in the Examiner's *sporting column*. Contributions should be brief and pointed.

LACROSSE.

The Athletics will leave to-morrow on the 8.20 train for Markham, where they will play the fast Elora "Rocks," the champions of districts 4, 8 and 13, Junior C.L.A. The locals hope to break the *winning* streak of the "Rocks," but they recognize the fact that it will be a tough proposition, and in view of this have been practicing consistently during the interval since the last game, as they did before, and this fact is assured that should the Athletics go down to defeat it will be *only* after the hardest kind of a struggle, compatible with good scientific lacrosse. Mr E. Pennock of Stouffville, will referee the game. The following players will represent the team, and are asked to be at the G.T.R. station to-morrow morning:

Goal, Clark; point, Ketchum, cover point, Morgan; 1st defence, Howell; 2nd defence, Mein, 3rd defence, Wilkinson; centre, Robertson; 3rd home, O'Flynn, 2nd home, Best, 1st home, Wasson; outside, Glover; inside, Cavanah. Dunsford and Dillon will also accompany the team.

* * * *

The following is a complete list of subscribers to the fund being established in response to the letter of President Kenner which appeared in yesterday's Examiner. Mr. Kenner asked for one dollar subscriptions to enable the Athletics to make their trip to Markham to-morrow. It is hoped that before this evening the required amount will have been received. Those who have shown an interest in the winning team, to the extent of $1 each, are:

J. R. Stratton,	R. H. Jackson,
W. H. Hill,	J. H. Cobb,
W. Lech,	F. J. Jameson,
G. Graham,	H. Lellman,
Review P.S. Co.,	F. McGrath,
J. Hamilton,	A. H. Stratton,
Chris Graham,	T. McDonough,
W. McCallum,	G. Hay,

R. J. Munro.	

RUGBY.

The Britannia Rugby Club organized at a meeting held in the Oriental Hotel parlours last night. Considerable enthusiasm was manifested in the proceedings and the prospects for a good season seem to be bright. The team will play in the City League and A Hodgson was appointed as their representative for the Wednesday night meeting of the League. The membership fee was placed at $1. The officers elected for the season of 1903 are as follows:

Hon. President—Alex. Elliott.
Hon. Vice-President—W. H. Hill.
President—A. A. Hollingshead.
Vice-President—C. G. Graham.
Sec.-Treasurer—A. C. Yokome.
Captain—W. H. Walkey.
Committee — A. B. Macfarlane, A. Hodgson, Jas. H. Sawers, N. Jolliffe, A. Boucher.

* * * *

St. John's choir boys' athletic club have elected the following officers for their Rugby Team:

Secretary—Geo. Strickland.
Treasurer—Charley Ray.
Captain—Erle Weller.
Committee — Harold Wallis, Frank Sawers, Gordon Cummings, Edward Wood, Jack Seymour.

* * * *

The Rough Riders Rugby Club was organized in the Y.M.C.A. last night and the following officers were elected:

Hon. President—R. A. Morrow.
President—A. H. Stratton.
Vice-President—Ross Cameron.
Manager—Frank Bradburn.
Team Committee — Manager, Captain and Geo. Rogers.
Secretary - Treasurer — Howard Taylor.

The captain will be chosen after one of the practices and before the first game.

Representative to Executive of the Town League — Manager.

The membership fee is $1; junior players under 15 years of age, 50c.

SPRINTING.

Mr. D. Belland stated to the Examiner yesterday that, owing to the fact that he was unable to get anybody to accept his challenge and because he had both accepted a position with the Cordage Company and signed with the Peterborough Hockey Club, he was not going to keep in training and would retire from the track.

CANOEING.

The T.V.C.C will feel a distinct loss in the removal from town of Mr. Chas. Whiten, who leaves for Toronto to work in P. W. Ellis & Co's wholesale establishment.

BASEBALL.

The Chicago Stars failed to put in an appearance to-day and consequently the game with the Excelsiors had to be called off.

TURF.

It is learned that Mr. Martin Conners, of the City Hotel, has bought "Blucher" from Mr. R. G. Smith, of Toronto.

* * * *

Mr. Geo. Graham has sold "Happy Paddy" to Dr. Archer of Port Perry.

* * * *

"Prince Hal, jr," "Black Mack," and "Lapidist Chief," are training at the track for the stallion races at the Fair.

* * * *

Dr. Archer of Port Perry, has a horse which is not yet three years old, which stepped the mile in 2.25.

* * * *

Jack Kenny of Bobcaygeon, has a horse on the track, which covered its mile in 2.27 1-4.

Mr. Geo. W. Fitzgerald, well known in cheese board circles, has a farm horse which it is said, has gone a mile in 2.27 1-4.

According to some local turfmen Sphinx B stepped the mile on Tuesday in 2.10. The question arises as to whether turfmen and fishermen are not in competition.

Took a Supply to the Seaside.

A Toronto mother who has brought up babies on life-giving Lactated Food writes thus:—"This summer we decided to go to one of the St. Lawrence seaside resorts for a month or six weeks. Before leaving I made up my mind to take with me a good supply of Lactated Food for my baby boy, two months old. At the seaside, baby's diet day and night was Lactated Food, on which he made wonderful progress, and we brought him back to Toronto strong and healthy. I can with confidence recommend Lactated Food as the best nourishment for babies. This is my experience after having used it for three children."

THE STREET RAILWAY PRACTICALLY ASSURED.

(Continued from 5th page.)

quarters by the Corporation and during the remainder of such term the said expense is to be borne equally by the Company and the Corporation and the said Company is to pay to the Corporation its share of such expense on or before the first day of May after said work is done in each year.

These were the best terms possible to secure, and it was thought that the bargain was a fair one. During the two winters in which the old Peterborough and Ashburnham Railway was in operation there was but little trouble with snow, and, as it is only once in a number of years that any great depth of snow is experienced, it was thought that the expense resulting to the town would not be very great. As evidence of this contention he stated that on Bethune street where snow is thrown from G.T.R. tracks no inconvenience to vehicular traffic is noticed.

THE QUESTION OF FARES.

In reference to the price of workingmen's tickets, the committee fought hard to have the price placed at 8 for 25c. In reply to this demand Mr. Stuart promptly told them that if the Council wished to dictate the price of tickets, it might also run the road, and added that the company, while it wished to have the price of tickets set at the same as other roads, in the franchise, it would, if possible place the price of workingmens' tickets at 8 for 25 cents as requested, but that for the sake of being able to easily sell the Bonds he wished this clause not to be included in the agreement. In refuting the statement made by some that the Railway Company was being given a Bonus of the street lighting, he said, that he claimed the difference in price of the offers for light of the two companies was so slight that he would be inclined to accept that of the Peterborough Light and Power Company at $46 60 net, in preference to that of the Otonabee Power Co. at $35.00, when the superiority of the open lamps is considered, and the duplicating of the pole lines. He claimed that the town was getting a good street lighting contract, as compared with other towns, and the street railway thrown in. This year the cost for street lighting will be $5,725 net. Under new rate the town will be able to have installed 25 additional lamps, making a total of 120 at a cost of $5,600 per year net, and save $125 per year. "If anyone can show me," said Alderman Morrison, "where there is any bad bargain, when the town is getting 25 additional lights at a less cost than at present and a street railway under the terms of the agreement, I will agree to the assertion that a bonus is being given."

SUBMITTING THE QUESTION TO THE RATEPAYERS.

In speaking of the question of submitting the agreement to the people before having it ratified, Ald. Morrison said when this negotiation was entered into no law existed providing for the submitting of such questions to a public vote. In support of this contention he read extracts from decisions of Justices Britton, Osler and Street to the effect that questions of this kind should not be submitted to popular vote, and stated that even could such be done the question would still come back to the council for final settlement. Since that time however an amendment to the statutes provides that a referendum vote may be taken on such questions but it must be taken at the time of a general municipal election. Consequently this could not be had until next January, which would mean the delay of a year, and would probably result in the present offer being withdrawn by the company. In the face of all these facts, Ald. Morrison said he had no hesitation in moving that the council go into Committee of the Whole on the second reading of the bylaw.

(Continued to-morrow.)

P. T. BARNUM

Mr. Barnum, the great circus king, said: The only way for any business man to get along is to advertise his business. He doesn't recommend copying; No 1. He says paint your name and business in the most prominent place and do not stop at that, but paint it as many times as you can find conspicuous place. Now pictorial signs as flashy as the artist can produce is the best ways and means. The great show man said don't try to please your next door neighbor. He remarks, "I have often heard it said, 'Mr Smith has a sign and it is like so and so; I think I will have one the same.' Now that is the greatest mistake a business man ever made. Be original always.'" Get Fred Cook to paint your signs to suit your business, as he is original with his way of advertising. He doesn't copy nor does he intend to, and that is why Cook does the sign trade of the town. He is always ready to submit a design and always guarantees not to disapoint you. Just ring up 'phone 119 and order your exhibition signs.

Coats

Stunningly Natty Coats

Coats that have a swagger touch, yet every garment a "Lady's" garment.

No loudness about a "Sutcliffe Coat." They're made to wear, and wear comfortably, yet with the chic little touches that women appreciate.

The cloths vary nearly as much as the styles, Zebilenes or rough effects having quite a prominent place. Grays and Black and White mixtures are bound to have a big run.

We have some select Plain Black Garments that are especially worthy of notice.

Our Mantle Department is free to inspect. Increased stocks demanding a change in arrangement, we have materially increased the capacity of the department, and thus more room for the accommodation of our customers. We value your inspection.

Lucy Snowe's Mother

is *so* worried about Lucy's clothes for boarding school next Winter—she wants to make up a serviceable school-room suit and a pretty gown for "nice," and if she will step in and get the September number of THE DESIGNER she will find just what she is looking for.

The School Suit has a new blouse, to be trimmed in braid or stitching, and is the most satisfactory design yet made for girls from 13 to 17 years. The blouse design may also serve for separate shirt waists in flannel, mohair or silk.

The other costume is made with the very fashionable ¾ collarless coat, and instructions for cutting and making are so complete that nobody who knows how to sew need hesitate to attempt this stylish gown.

Each Suit Pattern, including skirt and waist, costs but 15 cents.

THE DESIGNER *is 10 cents a copy—we take subscriptions at 80 cents a year.*

J. SUTCLIFFE & SONS

369 George Street.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell for lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

THE ORAL ARGUMENT

Canada's Case in Alaska Boundary Dispute Heard First.

A REVIEW OF THE TREATIES

Concise Statement Made by Attorney-General Sir R. B. Finlay in Making Out the Case For the Dominion—The Canadians Gratified, Believing That They Have Scored a First Good Point.

(Canadian Associated Press.)

London, Sept. 16.—The first sitting of the Alaskan Boundary Tribunal took place at the Foreign Office yesterday in the room in which deputations are received by members of the Government.

The Commissioners and counsel were all present, and among the ladies present were Mesdames Sifton, Duff, Wade, Courtney, and Pope. Many American ladies were also present.

Attorney-General Finlay.

The Attorney-General, Sir R. B. Finlay, proceeded to open the case for Great Britain by describing the territory in dispute as being chiefly of value to Canada as affording access to the Yukon Territory. He went on to say that the question of boundary had been in dispute since 1872, for more than 30 years the subject of differences periodically between the Governments. Though but little known to the outside world up to 1896, and confined to State papers, in that year the discovery of gold in the Yukon made it a subject of active concern. He alluded to the joint survey of 1895 and the negotiations of the Joint High Commission in 1898, which unfortunately bore no fruit.

Coming to the treaty of 1903 he said the tribunal was organized thereunder to interpret the treaty of 1825. It can only answer questions, and has no power to draw a boundary. Referring to the last paragraph of Act Three of the treaty of 1903, he argued that under it the tribunal could take cognizance only of acts of the Governments concerned, not of individuals, and that only such actions could be considered as implied agreement of view between the two Governments. Any action outside the treaty could only be relevant so far as it showed united action of both parties.

Questions at Issue.

The Attorney-General then proceeded to read and comment upon the questions proposed to be answered by the tribunal. Regarding the first, he said there could be no discussion.

The second also was a simple question of identity. What channel did the negotiators mean by Portland Channel? Undoubtedly that passing to the north of Prince of Wales and Pearse Islands.

The third question answers itself; you have the two points and must join them by a straight line.

The same answer applies to the fourth question.

Regarding the fifth question, he asked the tribunal to return a simple negative.

To the sixth question he asked that it should be answered to the effect that where deep inlets occur the measurement should be from the line of general direction of the mainland coast, and that whether the heads of the inlets should belong to the United States or Canada would depend upon the situation of the mountains, which are the cardinal feature of this treaty.

Regarding the seventh question, he asked the tribunal to decide that the mountains do exist, and that the line of their summits is that delineated by Mr. King, the Canadian expert.

The Case in Outline.

He then indicated the order in which he proposed to deal with the case, as follows: (1) The terms of the treaty of 1825; (2) to give a general view of the negotiations which led to the treaty of 1825; (3) to deal with the questions before the tribunal, which fall into two groups, the first four and the last three. He then read and commented on the treaty of 1825, pointing out that the latitude and longitude of the southern-most point of Prince of Wales Island were given merely for identification, and that the point itself was the commencement, no matter what the latitude was. He then said "le long de la parse, dite Portland Channel" did not necessarily mean through the middle of the channel. He argued that throughout the negotiations the southern boundary contended for by Russia was degree 55. He touched upon the meaning of the pronoun "elle," which, however, he said, was of little practical utility.

Passing to the treaty he contended that the basis of the treaty is the existence of mountains. The contingent portion of the fourth article does not controvert this, for it supposes mountains, though in places they may recede more than 10 leagues from the coast.

Coming to the meaning of the word "coast," he quoted Mr. Mendenhall, chief of the United States Coast Survey, to show that he understood the word to mean the general trend of the coast.

Here Senator Turner enquired if the general trend of the coasts and trend of the general coasts were not different in meaning and intimating that Mr. Mendenhall did not use the latter phrase, which alone conveyed the British meaning.

U.S. Authority Quoted.

The Attorney-General saw incompatibility between the two expressions, and quoted Mr. Mendenhall further in support of his view. He dwelt on the words of that treaty that the line was never to exceed ten leagues, and showed that the United States read this to mean that the line was never to be less than that distance from the coast. He next commented upon the United States contention that there were no mountains within the ten leagues, and showed that for long stretches there were undeniably mountains. He cited the St. Elias Alps as huge physical facts, and said that, as a French King once said, "There are no more Phyrenees," so the United States proposed to eliminate from nature the St. Elias Alps. Again, he showed that mountains exist ten or twelve miles back of Dyea, whereas the United States claim ignores them altogether, and runs the line 35 miles back from the head of the Lynn Canal. In this way, they seek to acquire an additional 10,000 square miles, to which they cannot possibly have any claim. He took up the negotiations in 1823-1825, and showed that the negotiators must have been familiar with Vancouver's narrative, and was proceeding critically to examine the negotiations in support of the claim of Great Britain when the Court rose for lunch.

THE CHAIRMAN ACQUIESCED.

With Sir R. B. Finlay's Interpretation in Favor of Canada.

(American Associated Press.)

London, Sept. 16.—The first day of the oral arguments in the Alaskan boundary question was taken up by Attorney-General Finlay, who partially presented the Canadian view of this important controversy. The tribunal adjourned to a few minutes after 4 o'clock yesterday afternoon until this morning.

The Canadians were gratified at scoring what they believed to be the first good point. During the afternoon session the Attorney-General sought to establish the position of Portland Channel and fix the entrance thereto. He interpreted the words of the woman: "A. La Hauteurde" in the Russo-British correspondence leading to the signature to the treaty of 1856, not as showing that the boundary line was on the same parallel "as the lower end of Prince of Wales Islands," as claimed by the United States, but "off of," as asserted by Canada, the effect of this would be to fix the line of 54 and 45 minutes as claimed by Canada.

Chief Justice Alverstone agreed with Attorney-General Finlay.

Attorney-General Finlay to-day will resume the presentation of the Canadian case.

What Shall Be Done With Queen's?

Kingston, Sept. 16.—At the conference of the General Assembly Committee and Queen's Trustees to consider what shall be done to retain Queen's as a church institution, the opening hours of yesterday session were spent in review. Principal Gordon and Dr. Milligan presented Queen's reasons for separation and various reverend doctors of the church held for retaining the college and maintaining it. The matter will not be decided before to-day. Rev. Dr. Fletcher, moderator, presides, and Rev. Dr. Campbell is secretary.

Killing of Lewis Trew.

Garden Hill, Sept. 16.—A sad accident occurred near here yesterday, resulting in the death of Lewis Trew, a young man about 25 years of age. Together with Robert Langstaff he had hold the tongue of the truck of a threshing machine attempting to steady it while going down hill. A wheel struck a stone and the tongue swerved, knocking Trew down, and the wheels passed over his chest. He was so severely crushed that he died in a few hours.

Whittaker Wright Had Nerve.

London, Sept. 16. — Whittaker Wright was re-arraigned at the Guild Hall Police Court yesterday. The examination of the witnesses for the prosecution lasted through the day. The secretary of the London & Globe Corporation caused some sensation by testifying that on the date when the Standard Company's cash balance was only $10,000, the directors passed a resolution to undertake liabilities of over $7,500,000.

Another Barn Burned.

Darrie, Sept. 16.—In a big thunderstorm that passed over this section last evening the barns of George Morton's farm, near Allandale, were struck by lightning and completely destroyed, together with the entire crop of 200 acres, his implements, and several head of cattle and pigs. The loss is estimated at $5,000, partially covered by insurance.

Barn Struck by Lightning.

Fergus, Sept. 16.—During a heavy electrical storm which swept over the greater part of Garfraxa yesterday afternoon, the barn of David Ferrier was struck by lightning and burned to the ground. The barn contained a large part of the season's crop, but a stack of hay and oats was saved. There was no insurance.

Switch Left Open.

Blenheim, Sept. 16.—An accident occurred here on the Lake Erie & Detroit River Railway yesterday afternoon at 5 o'clock. The switch was left open and the engineer did not see it and backed into it. There was nobody killed, but several were badly injured and one car badly wrecked.

Finds $18,000 in Wreck.

Digby, N.S., Sept. 16.—By the aid of a diver, Thomas Burns, a fisherman of Seawall, N.S., has recovered nearly $18,000 in gold from the hull of a wrecked vessel, for which he paid 21 shillings, and he expects to find even more treasure.

Body in Toronto Bay.

Toronto, Sept. 16.—The body of a woman was discovered in the Bay yesterday afternoon at the foot of John street, and has been identified as that of Mrs. Bradin, 168 Bedford Road. The conclusions are that the unfortunate woman threw herself into the water. The woman was missing since Sunday.

DUTTON'S MARKET.

CHANGE OF POLICY.

Premier Balfour Says Britain's Fiscal Ideal is Not Right One.

THE ACTION TO BE TAKEN.

"The Only Alternative Is to Do to Foreign Nations What They Always Do to Each Other," an Inducement That They Will Thoroughly Understand—Liberal Papers Denounce Premier's Pamphlet.

(Canadian Associated Press.)

London, Sept. 16.—Premier Balfour issued this morning the advance sheets of a pamphlet on the subject of "Insular Free Trade," in which he presents at length arguments in favor of a change in Great Britain's fiscal policy.

He says: I am a free trader, but not of the pattern which holds that the doctrine of free trade is so universal in its application and so capable of an exact expression that every conclusion to which it logically leads must be accepted without hesitation and reserve."

The Premier points out that as a result of England's policy of retaining a fiscal policy made for a free trade country in a world of free traders, the rate of her export trade has not increased, and, in fact, has seriously diminished. Meanwhile, Germany, America, France, Russia and even Great Britian's self-governing colonies continue to build up a protected interest within their borders.

Foolish Optimists.

Mr. Balfour declared that the optimists who advocate a continuance of the free trade policy in face of the injury worked by protection on Great Britain's interests, are foolish.

Mr. Balfour concludes: "I plead for freedom to negotiate. The freedom of exchange may be increased. It cannot be right for a country with free trade ideals to enter into competition with its protectionist rivals and allow itself to be deprived of the only instrument by which their policy can conceivably be modified. The first and most essential object of our national efforts should be to get rid of the bonds in which we have gratuitously entangled ourselves. What is fundamental is that our liberty should be regained."

Associated Press Deductions.

The publication of the pamphlet immediately after the momentous Cabinet Council indicates that it will be a statement of policy accepted or rather acquiesced in by the majority of the Cabinet. If this assumption is correct, it means the abandonment of the idea of a preferential tariff with the colonies and the taxation of food in favor of a system of retaliatory duties. Even this, however, is tentative.

The most striking feature of the pamphlet is that it does not refer to Mr. Chamberlain's proposals. The whole line of Mr. Balfour's reasoning is opposed to tariffs for purely protectionist purposes. Hence, Mr. Chamberlain is faced with the alternative of either abandoning preferential tariffs or prosecuting his campaign unsupported by Mr. Balfour.

Neither does Mr. Balfour admit that Great Britain's trade is on the verge of ruin. He says: "I can find no evidence that we are living on our capital." The Premier thinks that this is because protectionist tariffs are less bad than they look, and protectionist countries are still our most important customers."

He contends, however, that in the future the disadvantages under which Great Britain suffers must increase with the growth and spread of protection abroad and the absorption of new markets.

Practical Inducements.

Mr. Balfour says further: "The only alternative is to do to foreign nations what they always do to each other, and instead of appealing to economic theories, in which they wholly disbelieve, to use fiscal inducements which they thoroughly understand."

The Liberals papers strongly denounce the booklet because they contend that it leaves Mr. Balfour on the protectionist side without in any way settling the issue before the country.

The Duke of Devonshire had a conference lasting two hours with Mr. Balfour. Last night Chief Irish Secretary Wyndham, the Earl of Selborne, and Gerald Balfour also called on the Premier. It is believed that within a day or two the resignation of the Chancellor of the Exchequer, Mr. Ritchie, and, perhaps, of the Duke of Devonshire, will be announced.

Chamberlain's Prophecy.

According to The Daily Mail, Mr. Chamberlain agrees under the stress of necessity not to press his program.

A circumstantial statement is published attributing to the Colonial Secretary the prediction of a general election and the defeat of the Government in the spring. The Conservatives will be in opposition for six months, and then he will return to office with the country at his back.

Scientists Favor Free Trade.

Southport, England, Sept. 16.—(C.A.P.)—The economic science section of the British Association for the Advancement of Science yesterday debated the fiscal problem. Dr. Cunningham of Cambridge advocated the levying of preferential and retaliatory tariffs, but his remarks found little support. The majority of the speakers favored the maintenance of free trade.

Canadians Among the Dead.

New York, Sept. 15.—United States transport Kilpatrick, which arrived Saturday from Manila with bodies of 302 American soldiers killed either in battle or by disease in the Philippine Islands, began unloading its burden of dead yesterday. Among the dead were four Canadians, whose bodies were shipped to respective homes yesterday. They were:

Robert R. Parnell, private, Company G. Ninth Infantry, St. John's, Nfld.

Albert C. Krause, private, Company I, 19th Infantry, Waterloo, Ont.

Wm. H. Forsythe, private, Hospital Corps, Scotland, Ont.

Thomas A. Vicars, 1st lieutenant, 27th Infantry, Kamloops, Yale County, B.C.

Guelph to Goderich.

Goderich, Sept. 16.—The long-talked-of Canadian Pacific Railway from Guelph to Goderich is to be built at last. Engineer Peterson, of Montreal, representing the C. P. R. is here selecting a site for the station. The construction of the line is to be commenced at once.

Eleven Burned to Death.

London, Sept. 16.—A special despatch from Christiania, Norway, says that as the result of a fire in some business premises on Kongens Cade, there yesterday, eleven persons were burned to death and great damage done.

Heading For Canada.

London, Sept. 16.—(C. A. P.)—Lieut.-General Sir Ian Hamilton leaves this week for a tour of Canada.

SUNLIGHT SOAP REDUCES EXPENSE

$5,000 Reward will be paid by Lever Brothers Limited, Toronto, to any person who can prove that this soap contains any form of adulteration whatsoever, or contains any injurious chemicals.

WEDNESDAY, SEPT. 16, 1903.

NORWOOD.

(From our own Correspondent.)

Mrs. Jas. Cumming is visiting her nieces, Mrs. J. Patten, and Mrs. Robt. Easton, of Otonabee.

Miss Flossie Nichol was the guest of her uncle Mr. John Harper, of Peterborough, last week.

Messrs. Buck and Walsh shipped last week one car load of hogs to the Matthews Co., Peterborough. The price paid was $5.60.

Dr. Hall and Mr. Merrill, head-bookkeeper for the Dickson Co., of Peterborough, were the guests at the home of the former's sister, Mrs F. W. Pearce, over Sunday.

The Misses Sherry returned on Saturday night after a month's visit with Napanee and Kingston friends.

Union services of the Methodist and Presbyterian churches were held on Sunday. In the morning the services were conducted in the Methodist church and in the evening in the Presbyterian. The congregations at both services were large. Rev. G. McLennan, Presbyterian minister, conducted the services.

Mr. Arthur Townsend and wife and family, and brother and wife, arrived home last Sunday, after spending two months in England.

Rev. Father Clotter of New York is conducting mission services in the Roman Catholic church this week. There are three services each day—at 6.30 and 9 a.m., and 7.30 p.m. Each service is largely attended.

The Misses Morrison of Hastings, spent Sunday with their sister, Mrs. E. P. Cuffe.

Mr. and Mrs. W. A. F. Campbell, who have been visiting at the home of Mr. J. B. Pearce, for some time, returned to their home in Ridgetown, on Tuesday last. Miss Blanche Pearce, Mrs. Campbell's sister, accompanied them on a lengthy visit.

Miss Maria Weeks of Orillia, who has been the guest of Mrs. S. Girvan for the past month, left for her home on Monday morning.

Mrs. Arthur Rutherford, of Winnipeg, formerly of Peterborough, is the guest of her brother, Dr. S. P. Ford.

Mr. J. J. Crowe, of Hall's Glen, license inspector, was in town on business on Saturday.

A POPULAR APPOINTMENT.

Miss Daisy Seccombe Appointed to Position of Teacher of Piano.

Miss Daisy Seccombe, daughter of the Rev. W. B. Seccombe, of Keene, has gone to Whitby, where she will enter upon her new duties on the teaching staff of the college, having received the appointment as piano teacher in place of Miss Williams, who resigned at the close of last term. Miss Seccombe has been attending Whitby Young Ladies' College for the past three years and we are pleased to know that the college was able to secure a teacher from one of her own graduates. She is also a graduate of the Toronto Conservatory of Music.

She had the honour of carrying off the silver medal at the Ontario Young Ladies' College, Whitby, this year. Miss Seccombe is to be congratulated on her appointment.

SPRINGVILLE.

(From our own Correspondent.)

The attention of the boundry commissioners is again called to the ditch passing through our village. It has become so thoroughly filled up as to cause the water to flow into the grave yard and to lie there in a very objectionable way. It is also injuring the road bed and by flooding the cellars of adjoining places of business makes the councils responsible for damages that have occurred. A prompt looking after this will fulfil the expectations of all concerned.

Rev. Mr. M. E. Wilson and wife of Brooklyn, Ont., have been spending their vacation here, the guests of Mr. and Mrs. David Wilson. Rev. Mr. Wilson occupied Rev. Mr. Yule's pulpit on Sunday last.

Mr. Geo. Gibson of the Canadian General Electric Works, and Mr. Arthur Gibson, of the McAllister Milling Co.'s staff, spent Labour day at their old home.

Mr. Thos. Bidgood, who has been in Pennsylvania, U. S. A., for some years past working in the oil fields, is renewing old acquaintances.

Miss Minnie Clark spent Sunday at her old home.

Quite a number from this section attended the Musical Festival and enjoyed the entertainment very much. Several members of our choir took part.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other powders, as it is both soap and disinfectant. 34

Cortidelli

34 Asiatic Dyes Wash Silks

In Patent Holders.

The colors are fast—the silk the best. Put up in Patent Holders, which prevents waste by tangling or soiling—keeps each shade separate, and automatically measures a correct needleful. Recommended as the only proper way to put up filo and floss silks, and used by art needle workers everywhere.

BOBCAYGEON ROAD LEASED BY C. P. R.

Taken Over New Railway for Period of 99 Years.

Construction Work was Commenced in July and may be Finished in December

The Canadian Pacific Railway yesterday secured a lease for 99 years of the Lindsay, Bobcaygeon and Pontypool Railway, now in course of construction. This will mean much to the Kawartha Lakes district, as the new road will be largely for the accommodation of tourists. The natural beauties of the country to be traversed are well known to many citizens of Toronto, and it is estimated that the line will place these famous resorts within two-hours ride of this city.

The Lindsay, Bobcaygeon and Pontypool railway was promoted by H. J. Wickham, W. T. C. Boyd, and Thos. Stewart. The usual subsidy of $3,200 a mile, for forty miles, was granted by the Dominion Government, while the Ontario Government gave $3,000 a mile for that portion of the road between Bobcaygeon and Lindsay, a distance of 19 miles. The road will run from Burketon, on the line of the C. P. R., to Lindsay and thence north to Bobcaygeon, taking in the chain of lakes. Construction work was commenced in July and has been pushed along so rapidly that the contractor, Mr. E. F. Fequier, expects to have the line completed about the middle of December, in case frost does not interfere with ballasting operations. In any event the line will be ready early next spring.

The regular annual meeting of the Lindsay, Bobcaygeon and Pontypool Railway Company was held in room No. 1, Mail Building, yesterday afternoon, when Mr. W. T. C. Boyd, of Bobcaygeon, was elected president, and Mr. Thos. Stewart, of Lindsay, secretary. Subsequently a meeting of the shareholders of the company was held, when the lease of the road to the C. P. R. for a term of 99 years was formally ratified. The C. P. R. will operate the line as part of their general system.—Mail and Empire.

THE LONDON TIMES

Expresses the Satisfaction Over the Coldstreams' Visit.

A cable to the London Times from Ottawa, Canada, says: "There is much appreciation expressed here of the gracious permission granted by His Majesty the King to the band of the Coldstream Guards to visit Canada with the primary object of playing at the Dominion Exhibition to be held in Toronto. It is understood that on the initiation of Sir Frederick Borden the period of leave is sufficient to admit of other representative cities and exhibitions hearing the band, which will arrive in Canada on September 5th and leave on October 10th. It is the first time that permission of this kind has been granted an army regimental band to visit Canada and it is all the more appreciated.'

The Coldstream Guards will delight the hearts of all loyal Canadians and music lovers by their magnificent playing. With 46 skilled musicians—the full regimental strength—they will be here on Wednesday evening, Sept. 23rd at the new rink.

INDIAN RIVER NEWS.

(From Our Own Correspondent.)

Rev. J. E. Hawkins preached in the Baptist church here on Sunday last. After the service the ordinance of baptism was administered. The reverend gentleman was accompanied by Mr. Fred Anderson of Norwood.

Mr. P. G. Walker, our fruit dealer received a large shipment of fruit on Thursday, Sept. 10th.

Quite a number of our young people attended the concert in the town hall at Warsaw on Thursday, Sept. 10th, under the auspices of the Warsaw Baptist church. Miss Decker, of Auburn, N. Y., and Miss Hall and Master F. Hall, of Peterborough, rendered the evening's entertainment. Miss Decker was very much admired as an elocutionist.

Mr. Wm. Brockinridge will accompany Mr. A. A. Kelly to Warsaw this week, making pastoral calls.

CLYDESDALE.

(From Our Own Correspondent.)

The Clysdale store has changed hands. It has formerly been run by Mr. Bart. Conlan. Mr. James Mahony has bought him out.

Mr. McLean, of Peterborough, was in this vicinity last week.

Mr. Jos. Long has returned home from the north country.

The many friends of Mrs John Amell will be sorry to hear that she is very ill.

Mr. Michael O'Brien, of Indian River, is spending a week visiting his friends in Clysdale.

Miss Nellie Scott has returned home from town.

Mr. Fred Bemegiton, our popular cheese maker, with his wife, spent Sunday in Coe Hill.

Misses Nellie and Laura Scott were the guests of John Menogue on Sunday.

Mr. Maurice Hobbins was the guest of Alex Trotter on Sunday evening.

Messrs. Patrick Menogue and Michael Scott were in Coe Hill on Saturday.

Mr. Patrick Menogue was the guest of Mr. R. Hawkes Sunday.

Miss Kate Tucker is visiting Miss Eva Hawkes.

FALL FAIRS.

The Fairs will be held on the following dates:—

Peterborough Industrial, at Peterborough	Sept. 22-24
East Hastings	Sept. 18-19
Clarke, at Orono	Sept. 21-22
North Hastings	Sept. 22-23
Campbellford	Sept. 24-25
Lindsay	Sept. 24-26
Marmora	Sept. 29
Otonabee, at Keene	Sept. 29-30
L'Amabelle	Sept. 30
Coe Hill	Oct. 1
Millbrook	Oct. 1-2
Harvey, at Lakehurst	Oct. 1-2
Warkworth	Oct. 6-7
Lakefield	Oct. 6-7
Castleton	Oct. 6
Norwood	Oct. 13

SOME HAPPENINGS IN THE NORTHERN TOWN.

Personal Mention and Other Happenings of Interest at Lakefield.

Master Geo. Strickland went to Peterborough on Monday to begin an apprenticeship in the Peterborough branch of the Ontario Bank.

Mr. Thos. Cox and wife, of Mission city, B. C., who were visiting Mr. Cox's mother in the village, have returned to their home. Mr. Cox, who is an old Lakefield boy, says he notices many improvements in the village since he was last here.

Mr. and Mrs. Ger. Fitzgerald and Miss Myrtle, who were visiting in Toronto, have returned home.

Mrs. H. G. Fitzgerald, who has been visiting her mother in Winnipeg for a couple of months, has returned home and reports having had a most delightful trip.

Mr. John Kilbourn and wife, of Montreal, Que., were the guests of Mrs. J. M. Kilbourn in the village last week.

On Monday last Mr. F. X. Fortier was unfortunate enough to have his hand badly torn by the cogs of a windlass, with the result that he is compelled to cease work till the injured member is healed.

Miss Elsie Bell, nurse in training at a Boston hospital, arrived in the village Wednesday for a two months' vacation. Miss Bell has just recovered from an attack of appendicitis and has two months' leave of absence to recover her health.

Senator Cox, of Toronto, passed through the village Thursday en route to Stony Lake.

Rev. Geo. Warren has returned from England after a two months' holiday on the other side of the Atlantic. Mr. Warren is looking much improved by his visit to the mother country and took charge of the services in the Church of England here on Sunday for the first time since his return.

Mr. and Mrs. J. M. Kilbourn are in Brockville this week.

Quite an exciting time was spent with a balky horse on Queen street on Saturday when Mr. Darcy attempted to start for home. His horse refused to move and all possible means were resorted to in order to induce the stubborn animal to move, until some brilliant mind suggested that they shoot a gun off at the animal's ears; so a gun was brought out and loaded. Mr. Darcy got in position in the buggy with the reins wound around his hands prepared for a sudden start. The gun went off and the only sign of alarm from the horse was the falling back of one ear. The buggy was finally removed from the horse as he seemed stationary, and a more willing steed brought forth to take the driver home.

Mr. Chas. Knowles, news editor of the Toronto Telegram, is spending a few days with his brother, Mr. Lorne Knowles, of the Traders' Bank here.

CEMENT WORKS FOR LINDSAY.

A Syndicate to Work Sandy and Ball Lake Marl Deposits.

There is, says the Bobcaygeon Independent, every probability of a large operation being floated for the manufacture of the Sandy Lake marl into cement. A Lindsay syndicate has been formed that has secured the marl of the lake, the land between Sandy and Ball Lake, the Squaw river water power and a ten acre lot for the works between the railway and the river at Lindsay. An expert has made an examination of the marl and the location, and the clay beds near Lindsay, and his report is entirely favourable. The proposition is to dredge the marl from Sandy lake and convey it to Ball lake by electric tram. There it will be separated from all impurities and loaded on scows for conveyance to the works at Lindsay. The company will be floated shortly and the enterprise put under way.

DAY SPRING.

Out from surges of sorrow
Poureth the dawn of day!
A veil hangs o'er to-morrow;
Yet light will chase away
The mist whose chilly pinions
Enwrapp'd thy quiv'ring clay,
And thou shalt greet the day.

Waiteth one lofty measure
Thy faithfulness must fill,
And then the long'd-for treasure,
"Peace, peace, be still,"
May soothe with silent gladness
Worn cordage of the heart;
Bidd'ng the pain depart.

'Tis "trust and wait" what 'er the fate
Increasing day-spring gives.
The sun will gleam adown the stream
That bears where Summer lives.

The following familiar gem of Whittier's floats from the past like music:

"I know not where His islands lift
Their fronded palms in air;
I only know I shall not drift
Beyond His loving care."
—Harriett Isabel Farnum.

Peterborough, Ont., Sept. 5th, 1903.

BLAIRTON.

(From Our Own Correspondent.)

On the 7th inst., Mr. James Russell while cutting peas with his mower dropped the lines for a few seconds to fix something, and his horses, a spirited young team, ran away at a furious rate coming into contact with fences, bars, gate posts, etc. After making their way across fields and lanes they got into the orchard where one horse injured its head with a tree. This was all the damage the tree sustained, but the mower, in its flight, and attempting, as it were, to exemplify the feat of an irresistible coming in contact with an immovable, was transformed into a perfect automohay—but it never will.

Duck hunters have been quite numerous around Crow Lake this season, but ducks being never before known to be so scarce and the shooting was never so meagre, and never before were ducks less in it.

Railway Notes.

An official circular issued by F. H. McGuigan, of the G.T.R., headquarters staff, appoints U. E. Gillen trainmaster, Belleville, to the position of assistant superintendent of the fifth, sixth and seventh districts, which extends from York to Montreal, with headquarters at Belleville. This appointment will do away with the position of trainmaster on the fifth district, which reaches from Brockville to Montreal, including Point St. Charles yard.

HONOUR ROLLS.

S. S. No. 4, GALWAY.

The following is the honour roll for August:

Class IV—Gertie Allen, Willie Beckett. Class III.—Edith McMahon, Gertie Mahoney, Jno. Collins, Dannie Allen, Mary Curtain, Harry McMahon. Class II.—Martha Flaherty, Will Collins. Class Pt. II.—Lizzie Mahoney, Robert Curtain, Mary McGee, Annie Beckett, Gertie Allen. Class Pt. I.—Katie McGee, Norman McMahon, Vincent McGuire.

COTTESLOE SCHOOL.

The report of S. S. No. 1, Dummer, for the two weeks in August is as follows: Sr. IV.—J. Clysdale, Bella Tedford. Jr. IV.—Barbara Kidd, Eva Bell, M. Kidd, L. Rutherford. Sr. III.—Fanny Cuffe, H. Beavis, E. Moore, O. Kelly, E. Bell. Sr. II—B. Nelson. Jr. II.—William Batten, H. Clements, P. Anderson, H. Anderson. Sr. Pt. II.—Beatty Rutherford, C. Moore, H. Calder, H. Rutherford, N. Rutherford. Jr. Pt. II—Ida Carlow, T. Kelly, M. Cuffe, D. Borland, A. Nelson, M. Tucker. I.—E. Hendren, A. Batten, J. Bell, G. Webster, H. Moore, G. Rutherford.

P. T. BARNUM

Mr. Barnum, the great circus king, said: The only way for any business man to get along is to advertise his business. He doesn't recommend copying; No 1. He says paint your name and business in the most prominent place and do not stop at that, but paint it as many times as you can find conspicuous places. Now pictorial signs as flashy as the artist can produce is the best ways and means. The great show man said don't try to please your next door neighbor. He remarks, "I have often heard it said, 'Mr Smith has a sign and it is like so and so; I think I will have one the same.' Now that is the greatest mistake a business man ever made. Be original always.'" Get Fred Cook to paint your signs to suit your business, as he is original with his way of advertising. He doesn't copy nor does he intend to, and that is why Cook does the sign trade of the town. He is always ready to submit a design and always guarantees not to disapoint you. Just ring up 'phone 119 and order your exhibition signs.

MORTGAGE SALE

—OF—

DOUBLE DWELLING HOUSES.

Under and by virtue of the powers contained in a certain mortgage, which will be produced at the time of sale, there will be offered for sale, by public auction, on WEDNESDAY, the 30th day of September, 1903, at the hour of three o'clock in the afternoon, at the MUNRO HOUSE, in the Town of Peterborough, by John Haggart, Auctioneer, the following property, known as Street Numbers 13 and 15 Cross street, Peterborough, and which said property is more particularly known and described as part of Lot Number 9, shown on registered plan No. 33, for the said Town of Peterborough, more particularly described as follows, that is to say, commencing at the north-east angle of the said lot, thence southerly along the eastern limit of said lot 45 feet, thence westerly parallel to the northern boundary of the said lot to the rear of said lot, thence northerly 45 feet parallel with Cross street to the northern limit of said lot, thence easterly in a straight line to the place of beginning.

On the said property there is said to be erected on a stone foundation a double two story frame dwelling house; cellar under the front part of each house. Front part of each house being about 32 feet by 20 feet, with a one story kitchen attached to each house, on a stone foundation, about 18 feet by 12 feet, and a summer kitchen about 15 feet by 10 feet. Each house has shingled wood shed annexed to it about 12 feet by 15 feet. The said buildings are said to be in good state of repair and there is a verandah along the front of the house and a well on the premises.

TERMS—10 per cent. of the purchase money to be paid at the time of sale, and balance to be paid within fifteen days thereafter without interest.

For further particulars and conditions of sale, apply to

STRATTON & HALL,
Vendor's Solicitors,

JOHN HAGGART, Auctioneer.

Dated at Peterborough, this 27th day of August, 1903.

PROVINCIAL JUDGES

The Dominion of Canada Must Act As the Provinces Decide.

THE SALARIES BILL PASSED

The French Steamship Line Subsidy Resolution—"Mountains of Information" on Grand Trunk Pacific Route Brought Down—Bill Confirming the Agreement With G.T.P. Railway Further Considered.

Ottawa, Sept. 16.—When the House opened yesterday Sir Wilfrid Laurier, in accordance with his promise of a few days ago, laid upon the table a compilation of the information in possession of the Government regarding the resources of the country between Quebec and Winnipeg along the line of the Grand Trunk Pacific Railway. It is a blue book of 180 pages, prepared by Dr. H. M. Ami, of the Geological Survey. A map of the Dominion also illustrates the route from Moncton to Port Simpson. The route described is divided into twelve sections, and a summary of reports of Dominion, Provincial and independent explorers quoted. The report presents in a most convenient form a great deal of the information which has led the Government to their optimistic view of that portion of Canada.

Progress Was Marked.

Marked progress was made with Government business yesterday. The bill providing the salaries for the Judges of the new Exchequer Court of Ontario was passed through its final stages and sent up to the Senate.

During the debate the leader of the Opposition suggested that some veto power should be enjoyed by the Dominion, which would enable the Federal Parliament to check the unnecessary increase by the Provincial Legislatures of the judiciary. He also expressed the opinion that a sufficient sum was now paid in the aggregate to provide an efficient judiciary. The Premier, while admitting the defects of the existing system and the advisability of changing it, pointed out that the Dominion could not question the judgment of the Legislatures upon this point, and had no option but to provide the salaries necessary.

Grand Trunk Pacific.

The Committee concluded the consideration of the Government's bill confirming the agreement with the G. T. Pacific Railway for the present. All the clauses have been debated, but a number of the more important ones stand for further consideration.

The resolution providing a subsidy for a direct steamship line to France was reported.

Workhouse For McGreary.

Dublin, Sept. 16.—At the weekly meeting yesterday of the Donegal Board of Guardians, a man named McGreary, who said he had returned to Ireland after making a fortune in America, applied for admittance to the workhouse as a paying boarder, on the ground that he found the hotels in the northwest of Ireland not to his liking. The application was granted, and McGreary drove to the workhouse in a carriage and pair. He pays $5.25 per week for his board.

A Partial Failure.

St. John's, Nfld., Sept. 16.—Dr. Grenfell, the superintendent of the medical mission in Northern Labrador, reports the partial failure of the Labrador expedition under Col. Willard Glazier, of New York, which has been attempting to enter the unknown territory towards Ungava Bay. The expedition has been unable to secure a sufficiently large craft to convey them north.

For Colonial Defence.

London, Sept. 16.—(C.A.P.)—The last budget speech of Hon. Richard Seddon, Premier of New Zealand, contains an item not mentioned in the telegraphed summary. He suggested an early Imperial conference of representatives of the colonies in consultation with Lord Roberts and the Admiralty for the specific purpose of placing the defence of the Empire on a more satisfactory basis.

Sam Jones Bruised.

Cartersville, Ga., Sept. 16.—The Rev. "Sam" Jones, the fighting Methodist evangelist, who once whipped the Mayor of a Texas town, was badly bruised yesterday in a personal encounter with Walter Akerman, postmaster of Cartersville. Mr. Jones, from the pulpit, denounced Mr. Akerman for selling wine.

Put Up For Besson.

Ottawa, Sept. 15.—George Besson, who pleaded guilty last week to the charge of stealing $460 of the funds of Court Royal Albert, Canadian Order of Foresters, was allowed out on suspended sentence yesterday. His friends made restitution for the amount stolen, and, this, along with Besson's previous good character, led the judge to be lenient.

Eighteen Petitions Filed.

Winnipeg, Sept. 15.—Two more election petitions have been filed by the Liberal party against Conservative members. One is against Harvey Elgin Hicks, the member for Lansdowne, the other is against Alfred Henry Carroll, member for South Brandon. Altogether 18 petitions have been filed up to date.

Robbers Getting Bold.

Buffalo, N.Y., Sept. 15.—The Medina ticket office of the New York Central Railroad was robbed by burglars early yesterday, and between $500 and $600 was stolen. Jerome Brown, a telegraph operator, was knocked senseless.

Ottawa Fair Opened.

Ottawa, Sept. 15.—The Central Canada Exhibition opened yesterday. The attendance was light up to noon, but picked up later. The exhibit is the best in years.

Conservative Organizers Resign.

Toronto, Sept. 15.—A. W. Wright and T. W. H. Leavitt, the Conservative organizers, have resigned and their resignations have been accepted.

MR. FIELDING'S BILL.

Will Compel Auditor-General to Accept the Treasury Bond Regulations—The Grand Trunk Pacific Debate.

Ottawa, Sept. 15.—The chief feature of the proceedings in the House of Commons yesterday was the introduction by the Minister of Finance of a bill to overcome the difficulty which has been created by the refusal of the Auditor-General to accept the new regulations adopted by the Treasury Board. Mr. Fielding explained that the regulations designed to prevent peculation were based upon the recommendation of the special commission appointed to investigate the Martineau defalcation. The Auditor-General has taken a position antagonistic to the regulations, and the difficulty could only be cured by legislation. Mr. Clancy offered the objection that it was a dangerous step for Parliament to clip the powers of the Auditor-General. Mr. E. F. Clarke brought to the attention of the House the resolution passed by the grain section of the Toronto Board of Trade in reference to the delay in fixing the grain standards for Ontario. The Premier promised to call the attention of the Minister of Trade and Commerce to the matter. The remainder of the day was spent in considering the Government's bill for the construction of a national transcontinental railway, and substantial progress was made, an amendment by Mr. Barker, compelling the G. T. R. to pay cash for the common stock of the Grand Trunk Pacific, being voted down.

The morning prayers in the House were barely over when Mr. R. L. Borden entered and took his seat, after an absence of a couple of weeks. He was greeted with loud applause from both sides.

Mr. Borden's Amendments.

Mr. Borden then moved two amendments as additional sections to Clause 7. The first provides that the Government shall not be required to carry out any conditions of agreement until the Grand Trunk Railway Company has subscribed for the common stock of the Grand Trunk Pacific Railway Company, payable in cash at par for not less than $24,900,000. It also provides that the Grand Trunk Railway Company shall hold this stock during the entire term of the lease, and so long as any bonds guaranteed by the Government under the terms of the agreement shall remain outstanding and unpaid. No pledge, transfer or conveyance of any part of stock during that period shall be valid.

The second amendment provides that the Government shall not be obliged to carry out any conditions of contract until the Grand Trunk Railway Company covenants to guarantee the bonds of the Grand Trunk Pacific Railway Company for the balance required to complete the western section.

It makes one other provision that the Grand Trunk Pacific Railway Company, so long as its common stock is held by the Grand Trunk Railway Company, shall carry out all the conditions of the contract.

After speeches by Mr. Borden and Sir Wilfrid Laurier, the amendments stood over at the request of the Premier.

On section 11, governing the employment of workmen, Mr. Puttee of Winnipeg appealed for the protection of employes.

Clause 11 was then carried.

Clauses 12, 13, 14 and 15 were carried without opposition, and the committee rose and reported progress.

CAUSE FOR THANKSGIVING.

Thanksgiving Day and Prorogation of Parliament to Be Simultaneous Events.

Toronto, Sept. 15.—Globe Special.—Ottawa, Sept. 14.—The expectation now is that the Grand Trunk Pacific will occupy four days longer and the redistribution bill a similar period of time in the House. That means a fortnight as there are only five working days in the Parliamentary week. After the two measures are disposed of the supplementary estimates and the railway resolutions will be brought down. The supplementaries, with the balance of main estimates remaining unfinished and the railway resolutions, will take another fortnight to put through. Apparently, therefore, it is useless to expect prorogation before Oct. 15.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured, by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address

F. J. CHENEY & CO., Toledo, O.

Sold by druggists, 75 cents.

Hall's Family Pills are the best.

Charge of Manslaughter.

Montreal Sept. 15.—Michael Connolly, so well known in connection with Canadian Government contracts, were arrested yesterday on a charge of manslaughter. He is the owner of the tug Mersey, which sank with five men a month ago below Quebec. The coroner's jury lays the blame of the deaths on Captain Gagnon, Mate Barras, and Mr. Connolly. Engineer Lamothe told different stories at the inquest. He said the captain, mate and himself took the only boat and rowed away, leaving the five men to their fate. Gagnon and Barras are in Rimouski jail.

3,000,000 Voters Represented.

Dresden, Saxony, Sept. 15.—Representatives of three million Social Democrat voters, more than a quarter of the entire German electorate, began their annual congress yesterday. Gaylord Wilshire, of Toronto, Canada, congratulated the Social Democrats of Germany on their organization and electoral triumphs.

Accidentally Killed.

Quebec, Sept. 15.—Maurice Power of this city was accidentally killed at Seven Islands on the north shore of the Lower St. Lawrence.

Price of Flour Up.

Montreal, Sept. 16.—The large Manitoba Milling Company, which made the advance in flour on Saturday last from $4.50 to $4.68 for patents, and from $4.20 to $4.35 for seconds, have now made a further advance, making prices $4.80 for patents, and $4.50 for seconds. They have also advanced the price of shorts to $20 a ton.

Elections Caused Fatal Rioting.

Athens, Sept. 16.—A demonstration in connection with the municipal elections here was followed Monday night by hand to hand street fights. Fourteen persons were either killed or wounded.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

PRISONER IS AFTER MR. BEVITT.

George Rowley, Now in Kingston Penitentiary, Laid the Information.

St. Thomas, Sept. 15.—A warrant has been issued for the arrest of W. R. Bevitt, who, it is said, acted as agent for George Rowley, the defaulting manager of the Elgin Loan Company, at present serving a 12 year term in Kingston Penitentiary. Mr. Bevitt has been out of the city for some time, and the police claim that his whereabouts is a mystery to them.

The information against Mr. Bevitt is laid by Mr. Rowley, and charges him with failing to account for sales made by him for Rowley in certain stock deals carried through by Bevitt for Rowley, but in Bevitt's name.

All of the money realized by Bevitt on the deals, it is alleged, were not accounted for by him. According to the charges, the total amounts given by Rowley to Bevitt on the deals was $14,950, and the latter realized $11,268.75.

BIDS UNACCEPTABLE.

Tenders For 3 1-2 Per Cent. Temiskaming Bonds Not Satisfactory.

Toronto, Sept. 15.—Tenders were opened on Saturday for the issue of 3½ per cent. bonds for $2,750,000, guaranteed by the province, for the construction of 110 miles of the Temiskaming and Northern Railway, but it is probable that none of them will be accepted. Owing to the condition of the money market, the tenderers would not offer par value for the bonds, and as it will require the full amount of $2,700,000 for the construction of the railway, at $25,000 a mile, a new issue will probably have to be made.

The Bank of England rate is now 4 per cent., and is likely to advance to 4½ per cent. Many first-class securities, including bonds, are selling on a 6 per cent. basis. The Temiskaming Railway Commission will meet on the 26th.

Redmond Optimistic.

London, Sept. 15.—John Redmond, M.P., speaking at Aughrim, Wicklow County, Ireland, yesterday said the Irish party would find an entirely new situation when Parliament next met. The English parties would be broken up, and the Irish party would wield a power such as it never before possessed. He counselled a continuance of the policy which had resulted in securing the Irish Land Bill, which he valued above all as opening the way to attaining an Irish Parliament.

Perils of Peaceful Life.

Ottawa, Sept. 15.—Adelard Proulx and Arthur Morin, carpenters, were crushed yesterday by a falling archway on the Thackray and Davidson new mill, under course of construction. They were removing the frame support from a brick arch when the arch collapsed. Shortly after John Riopelle, a carpenter, made a misstep and fell 18 feet, fracturing his thigh.

Jews Forced From England.

London, Sept. 15.—As a result of the recent anti-Jewish agitation among the laboring classes at Cardiff, Wales, and in its neighborhood, one hundred Jewish employes of the Dawlais works left Merthyr Tydvil yesterday on their way to America.

Company May Erect Poles.

Toronto, Sept. 15.—In the second round of the fight between the city and the Bell Telephone Company, regarding the city's right to control the erection of poles and stringing of wires on the streets, the phone company wins, but the fight will be resumed with round three in the Supreme Court. Two out of the five Judges favored the city.

Want King of Their Own.

London, Sept. 15.—The Hungarian political crisis has become so acute that the abdiction of Emperor Francis Joseph, as King of Hungary, is freely discussed in the latter country, and although no party leader is willing to openly discuss the probability there is a strong feeling in favor of Hungary's right to choose its own King.

Get Bonus From Renfrew.

Renfrew, Sept. 15.—The bylaw to loan $18,000 to the Cumming Manufacturing Company was carried here yesterday by a vote of 294 to 29. It was 50 more than the necessary three-fifths vote. The company manufactures woodenwares and steel utensils, and will employ fifty hands at the start.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity. All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Post Office, Bowmanville, Ont," will be received at this office until Friday, Sept. 25, inclusively, for the construction of a building for Post Office, etc., at Bowmanville, Ont., according to plans and specifications to be seen at the present post office, Bowmanville, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied, and signed with the actual signature of the tenderers.

An accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tender must accompany each tender. This cheque will be forfeited if the party tendering decline the contract or fail to complete the work contracted for and will be returned in case of non-acceptance of tender. The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, Sept. 5th, 1903.

Newspapers inserting this advertisement without authority from the Department, will not be paid for it.

LUMBER WANTED

Highest prices paid for all kinds of Lumber. Apply to H. C. STABLER, 304 George street, or Box 436, Peterborough.

A TRUE STORY.

How a Young Wife Regained Her Health and Beauty.

W. E. Birch, Afton, Va., an extensive fruit grower of that place, writes the following letter to the Peruna Medicine Co., of Columbus, Ohio. We print the letter in full:

Afton, Va., June 4, 1900.

The Peruna Medicine Co., Columbus, O.:

Gentlemen—"The country is so flooded with patent medicines of every kind that are worthless and a humbug, that I for one, am glad to be able to say I have found one that is everything and more than is claimed for it.

"My wife was very much run down and out of sorts in every way. She had a pelvic disorder which left her very weak, nervous and no appetite at all.

"One day I happened to be at my father's store, S. A. Birch, Coresville, Alb county, Va., and noticed your medicine he had there for sale.

"I thought it might help my wife, so I brought a bottle of it home and within a week she commenced to eat and now she is hungry all the time and not half the medicine has been taken. We both agree that it beats any medicine to bring on an appetite and to put the nerves in good shape that we have ever had anything to do with. We had our family doctor to give her medicine and he did all he could, but she did not improve the least. She has consumption in her family and she was in such bad shape; so run down, nervous, weak, and could not eat, that I had begun to get very uneasy, but your medicine made an entirely new woman of her. I believe she eats and feels better now than she has for years.

"I have not the slightest doubt but that your medicine has saved her from a long spell of sickness, if nothing more. All my family had begun to get uneasy, but, of course, she did not know it and I have only just told her of it since she has improved so much. I had no idea it would do half what it has and don't think there is another medicine made that will begin to compare with it."—W. E. Birch, Fruit Grower, Afton, Alb county, Va.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

The Oxford Hot Water Heater was the first boiler of this type. We placed it on the market after years of study and experience in house heating. It is not only the original idea, but in it that idea has been brought to the greatest perfection. In spite of all kinds of competition and imitation, the

Oxford Hot Water Heater

has continuously held its place in the front rank with an ever-increasing business. It is keeping Canadian homes at a more comfortable temperature than all other makes combined. If your dealer cannot supply you, write to us direct.

WEDNESDAY, SEPT. 16, 1903.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Miss Norma Logan has returned home after a pleasant visit to Toronto.

Miss Mable Wareham has returned from spending a pleasant vacation in Portland, Maine.

Miss Edna Waters of Norwood, was in town yesterday, the guest of her friend, Miss Ryan.

Mrs. R. J. Cavanagh and Mr. J. F. Farish were married quietly at Toronto on Sept. 12th, 1903.

Mrs. R. J. Frost has returned home after a pleasant visit with friends in Orilla and Midland.

Mrs. J. A. Sharp has returned after spending a few days with friends in Toronto and Hamilton.

Miss Lillian White has returned home after a pleasant visit with friends in Toronto and Hamilton.

Miss Bessie Crowe returned last night from Toronto, where she has been spending a two weeks' vacation

Mr. D. O'Brien of Clydesdale, has returned home after spending a week in town, the guest of his uncle, Mr. D. Hobbins.

Misses Aggie and Maud Burns, have returned home after a pleasant visit with friends in Rochester and Toronto.

Mr. Robert Fair returned to town last evening from Millbrook, where he had been in attendance on his sister's funeral.

Mr. R. J. Lynch has closed his cottage, "Yarrow Brae," at Stony Lake, and with his family has again taken up his residence in town.

Miss Ada Miller, Miss Stanger, and Mr. J. H. Miller, are guests at Mr. W. Miller's beautiful summer home, Niagara-on-the-Lake.

Mr. Bert Richardson, of the head office of McMillan & Maguire, Toronto, stock brokers, has been temporarily transferred to Peterborough to act as operator for the local branch of that office in the place of the late Mr. Maguire.

Miss Maud Macfarlane, Homewood avenue, who went to South Africa as a member of the staff of Ontario teachers, is on her way home. She has advised her family of her arrival at Boston on the steamer Canada, accompanied by Miss Hoover, of Toronto. Miss Macfarlane will arrive in Montreal to-day and reach Peterborough to-morrow evening. Her many friends will be glad to welcome her home again safely after the many perils by sea and land she must have encountered.

St. Johns Festival.

Rev. Derwyn T. Owen, of St. James' Cathedral, Toronto, will be the preacher at St. John's Thanksgiving Festival to-morrow evening. Mr. Owen was formerly a resident of Peterborough, and no doubt many of those who knew him then will be pleased to hear him again.

Pastors' and Deacons' Conference.

The pastor's and deacons' conference of the Peterborough Baptist Association has been in session for the past two days at Hubble Hill. Rev. A. H. Brace, of the Park street church, preached the evangelistic sermon last evening. The sermon on "Doctrine" will be delivered by Rev. J. Bastow, M.A., of the Murray street church this evening.

An Enterprising Builder.

Mr. John Carlisle has set an example, which, in the interests of the town, it would be well if more would follow. He has purchased a tract of land from Mr Georg. Duncan on the site of the old cricket grounds in Ashburnham, and will at once commence the erection of a five-house terrace. During the past season Mr. Carlisle has erected a number of houses which have done much to relieve the house famine which appears to exist.

A STATEMENT BY CORONER GRAY

Completely Relieves Ormond and Walsh from Blame.

Death of Mr. W. W. Maguire not Caused by anything contained in Seidlitz Powder Purchased from Drug Store.

The following statement signed by Dr. Gray, coroner, but confirms the opinion generally held that no blame is in any way attached to Ormond & Walsh in connection with Mr. Maguire's death:

This is to certify that having obtained all the seidlitz powders in the possession of Ormond & Walsh, of the Town of Peterborough, numbering 261, out of the 300 procured from the Toronto wholesale house and from which number the late Mr. Maguire purchased two, I have tested with the greatest care and with the following results: I first took the seidlitz powders in pairs and made concentrated solutions in clean, aseptic vessels. After rendering the solution neutral by adding the required reagents I then selected the most delicate tests for opium and its salts. By adding ferric chloride to portions of the above solution I failed to obtain the red colour which would have been produced had meconic acid been present. Taking other portions of the solution and adding nitric acid, I failed to obtain the red colour which would be produced if morphine were present. I might just state here that the above two tests are very delicate and would have shown either opium or morphine if they were present. I also tested for strychnine and found no trace. I took the powders in their dry state as taken from the containing papers and found them in perfect condition. In conclusion I might state that, after examining the said powders and the test I applied that the said seidlitz powders contained no injurious matter of any kind and completely exonorates Ormond & Walsh from any responsibility or blame of the death of the late Mr. Maguire.

(Signed.)
J. W. GRAY, M.D.

Dated at Peterborough, this 16th day of September, 1903.

THE CITY OF PETERBOROUGH

Laid up for the Winter After a Most Successful Season.

The steamer City of Peterborough is now laid up for the winter, after one of the most successful seasons in her history. Captain Lane has had a most successful season. His experience entitles him to boast that his season has closed without a break or an accident. Captain Lane, by his obliging demeanour, and care for the comfort of his passengers, has won a good reputation, and has done so without sacrificing in any way the interests of his employers. Therefore it is natural that at the close of the season he should retire to his well-earned winter rest with general satisfaction — the steamer company satisfied, Captain Lane himself satisfied, and the public well pleased.

THE CHARGE DISMISSED.

Mrs. Varty Acquitted of Charge Made by her Husband.

County Police Magistrate Edmison was at Havelock yesterday investigating the charge made against Mrs. Harvey Varty of having attempted to poison her husband. After hearing all the evidence to be presented the charge was dismissed and Mrs. Varty honourably acquitted. There was no evidence to support the charge whatever, and Mrs. Varty is being warmly sympathised with in having been arrested on a charge which had no foundation, except in the criminal imaginations of her husband, who is described as being a lazy, shiftless being. Mrs. Varty, on being acquitted, was taken by her brother, who would not allow her to go back to her husband. Mr. R. E. Wood, County Crown Attorney,

NEWS NUGGETS.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—A special attraction this week is the Silk Waist Demonstration in the Turnbull Company's Cloak Room on Thursday, the 17th. 2d

—Will the party who took the ladies' wheel from outside the Examiner window yesterday return same at once and avoid trouble.

—There will be a meeting of the Ashburnham Board of Health tonight at eight o'clock in the Council Chamber. Anyone having a complaint of unsanitary conditions is advised to attend.

—A cordial invitation is given to all to visit the demonstration in the Cloak Room of the Turnbull Company, on Thursday, Sept. 17th, by the New York Silk Waist Company. 2d

—Call and look over our stock of Purses and Hand Bags. Some new lines at remarkably low prices. By the way, we are selling fishing tackle at cost to clear. Sailsbury & Co.

—At a largely attended meeting of the Charlotte street Ladies' Aid held on Tuesday, it was unanimously decided to hold a musical and literary entertainment in the lecture room of the church on the evening of Thanksgiving Day. Particulars later.

MUSIC AND DRAMA.

The Killin-Keough Concert Company, comprising Mr. and Mrs. Killin-Keough, Miss Brown, pianiste, and Miss Terry, elocutionist, of New York, left on the 11.45 G.T.R. train for Brighton, where they will give an entertainment for two nights in the opera house. The company will soon commence a tour and has already been booked for a number of nights in different cities both east and west of Peterborough.

An event of special moment will be the advent of the Coldstream Guards' Band to Peterborough, when a concert will be given in the new rink. The band without doubt is the finest in the British service, even excelling Dan Godfrey's famous musical organization which created such a furore some years ago. The presence of Miss Howard, a contralto singer of especial merit will, it is felt, also help to attract a large number to the concert.

FUNERAL OF THE LATE MISS FAIR.

Took Place at Millbrook on Monday Afternoon.

The funeral of the late Miss Fair, whose death occurred on Friday, took place at Millbrook on Monday afternoon at 1.30 from the residence of her father, Mr. William Fair. After a short service at the house conducted by Archdeacon Allen, the remains were transferred to St. Thomas' Episcopal church, where the service was conducted by Rev. W. S. Allen and Rev. Mr. Spencer, Millbrook, assisted by Rev. J. C. Davidson and Rev. E. A. Langfeldt of Peterborough. At the graveside in St. Paul's church cemetery, the last funeral rites were performed by Archdeacon Allen. Rev. J. C. Davidson also took occasion to pay a tribute to the devout Christian character and beautiful life of the late Miss Fair, who had been a member of his church for a number of years. The pall bearers were Mr. Robert McCamus, Mr. Wm. Campbell, Mr. Robert Wood, and Mr. Jas. Wood, of Millbrook, cousins of the deceased, and Mr Charles Needler and Mr. Harry Allen. Among the mourners was Rev. Jos. Fennell of Hamilton, a relative of the family.

The funeral was a large one, and was an evidence of the esteem in which the deceased lady was held by her large circle of friends.

At the Sunday morning service in St. John's, the Rector, Rev. J. C. Davidson, made a feeling reference to the death of Miss Fair, and in announcing a hymn which was sung especially in commemoration of her, he said that the whole congregation must feel deeply the removal from their midst of Miss Fair, particularly in view of the active interest which she had displayed in all departments of church work. She had been a consistent Christian lady and her loss would be severely felt.

PETERBOROUGH COUNTY RESIDENT'S DEATH.

Mr. W. G. Greer, of Bethel, has Passed Away.

The Dundalk Herald of Thursday, September 10th, contains the following:

The Herald last week noted the serious illness of W. G. Greer, of Bethel. This week it is our painful duty to announce his death, which occurred last Thursday. Mr. Greer has been in failing health for the past two years, but it was only a few days before his demise that he was considered dangerously ill. The immediate cause of death was stomach trouble and his illness throughout was borne with Christian patience. His closing hours were peaceful and happy. The deceased was born in Peterborough County and came to Proton 23 years ago. He was a quiet unassuming man and was highly respected by all who knew him. He was sixty years old. The funeral on Saturday afternoon to Bethel Cemetery was largely attended and the burial ceremony was conducted by Rev. N. Wellwood. He leaves to mourn his departure a widow, one son Fred, at home and two daughters, Lena, at home, and Mrs. Elcombe of Campbellford. Mrs. Reid, of Peterborough, Mrs. Taylor of Otonabee, Mrs. Bell and Miss Jennie Greer, of Peterborough, the four sisters of the deceased, were present at the funeral, as well as Mrs. Walsh, of Millbrook, Mr. Evans, Tiverton, and Chas. Evans, Toronto."

Mrs. Nathan Nicholls, McDonel, street, is also a sister of the deceased.

PLEASANT EVENT AT MARK STREET.

Social Evening Enjoyed at Methodist Parsonage.

A delightful social evening was spent at Mark street Methodist parsonage last evening by about sixty young people of the church and a few of their friends. The lawn was lighted for the occasion by electricity and, after the heat of the day proved to be just the place for comfort. The games were were joined in by all most enthusiastically. After refreshments were served all joined heartily in singing many familiar pieces, led by Mr. Millar on the cornet, who also delighted the company with his cornet and vocal solos. Other interesting items of the programme were a recitation by Mrs. Lewis, songs by Miss Sharpe and mouth organ solos by Messrs. Hooper and McKee. At a late hour the company disbanded, all in words of warm appreciation declaring their indebtedness to Mr. and Mrs. Lewis for a most enjoyable evening.

LOCAL LEGAL.

In the case of O'Shea vs. O'Shea, in which an appeal was made in the Divisional Court from a judgment given in the Single Court, by Mr. Justice Street, on the construction of a will, the appeal was dismissed with costs. Mr. R. R. Hall of Peterborough, appeared for the appellant, and Mr. G. Edmison, K. C., opposed the appeal.

CORDAGE COMPANY EMPLOYEES EXCURSION.

Successful Trip to Jubilee Point Yesterday.

Feature of day Address by Officials of Company—Last Excursion of the Season.

The second annual excursion of the employees of the Canadian Cordage Company was held on Monday at Jubilee Point, the trip being made by the steamer City of Peterborough.

The excursionists to the number of about 150 embarked on the steamer shortly after 8 o'clock, and enjoyed a pleasant sail down the river in the delightful September day. They arrived at the Point in good time, and after dinner had been served a programme of sports was run off, the winners of which were as follows:—

Boys' 100 yd. race—T. Graham, Leplante.

Putting shot.—Vance Wilson, J. Perdue.

Three Legged Race.—Dave Belland and H. McGee; Walter Jackson and J. Rouille.

Potato Race, Girls.—Mamy McIntee, Lottie Scott.

Men's 100 yd. race.—D. Belland, W. Jackson.

Tug-of-War. — Preparation Department vs. Mill, resulting in a victory for former by 2 pulls to 1.

Girls' Race.—Mamy McIntee, Maud Chapman.

Standing Broad Jump.—W. Jackson, C. Bryans, H. McGee.

Girls' Tug-of-War. — Preparation Department vs. Spinning and Baling Departments, resulting in a victory of the former.

Married Men's Race. — Archie Moore, Jack Pollock.

Married Women's Race.—Mrs. T. J. Perdue, Mrs. J. Irwin.

A special feature of the day's pleasure was an informal meeting held in the pavillion during the afternoon at which brief addresses were given by Messrs. J. P. Connors, Superintendent; A. S. Sykes, Manager, and Adam Hall, President, in the course of which the present good feeling existing between the employees and the officials of the company was remarked, and the great benefits resulting to both, from a mutual co-operation were enlarged upon. The addresses of the officials were much appreciated by the employees, as was also their presence on the excursion. The Cawthorn Orchestra provided music for the day, and their playing was thoroughly enjoyed.

A notworthy feature of the excursion was the excellent conduct of all who participated in the event, and it is doubtful if a more thoroughly well behaved company has ever spent a day at Jubilee Point. The return trip was made in the evening and the journey was enlivened by music and dancing and the boat reached her wharf after carrying the last excursion of 1903, with every person on board fully convinced that the last had also been the best.

THRESHING ACCIDENT.

Young Man Killed in Hope Township.

A fatal accident is reported to the Examiner as having occurred yesterday at Oak Hill, in Hope township, near Elizabethville. The victim of the accident is a young man about 22 years of age, Lewis Trew, cousin of Mr. D. V. Trew of Springville. The accident which caused the death of the young man occurred while a threshing machine was being taken up a steep embankment into a barn. The machine was being hauled in by the rear, to which a team of horses was attached. The unfortunate young man was guiding the machine by the tongue when, it is stated, one of the wheels striking some object, he was thrown before them, one of them passing over his breast, or, as is more probably the case, something gave way and the machine descending, caused the accident. He died about two o'clock, one and a half hours after the accident occurred.

THE LATE WILLIAM DIXON.

Reference to the Death of a Former Peterborough Citizen.

The Maple Creek, (Assa.) Signal, has the following in reference to the death of William Dixon, a former well known dry-goods merchant of this town, and a brother of Mr. A. E. Dixon, barrister. The death occurred on September 1st. The Signal says:

"On Tuesday afternoon about 4 o'clock there passed peacefully away at the family residence on Harder street, Maple Creek, a well known and highly respected citizen in the person of William Dixon, at the age of 60 years and 8 months.

"About two years ago he contracted a cold, and being a strong man paid no attention to it. Time passed on and instead of the cold leaving, it developed into that dreaded disease, consumption. He had not, however, been confined to his bed for any length of time, being able to take short walks up to almost the last. Three children are left to mourn the loss of their father, viz, Mrs. A. H. Ball and Miss Maggie, at home, and J. R. H., at Belle Plain, who have the sympathy of all in their bereavement.

"The late William Dixon was born near Peterborough, Ont., on Jan. 23, 1843, where he spent his boyhood days. After his marriage he lived at Lakefield for a number of years and shortly after the death of Mrs. Dixon, which occurred there in 1881, he came to the Northwest, and settled near Whitewood, Assa., four years later coming to Maple Creek, where he has since resided.

"The funeral took place from his late residence to-day, (Friday) at at 2.30 o'clock p.m., to the Maple Creek cemetery."

Begun in Earnest.

For the benefit of country as well as town shoppers, attention is directed to the Peterborough Bookstore's Red Ticket Sale, now under full headway. Everyone looking for money-saving chances should embrace this opportunity. Vastness of stock a feature. In buying at the Peterborough Bookstore there always is the pleasing satisfaction of knowing that goods are perfectly new as well as up-to-date. A. H. Stratton & Co.

MARRIED.

FARISH-CAVANAGH, at Toronto on Saturday, September 12th, 1903, Mr. J. F. Farish to Mrs. R. J. Cavanagh, both of Peterborough.

MOWRY — PATERSON. — At the residence of the bride's father, Mr. A. W. Paterson, Dalhousie street, by Rev. J. G. Potter, on Wednesday, September 16, 1903, Miss Agnes Paterson to Mr. Orlando Mowry.

PRETTY WEDDING AT "HILL-CREST."

Nuptials of Mr. W. Fred Skitch and Miss Eva Powell, Both of Town.

"Hill-Crest," Warsaw Road, the residence of Mr. George W. Powell, was a scene of a very pretty wedding at one o'clock this afternoon, when Miss Eva L. Powell, eldest daughter of Mr. G. W. Powell, was united in marriage to Mr. W. Fred Skitch, son of Mr. Wm. Skitch, of Lindsay. The ceremony was performed under a beautiful floral arch, the room also being decorated with ferns and cut flowers. The first bridesmaid was Miss Ethel McWhinnie, and the second Miss Bessie E. Powell, sister of the bride. Both were dressed in white organdie over green, while the bride was attired in a beautiful gown of Swiss muslin, trimmed with insertion and lace. The groomsmen were Messrs. W. P. Holmes of Brantford, and Albert E. Skitch, of Lindsay, while Miss Eva Sanderson played an appropriate wedding march. The groom's gift to the bride was a diamond ring and to the bridesmaids, pearl crescents. At the conclusion of the ceremony a wedding dejeuner was served, for which the table was beautifully decorated.

The array of presents was beautiful and the numerous gifts indicated the popularity of the young couple. There were about 60 guests present at the ceremony, those from a distance being Mr. and Mrs. William Skitch, Mr. and Mrs. Herbert Skitch, Miss Leta Skitch, Mr. Albert and Master Gerald Skitch, and Mr. and Mrs. Selby, all of Lindsay; Mr. Geo. Bond, Miss Fannie Bond, and Misses Lucy and Clara Powell, of Cobourg; Miss Leta and Mr. Bernard Skitch of Port Hope; Mrs. (Dr.) and Miss Mercy Powell, B.A., Toronto; and Mrs. W. L. and Miss Fannie Payne, of Colborne.

Mr. and Mrs. Fred Skitch left on the 5.10 C. P. R. train this afternoon for Hamilton and points west, Mrs. Skitch wearing a gown of navy blue broad cloth with Parisian trimmings. On their return the happy couple will reside in town

Is Your Piano in Tune?

The change of season affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

UNDER THE PILOT.

Thrilling Experience of a G. T. R. Brakeman.

The Lindsay Post describes an accident which occurred on the G.T.R. as follows: "A young man named Ross, was the victim of a painful accident at Port Perry on Monday. The unfortunate young man is a brakesman, and left in the morning for Whitby on a freight train in charge of Conductor Frank Shaw and Engineer William Chambers. On the return trip some shunting had to be done. Ross was standing on the track in front of the engine, and when the engine moved forward he attempted to step on to the iron plate resting on the pilot. Missing his step he stumbled and his left leg slipped underneath but he managed to keep his body from going under the engine by clinging to an iron bar. Fortunately he was noticed by Engineer Chambers before the engine got much of a start, and was quickly liberated, but not before he had been pushed along the track for about ten feet. When picked up it was discovered that he had sustained a nasty flesh wound about 5 inches in length, but no bones were broken. A special train was made up and the injured man was brought to Lindsay, arriving here at 2 o'clock He was taken to the Ross Memorial Hospital, and Drs. Jeffers and Simpson, G.T.R. surgeons, were summoned. At present the patient is doing nicely, but the doctors fear that blood poisoning may develop, in which case amputation may be necessary in order to save his life. Ross' home is in Gelert and he is a new man in the company's service, having made his first trip a few days ago."

A CATHEDRAL WEDDING.

Miss Lynch Married to Mr. William Mc Auliffe.

A very pretty wedding took place at St. Peter's cathedral at 8 o'clock Tuesday morning, when Miss Mary Maud, the eldest daughter of Mr. and Mrs. Michael Lynch, was united in marriage to Mr. William C. McAuliffe, a prominent young man of Peterborough.

The bride, preceded by her bridesmaid, Miss Loretto N Keefe, of Victor, N.Y., entered the church on the arm of her father, and were met at the altar by the groom and groomsman, Mr. William Whaley, of Peterborough.

The bride was tastefully attired in blue broadcloth, trimmed with white applique, and wore a picture hat. She carried a prayer book. The bridesmaid wore white silk trimmed with chene lace; she also wore a black picture hat, and carried white carnations.

Immediately after the ceremony the bridal party repaired to the home of the bride on Concession street, where a bountiful wedding breakfast was served to the families and immediate friends.

The out-of-town guests were the Misses Ella and Fanny McAuliffe of Cobourg, and Mr. and Mrs. Bartholomew V Keefe of Victor, N.Y.

The bride was the recipient of many beautiful presents, testifying to the high esteem in which she is held by her many friends.

The groom's gift to the bride and and bridesmaid was a beautiful gold crescent set with pearls.

Mr. and Mrs. McAuliffe will make their future home on Stewart street, Ashburnham.

THE BAND OF THE GOLDSTREAM GUARDS.

Their Visit a Great Musical and Patriotic Event.

Power of Their Music to Arouse Patriotic Enthusiasm—Here Next Wednesday Evening.

The visit to Peterborough of the celebrated Coldstream Guards' Band on Wednesday next will be an occasion of great patriotic as well as musical interest. The band represents the highest musical culture in the British Army, and their visit to Canada having been brought about by the co-operation of King Edward it may be accepted as were the sending of the Jubilee presents to the Dominion Exhibitions as an evidence of His Majesty's favour. The band fairly captivated the people in Toronto by its musical powers and aroused the patriotic enthusiasm of the people to a high degree.

The management of the Peterborough Industrial Fair, through whose instrumentality the band has been secured to visit the town, is to be congratulated on its enterprise.

The Toronto Star, in writing of the occasion of the Band's visit to Toronto says:—

"Something occurred at the fair yesterday afternoon which proves Bandmaster Rogan a *melodic missionary*, a peaceful conqueror, the Orpheus of Imperialism. He carried twenty thousand people off their feet, took them captive in two minutes with his sweet strains . . . Rogan's name is in itself a token of that blessed union which is the hope of imperial statesmanship — John, which is English, Mackenzie, which is Scotch, and Rogan, which is Irish—the three races which are to put together forever and make the British Empire as staunch as the everlasting hills.

"Such was Bandmaster Rogan in his uniform of scarlet and gold, as he made ready to deliver his final charge and make the victory complete. The band stood up, as British regimental bands all over the world stand up, to play God Save the King. They played it through and the thunder of the drums and the silver defiance of the trumpets could be heard far out on the lake. Then was Rogan inspired. He looked at that vast audience of twenty thousand people liege subjects and friends of the king he served, and his great chest expanded six inches under the red sash, and the row of medals on his breast swelled tumultuously. With a large gesture of invitation, he started the national anthem again and 20,000 people took up the noble strain. They say the Americans who were present sung, "My Country, 'Tis of Thee," but our word for it, the tremendous body of that chorus was for His Majesty, and thousands of hats were lifted reverently as the song soared to the welkin. After that there were three cheers and a tiger—and such cheer had in it something for Rogan. Something of his band, but most of all for the feeling that makes Saxons the dominant race of the world.

"Some people tried to analyze their emotions afterwards, and some to make light of them. But the fact remained that they had shouted themselves horase and dared pneumonia in the open air when Rogan said so. For these reasons let us have more Rogans, and more Coldstream Guards' Bands, and more bandmasters who know when to seize the moment for a demonstration."

New Organist.

The trustee board of the Charlotte street church last night engaged Miss Clarry of Millbrook, to fill the position of organist and choir leader of that church in the interval between now and Jan 1st, 1904. Miss Clarry has for some weeks been filling the position of organist and her playing has been much appreciated.

Hints to Housekeepers.

The undersigned desires to inform the public that he is sole agent for the Celebrated Laurentian Range, made in 6 styles, 2 sizes, the best four-hole range on the market. Neat in appearance, perfect in fit and finish, a splendid baker, burns economically any kind of fuel, is easily kept clean, works like a charm in every respect, and is guaranteed to give satisfaction. I have also a large stock of new and second-hand furniture and stoves, and general housefurnishings, and I also buy second-hand furniture and stoves. Call and examine stock before purchasing elsewhere. Stock and prices right. R. Begley, 380 and 382 Water street, opposite the Public Library.

CITIZENS HEARD ON RAILWAY AGREEMENT.

Discussion on Bylaw Authorizing Execution of Agreement.

Advocates of Street Railway Heard in Council Meeting Views of Those Opposed to Granting a Franchise.

ByLaw is a continuation of the discussion on the by-law granting a franchise to the Peterborough Radial Railway Company, as taken up at the Council meeting on Monday night:—

Ald. Morrison moved the second reading of the by-law, which was seconded by Ald. Rush.

Ald. Best moved in amendment, that the by-law be withdrawn, and that a by-law authorizing the submitting of the question to the ratepayers be submitted, and in support of his motion said that he considered the council was going beyond its jurisdiction in passing a by-law of such a serious nature without first obtaining the opinion of the people whom they represented.

POSITION OF THE OTONABEE POWER COMPANY.

Before the vote was taken on the amendment it was suggested by Ald. Best that probably there was someone present who would wish to speak on behalf of the Otonabee Power Company, and moved that anyone wishing to speak on the question should be heard. This motion was carried, and Mr. R. R. Hall, on behalf of the Otonabee Power Company, and speaking for a number of citizens who were opposed to the agreement made an address in which he set forth the claims of the Otonabee Power Company. Mr. Hall said that on behalf of the Otonabee Power Company he contended that the street railway franchise and the street lighting franchise should be considered entirely separate and that the street lighting should not be given to the present company supplying light at a higher figure than the Otonabee Power Company are prepared to furnish it. Alderman Morrison contends that if the street lighting franchise were given to the Otonabee Power Company we would have too many poles on the streets. In order to have competition in lighting it is necessary to have poles on the streets. Judging from the number of applications for lighting that the Otonabee Power Company have received it is perfectly clear that there is nothing in this objection. The people desire to secure cheap light for domestic purposes and every facility should be given to the opposition Company to supply light to the resident mechanics and workingmen of Peterborough. Electric light can now be secured at a less cost than coal oil. Every facility should be given to the opposition Company to have fair competition in domestic lighting. The people of this town have already saved thousands of dollars per year in domestic lighting since the Otonabee Power Company entered the field. Every facility therefore should be given to enable the Otonabee Power Company to secure more poles on the streets, in order that every mechanic and working man in town should be able to light his house with electric light. The statement was made by Alderman Morrison that the lamps that the Otonabee Power Company propose to furnish were inferior to the ones at present in use. The Town's expert in his report practically states that the present lamps in use amount to so much scrap. The lamp the Otonabee Power Company propose to instal is the most modern street lamp that the Canadian General Electric Company of this town manufactures to-day. Ald. Morrison paid a poor compliment to the chief electrical manufacturing company in Canada when he leads the ratepayers of Peterborough to infer that their most modern street lamp is not as good a lamp as that which many cities are throwing into the scrap heap. The lamp the Otonabee Power Company proposed to instal has lately been installed in Hamilton. The lamps at Toronto Junction were only 1200 candle power lamps. The ones the Otonabee Power Company propose to instal are 2000 candle power lamps. The by-law before the Council dealt only with the street railway. There is a definite understanding that the Council are to give the Peterborough Light and Power Company the street lighting franchise for the next ten years at $50 per lamp for 120 lamps. Of this fact many of the ratepayers were not aware. The Otonabee Power Company had offered to supply a better light at $35 per lamp.

THE PROPOSITIONS CONTRASTED.

The difference between the two propositions in ten years would, Mr. Hall pointed out, amount to $14,000, which the town would save if they accepted the Otonabee Power Company's offer and this sum of $14,000 the Council proposed to give as a bonus to the Street Railway Company. Ald. Morrison was, therefore clearly wrong when he contended that a bonus is not been given to the street railway. The fact that other towns paid more for their street lighting than Peterborough should not be taken into consideration. They were not as favourably situated as Peterborough. They had not water powers going to waste and undeveloped and unused. The ratepayers of Peterborough therefore should be given every opportunity to take advantage of their own natural advantages. The agreement between the Street Railway and the Town granted to the Street Railway the exclusive franchise and right to the use of all the streets in the Town except Crescent street for their poles, wires, etc., for the period of thirty years and hence it would appear that the Street Railway could prevent any power company from transmitting electric current in the town for power, lighting and heating purposes. He contended that it was most important that the rights of the town to grant pole rights on the streets to any power company should be most carefully guarded and reserved to the town. It is more important to this town that the cheap power with which Peterborough is favoured, should be fairly transmitted to manufacturers, and to those who use electric power and light, than that undue advantage should be given to the street railway company, which could impose any terms it might choose on opposition power companies using the streets. In any event the agreement should be amended by the town so as to reserve the town's rights in clear and unequivocal language. Ald. Morrison contended that a bonus was not being given to the street railway. Mr. Hall contended that a number of bonuses are being given to the street railway, in addition to the bonus of $14,000 in connection with the street lighting. One of these bonuses is exemption from taxation, which will save the street railway on their minimum capitalization of $100,000, in the neighbourhood of $1,500.00 per year in taxes for thirty years. That is a bonus. In the next place the town agrees to be at the entire expense of clearing the snow off the streets on which the railway runs for the first five years. For the next five years the town is to pay three-fourths of the expense, and for the remaining twenty years one half of this expense. No one can tell what this will amount to. It may amount to an expenditure on the part of the town for the benefit of the street railway to $1,000 per year, or it may amount to $3,000 per year. That undertaking on the part of the town certainly amounts to a bonus.

AN INJUSTICE TO WORKMEN.

It certainly is an injustice to workmen, and mechanics and ratepayers, who own their own property, that their taxes should be increased in order to pay these bonuses to the street railway company without being given an opportunity to express their opinion in the matter.

Mr. Hall said there was nothing whatever to prevent the council from submitting a bonus bylaw, such as this, to the ratepayers. He then handed to the Mayor a petition signed by over one hundred ratepayers requesting that the bylaw be submitted to the people, so that they might have an opportunity of voting upon it. The parties whom he represented, he said, felt confident that the ratepayers would vote against the street lighting and street railway bylaws, if they were given an opportunity to do so. If these two bylaws were submitted to the ratepayers he said he would undertake on behalf of these ratepayers to pay the entire cost to the town in submitting such bylaws, if they were not defeated. He offered to place an amount sufficient to pay the entire cost of submitting these bylaws in the hands of the Mayor, out of which these expenses may be paid, if these bylaws were not defeated. Under all these circumstances he submitted that the council should not take upon itself to give away such large sums of the people's money without giving them a voice in the matter.

ALDERMAN BEST'S AMENDMENT DEFEATED.

At the conclusion of Mr. Hall's remarks the amendment proposed by Ald. Best to the effect that the by-law be submitted to the ratepayers was voted on and lost on the following division:—

Yea.—Ald. Best and Clinkscale.

Nay.—Ald. Batten, Corkery, Finnie, Morrison, O'Connell, Rush, Shortly, and Mayor Roger.

The Mayor then asked if there were any other gentlemen who desired to be heard in reference to this question before Ald. Morrison's motion were voted upon.

Ald. Best in defending his position said that the great bulk of the people was in favour of having the question submitted to a popular vote before being ratified by the Council.

In answer to Ald. Best's argument Ald. Morrison said that if the by-law were submitted to the people in the form of a bonus by-law as Ald. Best proposed, the consent of 2-3 of the property owners would be necessary before it could pass, and he felt sure that as many of the landowners lived out of town, the by-law if submitted in this way would not be sufficiently supported, although he was certain that an overwhelming majority of the citizens was in favour of the granting of the franchise.

COMPANY'S SOLICITOR PRESENTS CASE

Mr. R. M. Dennistoun asked the indulgence of the Council while he made a few remarks in support of the granting of the franchise. He said that the obstructionists to the franchise had sought from the first to delay the Company Orders for the equipment and appliances for the road should have been placed a month ago in order to have them delivered in sufficient time to enable the Company to carry out its agreement. He said that if the matter were deferred until January and a referendum taken on it, the Council would not then have the present proposition to deal with. He further stated that the present franchise was not a monopoly of the streets of the town, as at any time a street or other railway having secured a charter from the Dominion Government could enter the town and run on any street, irrespective of any franchise previously granted by the town to a railway receiving its charter from the Ontario Government. The proposition had been misrepresented from the first, but they had borne it all without attempting to defend it.

SNOW QUESTION DISCUSSED.

In reference to the much discussed question of cleaning the snow from the streets, he said that the Company considered it most unfair to ask it to keep the entire street clear. The merchants on each side of George street, he said, swept the snow off 10 feet of sidewalk into the road, and he thought it unjust to ask the Company to clean away snow which the merchants placed on the road. There were clauses in the original agreements which were objectionable to the Company, and likewise the Council had been disinclined to accept some of the Company's proposals, and there had been compromises on both sides. He felt now, however, that the agreement as it stood was one which should prove satisfactory to every citizen. Defending the exemption from taxation of the plant and income of the Railway, he said it would not be adding to the burden of the taxpayers, because it would simply mean that no charge would be made for what did not at present exist. He said in conclusion that in the past franchises had been granted by the Council to "Tin Horn" men, who had been un-

POLICE COURT

"Old Nick" Fined for Selling Intoxicants Without a License.

At the Police yesterday, Nicholas Renzetta, an Italian, was charged with selling liquor without a license at his house on Bethune street at the rear of 386 Stewart street. His house is inhabited by a number of natives of Sunny Italy and one room was found by the police to be fitted out as a bar room, and here it was proved the liquor was sold. The Court was crowded with Italians who seemed to be "tickled to death" to see the Chief sample the "Mountain Dew" in order to give evidence as to what it was. He was fined $50 and costs amounting in all to $57.00. E. H. D. Hall, for the Crown and D. O'Connell for the defendant.

This morning three little boys were charged with stealing fruit. They were discharged with a warning.

NOT JUST AS GOOD
Did you ever inquire at a store for certain articles and get for a reply "We have something just as good"? Did it ever occur to you that "Something just as good" is something the dealer has been able to buy much cheaper than the articles you inquire for? This is true in drugs, fabrics, groceries, hardware, and in fact every line, including silver-plated ware. If you inquire for 1847 Rogers Bros.' Knives, Forks or Spoons, don't accept any bogus Rogers' stamp because your dealer tells you it's just as good.
1847 TRADE MARK ROGERS BROS.
The above trade mark has been stamped on every article of the original and genuine Rogers Bros.' goods for over 50 years. Get this and you get the best that is made.

SOME HINDU TRICKS

INDIAN CONJURORS AND JUGGLERS CLEVERER THAN EUROPEANS.

Their Skill Is Startling and They Produce More of the Effect of the So-Called Supernatural—Three Feats That Deserve All the Wonder They Excite in Beholders From the West.

The British public is treated occasionally to some very marvelous accounts of the skill, sometimes of the almost supernatural skill, of Indian conjurers and jugglers. It would be interesting to know from what source some of these tales have emanated, and what authority lies behind them. That a large number of them are not founded on fact is in some degree suggested by the circumstance that the more our facilities for traveling in the East are increased, the less wonderful are the stories we import.

That the Hindu is a very expert juggler and conjuror cannot be denied; and his skill is the more startling, his feats produce more the effect of the supernatural, from the absence of those many stage properties with which his European confrere works, and which serve so largely to distract the attention of his audience and to withdraw their gaze from those little details which it is expedient they should not see. The properties of an Indian conjuror can be carried under his arm. Yet when all is said and done, when it is admitted that with little or no mechanical contrivances to help him, the Hindu is a cleverer conjuror than the European—that is as far as we have any real authority to go.

There are at least three feats, however, and these are not the less wonderful, that are still constantly spoken of as facts in this age of Marconi, and if they have in fact been performed, deserve all the wonder they arouse. The first is as follows: The conjuror places a boy in an oblong wicker basket, the boy is doubled up in order to go into the basket, and is a tight fit. The lid of the basket is then strapped up. Then, of course, the conjuror holds some conversation with the boy, in order that the audience may be quite sure that he is actually within. Next he runs the basket through with a sword in several directions. Blood-curdling screams are heard, and some versions go so far as to say that blood runs freely. Of course, the audience is intensely horrified. Not so the conjuror. With a calm and triumphant smile he opens the basket and shows it empty. While the audience gives expression to its wonder he throws out his arm for silence and appears to be listening intently. Suddenly he gives a cry, and the boy who was supposed to be in the basket rushes into the room, and—here follows the collection.

Truly a marvelous performance; but has any one ever seen it performed? It is to be doubted. One is inclined to believe that it is only performed in the inner sanctuary of that most marvelous of contrivances, the human imagination. The mild and ingenious Hindu has heard of this feat. Possibly the substitute for, or rather the burlesque of, this trick, so commonly presented to Europeans, took its rise from inquiries for the real article. The performance is as follows: The conjuror puts his boy into the basket, which in this spurious feat is a roomy one. The said boy, by curling himself around the edges of the basket, allows plenty of room for the sword to pass through it in several directions above his body. The conjuror, with abundance of deliberation and cautious aim, makes his stabs accordingly, and the audience is supposed to be overcome with wonder that the boy is produced from the basket alive. The dictates of prudence and humanity alike point out to the conjuror the advisability of allowing nobody but himself to use the sword, and this circumstance probably accounts for the fact that the performance of even the first part of the trick is quite rare. One striking incident, however, is common both to the real trick and its burlesque—the collection.

The second trick of which one hears so much is the "aerial rope" trick. Briefly it is as follows: The conjuror has a coil of thin rope. Keeping hold of one end he throws the coil up into the air. The rope, instead of falling down on to his head again, as one would naturally suppose, if it obeyed the law of gravity, remains standing up into the air as if it were an iron rod. Then the conjuror's companion swarms up the rope, and when he gets to the top absolutely disappears.

The conjuror who could perform this feat to large audiences could not fail to make an enormous fortune. That Eastern conjurors are not indifferent to monetary considerations is notorious. Neither are they averse to visiting Europe, if it is made worth their while. It will be remembered that a party of them performed at the Indian and Colonial Exhibition. Yet one hardly ever hears a word in India of the "aerial rope" trick. Nevertheless, there is some evidence to account for, if not to justify its tradition. Here and there a man is met with who says that he has seen it. Generally he was alone, or the only European. On occasions two Europeans have been present, and one declares that he has seen it, while the other has not. It is said that the men who profess to have seen the marvel are often honest, trustworthy, hard-headed, and skeptical people, not likely either to deceive or to be deceived.

The third is the "mango trick." In English fiction this is a sight well worth seeing. A mango stone is planted, and is grown into a small tree in a few moments under the eyes of the audience, regardless of the season, ripe mangoes are only withheld from motives of economy, cleanliness, or perhaps from a desire not to excite trade jealousy in the fruit market.

Alas! this trick, as performed in Southern India, is quite beneath the dignity of the European expert. To see the trick once is enough, for it explains itself as it goes along. The conjuror has three bags, and abundance of patter. If only the patter could cover the bags, so that we knew not what the bags covered! First of all the conjuror solemnly plants the mango stone. This he covers over with the smallest of the three bags, which, of course, contains the mango bush in its infancy. Poor soul! How hard he patters, and his friend patters, while he is busy with his fingers inside that bag, planting the sapling in its little patch of earth and deftly arranging the leaves that it may look fresh and natural when the bag is lifted; oh, so carefully, lest the mango plant come with it. Hi-la! there you are. Wonderful! Needless to go on. The next bag contains a larger edition of the mango plant, and the third a larger still. Probably the only bag which at the beginning of the visit contains nothing and at the end is occupied is the collection bag. An admirable feature of the performance is the neat deftness displayed in the planting. It must require a good deal of skill to extricate and arrange the plants so that the stand securely upright when the bag is removed, and do not look stale or rumpled.

The Hindu is very expert at palming, and his feats gain in force from the circumstance that the whole of the upper part of his body is generally naked. The neatness with which he produces eggs or rupees from his elbows, armpits, and ears is quite pretty to see. It is a drawback, however, to be informed the next day by your domestics that your fowls have been neglecting their duties. Probably it is the patter which has distracted them.

One bit of palming generally raises a laugh if you have not seen it before. After palming a couple of rupees into your hand from nowhere in particular, you suddenly find on your hand a hoary old scorpion, about the size of a young crab. Your jump of terror is exceedingly amusing—to your friends. Of course, the scorpion's sting has been previously extracted. The Hindu is quite a match for the ordinary English amateur juggler. It is most amusing to watch him while the amateur is firing off his feat. The immemorial courtesy of the East prescribes a face of wondering deference. The amateur pauses, flushed with pleasure and anticipated triumph. The Hindu never abates his air of deference, nor allows the Oriental equivalent of "Rats!" to escape him. He merely does the trick infinitely more neatly, and generally with some variation that leaves the amateur writhing with impotent envy. The feeling one has about the Hindoo juggler, or conjuror, is, first, that he is exceedingly expert, but probably not so expert as either the Chinaman or the Japanese. Secondly, he is unfortunate in having his really creditable performances discounted in advance by misinformed, credulous, or untruthful travelers.—London Globe.

SHE HAD TO SIT UP IN A CHAIR.

Mr. Jas. Kinsella Cured by Dodd's Kidney Pills.

Peculiar Medical Case Ends in Another Victory for the Great Kidney Remedy.

St. Malachie, Dorchester Co., Que., Sept. 14.—Special.—A medical case of particular interest, especially to women, is causing much talk here. Mrs. James Kinsella suffered from Kidney Disease, which so affected her that she could not sleep and she was obliged for two summers to pass her nights sitting in a chair. To-day she is practically a well woman. Interviewed regarding her cure she said:

"I had a pain in my right hip, in the back and was swollen all down that side of the abdomen. I could not sleep at night and I was obliged to sit up in a chair for two summers. "Reading of cures by Dodd's Kidney Pills I bought one box. That gave me such relief that I continued to use them. They did me a world of good and now I can go to bed like other people. I have never had to sit up in a chair since I used Dodd's Kidney Pills."

Female complaints are caused by Kidneys. Dodd's Kidney Pills never fail to cure them.

Didn't Know That Trick.

"That's a werry knowing animal of yours," said a yonng cockney to the keeper of an elephant.

"Very," was the cool rejoinder.

"He performs strange tricks and hantics, does he?" inquired the cockney, eying the animal critically.

"Surprisin'!" retorted the keeper. "We've learned him to put money in that box you see up there. Try him with half a crown."

The cockney handed the elephant half a crown, and, sure enough, he took it in his trunk and placed it in a box high up out of reach.

"Well, that is very hextraordinary—hastonishing, truly!" said the green one, opening his eyes. "Now, let's see him take it out and hand it back."

"We never learned him that trick," retorted the keeper, walking away.

Curious Irish Marriage Custom.

A curious old marriage custom, called locally "the settling," still survives in County Donegal, Ireland, and in the Scotch districts of Kintyre and Cowal. After the marriage has been publicly announced the friends of the couple meet at the house of the bride's parents to fix a suitable date for the marriage. A bottle of whisky is opened, and as each guest drinks to their happiness he names a date. When each guest has named a date an average is struck and "settling" is complete. Neither the bride nor bridegroom ever thinks of protesting against the date so curiously chosen.

Indian Tribes of the South.

The Cherokees, as far back as the whites have any knowledge of them, occupied portions of northeast Alabama, southeast Tennessee, western North Carolina and a portion of northwest Georgia. They were essentially a hill people and their homes were among the mountain ranges. The Choctaws, on the contrary, occupied the comparatively level regions of middle west Alabama and eastern Mississippi. Between them and the Cherokees were the Creeks on the northwest and the Chickasaws on the north. The Cherokees and Choctaws were widely separated and were never neighbors, at least in historic times.

EXPLORER LA SALLE.

Justice Girouard's New Work on Celebrities of Jacques Cartier County.

Mr. Justice Girouard in the preface to his "Supplement to Lake St. Louis" observes that the new documents from the "correspondence generale," in the national archives at Paris which have furnished him with the material for the new work that has just been published are in the way of contrast of what he wrote in his earlier volume, "Lake St. Louis," but confirm the impressions therein conveyed to the public as to several more or less doubtful points.

Like the learned judge's first work the supplement is a most valuable contribution to Canadian historical research. The writer sure of the interest in his subject and inspired by the desire to present the truth unvarnished makes no attempt whatever at artistic presentation of embellishment of the documents; but leaves them to tell their own story. The work as a whole has distinct literary merits and the translator from the French into English has performed his task in a manner worthy of appreciation. The author has added many additions and he tells that the volume will form the last touch of a work embodying the research of years, pleasant it is true but all the same slow and laborious.

No person, it has been well said, has either inherited or acquired a better right to speak of Jacques Cartier County than its former member.

It is many long years since Mr. Girouard gave his lecture on the Lachine massacre of 1689 that formed the starting point of his researches. It was clearly a labor of love, this studying of ancient documents and archives connected with a scene of which his own summer residence makes a part to-day and which yields to no spot in North America in historical interest. The idea grew upon him that while the nations of the old world and the new were celebrating the discovery of America a resident of Lachine would be justified in paying his tribute to the memory of those who founded and fostered the early settlements and especially La Salle, who was not only the founder of Lachine but the pioneer of the States of Ohio, Michigan and Illinois.

"What changes along Lake St. Louis" exclaims the author, "since the early days of the Boyer cottages, built about forty years ago, on the western shores of the little village of Lachine! The entire distance from the place to the northern limit of St. Anne de Bout de l'Isle, some twenty-two miles, is covered with beautifully laid out lawns, gardens and parks, pretty cottages and elegant residences, erected in many instances at a large expenditure, from five to ten, fifteen, twenty, thirty thousand dollars and even more. Without speaking of the accommodation given by the C.P.R. and electric railway, the G.T.R. has daily from twenty to twenty-five trains running to and from St. Anne's at almost every hour. What an improvement on the 'mixed' and the 'Moccasin' of twenty years ago, always late, so much so that, one exceptional morning, Bob, the popular conductor of the 'Moccasin,' on reaching old Bonaventure Depot on time was, ceremoniously presented with a leather medal by the grateful summer residents. Even if one has to wait for a train, he is comfortably seated in a pretty station, instead of the miserable open little shed built at first by the interested travelers."

Official Precedence in Australia.

The question of official precedence in Australia appears to be as embarrassing as it proved in this country. The London Chronicle says: The new table of precedence at Commonwealth functions, recently sanctioned by the King, has caused some commotion. Protests and hostile comments are pretty numerous in the papers. They come mainly from the heads of the non-Episcopal Churches—Presbyterians, Wesleyans, etc.—who are indignant because their status is completely ignored, and only "the Cardinal and the Primate" are officially recognized in the new table. They consider it a curious anomaly that in such a democratic country as Australia the democratically chosen heads of denominations, like the President of the Wesleyan Conference and the Moderator of the Presbyterian General Assembly, should be thus entirely overlooked. A deputation to the Commonwealth Prime Minister, Sir Edmund Barton, had laid the matter before him when the mail left.

Frankfort Death Houses.

In Frankfort the body of the dead is removed as soon as life is extinct to "leichen hansen" or death houses, where it rests until the first signs of decomposition appear. Such a death house consists of a warder's room, with five death chambers on each hand. A ring on the finger of each body is connected with a bell, and should one rouse from a trance that had been mistaken for death he could summon the warder. Since Frankfort has had death houses several young girls have been rescued from being buried alive. Munich has a similar system.

BUYING A MOUNTAIN.

Troubles of Owning an Estate Away Up in the Air.

On Wednesday, July 10, 1889, Snowdon, the highest mountain peak in Wales, and of all South Britain, rising to a height of 3,560 feet above the level of the sea's surface, was sold by auction in London. It was purchased by Sir William Watkin—created a baronet in 1880—formerly chairman of the South-Eastern Railway Company, and called "the Railway King," representative in the House of Commons at various times of Yarmouth, Stockport, and Hythe, and who died on April 13, 1901, at 80 years of age, and was succeeded in his title by his son, the present Sir Alfred Mellor Watkin. Sir Edward possessed as one of his residences a house in Beddgelert, by the southern foot of the mountain, whence is one of the ways of ascending; this dwelling being called "The Chalet," which is a French word signifying "cottage." At the auction the first bid was one of £2,000; but the mountain was finally knocked down for £3,750. Having come into possession of such an owner, a rack-and-pinion railway was laid down by about 1897, the name been applied to one on which there are cogs, teeth on the wheels which are caught by bars crossing the lines at right angles, the train being thereby prevented from slipping back downwards, as otherwise it naturally would by the law of gravity. Such a railway is of extra expense in construction, this one costing £11,550 a mile, but has been far exceeded in this respect on such heights as the Alps. The Snowdon line is four and three-quarter miles in length, and starts from Llanberis, at the north-west foot of the mountain, and terminates at an hotel that crowns the top.

Curly Shavings.

A shaving of wood curls up owing to contraction on one side and expansion on the other. This expansion is accelerated by what is known as the "back iron" or "cap iron" which is used in most planes.

The object of this "cap iron" is to break the shavings into short lengths and to prevent the "cutting iron" from tearing or splitting the fibers of the wood, which lie always more or less in a slanting direction.

The nearer the edge of the "back iron" is placed to the edge of the "cutting iron" the shorter the shavings are broken off. These are smooth on one side, and the serrations on the other correspond with the distance between the edges of the two irons.

All wood, too, is formed in circular rings, such as can be seen in the section of any tree trunk. It follows, therefore, that when the rings of wood are cut across, as they are to a certain extent in the act of planing, they are relieved from tension, and curl up in the endeavor to expand themselves.

ARE YOU ONE OF THE WEAK ONES?
Subject to Sinking Spells and Feelings of Langour, Depression and Weakness—You can be Helped by
Dr. Chase's Nerve Food.
Very many people feel much as you do. They do not like to confess that they are sick, but they are weak and languid, feel drowsy and depressed after meals, are easily tired and discouraged, suffer from indigestion, sleeplessness, irritability and general bodily weakness. At times, it may be, some of the old-time vigor returns, but you no more than get your hopes aroused when the sinking spells come on again and you are as helpless and disheartened as ever.
Such symptoms point to lack of nourishment in the blood and an exhausted nervous system. You can get well if you will but restore the system by using Dr. Chase's Nerve Food. This great food cure forms new blood and instils new force and energy into the wasted and depleted nerve cells. It makes you well in nature's way by supplying to the blood and nerves the very elements in which they are lacking.
These symptoms of which you complain are but a warning of approaching nervous prostration, paralysis, locomotor ataxia or even insanity, the time to act is before these dreadful diseases of the nerves have fastened themselves upon you. You are much easier to prevent than to cure, as many know, on account of long years of helplessness and suffering.
Dr. Chase's Nerve Food will give you new hope and courage. Not only will you be able to feel the benefit you are deriving it, but by noting your increase in weight you can prove conclusively that new, firm flesh and tissue is being added to your body.
The success of Dr. Chase's Nerve Food in curing all ailments arising from weakness of the blood and an exhausted condition of the nerves has been phenomenal. 50 cents a box, 6 boxes for $2.50, at all dealers or Edmanson Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 7

MARRIAGE IN INDIA

BRIDEGROOMS COME HIGH IN THAT FAR-OFF BRITISH POSSESSION.

Problem of Dowers for Daughters Becoming Yearly More Acute in Eastern Empire—Two Sides to an Old Story Told—The Parents' Wail—Reforming Society—At Cross Purposes.

What is the ordinary notion of Indian domesticity and the Hindu marriage problem among the majority of English people at home? Is it not that boys and girls are married at a shamefully early age? That at the time of puberty or earlier the zenana closes upon the Hindu wife? That her life thenceforward is a trivial round—withdrawn, apart; and that if her husband should die it were better a thousand times that she had never been born? That, or something like it, is the common version. But it is not the version you will get from Mrs. Besant; still less is it the one you will get from the militant apostles of the Hindu revival, in whose eyes there is nothing so venerable as the religious idea and tradition lying behind the social life of India, nothing so exquisite as the sentiment and ritual of the Hindu household, says a writer in The London Leader.

For agreement on these things, however, you will seek in vain. They are matters of feeling, habit, creed—matters of climate and longitude. Other aspects of the subject there are which belong comparatively to the region of social facts, and, as it happens, there is one such aspect being canvassed with a good deal of vigor in India at the moment.

The Parents' Wail.

At intervals you may see in the Indian or Anglo-Indian newspapers a cry of distress from a Hindu father. He has five, seven, ten daughters; himself is a poor clerk in Government or private employ. He cannot endow his many daughters. It is an unspeakable disgrace that they should grow up to womanhood unmarried. The "dot" and the marriage expenses of one, or at most two, would reduce him to beggary. What is he to do? It is all very well for the benevolent outsider to reply that he should disregard the custom of his creed and caste, should give his daughters something of an education, and teach them that there is such a thing as honorable spinsterhood. In dealing with India one thing must always be borne in mind, namely, that notwithstanding the spread of education and western ideas, and the alleged break-up of the caste system, the social structure of Hinduism remains substantially unimpaired. The Bengali, for example, may eat chicken and read Herbert Spencer; may embellish his house with German oleographs and unspeakable imitations of Tottenham Court road; but in his private circle he keeps to the ways of his forbears, departing not at all from the scrupulous observances of his class. He secludes his women and marries his child-daughter, with dowry and marriage ceremonies up to the limit of his means, or beyond it.

Price of a Husband.

India, it is often said, is one—in spite of its bewildering diversity of race and speech; the unifying influence is Hinduism itself. That, however, is only partially true as regards social custom. In the south, for example, the cloistral zenana is far less provalent than in the north. Infant marriages in Madras are practically confined to the Brahmins; they are almost universal among the Hindus of Bengal, and, if anything, are most common among the lower castes. The curious thing is that among these castes a girl is actually sold in marriage. Every Sudra girl is a valuable asset, while in the three highest caste groups she is counted a superfluous responsibility.

A husband must be found for her, and husbands in Bengal are dear. For a tolerable good match a father must be prepared to pay anything between Rs 3,000 ($900) and Rs 8,000 ($2,400), and in order to secure such a match he will denude himself of all his resources, and most likely mortgage himself up to the eyes. Here, indeed, is one of the strangest and most baffling products of English education in India. The price of a youth in the marriage market is regulated by his record of examinations—not necessarily passed, but entered for. It would be fair to say that at the present time in Bengal this is the only test that has any validity. Eligibility in the old days may have been a matter of family, of breeding, of social position; it is now a matter of university degrees, the reason being, of course, that the people of India have learnt to estimate a man's chances of success in life, especially as regards Government employment, according to his place in the examination lists.

Reforming Society.

The effects of a system of this kind will be clear enough in the educational world as in the home. The marriage market becomes a huge commercial department of society, and the marriage agent or professional matchmaker a highly important functionary—especially the female of the species, whose powers, mostly for mischief, are multiplied indefinitely by her freedom of access to the zenanas. Year by year, especially in Bengal, the problem becomes more acute, and it is not surprising that among the more enlightened section of the Hindu community a definite movement should have been set on foot for the liberation of society from a yoke that has become unendurable. Perhaps the most influential section of reformers is that composing the Kayashta Sava, an organization which has lately been taking steps to make its purposes more widely known. The enormous difficulty of the task lying before any Hindu reforming agency may be realized in part by considering the salient facts of the situation as it presents itself to this society. The Ka-

Woman's Weakness

A woman's reproductive organs are in the most intense and continuous sympathy with her kidneys. The slightest disorder in the kidneys brings about a corresponding disease in the reproductive organs. GOOD LIVING

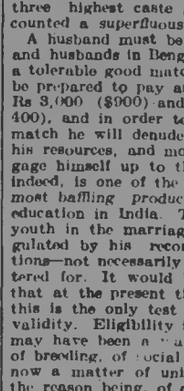
Quite often results in bad health, because what is termed "good living" is usually the gratification of the palate without reference to the nutrition of the body. When the good liver is a business man and rises from a full meal to plunge at once into work requiring mental effort the result is almost sure to be disastrous, because digestion draws upon the same nervous forces which are employed in thought. In time the stomach becomes diseased, the processes of digestion and nutrition are imperfectly performed and there is a physical breakdown.



Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It eliminates the effete poisonous matter which originates in the system as a consequence of imperfect digestion. It gives sound health to the whole body.

"I wish to say to the world that Dr. Pierce's Golden Medical Discovery has proved a great blessing to me," writes Mrs. Ellen E. Bacon, of Shutesbury, Franklin Co., Mass. "Prior to September, 1897, I had doctored for my stomach trouble for several years, getting through a course of treatment without any real benefit. In September, 1896, I had very sick spells and grew worse, could eat but little. I commenced in September, 1897, to take Dr. Pierce's medicine, and in a short time I could eat and work. I have *gained twenty pounds in two months.*"

FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

MEXICAN INDIAN MAIDENS.

They Take the Initiative in Love Affairs and Do the Courting.

The custom of Mexico requires the Indian girl to do all the courting. She is just as bashful as the young swain whom she wishes to fascinate, but she has to take the initiative in love affairs. The young people meet only at the feasts, and after she has got mildly under the influence of the native beer that is liberally consumed by all she tries to attract his attention by dancing before him in a clumsy way up and down on the same spot. But so bashful is she that she persistently keeps her back turned toward him. She may also sit down near him and pull his blanket and sing to him in a gentle, low voice a simple love song, such as "Beautiful man to be sure." If occasion requires, the parents of the girl may say to the parents of the boy, "Our daughter wants to marry your son." Then they send the girl to the boy's home that the young people may become acquainted. For two or three days perhaps they do not speak to each other, but finally she playfully begins to throw pebbles at him. If he does not return them she understands that he does not care for her. If he throws them back at her she knows that she has won him. She lets her blanket drop and runs off into the woods, and he is not long in following her.—Carl Lumholtz in "Unknown Mexico."

Change of Air.

The quasi miraculous benefits which are associated with change of air in the popular belief are in reality derived when they accrue from change of environment, qua change of habits of life. In a great many instances the measure of benefit obtainable would be as effectually secured, and at much less expense, by mere change of habits, without the fatigue and inconvenience of change of domicile. The overwrought city clerk might advantageously take to driving a cab, while the cabman would find it a relief to discharge for a time the functions of caretaker of a deserted house. Many an overworked physician would experience a distinct improvement were he to qualify as chauffeur, with no other object in view than to cover space, and there are few domestic servants whose health would not be sensibly modified by a brief experience as milkmaid or gleaner should the season lend itself to that pursuit. The "literary gent," whose brain is sterile of new ideas, might recuperate his energies by usurping the role of a sick man and remaining in bed for a week or two.

A Spider and a King.

On the ceiling of one of the rooms in Sans Souci, the world renowned palace of Frederick the Great in Prussia, is the painting of a huge spider with its web. The reason for this odd decoration is that one morning just as the king was about to drink his usual morning cup of chocolate in this room he turned aside for something, and when, a moment later, he took up the cup he noticed a small spider had fallen into it. Immediately upon giving an order for a fresh cup a pistol report was heard, and it was discovered that the cook had shot himself. The reason for this, it was later found out, was that he had poisoned the chocolate, and of course when a fresh cup was ordered he supposed his treachery had been discovered. It was in remembrance of this narrow escape that Frederick ordered a spider's web to be painted on the ceiling.

Sir Kenelm Digby, K.C.B.

Sir Kenelm Digby, K.C.B., who retires next month from the post of Permanent Under-Secretary of State for the Home Department, which he has held, with a special extension for two years, since January, 1895, was born in 1836, the eldest son of Canon the Hon. Kenelm H. Digby, rector of Tittleshall, Norfolk. Educated at Oxford, he was called to the Bar by Lincoln's Inn in 1865. He became a Bencher of his Inn in 1891. From 1868-74 he was Vinerian Law Reader at Oxford. Sir Kenelm was a County Court Judge from 1892 to 1894, and at the beginning of the next year took up the duties which he now leaves. He was created a K.C.B. in 1898. He married in 1870, the Hon. Caroline Strutt, daughter of the first Lord Belper.

EAT LETTUCE DAILY.

Then You Will Be In No Danger of Catching Smallpox.

Lettuce is an absolute preventive of smallpox. No one is in the least particle of danger of catching smallpox who eats a little lettuce every day.

Smallpox belongs to the scorbutic class of diseases. Sailors at sea, deprived of fresh vegetables, get scurvy. Scurvy is a typical scorbutic disease. Smallpox is another. Smallpox always rages during the winter season, when the poor people are deprived of fresh vegetable foods.

Celery and onions are good for this purpose, but there is such a long interval between their being gathered and being eaten that they lose most of their antiscorbutic properties. Lettuce is served shortly after it is picked, and hence contains the valuable properties which will prevent smallpox.

We say without the least hesitation or reserve that lettuce will prevent smallpox. It is a thousand times better than vaccination. It has no liabilities, like vaccination, to produce other diseases. We are willing to stake our professional reputation on the broad statement that any one who eats lettuce daily will not catch smallpox, whether he be vaccinated or not.

Birds as They Fly.

No bird can fly for any appreciable distance tail first. The nearest approach to such a movement is shown in the tumbler pigeon when that bird slews his wings forward and, suddenly turning back his head, throws a somersault, but this is not true backward flight.

When a bird wishes to reverse its motion it tilts its body laterally, as a railway carriage would be tilted in taking a curve, or increases the number of beats given by one wing as compared with the other or keeps one wing extended while the other is partially flexed. But a bird can no more fly backward than a ship can sail astern.

Some birds, however, and particularly the albatross, can fly half upside down—that is, with the wings pointed in a direction nearly perpendicular to the sea—and when turning quickly in this position the appearance is sometimes almost as though the bird were using its wings in a backward direction, though their structure is not really adapted to any such movement, and when poised, facing a strong wind, birds may seem to move astern.

Rossetti and Whistler.

Dante Gabriel Rossetti once showed Whistler a sketch for a painting and asked him how he liked it. "It has good points," said Whistler. "Go ahead with it by all means."

A few weeks later he asked how the work was progressing. "All right," answered Rossetti cheerfully. "I've ordered a stunning frame for it."

Happening in at Rossetti's in Cheyne Walk, Whistler asked to see the canvas, which was brought out beautifully framed.

"You've done nothing to it since I saw it, have you?" said Whistler.

"No," replied Rossetti, "but I've written a sonnet on the subject if you would like to hear it."

The former of course assented, and the poet-painter thereupon recited some lines of peculiar tenderness and melody. They were barely ended when Whistler broke in with:

"Rossetti, put the sonnet in the frame."

THE LATEST NEWS OF LOCAL SPORT.

LACROSSE.

Members of the T.A.S. Club who have in their possession uniforms and other property of the club, are requested to turn same in as soon as possible.

• • • •

The T.A.S. club intend closing the season with an "evening" on Monday, September 21st, in the rooms of the T.A.S. The members will provide refreshments and there will be games and music. All friends of the club are invited. An admission fee will be charged.

• • • •

The Athletics left for Markham this morning on the 8.20 G. T. R. train to play a sudden death game with Elora in the last semi-final game for the season. The winners of to-day's game will go into the finals, which will be played at Stouffville, when the championships in both the Intermediate and Junior series will be decided.

• • • •

The Elora "Rocks," like the Athletics, have won every game played so far. To-day's game will be a battle of the stalwarts, the winner of which will have achieved something of which to be proud.

• • • •

In addition to the names of those who subscribed to the Athletic fund, as acknowledged in Yesterday's Examiner, the following also have responded to the request of President Kenner: J. Lewis, C. B. McAllister, Mrs. McAllister, a Friend, W. Sailsbury, Dr. Eastwood, E. Graham, P. Carroll, Dr. McKercher, F. Stenson, W. Pringle, a Friend, R. M. Waddell, A. W. Cressman.

HOCKEY.

The most of the members of the Montreal Hockey team have been offered positions in Pittsburg. Two members of the team, Jas. Gardner and Harry Dewitt, have gone to Pittsburg to look into the character of the positions offered, and upon their report will depend to a large extent the fate of the team as at present constituted. There may be wholesale migration, including the captain, Dicky Boon.

BASEBALL.

The Excelsiors will go to Lindsay to-morrow to play an exhibition game with the Clippers of that town.

BLOOD HUMOURS

Skin Humours, Scalp Humours, Hair Humours,

Whether Simple Scrofulous or Hereditary

Speedily Cured by Cuticura Soap, Ointment and Pills.

Complete Treatment for All Kinds of Humours.

In the treatment of torturing, disfiguring, itching, scaly, crusted, pimply, blotchy and scrofulous humours of the skin, scalp and blood, with loss of hair, Cuticura Soap, Ointment and Pills have been wonderfully successful. Even the most obstinate of constitutional humours, such as bad blood, scrofula, inherited and contagious humours, with loss of hair, glandular swellings, ulcerous patches in the throat and mouth, sore eyes, copper-coloured blotches, as well as boils, carbuncles, scurvy, sties, ulcers and sores arising from an impure or impoverished condition of the blood, yield to the Cuticura Treatment, when all other remedies fail.

And greater still, if possible, is the wonderful record of cures of torturing, disfiguring humours among infants and children. The suffering which Cuticura Remedies have alleviated among the young, and the comfort they have afforded worn-out and worried parents, have led to their adoption in countless homes as priceless curatives for the skin and blood. Infantile and birth humours, milk crust, scalled head, eczema, rashes and every form of itching, scaly, pimply skin and scalp humours, with loss of hair, of infancy and childhood, are speedily, permanently and economically cured when all other remedies suitable for children, and even the best physicians, fail.

Cuticura Resolvent, liquid and in the form of Chocolate Coated Pills, Cuticura Ointment and Cuticura Soap are sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Australia, R. Towns & Co., Sydney; Boston, 137 Columbus Ave. Potter Drug & Chemical Corp., Sole Proprietors.

Send for "The Great Humour Cure."

Manager Whitcroft expects to add another string to his victories.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

S. A. OKE,

Tel. 18, 376 George street.

CITIZENS HEARD ON RAILWAY AGREEMENT

(Continued from page 5.)

ake to finance their schemes, but they were now granting one to a man who would carry out everything he promised to undertake and would deposit $5,000 as a guarantee for the faithful performance of every contract entered into.

A BUSINESS-LIKE COUNCIL.

Mr. D. W. Dumble was the next speaker and said on rising that he had never sat in the Council Chamber and listened with more satisfaction to any speech than he had to that of Ald. Morrison. He paid a tribute to the business-like qualities of the members of the Council. He thought the matter under consideration was worthy of all the attention which could be given it, and believed in the Council assuming the responsibility as business men and believed that the ratepayers would uphold them in the stand which they had taken. The people, of whom they were the representatives, would have but a low opinion of the members of the Council if they did not take some action in the matter.

TOWN SHOULD CONSIDER ITSELF FORTUNATE

He thought the town was unusually fortunate in securing a street railway on such advantageous terms. He asserted that no town of the size of Peterborough in Canada obtained from a street railway a percentage of its receipts, as some had claimed the town should demand from the company. Toronto had a population of 150,000 before it secured any percentage of its street railway receipts. He felt that the town should consider itself lucky to have the railway operated by such a responsible man as Mr. Stuart had proven himself to be. He predicted that it would prove to be a very profitable thing for the town, because Mr. Stuart, after having built the railway, would naturally want people to ride on it, and he would be in a position to induce people to come to the town. He appealed to the council not to trifle with the matter, as the probable result of such action would be to influence Mr. Stuart not to enter into further negotiations. The citizens of the town, he said, in view of the business enterprise already evidenced by the company, would expect them to carry the enterprise to a successful issue.

Mr. A. B. Cunningham at this point, said he would like to say a few words speaking from the standpoint of the average ratepayer. He said he believed that if the council would but spread abroad throughout the town the information which had been given at that meeting, the public would heartily endorse the action of the council in its endeavour to secure the street railway.

DO NOT ABUSE OPPOSITION

Ald. O'Connell also made a most sensible speech on the question, and said that he did not believe in heaping abuse on those who came there to oppose the bylaw. The action of the Otonabee Power Company in establishing a power and lighting plant had been of undoubted benefit to the town, as it had secured to it a greatly reduced rate on both power and light. He said he was anxious to see the street railway operated, which was the only reason in influencing him in supporting the granting to the Peterborough Light and Power Company of the lighting contract, because of the fact that by this means the street railway would be assured. The fact remains, however, that in order to secure the railway a lighting contract which involves the expenditure of $1,400 per year more than would be required if the offer of the Otonabee Power Company were accepted, had to be entered into.

GOOD AND SUFFICIENT REASONS.

The council had taken the responsibility of doing this, and there must have been some good reason for it. The reason, he thought, had been clearly stated, and he believed the citizens would consider them sufficient. He held the opinion that the council was justified in making the agreement they had, and felt that the citizens, if the matter were submitted to them, would endorse the council's action. He believed that by taking advantage of the competition in the lighting field, the town had been enabled to secure cheaper light than any other city in Ontario. The council had kept in touch with the citizens and had been anxious to secure the best possible bargain from the company, in order to get the railway.

DIFFICULTY IN ARRANGING TERMS.

True, there had been considerable trouble experienced in coming to terms with the company, but the council had done the best it could, and a compromise had been effected. The council had used its best efforts to secure a lower rate for workingmen's tickets. Knowing that the Peterborough Radial Railway Company was an unknown company the council had stipulated that sufficient guarantee be given to satisfy it that the contract entered into would be carried out, and in every way the citizens' interests had been safeguarded. Having regard therefore to all the facts he considered that the council would be guilty of negligence of its duty if the offer of the railway company were not accepted.

MAYOR ROGER'S VIEWS.

Mayor Roger, after Ald Shortly had taken the chair, stated that it was only after great care and pains had been taken that the proposition had been reduced to its present form. All that could possibly be done was accomplished to secure further concessions from the company, and it had now reached the stage where it must either be accepted as it stood or let go altogether. The matter must be dealt with now or the whole matter lost, and in view of this fact he had no hesitation in saying that the agreement should be accepted, as it would mean considerable to the town. He stated his conviction in reference to the offer of lighting made by the Otonabee Power Company that it would prove to be just as high in cost as that of the Peterborough Light and Power Company, because a greater number of lights would be required to produce an equal volume of light, although he believed that the light would be better diffused and of a more satisfactory character. However, he said, the question of lighting was a difficult one to arrive at an intelligent conclusion on because of the circumstances surrounding it. The council had never lost sight of the people's interests and he believed the citizens would support it in its actions.

The vote on the third reading of the bylaw was then taken and it passed on the same division as Ald. Best's amendment.

The council then adjourned.

Bible Study Rally Day.

The fifth annual Bible Study Rally Day, which opens that department of work of the Y.M.C.A., will be next Sunday, Sept. 20th. Mr. C. M. Copeland, Provincial Secretary, and a most gifted Bible teacher, will give the address on Sunday at 4 o'clock in Association Hall. A special musical programme will be provided. On the preceding Saturday evening Mr. Copeland will lead a conference of active members, to which all of that class are invited. Fuller announcements will be made later in the week.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 40c.

300 Pairs Men's, Ladies' and Children's Boots, all new goods, from 15c Pair up.

Oilcloth, 14 yards wide, regular 35c, for 23c
100 Chatelaine and Wrist Bags, in leather and fancy beads, regular 50c, to $2.00, for 25c
125 Ladies' and Gentlemen's Rainproof and Raglan Coats, up-to-date styles, regular $5.00 to $14.00, for, from $2.75 to $6.00
Men's Blue Serge and Tweed Suits, regular $8 and $10, for from $4.50 to $5.50
Job Lot of Boys' Moleskin Knickers, for ages 5 to 12, regular 50c, for 15c
Men's Worsted, Tweed and Serge Vests, regular $1.00 to $2.00, for 74c
41 dozen Ladies' Wrappers, Night Gowns and Drawers, made from new fall materials and new styles, sold elsewhere for from 40c to $2.00, yours at 25c to $1.00
45 dozen Black Silk Spool Thread (only 2 to one customer) regular 5c, for 2c
Piles of New Fall Underwear, Hosiery, Boots and Shoes and hundreds of other great bargains too numerous to mention.
Good chance for peddlers and small storekeepers to stock up.

Coats

Stunningly Natty Coats

Coats that have a swagger touch, yet every garment a "Lady's" garment.

No loudness about a "Sutcliffe Coat." They're made to wear, and wear comfortably, yet with the chic little touches that women appreciate.

The cloths vary nearly as much as the styles, Zebilenes or rough effects having quite a prominent place. Grays and Black and White mixtures are bound to have a big run.

We have some select Plain Black Garments that are especially worthy of notice.

Our Mantle Department is free to inspect. Increased stocks demanding a change in arrangement, we have materially increased the capacity of the department, and thus more room for the accommodation of our customers. We value your inspection.

Lucy Snowe's Mother

is *so* worried about Lucy's clothes for boarding school next Winter—she wants to make up a serviceable school-room suit and a pretty gown for "nice," and if she will step in and get the September number of THE DESIGNER she will find just what she is looking for.

The School Suit has a new blouse, to be trimmed in braid or stitching, and is the most satisfactory design yet made for girls from 13 to 17 years. The blouse design may also serve for separate shirt waists in flannel, mohair or silk.

The other costume is made with the very fashionable ¾ collarless coat, and instructions for cutting and making are so complete that nobody who knows how to sew need hesitate to attempt this stylish gown.

Each Suit Pattern, including skirt and waist, costs but 15 cents.

THE DESIGNER *is 10 cents a copy—we take subscriptions at 80 cents a year.*

A TRADE BLUE BOOK

Important Publication Issued by British Government.

A DECREASE OF EXPORTS.

A Considerable Decline in the Past Ten Years—Explanation of Common Misunderstanding Regarding Excess of Imports Over Exports—Treaties That Would Have to Be Denounced.

London, Sept. 17.—On the heels of Premier Balfour's academic exposition of his personal views of the fiscal problem, contained in the pamphlet on "Insular Free Trade," advance sheets of which were issued Tuesday night, came the long-promised and much-demanded Government statistics dealing with that subject.

They were issued yesterday morning by the Board of Trade, in the shape of a blue book of nearly 500 pages of bewildering tables of figures showing the various aspects of British and foreign trade, and the industrial conditions.

No deductions were drawn, though the publication teems with interesting notes upon what are regarded as points of fact. The references to foreign trade were chiefly confined to France, Germany and the United States.

Decline of Exports.

One of the most important phases dealt with in the blue book are imports and exports. The tables show that exports from the United Kingdom to the United States declined from $145,000,000 in 1890, to $97,500,000 in 1902, while the imports rose from $485,000,000 to $635,000,000. The total exports to all foreign countries declined in the same period $90,000,000, though when the colonies are included the decline only amounts to $5,000,000.

The proportion of the United Kingdom exports, as between protected and unprotected countries, in the markets of the world, has been reversed since 1850. Then it was 56 per cent. to the protected countries, and 44 per cent. to the others. In 1902 the proportion was 42 per cent. to the protected countries and 58 per cent. to the others.

Compensating Conditions.

A valuable explanation is given of the much-quoted excess of imports over exports, which has so often been held to be a sign of British trade decline. The blue book says that while the excess yearly averages about $800,000,000, the income receivable from foreign investments, calculated at $312,500,000, added to the earnings of the British merchant fleet engaged in foreign trade, calculated at $150,000,000, "is probably more than sufficient to account for the average excess of imports."

Such estimates have never before been included, hence the misleading character of the usual figures.

Americans have made large investments in the United Kingdom of recent years, and American re-purchases of railroad and other securities are admitted to have to some extent affected the fiscal figures; "but they are not likely to form a serious factor."

Much attention is devoted to the tinplate industry, and the effect of the Dingley and McKinley tariffs. The figures show that the total exports of tin from the United Kingdom have declined only a little over $5,000,000 since 1897, with a marked increase in the quantity produced, and in the value of a number of mills since 1898.

U.S. Drawback System.

Dealing exhaustively with the tariffs of all nations the Blue Book says the American system of drawbacks "necessarily results in inequality of treatment, and may yield an export bounty to the best equipped manufacturers, while others sustain a loss."

In a table showing the ad valorem equivalent to import duties, levied by foreign countries on the principal articles of British export, Russia comes first with 131 per cent., the United States next with 73 per cent., and Austria follows with 35 per cent. Though Germany comes sixth, it is pointed out that her existing tariff is so effective as to be more highly protective against Great Britain than the percentage shows.

Denounce the Treaties.

Before the trade of the United Kingdom and any of the colonies should be reserved to British vessels, the Board of Trade states that the existing treaties with Austria, Greece, and other countries would have to be denounced.

The tables show that the United Kingdom is most dependent on imported wheat. The question of wages and the cost of living, especially the price of food, which has figured so largely in the recent Chamberlain agitation, takes up pages, and is summed up as follows:

"The average level wages in the United States are one and a half times greater than in the United Kingdom, while in Germany wages are only two-thirds, and in France three-fourths of the average prevailing in the United Kingdom."

The percentage of family incomes, taking New York as the capital of the United States, is estimated on the basis of 100 per cent. for the United Kingdom, for the United States 123 per cent., for France 83 per cent. and for Germany 69 per cent. The mean weekly rate of wages in skilled trades in the United States is estimated at 179 per cent. on the same basis.

WILL MEET PARLIAMENT.

London Times' View on the Course of the British Premier.

London, Sept. 12.—The Times thinks there is no doubt that Premier Balfour will meet Parliament and defend the policy embodied in his pamphlet. Even should there be, as rumored, one or two Ministerial resignations, it was unlikely that there would arise any question of the resignation of the Government or an appeal to the country.

The Pall Mall Gazette says it understands the Cabinet has concluded the consideration of its fiscal position and its policy in regard thereto; that no further Cabinet meetings will be held for the present, probably not until late in the autumn, and that, in the meanwhile, Colonial Secretary Chamberlain will proceed with his expository program. The paper says: "It will probably be found that he has modified his proposals so as to bring them in harmony with Mr. Balfour's views, as set forth in the pamphlet. The main feature of Mr. Chamberlain's modifications will be the disappearance of all suggestions in the direction of the further taxation of foodstuffs and raw materials."

Consideration of the War Commission's report is reserved for future meetings of the Cabinet.

The Pall Mall Gazette believes it is still possible that there will be more than one resignation from the Cabinet.

Vote on Preferential Tariffs.

London, Sept. 17.—(C.A.P.)—At a meeting of the Council of Birmingham Chamber of Commerce, of 89 members representative of trade districts replying to questions put by letter, 58 said that preferential trade would favor the products of manufacturers in the United Kingdom, and would enable them to sell goods more largely to the colonies. Ten stated that the preference conferred no benefit, two declared that they did not suffer from foreign competition in the colonial markets. The remainder of the replies contained no expression of opinion on preferential tariffs.

C. M. A. CONVENTION.

Labor Question and the Tariff Chief Subjects For Convention.

Toronto, Sept. 17.—The annual convention of the Canadian Manufacturers' Association opened here yesterday, and from present indications it is evident that the meeting will be the most largely attended in the history of the association. The secretary estimates that by this morning somewhat over 400 manufacturers will be in attendance. The business transacted yesterday was confined to meetings of trade sections of the Association. These meetings were held in private, and dealt with particular trade interests.

In the evening, a reception was tendered the delegates at the Parliament buildings, and addresses were delivered by Controller Oliver as Acting Mayor, Premier Ross, J. P. Murray and Hon. Thos. A. Brassey, M.P., of London, England.

So far as learned, the two subjects of chief importance before the meeting are the labor question and the tariff.

Union of Canadian Municipalities.

Ottawa, Sept. 17.—Some good work was accomplished yesterday by the convention of the Union of Canadian Municipalities. At the evening sitting, A. W. Campbell, Good Roads Commissioner for Ontario, delivered an address which was greatly appreciated. A resolution was adopted authorizing the executive to prepare a scheme for concerted action to secure better terms for debentures. The convention adjourned at 10.30 p.m.

A Fatal Collision.

Montreal, Que., Sept. 17.—In a collision between two freight trains on the Intercolonial Railway at 5.50 o'clock yesterday morning about two miles east of St. Madeleine, Engineer Atkinson and Fireman Hurd, of the east bound train, were killed and Brakeman Borner and Engineer Dussault of the west bound train, were slightly injured. Both the engines were badly damaged and several of the cars were wrecked.

Petrel Lifts Nets.

Ashtabula, Ohio, Sept. 17.—The Canadian patrol steamer Petrel early yesterday lifted and confiscated a number of fish nets belonging to American fishermen in Lake Erie. It is supposed the officers of the Petrel decided that the nets were set on the Canadian side of the line. This, however, is denied by the fishermen. The nets were valued at $2,000.

Queen's Needs $500,000.

Kingston, Sept. 17.—The Presbyterian Commission and Queen's College trustees having agreed that Queen's is to remain a Presbyterian institution, to be developed on broad, liberal and Christian lines, a committee of both church and college will likely make an appeal for financial aid. At least half a million dollars as endownment is the figure aimed at.

Transport Arrives Safe.

Valetta, Malta, Sept. 17.—The British transport Soudan, with a regiment of troops on board, bound for India, which was reported to have foundered during the recent gale, which swept over many parts of Europe, has arrived here. She did not sustain any damage.

Call For Tariff Revision.

Quebec, Sept. 17.—The National Trades and Labor Congress of Canada commenced its second session yesterday. The Committee on resolutions reported in favor of a resolution urging the Dominion Government to hold a revision of the tariff.

In Front of Moving Train.

Toronto, Sept. 17.—Ambrose Kenny, aged 27, with wife and two children, stepped in front of a moving train at the Queen street crossing at the Humber yesterday morning and was so badly injured that the doctors are not hopeful of his recovery.

GOOD POINTS MADE.

Attorney-General Finlay Scores in the Alaska Case.

THE VIEWS OF THE RUSSIANS

They Accepted Contentions of the British in Taking the Mountains as the Basis of the Boundary — Negotiations Prior to the Treaty of 1825 Were Working Along Lines of Similarity.

(Canadian Associated Press.)

London, Sept. 17.—When the Alaskan Boundary Tribunal re-assembled yesterday morning the Attorney-General, Sir R. B. Finlay, resumed his running comments upon the negotiations between Great Britain and Russia from 1822 until the treaty of 1825 was signed, with which he concluded his speech yesterday afternoon. Then he dwelt upon the suggestion from the Russian negotiator that the line be taken from the southernmost point of Prince of Wales Island to Observatory Inlet, as proving that the Russians recognized Observatory Inlet as distinct from the Portland Channel. The British claim is for Portland Channel, which the treaty names; the United States claim is for Observatory Inlet, which, though the negotiators knew, they did not give.

Yesterday morning he read the counter proposals of the Russians to Sir C. Bagot's draft in March, 1824, and showed it contained no mention of mountains as a boundary, and that Count Nerschode, the Russian negotiator, in letters to the Russian Minister in London, explicitly discarded a mountain line and instead proposed a certain number of leagues from the coast.

The United States, in their case, have reverted to this. The proposals of the Russians declared that there are no mountains suitable for a boundary. This, however, was not adopted in 1825 for the British negotiators insisted upon a mountain boundary, as affording the most natural and effective division between the territories of the two powers.

Russians Accepted British View.

The Attorney-General compared the various drafts of the treaty, and read letters from George Canning to show that the Russians finally accepted the British view. He showed that mountains were taken to form the basis of the boundary in the treaty as finally agreed upon and that the 10-league line, which the United States now insists upon, was only to be a corrective of the mountain line; that the mountains were to be the boundary wherever practicable; that only where they receded too far from the coast the 10-league line was to be resorted to as a necessary qualification, but as soon as the mountains came near the coast they were again to be followed; in short, that the mountains were the rule, and the 10-league line the occasional exception, with exceptions where the mountains ran too far inland. He submitted that the contention of the United States that no mountains exist to make the treaty is a mere nullity, and that unless there are mountains the treaty could not be worked at all.

Questions in Detail.

The Attorney-General then proceeded to consider the questions before the tribunal in detail, dividing them into two groups—the first four together as dealing with the water boundary, and the last three to the lisiere.

Regarding question No. 1, "What is the point of communication?" he said there was no dispute, both sides holding it to be Cape Muzon.

As to question No. 2, "What channel is Britain's channel?" the Attorney-General declared it to be the channel so named by Vancouver, and quoted exhaustively from Vancouver's narrative to show that the channel claimed by Great Britain was named by him "Portland Channel," and that the channel claimed by the United States was clearly differentiated by Vancouver from Portland Channel as he discovered it at another time and gave it a different name, "Observatory Inlet." Continuing, he claimed that he had proved to a demonstration that the channel which must have been understood by the negotiators of the treaty of 1825 as Portland Channel, was the channel passing to the north of Prince of Wales and Pearse Islands, giving these islands which command Port Simpson, the terminus of the new Canadian trans-continental railway, to Great Britain.

Made a Good Point.

Discussing the contention of the United States that the negotiators had not Vancouver's narratives before them, the Attorney-General quoted from Tuyll, Polotica and other Russian negotiators to show that they were quite familiar with Vancouver's nomenclature, and must have read his narrative. He made an especially good point by showing that Tuyll asked for a line from Prince of Wales Island to Observatory Inlet, thus showing that he differentiated between that inlet and Portland Canal. Nevertheless, the treaty says the Portland Canal. After proving from the correspondence of the period to show that the Russian negotiators were familiar with Vancouver's narrative, the Attorney-General proceeded to show that it was equally familiar to the British negotiators, and thus must have been in use at the framing of the treaty.

Throughout the day Attorney-General Finlay confined himself to a technical argument in which he further strongly upheld the Canadian contentions.

Great Coal Find.

Ottawa, Sept. 17.—J. J. Collins, civil engineer, of Ottawa, who has just returned from the head waters of the Gatineau River, reports that he has discovered a seam of coal 27 feet wide and extending for over 100 miles. He says that the coal is equal in quality to the Welsh anthracite which was imported to Canada last winter.

Should Be Treated With Silence.

London, Sept. 17.—Mr. Chamberlain, replying to a C.A.P. correspondent, denied ever having received broad hints from one of the colonies that they desired separation from the British Empire.

Killed by a Train.

Halifax, N.S., Sept. 17.—While walking on the railway track at Rockingham yesterday afternoon Isaac Bayers, aged 60 years, was struck by an incoming train and instantly killed.

One Hundred Perished.

London, Sept. 17.—A despatch to The Daily Mail from Hong Kong announces that during a typhoon a steamer, On-Ling-Woo, capsized off Kwang-Chau-Wan and 100 persons perished.

Crushed by the Cars.

Whitby, Sept. 17.—George Prescott, a freight conductor on the G. T. R., was crushed between two couplings and badly injured yesterday. He was instructing two new men in coupling.

The Sunlight way of washing requires little or no rubbing. You should try Sunlight Soap. Will not injure dainty fabrics.

3B

Fibroid Tumors Cured

Note the result of Mrs. Pinkham's advice and medicine.

"Some time ago I wrote to you describing my symptoms and asked your advice. You replied, and I followed all your directions carefully, and today I am a well woman.

"The use of **Lydia E. Pinkham's Vegetable Compound** entirely expelled the tumor and strengthened my whole system. I can walk miles now.

"**Lydia E. Pinkham's Vegetable Compound** is worth five dollars a drop. I advise all women who are afflicted with tumors or female trouble of any kind to give it a faithful trial."—(Signed) MRS. E. F. HAYES, 253 Dudley St., (Roxbury) Boston, Mass. — *$5000 forfeit if original of above letter proving genuineness cannot be produced.*

Mountains of gold could not purchase such testimony—or take the place of the health and happiness which Lydia E. Pinkham's Vegetable Compound brought to Mrs. Hayes.

Such testimony should be accepted by all women as convincing evidence that **Lydia E. Pinkham's Vegetable Compound** stands without a peer as a remedy for all the distressing ills of women; all ovarian troubles; tumors; inflammations; ulceration, falling and displacement of the womb; backache; irregular, suppressed or painful menstruation. Surely the volume and character of the testimonial letters we are daily printing in the newspapers can leave no room for doubt in the minds of fair people.

THURSDAY, SEPTEMBER 17, 1903.

CANADIAN CONFERENCE CHARITIES AND CORRECTIONS.

Sixth Canadian Conference to be Held in Ottawa September 29 and 30th.

The above body, which meets in Ottawa on Sept. 29th and 30th and Oct. 1st, under the presidency of Sir Louis H. Davies, is a convention of a purely benevolent and charitable character embracing all classes of the community and many phases of philanthropic and correctional effort.

This conference is favoured by the officials of our penal, reformatory and benevolent institutions, as they find that the interchange of actual experience at the annual meetings proves a powerful means of mutual instruction and enlightenment in the effective and conscientious discharge of their duties.

When we bear in mind the thousands of persons who are supported in whole or in part by public funds, as well as the large sums spent in private charity, surely no more important subject can engage the attention of statesmen, philanthropists or political economists, than a study of the most efficient as well as the most economical management of the criminal, defective, delinquent and dependent classes. By means of this annual conference and the regular publication of the practical papers and discussions on the causes and the means for the prevention and dimunition of crime, pauperism and insanity among us, the result will be a better administration of our laws, a lightening of the burden on our taxpayers, the progressive decrease of these classess by the introduction of wiser as well as more humane methods of dealing with them, and a corresponding increase in moral and material progress and prosperity. The conference aims at arousing the interest of the community to the importance of sound and intelligent methods in all humane and charitable work, educating the public mind to the great value of movements for the betterment of the poor, the saving of neglected and dependent children, treatment and reformation of juvenile offenders, prison reform and its related subjects, detention and cure of inebriates, charity organization, rescue work amongst women and girls, care and treatment of the feeble minded, prevention and cure of tuberculosis, all these come within the scope of the subjects discussed and dealt with at these conventions.

The object of this conference is, for the interchange of suggestion and experience, and is entirely of an educative character and for the formation and guidance of public opinion on certain broad lines. Specialists and experts in the various departments indicated are expected to be present and take part in the conference.

Mr. E. T. Devine, of New York, General Secretary of the Charity Organization Society of that city, and a gentleman of continental reputation, will be present throughout the meetings and give the conference the benefit of his wide experience and information. Judge McDonald, of Brockville, a former president, will also be present and take part in the proceedings.

Mr. J. J. Kelso, superintendent of the Department of Dependent and Neglected Children, will deal with child saving and the work of the Children's Aid Societies. All the meetings are free and open. The public are very cordially invited to attend and freely participate in the discussions.

REV. DR. WILKIE OF THE INDORE COLLEGE, INDIA.

The Report of the Commission to Inquire Into the Missionary Troubles in Central India.

It will be interesting to remind many readers of the Examiner that Mr. Robert Harrison, 569 George street, as an elder of St. Paul's church, was a member of the commission appointed to inquire into the troubles in Presbyterian mission affairs in Central India. The commission, whose report has been made, in its finding is of opinion that while elements of disturbances have existed there for many years, their importance and effect upon the general work of the mission have been in some cases exaggerated. At the same time recognizing the hindrance which all manifestations of an unworthy spirit must have upon Christian labour the commission would deprecate the presence of any jealousies or suspicions tending to perpetuate difficulties, and would humbly and affectionately counsel the members of the mission staff in Central India unitedly to seek the things that make for peace.

With regard to Dr. Wilkie, the commission decides that under existing conditions he cannot, with advantage to the mission, resume his former work in Central India.

Without attempting to apportion the exact measure of blame for the present condition of affairs, the commission desires to state:

First.—That charges against senior missionaries of prejudicing younger missionaries against Dr. Wilkie are shown by the evidence to be without foundation.

Second—That there is no evidence affecting the character of Dr. Wilkie, as addicted to the use of noxious drugs, and that the commission accepts without reserve his declaration to the contrary, and strongly condemns the circulation of such rumors.

Third—That the commission directs the attention of the Foreign Mission Committee to the instruction of last General Assembly, that strenuous efforts be made by the Foreign Mission Committee to secure for Dr. Wilkie some suitable field in connection with foreign mission work.

Fourth—That the commission expresses its confident hope for a bright future for our Central India mission, earnestly commends our missionaries to the sympathy of the church, and prays that Heaven's richest blessing may rest upon the work and workers there.

It is stated that Dr. Wilkie's friends in Toronto will not accept the finding of the commission.

It is further stated according to the Toronto News that the falling off in subscription to the missionary funds, since the trouble arose, has mounted into the thousands, and is a result to be considered, and that trouble has aroused so much feeling that it is thought that the sentiment will not remain long without forcibly showing itself. It is held to be improbable that the church will accept the finding of the committee.

P. T. BARNUM

Mr. Barnum, the great circus king, said: The only way for any business man to get along is to advertise his business. He doesn't recommend copying; No. 1. He says paint your name and business in the most prominent place and do not stop at that, but paint it as many times as you can find conspicuous places. Now pictorial signs as flashy as the artist can produce is the best ways and means. The great show man said don't try to please your next door neighbor. He remarks, "I have often heard it said, 'Mr Smith has a sign and it is like so and so; I think I will have one the same.' Now that is the greatest mistake a business man ever made. Be original always.'" Get Fred Cook to paint your signs to suit your business, as he is original with his way of advertising. He doesn't copy nor does he intend to, and that is why Cook does the sign trade of the town. He is always ready to submit a design and always guarantees not to disapoint you. Just ring up 'phone 119 and order your exhibition signs.

MERCHANT TAILORING.

It takes expert tailoring and cutting to make Suits to fit young men as they want to be fitted nowadays. There must be lots of style and the fit must be perfection.

Our cutter can be depended upon for carrying out your instructions to the letter.

Our new Suitings and Trouserings are arriving; they are the best goods obtainable.

MATTERS PERTAINING TO PETERBOROUGH SUGAR CO.

This Year's Crop Promises to be a Profitable One.

Considering the difficulty the Company has had in securing building materials splendid progress has been made in the construction of the great building. Few people who have not visited the works have any true appreciation of their enormous size. The Company, however, find that they cannot complete the factory in time to slice this season's beets.

This year's crop of beets has been sold to the Wallaceburg Sugar Company. The price received will prevent any loss to the Peterborough Company, and in fact yield a fair profit. The Wallaceburg Company has agreed to pay for the beets received in October, on the 10th of November, and for those shipped them in November, on the 10th of the following month. All the beets are to be shipped in October and November. The Peterborough Company will take the beets from their patrons at the prices contracted for and pay for them in accordance with the contracts.

The beets will probably be weighed and tared at most of the shipping points.

Last winter the officers and agents of the Peterborough Company promised the farmers in the townships adjacent to the factory, pulp for their cattle in proportion to the amount of beets delivered; this under the circumstances is almost an impossibility this year and the farmers are expected to be generous. In the case of farmers who gave up all their root land to growing the beets, if there be any, some special arrangement will need to be made by which the Company will make some satisfactory provision. The promise made in regard to pulp this year will be cheerfully redeemed next season.

The grading of the siding from the G.T.R. near the Locks, into the factory is nearly completed; it is about half a mile in length. Capt. Geo. Bennett is superintending the work.

In certain localities canvassers have begun soliciting acreage for next year's campaign. Two prominent farmers in the County some distance away have undertaken to procure a thousand acres. It is probable a large acreage will be secured from each of the adjacent counties, and Peterborough County is expected to grow several thousand acres. Already prominent farmers have promised to grow for next year ten acres apiece.

Mr. Young, the ex-manager of the Wiarton factory, was in town a few days ago. He stated that the same seed, as sown here, produced beets on farms in the vicinity of Wiarton last season which averaged 18 per cent. saccharine. As this season is a favourable one for the production of beets, it is probable that this average will be surpassed, in some cases, in this locality. Some of the farmers have exceptional fields of beets.

Some weeks ago it was reported in the public press that a new process recently discovered would make the pulp from sugar beets worth $8 a ton. It has been discovered since that there is no foundation for this statement. Mr. Gordon of Wallaceburg, who was one of the Company organized to make use of the new process, declared while in Peterborough that it had proved a failure. The benefit accruing from pulp will probably come through feeding it to cattle. As a feed for cattle the pulp has been thoroughly tested in Michigan and other places, and has been found by experiment to be superlatively good.

FORTUNES LYING LOOSE.

The hamlet of Saskatoon, Saskatchewan, on June 1st, 1902, could have been bought for five hundred dollars.

The town of Saskatoon, Saskatchewan, on September 1st, 1903, could not have been bought for less than half a million dollars.

Men sometimes complain that the chances of wealth are slow in Canada.

Yet men passed up and down from Regina to Prince Albert daily, men with money and men with brains, and still the site of a future metropolis was left neglected.

It is easy to see now why the natural crossing place of the longest river in British territory, the outlet of a vast wheat belt, should be a big settlement.

What is so easy to see now, if seen fifteen months ago, would have kept a man and his children to the third or fourth generation in luxury.

The site of the city of Ottawa is said to have once changed hands for a pair of oxen and in the commercial and legitimate speculative world there are even yet such chances.

The reason most men die poor, lies not in the opportunity, but in the man himself.

THE YACHT RACE FIASCO.

The contest between Shamrock III and Reliance, respectively the challenger for, and the defender of the famous Cup held as the great prize of yacht racing, proved a series of processions. So early did the American boat head its rival, and so far was the Lipton boat left in the rear, that the racing feature was hardly in evidence. What inspired Sir Thomas Lipton with such sanguine hopes of victory when his new yacht proved to be inferior in speed to its two predecessors, has not been explained. It is manifest, however, that he had been seriously misled by his own error in judgment; or that of his builder and skipper. Adversity is a great teacher; also a very accomplished occultist, as it clears the mind and brings the eye into the right focus for correct vision. Sir Thomas now sees that all this excitement is vanity. The boats which have been built at such an enormous cost to defend or win a yacht race cup, he says, are not yachts at all, but mere "racing shells." They have no more interior fittings than a drum, and like one, are chiefly constructed to make a great noise, having no capacity for practical use as boats. Sir Thomas says, not a single thing has been learned of any value by the building of these racing shells; nor any service done to seamanship, or to any nautical interest. There seems no little unfairness in compelling the British challenger to sail across the Atlantic, as a yacht stout enough for an ocean voyage must be handicapped in a contest with one built close to the race course. Sir Thomas does not make this point. He is a splendid specimen of a thoroughly British sportsman, who makes no excuses, but accepts defeat with cheerfulness and magnanimous acknowledgment of the victor's superiority, whatever that superiority may be worth.

REPORT ON ROUTE OF G. T. P. R. LINE.

Great Area of Rich Land in Northern Part of Quebec and Ontario.

EASY GRADE FOR RAILWAYS.

Agricultural Land Twice the Area of Ontario From Ottawa to Lake St. Clair.

Ottawa, September 15. — Sir Wilfrid Laurier presented to Parliament to-day a blue book containing all the available information concerning the country to be traversed by the new Government railway line between Quebec and Winnipeg, together with a map of the proposed route from Moncton to the Pacific Coast.

The route from Quebec to Winnipeg is dealt with by sections of one hundred miles each, showing the physical features of this district, together with its resources. The report summarizes the information supplied by the various surveys of this region.

It points out that "the remarkably level character of the belt of country above the height of land, not only throughout Ontario, but also in the greater portion of Northwestern Quebec, would make the grade a comparatively easy one."

Concerning the capabilities of the Hudson Bay basin, it is estimated "that the portion of the Hudson Bay basin, consisting of clay loam, sandy clays, and various other soils and surface deposits fit for agriculture, is at least twice the area covered by the agricultural lands in Ontario, between Ottawa and Lake St. Clair. The construction of the National Transcontinental Railway crossing the cereal-growing district south of Hudson Bay, between the Great Lakes, and the foot of James' Bay, will open up for settlement a generally level tract of country not only well timbered and well watered, but also producing a dense growth of plants, which predicts capabilities of of an agricultural nature, dairy, farm and stock raising products, which can support a mixed population, including agriculturists, manufacturers, lumber merchants, and all those varied classes of a community dependent on such natural resources as are found within that basin.

"There is no doubt," says the report, "that the character of the country, soil, climate, mineral resources, and general conditions are such as to warrant its settlement."

"Concerning the forest wealth of the district, it says that the following trees are found along the route of the new railway: White cedar, white pine, red pine, mountain maple, black ash, yellow birch, (eastern section,) white elm, whilst sugar maple, red oak, ironwood, basswood, hemlock, bun oak, balsam, poplar, banksian pine, black and white spruce, American larch,, canoe birch, balsam fir, rowan tree and aspen poplar abound, and the majority of these are found up to several hundred miles north of the proposed location. There is also an untold abundance of mineral wealth in the Laurentian Hills, about the height of land.

KEENE.

(From our own Correspondent.)

Mrs. (Dr.) Shaw, with her son Master Morris, started Monday morning on a two months' trip through the Territories where she will visit her son Arthur. We wish them a pleasant journey.

Miss Lyla Bell, of Peterborough, is visiting her cousin Miss Lily Bell.

Mr. Wm. Wedlock has begun extensive repairs on the dam which will take a couple of months to complete.

After years of suffering Mr. Jas. Kane was suddenly called to rest on Thursday morning last. He ate his breakfast in the usual manner and went for a short walk when he suddenly collapsed and died in a few minutes.

Mr. M. Konaley has taken over the Victoria Hotel lately vacated by Samuel English. Mr. English will remove to his home in Omemee.

Mr. Fred Eason has re-leased the Burnham farm for another year.

Mrs. W. W. Miller has disposed of her property on Hill street to Mr. Jno. Lang, M.P. Mr. Lang will move to the village in the early spring.

Mrs. Joseph Moncrief and Miss Florence Miller, of Peterborough, spent Tuesday here.

Rev. J. W. McIntosh and sister, of Centreville, were here on Monday the guests of Mrs. Wm. Campbell.

A number of our citizens attended the musical festival in Peterborough last week and were highly pleased.

Our dusky friends have a large encampment on Sugar Island, almost to the proportion of a village and are doing an extensive business in rice harvesting. The crop this year is unusually large and is being fairly well gathered. This, together with the fact that the market is active, is causing the purses of the aborigines to readily share in the prosperity of the country generally.

Miss Daisy Jackson, Peterborough, is visiting Miss Jenny Plunkett.

Miss Helen Laing is in Asphodel this week the guest of Miss Mabel Humphries.

The pig of one of our neighbours has lately become notorious, having caused no less than four runaways. The latest victim was Dr. Harrison. On Sunday afternoon his buggy and harness were badly smashed.

Mr. John Read spent Saturday in Westwood.

The annual meeting of the W.F.M.S. was held in the basement of the Presbyterian church on Thursday afternoon and was very largely attended. Rev. Geo. Yule, of Springville, delivered a very instructive address, as did also Mrs Rogers, of Peterborough. Master Walter Laing and Master Norman Taylor sang a very pretty duett and Misses M Bryce, A. Hope, L. Campbell and Mrs A. Anderson gave a quartette in a very pleasing manner. The temporal wants were amply provided by the ladies of the society.

LATEST FASHION NOTES.

AN ALL-WHITE TOILETTE.

All-white toilettes seem to grow more popular with everyone as the season advances ,and this beautiful costume is of oyster-white satin cloth. The bolero

waist is elaborated with medallions, also velvet and cord ornaments which are now playing such an important part on women's gowns. The cuffs and belt are of velvet and the medallions appear also on the sleeves. The inverted box-plaited skirt is securely stitched with Corticelli stitching silk and just below the stitching are arranged medallions in graduated sizes. The skirt, which clings about the upper part of the figure flares at the bottom and has a slight sweep.

WILL SEND A NOTE.

Powers Decide to Give Bulgaria Another Warning.

BOTH CLAIMING VICTORIES.

Turkish Soldiers' Atrocities Pass the Bounds of Imagination—Adrianople Will Soon Be Depopulated—300 Refugees Have Mysteriously Disappeared—Believed to Have Been Captured.

Vienna, Sept. 17.—The Tagblatt understands that the powers have arrived at a decision to make a new collective representation at Sofia, warning Bulgaria against commencing a war.

Macedonians Holding Their Own.

Constantinople, Sept. 17.—Contrary to the official reports, advices from good sources say the Macedonian insurgents are holding their own at several points, and are inflicting defeats on the Turks in the districts of Morihova and Melnik, 6 miles from Salonica, where three Turkish battalions have been almost annihilated.

Beyond Power of Imagination.

Sofia, Sept. 17.—Prince Ferdinand of Bulgaria, arrived here yesterday from Euxinograd. A semi-official statement says the atrocities daily committed by the Turkish soldiers pass the bounds of imagination. The general opinion is that Adrianople will soon be entirely depopulated of the Christian element.

Turkish soldiers have raided the estate of one of the Sultan's bodyguard, Sefulo Bey, at Sturbola Presta: pillaged 26 Bulgarian houses, outraged four women and taken 1,800 sheep. About 200 refugees from the burned village of Dyavata, who had gone to Malovisstha, have mysteriously disappeared. They are believed to have been captured by Turks.

450 Annihilated.

Salonica, European Turkey, Sept. 17.—An insurgent band of 450 men was annihilated by the Turks, Sept. 14, between Lotin and Krabola.

Grand Vizier Loses His Job.

Paris, Sept. 17.—The Foreign Office has been informed that the Foreign Grand Vizier of Turkey has been dismissed.

McDougall Again Remanded.

Toronto, Sept. 17.—Alfred McDougall did not appear before Judge Winchester yesterday when his case was called. Dr. Arthur Jukes Johnston was present to testify that while the accused was in slightly better health than when he previously visited him, his heart was still in a very weak condition and any excitement might prove fatal. The judge decided that the case should stand over until Oct. 3, against the strong objections of E. C. Briggs, K.C., the Crown prosecutor.

Be Quick.

Not a minute should be lost after a child shows symptoms of cholera infantum. The first unusual looseness of the bowels should be sufficient warning. If immediate and proper treatment is given, serious consequences will be averted. Chamberlain's Colic, Cholera and Diarrhoea Remedy is the sole reliance of thousands of mothers and by its aid they have often saved their children's lives. Every household should have a bottle at hand. Get it to-day. It may save a life. For sale by all druggists.

A Canadian Railway Mortgage.

Albany, N.Y., Sept. 16.—A mortgage deed for $1,250,000 was filed yesterday with the Secretary of State by the London, Aylmer and North Shore Electric Railway Company of New York. The road operated between London, Ont., and neighboring towns to the Town of Aylmer, Ont., along the north shore of Lake Erie. The Mortgage is made to William Warnock, banker of Alymer, and the Guardian Trust Company, of New York. The mortgage and bonds bear the date of April 29, 1903, and are for 20 years

Desires to Aid Labor Movement.

The Hague, Sept. 16.—The States general reassembled yesterday. The Queen's speech dealt largely with the excellence of the services rendered by the Navy and Army during the recent railroad strikes. Referring to the disturbances in the domain of labor Her Majesty declared the Government was desirous of "co-operating by continued social legislation in the healthy progress of the labor movement."

Stratford Won Dunlop Trophy.

Toronto, Sept 14.—The Dunlop Trophy Road Race was won by Stratford team, Strathconas of Toronto, second, on Saturday. A. McKee, of Barrie, was first to finish. His time was 45.14.

THE REDISTRIBUTION.

Sir Richard Cartwright in the House Revives Memories of the Iniquities of the 1882 Gerrymander.

Ottawa, Sept. 17.—The debate on the redistribution bill occupied the entire day in the House yesterday, some eleven constituencies being adopted. The discussion at times was extremely brisk, notably when Sir Richard Cartwright entered the arena, and revived memories of the iniquities of the gerrymander of 1882. Sir Wilfrid Laurier and Mr. Borden also participated actively. The chief storm centres of debate were Norfolk, for which Col. Tisdale made another unsuccessful plea for two seats, Elgin and Grey, but the latter stood over. Before adjournment Mr. Taylor again brought up the matter of members' unpaid indemnity, and Mr. Fielding declared emphatically for the rights of Parliament over the Auditor-General.

Dr. Sproule presented a petition from a number of his constituents in Grey, praying that the transcontinental railway bill be not passed, but held over for further consideration by the Government.

Pernicious Literature.

Hon. Wm. Paterson, replying to Mr. Walter Scott, said the attention of the Government had been called to the importation into Canada of weekly publications of the class known as "Jesse James stories" and "Diamond Dick," but that these publications were not brought in free of duty, so far as the Government were aware.

Mr. R. L. Borden asked that before the bill amending the adult act was taken up the correspondence and documents relating to the difficulty between the Government and the Auditor-General be laid on the table. This was agreed to.

THE COLLISION AT BLENHEIM.

Switch Opened by a Brakeman's Mistake—List of the Injured.

Chatham, Sept. 17.—The accident at Blenheim was caused by a switch left open, allowing the rear end of the passenger train to crash into a loaded freight that had pulled into the siding to allow the express to pass. The rear coach of the passenger train, which was mostly occupied by high school and business college students going to their homes, was telescoped half its length and reduced to splinters.

The list of injured is as follows: Miss Nellie Forbes, leg badly fractured; Miss Winnie Peacock, broken jaw and other injuries; Miss Erie Quackenbush, bad gash on cheek and leg much crushed; Misses Doherty and McGregor of Ridgetown, badly bruised and suffering much from shock. Miss McGregor's chest was crushed, but her injuries are not considered fatal. All the occupants of the coach were more or less bruised and shaken up. Among those more or less hurt, in addition to those named, are: James Hogan, Blenheim, neck, shoulder and head cut, not serious; Duelah Duchanan, hand bruised, not serious; Miss Rowe, suffering from shock; Walter Sedge, shock; Miss Elda Ranson, shoulder bruised, not serious; Stewart Campbell, head slightly hurt. The coach containing the Blenheim pupils was quite beyond repair, and was set on fire to facilitate the clearing of the track.

MODEL FAIR AT WHITBY.

Opened by Hon. Sydney Fisher, Dominion Minister of Agriculture.

Whitby, Sept. 17.—Whitby's Model Fair was yesterday opened by Hon. Sydney Fisher, Dominion Minister of Agriculture. He was received with kind words and cheers, and delivered a thoroughly sympathetic and inspiring agricultural speech. Hon. John Dryden, Ontario Minister of Agriculture, also spoke. The show, especially in the educational features, far surpassed anything heretofore held. The experimental plot of growing samples of various grains and seeds was very much admired by the hundreds of agriculturists present. Prof. Zavitz's address, using the growing grains as illustrations, was very interesting and instructive. The Fair's guests were entertained at luncheon at Whitby Ladies' College. The public meeting in the evening was also illustrative of what can be done here in establishing a Model Fair.

New York Storm Swept.

New York, Sept 17.—Greater New York and its environs were visited yesterday by the fiercest wind and rainstorm in years. The day begun with rain, which increased as the east wind blew 54 miles an hour, and for two hours about midday the combined fury of the elements wrought damage on land and water amounting to many thousands of dollars. Many persons were injured in the centre of the city. At Atlantic City the wind unroofed fifty houses.

Probably Fatal Accident.

Rockwood, Sept. 17.—Frank Phillips, who lives on what is known as the Moore farm, on the Guelph road, met with a serious and probably fatal accident on Tuesday afternoon. He was driving a large load of peas into the barn, and was kneeling on the load, when his head came in contact with the top of the door, and he was doubled up backwards. The physicians called have poor hopes of his recovery.

Hamilton Man Asphyxiated.

Toronto, Sept. 17.—Joseph Dillon, aged 32, of Hamilton, was found unconscious in his room at the Nelson House yesterday morning with the gas turned on, windows closed and door locked. Slight hope is held out for his recovery.

U.S. Fire Fighters Organize.

Pittsburg, Sept. 17.—Through the efforts of Organizer Thos H Flynn of the American Federation of Labor the firemen of Pittsburg are organized into a union.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

Symptoms

Weakness of the Back, Backache, or Pain in Back, Swelling of Feet, Ankles or Wrists, Pain in Joints or Hips, Constipation, Urinary Troubles, Chills, Feverishness.

Cause

These indicate that the kidneys are out of order. If a remedy is not soon found, the evil may develop into one or more of the following diseases: Inflammation of Kidneys or Bladder, Calculus, Gravel or Stone, Rheumatism in one of its distressing forms, Diabetes, Bright's Disease of the Kidneys.

Remedy

The latest and best remedy for Kidney irregularities, which are the cause of so many ailments and diseases, is

Trade-Mark

Bu=Ju

The Kidney Pill That Cures

It possesses all the advantages of other remedies without the objectionable features of any. Bu-Ju is the result of the latest scientific study, compounded with the highest skill. It is sold by all druggists in boxes of 50 pills for 50 cents. Do not waste money and valuable time on substitutes.

Remember

In kidney troubles time is peculiarly valuable. Get the best remedy at once; there is great danger in delay.

LOOKS LIKE WAR NOW.

Ten Thousand Bulgarian Reserves Called to the Colors.

Sofia, Sept. 16.—Ten thousand Bulgarian reserves belonging to three divisions on the Turkish frontier have been called to the colors.

Many Turks Killed.

Salonica, Sept. 16.—A general insurrection in the vilayet of Salonica, east of the Vardar River, is announced to have begun Monday. The region is divided into eight districts, each commanded by a Bulgarian officer. Gen. Zontchioff, president of the Macedonia Commission, is the commander-in-chief.

A band of one hundred and twenty insurgents posted at Bar Oritza killed thirty Turks in a recent engagement and retired to the mountains without sustaining losses. A band organized by Greek notables near Drama is threatening to destroy Cyurejik.

WINDFALL OF $60,000.

Coal and Steel Dividends Given to Elgin Loan Co.

St. Thomas, Sept. 16.—W. K. Cameron, solicitor for the Elgin Loan Company, yesterday morning received from the National Trust Company certificates for the 525 shares of Dominion Coal, amounting in value to $52,500, and 50 shares of Dominion Iron and Steel, valued at $5,000. In addition he also received a cheque for $1,050, being the amount of dividends paid on the stock while in the custody of the National Trust Company. The stock is worth about $18,000 less now than at the time it was first demanded by the Elgin Loan liquidators, and the National Trust may also be liable for this amount.

Was Hovering Between Life and Death

A few days trial of Lactated Food will convince any intelligent mother that it is the right form of nourishment for her weak and puny baby. No other food can give such prompt and happy results at a time when the little one is hovering between life and death. A Montreal lady last August wrote as follows: — "My baby was so weak and sickly a few weeks ago that we despaired of her life. We tried nourishment of every kind, but could not get anything to remain on its stomach. We heard of Lactated Food, and commenced its use. There was an improvement the very first week, and to-day our baby is well and strong. Lactated Food saved her life." Sold at all Drug Stores.

Coal and Steel Separation.

Montreal, Sept. 14.—Subject to the approval of the shareholders, the directors of the Steel Company have arrived at an understanding with the Coal Company respecting the surrender of the lease of its property. The Coal Company is to pay to the Steel Company $2,635,000, is to assume the current liabilities for wages, supplies, etc., of the coal department of the Steel Company's business, and is to receive the benefit of the current cash assets of the business.

Centenarian Dead.

Montreal, Sept. 14.—Mme. Joseph Juteau died at St. Agathe on Friday at the age of 104 years, and 9 months. She is survived by five generations. She came to Montreal when a little girl.

Killed on the Track.

Halifax N. S., Sept. 14.—Neal Dwyer, a young man, while walking on the track at New Glasgow, on Saturday afternoon, was struck by a special for Antigonish and instantly killed.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

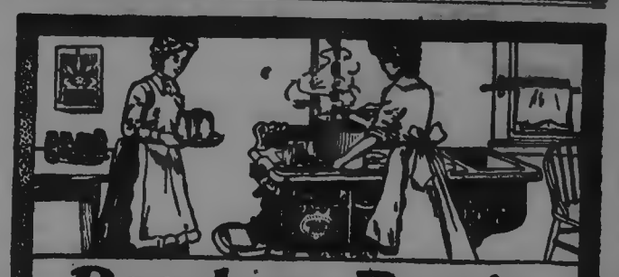
Hair Dyeing Comb

GERMAN patent, immense success, all shades, by simply combing; write for particulars. GERMAN COMB CO., 330 St. Urban street, Montreal, P. O. Box 68. 6w.



Pandora Range.

Fitted with Enameled Steel Reservoir.

Pandora reservoir is oval in shape and stamped in one piece from best grades of sheet steel—has no seams, grooves, bolt heads or square corners to collect dirt.

Is enameled pure white, and has a smooth, marble-like finish which is most easily and thoroughly cleansed—is so free from taint and all substances injurious to the health that it can be used for boiling fruit and many other purposes, besides heating water.

No other range is fitted with enameled steel reservoir.

The oven in the "Pandora" is extra roomy, scientifically proportioned to the fire-box and hot-air flues, ventilated, lined with sheet steel, fitted with thermometer, and is a perfect baker.

Sold by all enterprising dealers. Booklets free.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Miss Kathleen Carton has gone to visit friends in Toronto.

Mr. L. F. Clarry, barrister, of Hastings, is in town to-day.

Mrs. G. Magel of Rochester, N. Y., is visiting her aunt, Mrs. A. R. Ringer, of 589 Reid street.

Mrs. Jas. Dolan has returned home after spending a few weeks between Montreal and Massey.

Mr. A. Blade of Rochester, has returned home after spending a few days with friends in town.

Miss Carrie Noyes, of Rochester, N.Y., is spending a month's vacation in town visiting friends.

Mr. James Scobell, representing the Martin and Stanley Piano Co., went to Port Perry yesterday.

Mr. and Mrs. John Simons left on Monday for Toronto where they intend residing in the future, Mr. Simons having accepted a good position in that city.

Mrs. J. R. Stratton wishes to announce that if the weather to-morrow should be unfavourable, the "at home" and garden party for which invitation cards have been issued, will be postponed.

Mr. Fred Kelly was in Port Hope yesterday on a pleasant mission. He acted as groomsman in a wedding in which the principals were Miss Ida Maud Lent, daughter of Mr. and Mrs A. Lent, and Mr. Herbert S. Hamill, of Bolton, Ont.

Rev. Dr. Torrance and Mr. Hugh Waddell are representing Peterborough at the meeting in Kingston of the Presbyterian General Assembly Commission and Queen's University Trustees, to consider the advisability of holding the University in its past relations to the Presbyterian church instead of nationalizing it.

Mr. A. E. Jackson, formerly of the local staff of the Bank of Commerce, and now of the Stratford branch of the bank, is in town on a brief holiday. While in Peterborough Mr. Jackson was exceedingly popular in social circles and yesterday a number of the young people of the town attended a picnic party down the river which was gotten up in his honour. Mr. Jackson was thus given an opportunity of meeting a number of his former friends, and a delightful time was spent by all present.

Federal Union, No. 24.

Members are requested to attend special meeting of the above Union to be held in Sons of England Hall, Friday evening, Sept. 18th, at 8 p.m. Business important. J. McCann, President.

Teachers' Study Class.

Sabbath school teachers' study class will meet in the parlour of St. Paul's church this evening at 7.15 o'clock, for the study of next Sabbath's lesson. "Abstinence from evil," I. Peter 4. 1-11.

Loyal True Blues.

The twenty-ninth annual meeting of the Ontario Grand Lodge of Loyal True Blues is now being held at Port Perry. The reports of Grand Officers show the condition of the Order to be satisfactory.

Informal Reception.

An informal reception was tendered to Miss Lough, the newly appointed secretary of the Y.W.C.A., on Tuesday evening, at a meeting of the Board. A short musical programme was given and Miss Lough was welcomed in a few words by Miss Roberts, Vice-President. An open reception will be held on Tuesday, September 29th.

St. John's Festival.

St. John's church has been handsomely decorated for the Thanksgiving Festival service, which will be held there to-night. The preacher for the occasion will be Rev. Derwyn T. Owen, of St. James's cathedral, Toronto, and a special feature of the occasion will be the music, which will be rendered by the choir. The public will be welcomed at this service, which promises to be an especially enjoyable one.

THE CITY LEAGUE EXECUTIVE MET.

Some of the Motions Which Were Carried.

League Will Probably be Composed of Four Teams—Schedule to be Drawn up.

A meeting of the Executive of the City Rugby Football League, met last night in the Y.M.C.A. parlours with the following attendance: — Hon. President, Mr. H.R.H. Konner; President, D. Walker, who occupied the chair; Vice-President W. Crowley; Secretary Treasurer W. G. Perks, and the following representatives of the individual teams,—Messrs. A. Hudson, the Britannias; F. Bradburn, the Rough Riders; E. Poole, All Saint's, and W. Crowley, the T.A.S.

It was resolved after considerable discussion, that the first game be played on Saturday, Oct. 3rd, and that all games be played on Saturday afternoons at Nicholls Oval. A committee consisting of Messrs. Konner, Walker and Crowley was appointed to draw up the League's schedule.

The matter on which perhaps the most discussion took place was the age limit of the league. Two teams wished to have it under 20 years while the other two wanted the allowance of another year, making it under 21 years. The President's deciding vote made the age limit under 20 years on the day of the first game.

The entrance fee for each club will be $5, the teams playing for a trophy.

The following motions were carried:—

1. Each team should register a list of players with the President of the league two days before the match in which such players participate.

2. No player shall be allowed to transfer his membership to another team in the League after having played one game with his own team.

3. Each team shall register with the President of the League, a list of its playing members with their signatures and any member who has signed this list is bound to remain with that team for the season.

4. That every player be a bonefide resident of the town of Peterborough on or before Sept. 17th, 1903.

5. That a fee of 10 cents be charged each person attending the matches, home team to take charge of funds and be responsible for satisfactory provision of balls and marking of ground. That the home team shall be designated in the schedule of matches.

The meeting adjourned until Saturday night at 8 o'clock, when the details of the constitution of the League will be arranged.

A PRETTY WEDDING.

Miss Jane Ambrose Married to Mr. William Clemence.

A very pretty home wedding took place at the residence of Mr. John Ambrose, Otonabee, yesterday afternoon, when his sister, Miss Jane Ambrose was married to Mr. William Clemence, of Niagara Falls, N. Y. The ceremony was performed in the presence of a number of friends of the contracting parties, by Rev. W. J. Jolliffe, B.C.L., pastor of the Charlotte street church.

The bridesmaid was Miss May Donell, of Peterborough, while the groom was supported by Mr. C. B. Robertson of Boston. After the wedding a dainty dejeuner was served, after which the bride and groom left on the 5.10 C.P.R. train for their future home in Niagara Falls, N.Y., after a visit to western cities. The bride was the recipient of many handsome presents.

A HOME WEDDING.

Miss Agnes Patterson to Mr. Orlando Mowry.

The residence of Mr. W. A. Patterson, Dalhousie street, was the scene of a pleasing event yesterday afternoon, when his daughter, Agnes, was united in marriage to Mr. Orlando Mowry, a member of the staff of the Review Printing Company, the ceremony being performed by Rev. J. G. Potter, pastor of St. Andrew's church. The young couple start out in their married life with the best wishes of their many friends.

METHODIST DISTRICT FINANCIAL MEETING.

Being Held To-day in Mark Street Church

The Financial District meeting of Peterborough District Methodists is to-day being held in Mark street church, Ashburnham, and is being attended by a number of ministers and laymen from the district.

This morning the Executive of the District Epworth League held a meeting, the principal business under discussion being the District Epworth League Convention, which, it was decided, will be held at Millbrook on October 20th. The meeting this morning was presided over by Mr. R. McBain, President, and the other members of the Executive present were Rev. N. D. Drew, of Fraserville, Secretary, and Rev. Messrs. J. P. Wilson, W. J. Jolliffe, Leggott, Lewis, Montier, Kenner, Robeson, McQuade, Metzler and Bunner. A provisional programme for the convention was drafted, in which the following will take part:—Miss Hughes, of Peterborough, Rev. Dr. Smith, Rev Mr. Montier, of Cavan, and Miss Sherin, of Lakefield.

The convention will be attended by delegates representing all the Leagues in the District, and is expected to be an interesting series of meetings.

This afternoon the annual Financial District meeting is being held, the session being presided over by Rev J. P. Wilson, Chairman of the District. Rev. J. G. Lewis, pastor of Mark street church, is Financial Secretary. This meeting is held each year during September and the principal business is to apportion to the different circuits the amounts placed at its disposal by the annual conference, and to examine into the circumstances surrounding the income of the Home, Indian, Foreign and other Missionary enterprises. The missionary and educational meetings are also arranged for. A special feature of this year's meeting will be the consideration of the Wesley Bi-Centenary movement in which a fund of a quarter of a million dollars is being asked for missionary purposes.

CHILDREN'S AID SOCIETY.

Case of Neglect of Children Being Dealt With.

Mr. George Cochrane supplies the Examiner with the information that on behalf of the Children's Aid Society he has this week been investigating some cases which come under his jurisdiction. Three children, two girls and a boy, of whom the parents are Mr. and Mrs. Morton Mowry, have been taken from their parents, because of alleged neglect, and placed in the Shelter of the Society, until homes can be found for them. This is the third time that these children have been taken charge of by the Society, and it is proposed now to deal with them in the usual way, by placing them in good homes. Another case of a different nature is also being dealt with. Two boys, whom the parents are not able to control, have been handed over to the Society in the hope that something may be done which will make them amenable to parental discipline. Their parents live in North Dummer.

ELECTED OFFICERS.

St. Andrews Guild Held First Meeting of Fall Season Last Night.

The first meeting of St. Andrew's Young Men's Guild, after the summer recess, was held on Tuesday evening, and a good attendance was on hand indicating that the coming season will be a successful one. The principal business was the election of officers and the discussion of the programme to be followed in the coming winter's work. The officers elected to guide the work of the Guild during the year are as follows:—

Hon. President—Rev. J. G. Potter.
President—Mr. H. H. Edmison.
Vice-President—Mr. C. E. Anderson.
Cor. Secretary—Mr. J. Laing.
Rec. Secretary—Mr. W. Richardson.
Treasurer—Mr. R. M. Glover.
Counsellors—Messrs. R. H. Elliott, Peter Kerr, J. Y. Gerard, Chas. Peeling.
Musical director — Mr. D. S. Ferguson.

This Guild, which is very generally looked upon as being one of the most progressive organizations of it kind in the town, decided to hold its usual anniversary services this year on Sunday, Sept. 20th. The preacher secured for the day's services is Rev. Dr. McLeod of Barrie, who will in the evening preach a special sermon to young men. Committees were appointed to arrange the details of the anniversary services.

It was also decided that as has been the custom in the past, the annual concert of the Guild will be held on "St. Andrew's Night," November 30th. The entertainment, which will be on a par with those usually given by the Guild will be first-class, and the details were left for arrangement with the Executive Committee.

On the Sunday preceeding the 30th of November, special sermons will be preached by Rev. Principal Gordon, of Queen's University.

OBITUARY.

Christian Guardian on the Death of Mr. Wm. Church.

The Christian Guardian in its obituary column has the following notice:—

Wm. M., eldest son of Oliver and Maturia Church, was born in the county of Northumberland, township of Percy, on December 2, 1849, and came to the township of Burleigh, in Peterborough county, in the year 1870. Here he spent his time carving in red cedar, at which trade he became very proficient, and many a camper on Stony Lake has carried away the product of his skill, to be treasured as a souvenir of this delightful summer resort. Although not until about three years ago did Bro. Church take a public stand for Christ, still he was a man who was always held in very high esteem in the settlement in which he lived. Very honest, upright, and honourable in everything, he lived and died highly respected by all who knew him. For several years he had not been very rugged, and a few weeks before his death he was taken quite sick, but seemed to be in a fair way to recovering his usual health, being able to attend church on Sunday, May 17th. But during the following week he was stricken again, and very unexpectedly was called away about noon on May 21st. Though unable to bid his friends good-bye, he opened his eyes with a smile, and closed them in death. He leaves behind him a sorrowing widow, formerly Marion Borrowman, of the town of Peterborough, at one time a teacher in the public school, and one sister, Mrs. Chas. Lauder, and two brothers, Allen and Israel, all of Burleigh. We mingle joy with sadness, for we know that God hath given his beloved sleep."

A TRIBUTE TO MANITOBA.

Apple Culture Can Successfully be Conducted in Prairie Province.

As a contradiction of the mistaken idea that in Manitoba fruit cannot be successfully grown, Mr. John Fowler has this week received from his daughter, Mrs A. C. Thompson, who lives near Souris, Manitoba, a fine sample of crab-apples, which were grown by Mr. J. Cowan, a neighbour of Mrs. Thompson's. Mr. Cowan, like many other Manitoba farmers, for a long time held the opinion that the climate of that province was not suitable for fruit culture. Later, however, he made the experiment, with small fruit, at first, and the results being so satisfactory, he went into apple culture, with highly successful results, as is evidenced by those sent to Mr Fowler, and which, by the latter's kindness, have been left at the Examiner office for those interested to see.

CENTRAL EXHIBITION.

Advice to Apple Growers.

Apple growers are urged by those interested in fruit culture to make an effort to make a section of the Peterborough Fair a success. It is pointed out that it is not necessary for each exhibitor to have a large number of varieties to enter. A few varieties, and a few of each kind, are all that is necessary, and it is hoped that the apple section will have a number of entries.

THE ELORA TEAM HAD THE LUCK.

Athletics Were Unable to Continue Their Winning Streak.

Lost Yesterday to the Fast Western Team—Locals Have had an Enviable Record of Successes This Season.

After having won eight straight games this season, and worked up into a prominent position in the race for the Junior C.L.A. championship the Athletics yesterday went down to defeat at Markham before the Elora "Rocks," the team that is now booked to win the championship.

The Athletics, however, notwithstanding the fact that they have been defeated, can look back upon their season's record with considerable satisfaction and Peterborough has every reason to be proud of them.

When the difficulties under which the team has worked, even from the beginning of the season, are considered, the wonder is that it has been able to make such a creditable record. They have had practically no practice ground, because the oval is at such a distance from the town that, since the days have become shorter, it has been impossible for the boys to meet there for practice after working all day, as all the members of the team have done. This is but one, of the many adverse circumstances against which the team has worked, and, in spite of all, the record of the team has been one of which every lover of the great national game must feel proud. Good, clean and, even their opponents admit, scientific, lacrosse, has been played in every game. The boys have worked hard, and deserve all the commendation that can be given them for their conduct, both as lacrosse players and as gentlemen. It is certain that Peterborough has never been represented in the sporting field by an organization which brought the town more credit than the Athletic lacrosse team, and although they came back last night a defeated team, they have the satisfaction of knowing that in every game in which they have participated their honour has been maintained, and as a result the individual members and the team as an organization, stand high in the estimation of the citizens of the town.

The team which won the game yesterday, won it because as the teams were constituted, and taking the conditions into consideration, the winners were the better team. And this is not to be wondered at, when the circumstances are considered. The members of the Elora team are so circumstanced that they can practice every afternoon, which fact they were not slow to take advantage of, with the result that they were to a man, in the best of condition, while of the Athletics this could not be said. Wilkinson had not played a game since that played on Civic Holiday, and some of the other members had been so situated that they could not get out to practice, and for those who could turn out recent practices have been conducted under most unfavourable circumstances, chiefly by reason of the fact that a comparatively short time each evening could be spent, and it may be truthfully said that the lack of condition lost them the game, and the relative playing ability of the two teams is not indicated by the score, which was 7—3.

The game was won when the Athletics were playing 10 men to 12, in the last quarter, and was but the culmination of the hard luck which, to a certain degree, has been their portion for some time.

The game, which was witnessed by about three hundred persons, many of whom came from Elora, on a special train which the team ran, was a good clean exhibition of lacrosse, replete with fast plays, on the part of both teams. No one on either team was hurt beyond a few scratches or bruises, from which each suffered about equally, and the referee's duties were very light. The first goal after the face-off was scored by the Athletics, who were able to make a greater number of shots and keep possession of the ball during a longer period than their opponents, but the excellent work of the Elora's defence prevented them from scoring. The quarter ended with the score 2—1 in Elora's favour. During the second quarter the boys from the west had the better of the argument, and added 2 more to their list of tallies, while the Athletics were only able to advance one, making the figures at half time, 4—2. In the 3rd quarter the Peterborough boys put up the more scientific and effective game and scored one, with good chances of being able to increase the number of those already to their credit.

At the beginning of the last quarter with the score 4—3 the Athletics were playing the aggressive game and felt confident of being able to win out, which they undoubtedly would have done under ordinary circumstances, but two of the best defence men, Morgan and Howell, were ruled off at the same time for 5 minutes each for offences, which, particularly in the case of Howell, could hardly be called an offence at all, and it was during this period that the game was won, 2 goals being scored against them and the game cinched. One more was added before time was called, and the final score made 7—3.

The Elora team played a fast game, and the players are all first-class men, not a weak spot existing from goal to inside home. Brow in goal, and Francis at point are worthy of special mention. The latter played a particularly brilliant game. Hewett, on the defence field and Howes and Vallory on the home, are the players whose work was most conspicuous for effectiveness. The locals, by reason of the lack of condition, treated on above, did not play their usual game, but on the whole good lacrosse was seen, the playing of Clarke, in the nets, Howell and Morgan on the defence division, and Wasson on the home, were noteworthy features.

The boys are perfectly satisfied with the result, and cheerfully accord the victory to the best team as they lined up on the field yesterday. This win will place Elora in the finals, and if they continue to display the present form should have but little difficulty in winning the pennant.

The teams lined us as follows:—

Elora.	Athletics.
Goal.	
Brow	Clarke
Point.	
Francis	Ketchum
Cover point.	
Muir	Morgan
1st defence.	
Bird	Howell
2nd defence.	
Bryans	Main
3rd defence.	
Hewett	Wilkinson
Centre.	
W. Wells	Robertson
3rd home.	
J. Wells	O'Flynn
2nd home.	
Carter	Best
1st home.	
Howes	Wasson
Outside home.	
Jefferies	Glover
Inside home.	
Vallory	Cavanah
Field captain.

Makes Walking Easy

The Geo. A. Slater Invictus Shoe

Unsurpassed for Style, Fit, Wear and Comfort.

In Vici Box Calf
Patent Calf
And Enamel Leather

J. T. STENSON

George Street, near Simcoe.

A ROOM OF WALL PAPER

Rules for Measuring

TO FIND the number of single rolls required, multiply distance around room by height, taking out 20 square feet for each opening and divide by 30. To find quantity for ceiling, multiply length by width and divide by 30.

For 30 inch plain ingrains divide by 60, result will be number of rolls required.

Wall papers are sold by the single roll, but put up in double rolls, as they then cut to better advantage.

Price for border is for a single strip the width of the border and one yard long. Samples mailed free upon application. State what priced papers you wish, width of border and colour effect desired, to enable us to make suitable selection. Ceiling papers same price as walls they match, with the exception of ingrains.

Red Ticket Sale

Regular and Reduced Prices.

On the Red Ticket you can see at a glance the Regular Selling Price and the Reduced Price.

HALLWAY

We offer patterns that fit like a master of ceremonies into the surroundings, beautiful blending of colours, emphasizes good taste, modifies bad. Warm in hue, delicate in design. Regular price 25c, Red Ticket Sale price **18c**

PETERBOROUGH MAN IN ADVERTISING FIELD.

Work of Mr. Lawrence G. Cluxton Subject of Favourable Comment.

Under the heading, "A Successful Ad Manager," Profitable Advertising for September has the following appreciative notice referring to one of Peterborough's progressive sons.

Coming from such an authority as that of the journal mentioned above, which is one of the most influential in the advertising field, this notice is particularly valuable.

"There are two peculiar fields in which the successful advertiser makes his mark. They are (1) the placing on the market and creating a popular demand for goods hitherto unknown, and practically involving an experiment on the part of the consumer, and (2) the arena where many rivals shine—where similar articles are offered for sale and competition is keen, in the judicious placing and make-up oof advertising.

Perhaps it is easier to create a demand for a new article than by persistent and clever devices to keep constantly before the public grades and classes of staples, which have to face the close and zealous rivalry of other firms.

There is no name to-day more familiar in the wine and spirit trade in Canada than that of the Lawrence A. Wilson Company, Limited. The goods it handles have always been known as standard, but its popularity in the trade has been very largely built up by its persistent and clever advertising methods.

As in all large concerns, the advertising department is one by itself, and the manager of this important branch is Lawrence G. Cluxton, who combines with it the post of secretary. Mr. Cluxton is a native of Peterborough, Ont., and before entering the world of commerce, received the best education to be obtained in the banner province of the Dominion. Under his careful eye the specialties for which the Lawrence A. Wilson Company, Ltd., are so noted have become so popular that there is not a dealer of any importance in the Dominion without them. While the goods speak for themselves, the demand was created by a judicious use of printers' ink. Take, as examples, Vin Mariani, the now world-famous French tonic Gold Lack See Champagne, Spanish, brandies, Bordeaux Clarets, ports, and a number of famous Scotch whiskies.

Perhaps Mr. Cluxton scored his greatest success in his method of placing "King Edward VII." Scotch on the market; some idea of its popularity may be learned from the fact that the firm has just placed a repeat order, doubling the amount of the original contract, with the proprietors, Greenless Brothers, the well-known Argyleshire distillers."

WEDDING BELLS.

Nuptials of Mr. B. H. Bartlett and Miss Maude O. R. Shera, Both of Town.

A pretty, but quiet wedding took place at 6 o'clock last evening at 621 Water street, the residence of Mr. Robert E. Shera, when his youngest daughter, Miss Maude C. R. Shera, was united in marriage to Mr. Ernest H. Bartlett, also of town, in the presence of relatives and immediate friends. Miss Lillian M. Bartlett, of Battle Creek, Mich., and Miss Ila E. Shera, were bridesmaids, and Messrs. B. R. Beattie and J. J. Gorham supported the groom, while Miss Wilhemine Gumpright played an appropr. te wedding march. The happy young couple, who were married by Rev. J. P. Wilson, were the recipients of a large number of costly presents. They left on the 9.10 G.T.R. train and on returning will live in Peterborough.

THE "CITY FATHERS" IN CONFERENCE.

Union of Canadian Municipalities Convention at Ottawa.

The third annual convention of the Union of Canadian Municipalities is now in session at Ottawa, opening yesterday, and it will continue until to-morrow. His Worship Mayor Roger, who is a member of the Executive Committee of the Union, is in attendance, also Ald. Best, who attends as a delegate from the Town Council. A number of matters of vital importance to the different cities and towns in Canada will be brought up.

The special ones among these, and of most general interest, will be: "The Present Power of Railway Legislation as affecting Municipalities." This will be fully discussed, and the text of several amendments that have been given recently in some cases, cited.

Another thing that promises to be one of the live subjects is the attempted change in the Assessment Act. This is likely to affect the revenue of the cities and towns considerably, and there is a strong opposition from civic bodies.

An important matter that is to be taken up is the late legislation regarding the speed and equipment of electric roads. It will be shown that this concerns municipalities in many ways.

57TH BAND AT BOWMANVILLE.

Has Been Engaged to Play at West Durham Exhibition.

Bandmaster Gliddon was at Bowmanville this week completing arrangements for the 57th Band to play at the West Durham Exhibition to be held at Bowmanville on Oct. 6th and 7th. This is one of the model fairs of the province, a genuine farmers' exhibition, from which, following the lead of the Peterborough Exhibition, circus features have been entirely eliminated. Mr. M. A. James, editor of the Canadian Statesman, is one of the officers of the society, and his paper this week says of the 57th band: "The Fair managers are very fortunate in securing the 57th Regiment Band of Peterborough, under the direction of Mr. Rupert Gliddon, assisted by Mr. Jos. Halpany, vocalist and refined humorist, and Mr. E. Cronk, euphonium soloist, for both days, and they will give two concerts at night in the drill shed of a varied and fun-provoking character.

St. Johns Festival.

Rev. Derwyn T. Owen, of St. James' Cathedral, Toronto, will be the preacher at St. John's Thanksgiving Festival this evening at 8. Mr. Owen was formerly a resident of Peterborough, and no doubt many of those who know him then will be pleased to hear him again.

THE NORTH WEST THROUGH PETERBOROUGH EYES.

Interesting Letter From Mr. George McWilliams.

The Storm of Sunday Wrought Great Havoc Among Crops—Peterborough Well Represented in the West.

The following is an extract from a letter received by the Examiner from Mr. Geo. McWilliams, who is spending a few months in Manitoba and the North West Territories:

We left Peterborough on August 17th and arrived in Toronto about 10.30 a.m. We remained there until 1.45 when we pulled out with thirteen coaches filled to the doors, but when we arrived in Winnipeg Thursday morning about 1.30 the excursion consisted of two sections of fourteen coaches each. The trip was a very enjoyable one—pleasant weather and lots of jolly company, so that the time passed quickly.

I remained in Winnipeg seven days, during which time I "took in" the city pretty thoroughly. It is a very busy place and is going ahead at a very rapid rate. A slight idea of the growth can be learned from the fact that there are 1,100 dwelling houses either built or in course of erection this season and every one is either sold or rented before it is completed. Besides this, there are wholesale houses, etc., going up in great numbers. The Union Bank is building an eleven storey block, which will be the "sky scraper," of the city when completed.

From Winnipeg I went on to Moose Jaw which I found to be a thriving little town of 2,500. It is a divisional point of the C. P. R. and the population is very largely railway men. The monthly pay roll of the C. P. R. in that town amounts to between $25,000 and $30,000. So you can see what the railway means to Moose Jaw. I found a great many Peterborough people here and they all appeared prosperous and happy but two—they were behind the bars for horse stealing.

The weather had not been good at any time since my arrival in Winnipeg, being either wet or cold almost all the time, but on the evening of my first Sunday in Moose Jaw we had a regular western hailstorm, and I tell you it was a "peach." It had been rather pleasant that day and during the afternoon was quite sultry, until about six o'clock when it suddenly became cool, got cloudy and the wind began blowing a regular hurricane. The first number consisted of a slight rain fall, which was rapidly followed by the worst storm of hail I ever heard of or ever wish to see again. It seemed to come in sheets, and in five minutes' time there was scarcely a window left in the town. It was estimated that the amount of glass broken exceeded $12,000 and that in a place about the size of Ashburnham. It was the most desolate looking place next morning I ever saw—flowers and trees all stripped of their foliage. The merchants took advantage of the situation and glass jumped up in price ten cents a light. The farmers living in the path of the storm suffered to a great extent, their crops being broken off and driven into the ground. I met two Peterborough men who each lost four hundred acres of beautiful wheat. When I left they were burning the straw off and plowing the ground which two days previously promised 35 bushels to the acre.

I went out from Moose Jaw 22 miles to Buffalo Lake, where I spent a most enjoyable week with a friend of mine who runs a large horse ranch. This is where Mr. "Tobe" Fitzgerald met his death some two or three years ago. It is certainly a hunters' paridise, wild ducks, geese and prairie chicken being in great abundance.

I left Moose Jaw Friday evening for Souris, Manitoba, but when I reached Brandon, we were six hours late and my train for Souris had gone. As there is only one train a day on this branch, I had nothing else to do but remain here till Monday noon. It was raining quite heavily when we left the train, but before we arrived at the hotel it had turned to sleet and was accompanied by a terrific wind. The storm continued all day and is the worst ever experienced in this country, at least so the natives say. When I got up this (Sunday) morning the sleighs were running, but the sun coming out warm stopped them by ten o'clock. The telegraph and telephone wires are all down and traffic is at a standstill. It is impossible to estimate the loss to the country, as in this section the cutting is all done, but threshing has not commenced, owing to wet weather, so that the entire wheat crop is all standing in stooks, or at least it was. It is now lying flat and covered with snow. If this is followed by warm weather the weat will begin to grow in the stook. Two days ago this promised to be almost the "banner" year in the west. To-day the wheat crop, in some districts at least, lies under four inches of snow almost completely ruined.

GEO McWILLIAMS.

Mr. McWilliams adds that notwithstanding the inclement weather, he has enjoyed his visit and is feeling quite well except for a slight cold, contracted while outdoing "Buffalo Bill" at the horse ranch, whom he said he had "skinned" to death.

FINE FURS.

We're ready with advance styles of fine Furs for the season. The showing already discounts anything within your reach for fetching features. Every novelty worth consideration, every really new design finds representation at Lech's.

Scarfs and Stoles in all Furs and Grades for early Fall wear.

CHRISTIANS REVOLT

WAR IN MACEDONIA AGAINST TURKEY BEGINS IN EARNEST.

Twenty Thousand Under Arms, Led by Sarafoff, Under Direction of the Famous Macedonian Committee—Insurgents Swear to Fight to the Last Ditch —The Porte's Promises of Reform Are Simply Words.

The long expected Macedonian insurrection, after many starts, for which the insurgents paid heavy penalties, seems to be on in earnest. It is reported at Sofia that 10,000 Macedonians, divided into four bands, are operating in the vilayet of Monastir, where they have already scored several victories over the Turks, and that 10,000 more are in the field in the vicinity of Castoria. They are said to be well armed and provisioned, while the Turkish regulars sent to oppose them are disaffected and have been unpaid for months. The Sultan's intention to call out his irregular forces, with the probability

A MACEDONIAN INSURGENT.

of new massacres by the undisciplined Albanians, was met by a vigorous protest from the foreign representatives at Constantinople, and the Porte hastened to announce for the present that none but regular troops would be employed in crushing the insurrection.

Macedonia has been for centuries a thorn in the side of the "commander of the faithful." Turkey has sought in vain by every means except those of mercy to break the proud spirit of the Macedonian Christians. As the martyrs of the early church welcomed death by torture the Macedonians court persecution, even massacre, "for the good of the cause." Their hope lies more in the intervention of the Christian pwers than in their own armed assaults, and if atrocities committed by the Turks can arouse the powers in their behalf they count their sufferings but gain

Several times in the recent past the powers intervened so far as to force the Sultan to promises of reforms in Macedonia and demanded of the Macedonians that they keep quiet until the Turkish Government had an opportunity to put its promises into effect, but nothing but words has come of it all. This time, the leaders of the insurrection say, "nothing can end the revolution until our national aspirations are satisfied or those fighting to attain them are exterminated."

The famous Macedonian committee, the genius of the present revolution, as of all other risings in Macedonia within the past decade, has its headquarters in Sofia. It was formed there in 1891. Something of the kind had existed before, but it was in that year that the people first began to prepare for a revolution. The committee has enormous power. Peasants in Bulgaria, Servia, Roumelia, Macedonia and Roumania are under tribute to it, and it has agents all through the world. For a Macedonian to become known as a member of the Macedonian committee means certain death, but the committee's agents inside the danger line are as active as they are in Bulgaria, where they are countenanced, if not assisted, by the authorities. Some time ago, when the Macedonian members of the committee had accumulated so large a supply of arms as to attract the attention of the Sultan's spies, 3,000 Macedonians were cast into prison. Only half that number has emerged. What became of the rest is easily guessed.

AN ALBANIAN WARRIOR.

The present head of the central committee is General Michailowsky. He is a man of energy and ability and at the same time enough of a diplomat to keep out of needless trouble, unlike his predecessor, Boris Sarafoff. Sarafoff, the most picturesque figure in the Balkan drama, was too strenuous for the committee, and his methods were so aggressive that Prince Ferdinand, under pressure from Russia and Austria, anxious to preserve the status quo, was forced to procure his removal.

After his deposition as head of the central committee Sarafoff retained all active part in the workings of the revolutionary conspiracy, going into the enemy's country to arouse enthusiasm and recruits, and he is believed to be in command of the insurgent army in the vilayet of Monastir.

Sarafoff was born of Bulgarian parents in a Turkish village of unpronounceable name, where his ancestors had lived for 200 years and where they were always engaged in insurrections, so that his hatred for the Turks is hereditary.

He has made the most careful study of the country in which he had planned to carry on his war against the Mohammedan, and it is said that there is not a bypath in Macedonia which he does not know. He has from time to time gathered about him bands larger or smaller and has made many successful raids into the Sultan's territory, but the insurrection which has now begun is his great attempt, for which all his previous work has been the preparation. A little over thirty, his dream is to capture Constantinople and dethrone the Sultan, making himself dictator of an independent Macedonia.

Macedonia, with its almost impenetrable hills, full of natural fortresses, is an ideal country for the sort of irregular warfare which the insurgents wage, and whatever the outcome of the present combat Turkey must suffer. To rush down from a mountain fastness, wipe out a Turkish village and get safely back to port before the Turkish regulars are anywhere in sight is a feat which Boris Sarafoff has more than once accomplished.

The insurgents are accused by more disinterested critics than the Turks of being bandits, and it is not to be denied that some of their tactics closely approach those of the brigand, but in a country where might makes right the immorality of brigandage is not a burning question.

Macedonia, the birthplace of Alexander the Great, has had a glorious and bloody history, and though its name is now only a figurative appellation, cut up as the old province is into Turkish vilayets, it may yet find an honorable place among the principalities of Europe.

MAURICE BEST CURED.

Dyspepsia Kept Him in Misery for Years —Dodd's Dyspepsia Tablets and Dodd's Kidney Pills Cured Him.

Indigestion and Dyspepsia have become such common complaints that most people accept their aches and pains as a matter of course. They do not stop to realize to what terrible sufferings they lead unless they are promptly checked and cured. The story of Maurice Best, of Southern Harbour, Newfoundland, should be a warning to them.

"In 1892 I was attacked by Dyspepsia," says Mr. Best. "It gradually grew worse until I was in continual misery. Sometimes I would go off in a faint, and for ten or fifteen minutes I would be more dead than alive.

"I took doctors' advice and prescriptions but although they gave me a little help they failed to cure me. Then I started to use Dodd's Dyspepsia Tablets and Dodd's Kidney Pills. The first two boxes gave me a new life, and a further use of them made me a new man.

"I confess I owe my life to Dodd's Kidney Pills and Dodd's Dyspepsia Tablets."

Your case may not be as bad as that of Maurice Best. But if they saved his life how sure it is they will cure your aches, pains and discomforts.

Cost of False Noses.

People sometimes lose their noses by disease or by accidents, and some have lost them in war. For noseless persons the most appropriate organs are said to be made of wax, and the best ones cost about $175, though a really good one can be got for $75. A nose made of papier mache may be bought for $5. Noses made of this material are enameled and are deceptive, and for a poor man they are said to answer all the purposes that are required. Waxen and paper noses are, in case of disease, preferable to those made by the planting of flesh on the diseased part, for several cases have been known where the transplanting of the flesh of the nose has endangered men's lives.—London Tit-Bits.

Fight Until the End.

Life can be made a success. It is not a question of climbing above poverty; it is a question of understanding life. So many of us have been lured away and fascinated by what turn out to be phantoms and false gods! We have had to wheel back and begin over again and fight along against tremendous odds, and yet with all that life can be made a success, for success consists in doing right, in doing the best you can with what you have, of years of experience, of sorrows, of chances, of joys and of hope. Fight until the end.—Schoolmaster.

Brave and Brainy.

"The man I marry must be both brave and brainy."

"When we were out sailing and upset I saved you from a watery grave."

"That was brave, I admit, but it was not brainy."

"Yes, it was. I upset the boat on purpose."

An Excess of Nerve.

"I like to see a young man energetic and able to push himself," said the old banker sadly. "But when he borrowed the money from me to buy an automobile in which to elope with my daughter it was carrying things a little too far."

Pinch Bug Burns Church.

Oliver, Ill., Sept. 16.—The Christian Church here was destroyed by fire started by a pinch bug which boys had placed in a box of matches as a joke on the janitor.

Fire at Stayner.

LLOYD'S PATRIOTIC FUND.

British Naval and Military Fund Which Was Founded in 1803.

It is just 100 years ago that the Patriotic Fund, the oldest naval and military fund of the kind in existence in Great Britain, now known as Lloyd's Patriotic Fund, was founded by the subscribers to Lloyd's. On July 20, 1803, a meeting was held of the merchants and underwriters for the purpose of raising a fund for the benefit of the sufferers by the war which was then raging between this country and Napoleon Bonaparte. The meeting was presided over by Mr. Brook Watson, and the intention of the founders is best explained by the following resolution which was passed on that occasion: "Resolved, that to animate the efforts of our defenders by sea and land, it is expedient to raise by the patriotism of the community at large a suitable fund for their comfort and relief; for the purpose of assuaging the anguish of their wounds, or palliating in some degree the more weighty misfortune of the loss of limbs; of alleviating the distresses of the widow and orphan, of soothing the brow of sorrow for the fall of dearest relatives, the props of unhappy indigence or helpless age; the granting of pecuniary rewards or honorable badges of distinction for successful exertions of valor or merit."

In an interesting little history of the fund published by Lloyd's it is recorded that by March, 1805, £158,343 had been subscribed, and by 1825, when the subscriptions practically ceased, the total amounted to £430,509. This sum, by judicious management in the way of investment, by the operation of long annuities, and sale of securities at greatly enhanced prices, was eventually increased in value to £888,602. The list was headed by Lloyd's with £20,000 consols, to be supplemented later by £15,000, while the subscribers to Lloyd's contributed over £70,000 within a fortnight. The Lord Mayor and Corporation of London, the Bank of England, the East India Company, the City Companies, the bankers and the Archbishops, Bishops, Judges, ministers and other public men subscribed, as did also numberless humble contributors, who sent half-crowns and shillings. Even a Quaker gave thirty guineas for blankets.

It will be noticed that the fund was not only for the relief of those in distress, but also for the granting of rewards; and the first occasion on which the fund was used was when, in February, 1804, a squadron of French ships of war was repulsed by some East India merchantmen. Swords of honor were presented to the commodore and his captains, while the families of those who had fallen were granted assistance. After Trafalgar a vase with £500 was presented to Lady Nelson and £61,000 consols were given to the Royal Naval Asylum. The trustees have still on their books for relief aged ladies whose fathers or relatives fought under Nelson at Trafalgar or under Wellington in Spain. The fund continued its patriotic work in the many wars which took place after the great struggle with Napoleon was concluded, and particulars are given in the little history, but it must be sufficient to say here that the general work of the fund was continued throughout the remaining years of the last century. In the year 1875 the committee decided to place the balance of the capital funds, about £78,000, under the Charity Commissioners, in whose name they are now invested, and under a scheme approved by whom the trustees are elected and the funds administered. In recent years, by a new departure, one officer from the army and one from the navy has been elected, much to the satisfaction of their colleagues.

But it should not be imagined that there is no more need for help on the part of the public. The payments from the fund are very large, and the resources extremely limited, so that the trustees will always welcome further subscriptions to this excellent and patriotic institution.—London Globe

Whistler's Suit Against Ruskin.

Whistler's death recalls the famous libel suit he brought against Ruskin. The most amusing feature of it was the exhibition in court of some of the "nocturnes" and "arrangements" which were the subject of the suit. The jury of respectable citizens, whose knowledge of art was probably limited, was expected to pass judgment on these paintings. Mr. Whistler's counsel held up one of the pictures.

"Here, gentlemen," said he, "is one of the works which have been maligned."

"Pardon me," interposed Mr. Ruskin's lawyer, "you have that picture upside down."

"No such thing."

"Oh, but it is so," continued Ruskin's counsel. "I remember it in the Grosvenor Gallery, where it was hung the other way about."

The altercation ended in the correctness of view of Ruskin's lawyer being sustained, and the fact that Mr. Whistler's own counsel did not know which was the top or bottom of the picture had more to do with Ruskin's virtual victory than all the arguments of counsel or the evidence of art experts.

Some Don'ts.

Don't be afraid to clean your dropping boards every day. Don't be afraid of getting your hens too fat to lay well. You never saw a scrawny hen lay. Hens must first have enough to keep them in good condition, before any of it will go to produce eggs. Don't let any one fool you by making you think that common fowls lay better than thoroughbred, for they do not.

LORENZO PEROSI.

The Talented Priest-Composer Discovered by Pius X.

Among the notable deeds of Pope Pius X. was his discovery some years ago of a rare musical genius among the priests of Venice. Lorenzo Perosi sprang into fame in 1899 and was hailed as "the Wagner of church music." His "Resurrection of Christ," the fourth of his oratorios,

LORENZO PEROSI.

was heard at the Metropolitan Opera House in New York in 1899 and had already delighted the critical audiences of the continent.

Perosi was born at Fortuna in 1872. He inherited musical talent and as a youth won distinction as a pianist, organist and composer. His own preferences led him to the priesthood, and he put aside a musical professorship to assume the ecclesiastical habit at Venice.

Cardinal Sarto interested himself in the priest-composer and when he had produced his first oratorio, "The Passion of Christ," launched him among the music lovers of Venice as a new star in the firmament of song. Perosi is small of stature and insignificant in appearance except when inspired by music. As a conductor he becomes very excited and is more acceptable to the audience in that role than to the musicians he leads.

ARE YOU ONE OF THE WEAK ONES?

Subject to Sinking Spells and Feelings of Languor, Depression and Weakness—You can be Helped by

Dr. Chase's Nerve Food.

Very many people feel much as you do. They do not like to confess that they are sick, but they are weak and languid, feel drowsy and depressed after meals, are easily tired and discouraged, suffer from indigestion, sleeplessness, irritability and general bodily weakness. At times, it may be, some of the old-time vigor returns, but you no more than get your hopes aroused when the sinking spells come on again and you are as helpless and disheartened as ever.

Such symptoms point to lack of nourishment in the blood and an exhausted nervous system. You can get well if you will but restore the system by using Dr. Chase's Nerve Food. This great food cure forms new blood and instils new force and energy into the wasted and depleted nerve cells. It makes you well in nature's way by supplying to the blood and nerves the very elements in which they are lacking.

These symptoms of which you complain are but a warning of approaching nervous prostration, paralysis, locomotor ataxia or even insanity. The time to act is before these dreadful diseases of the nerves have fastened themselves upon you. They are much easier to prevent than to cure, as many know, on account of long years of helplessness and suffering.

Dr. Chase's Nerve Food will give you new hope and courage. Not only will you be able to feel the benefit you are deriving from it, but by noting your increase in weight you can prove conclusively that new, firm flesh and tissue is being added to your body.

The success of Dr. Chase's Nerve Food in curing all ailments arising from weakness of the blood and an exhausted condition of the nerves has been phenomenal. 50 cents a box, 6 boxes for $2.50, at all dealers or Edmanson Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 7

NOT JUST AS GOOD

Did you ever inquire at a store for certain articles and get for a reply "We have something just as good"? Did it ever occur to you that "Something just as good" is something the dealer has been able to buy much cheaper than the articles you inquire for? This is true in drugs, fabrics, groceries, hardware, and in fact every line, including silver-plated ware. If you inquire for 1847 Rogers Bros.' Knives, Forks or Spoons, don't accept any bogus Rogers' stamp because your dealer tells you it's just as good.

1847 TRADE MARK ROGERS BROS

The above trade mark has been stamped on every article of the original and genuine Rogers Bros.' goods for over 50 years. Get this and you get the best that is made.

CHAPTER FIVE

By Izola L. Merrifield

Copyright, 1903, by T. C. McClure

Half way between the Crescent ranch and the schoolhouse lay the western border of the Black Hawk range. If Don Easton happened to ride to the ridge of low, ragged buttes above the little valley trail he could catch a glimpse of the new schoolteacher's hat with the violets on it when little Sammie Trent took her to and fro in the buckboard from the ranch to the school.

One day Sammie rode out on the range on his own pinto, Buckeye, and told Don the news.

"We've got the new teacher at our place, Don. She's a Jim Dandy too. Pop let me go to school with the rest of the kids just because she said I was wasting my talent hoeing round. She ain't a real teacher either. She's studying us folks. Jumping Moses, Don, you ought to hear her talk. And she's going to study you pretty soon. You're chapter 5—on herders."

"Is she homely, Sammie?" Don asked gently.

Sammie shut one eye and crucked his tongue hungrily.

"Gimme two crackers and a dried herring and I'll tell," he said.

Don bargained and handed over two crackers with the herring laid between. Sammie munched contentedly. It was a long way from the ranch.

"Her hair's kind of pretty. It don't curl up exactly, but it kinks a little when the wind blows. And it's brown, kind of. And she smiles sweet as anything, and her eyes are blue, kind of, and she's awful gritty. She's learning to ride, and she fell off once and never yowled a bit."

A week after this the buckboard was discarded, and Don saw Sammie ride by on the pinto, while the schoolteacher was on a small lightweight black and white pony. Sometimes she went by alone, as the days passed and her confidence grew. Don would leave the sheep with the dogs and watch for her at sunset, lying face downward in the soft, thick grass on the edge of the buttes. He could see her from the time she passed the cottonwoods that fringed the divide until she turned the corner of Big Butte far down the valley, and beyond the way was clear to the ranch.

There was a secret satisfaction to him in this self imposed sentinel duty over her lonely ride. It was a welcome break in the monotony of his life, and he dreaded the time when the grass and water would give out and he would have to move farther on to new range.

When the spring days came and the wild flowers lay like a royal carpet for the feet of the black and white pony the schoolteacher would dismount and gather them on her way through the valley. Then came a day when the sentinel saw from his post that she was in trouble. The black and white pony had wandered ahead of her, cropping the grass and new clover, when suddenly he pitched forward, one fore leg sinking deeply into a beaver hole. With his heart aflame, Don had gone to the rescue and pulled the pony out. The ankle was sprained, and she limped badly. Flushing beneath his tan, he had told the schoolteacher who he was, just one of the Crescent herders, and had offered her his horse to ride home on. She had accepted thankfully, and Sammie was sent after the lame pony the next day.

"Ain't she a thoroughbred, though?" he asked, chewing on a bit of flag root he had found down near the creek. "Her name's Marjorie Allan."

"When is she coming to study chapter 5?" asked Don carelessly.

"Guess she hasn't got that far yet," returned Sammie seriously. "She's studying flowers and bees and birds and things now."

"Sammie"—the herder's voice was gentle and persuasive—"don't you want a job herding sheep along about sunset?"

"What you got that's better than herrings?" asked Sammie in mild interest.

"A whole nickel a day."

"I'll come tomorrow," said Sammie.

The new arrangement lasted a month. Every afternoon at sunset Sammie herded faithfully, while Don and the schoolteacher rode slowly from the cottonwoods to Big Butte. Then one day Don told him he need not come any more, and his face was grim and hopeless. Sammie looked at him shrewdly while he cracked a switch at a few mosquitoes that were feasting on the pinto's mottled hide.

"She's just a girl, even if she did come from Kansas City and writes books and things," he said pleasantly. "Did she throw you down, Don?"

The herder was silent.

"'Cause you're just a herder?"

"Go home," said the other gently without looking at him, but Sammie saw the clinched hands and he rode away whistling.

Three weeks later there came news to the ranch. The herder on the Black Hawk had moved his sheep eight miles northward toward the Big Horn country, and there were growlings among the cattlemen up there over his encroaching on their territory.

"But isn't the range free?" asked the schoolteacher when Sammie explained matters to her.

"You dassent say so nowadays less 'n you've got a gun to back it up," said Sammie. "Pop thinks Don will get all the trouble he's looking for."

Miss Allan looked at him, her blue eyes grave and anxious.

"What will they do to him?"

"Chase him off and scatter the sheep. Maybe let a little daylight into him if he stops to argue."

"Are we far from him?"

"He's about four or five miles northeast I guess. We could see the smoke if they fired the grass or his wagon," he added encouragingly.

Miss Allan was silent, and Sammie smiled at the pinto's ears. She was getting to chapter 5, he decided, on herders. And he saw, too, that she rode out of her way every day to get a view of the range. And every night at the ranch she asked if news had come from the cattlemen.

But all was quiet until one day the schoolteacher had remained later than usual. Sammie did not question when she turned away from the home path and rode up the hill until they reached a spot where the range lay before them. Far to the northeast a faint line of smoke trailed lazily up to the clouds, and she held her breath as she watched it.

"Sammie," she cried, her hands gripping the pony's bridle tightly, her face paling, "Sammie, what is it?"

"Just smoke," said Sammie shortly, knowing what lay behind the appeal. "I guess we can make it in an hour. Less 'n they've fixed him already."

But she rode on beside him fearlessly until they had passed scattered, frightened groups of what sheep were left, and halted beside the smoking ruins of the herder's wagon. It was she who found him first, lying unconscious a dozen yards from the wagon. There was a wound in his forehead. While Sammie stood with wide, scared eyes, she told him to run to the creek and bring water, then to ride on to the ranch for help.

With the water Sammie had brought her she bathed the wound and kept his parched lips moist, and the black and white pony moved up and down like a restless shadow between her and the charred wagon.

Once he opened his eyes and stared up at her in wonder, and she laid her hand lightly on his hot forehead.

"I am sorry," she said softly, and the pony moved out of hearing as he answered her.

A little after moon rise there came the thud of hoofs on the ground and the lone vigil was ended. Next morning Sammie's freckled face looked cautiously in the open window of the room at the ranch where the herder lay.

"Hello, Don," he said cheerfully. "Ain't she got grit, though? Ain't she a thoroughbred?"

Don smiled at him in proud assent, and moved his bandaged head in a half nod.

"How's chapter 5—on herders?" asked Sammie in a whisper.

"All done," said Don, his eyes bright with happiness. "Next one's on weddings, but there's a herder in it, too, and she's going to take the leading part."

A Consoled Widow.

"Yes," said Coyote Jim, "we did make a mistake once, stranger, but we squared it up all right."

"How was that?" asked the tenderfoot.

"One day a feller come through town," explained the native, "riding two ways for sundown, an' somebody yelled he was a hoss thief. In course we rounded him up an' strung him afore we found he'd only stole a clotheshorse from his wife to trade for licker. But we held a meetin' right after, an' the widder got our washin' fer the next year, so she never lost nothin' by it, an' she got her clotheshorse back too!"

Woman's Weakness

A woman's reproductive organs are in the most intense and continuous sympathy with her kidneys. The slightest disorder in the kidneys brings about a corresponding disease in the reproductive organs. Dodd's Kidney Pills, by restoring the kidneys to their perfect condition, prevent and cure those fearful disorders peculiar to women. Pale young girls, worn-out mothers, suffering wives and women entering upon the Change of Life, your best friend is

Ask a healthy woman what she would sell her health for and she would tell you that the choicest diamonds in the world could not buy it. What use for diamond rings to emphasize the shrunken fingers, or earrings to light up the cheeks hollowed by disease?

Health is the first requisite to womanly happiness. General ill-health in women has its origin in local womanly diseases. Cure the diseases of the delicate womanly organism and the general health is perfectly restored.

The remarkable benefits experienced from the use of Dr. Pierce's Favorite Prescription are due to this medicine's perfect cures of womanly diseases. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness

"It affords me great pleasure to be able to say a few words in regard to the merits of Dr. Pierce's Favorite Prescription and his 'Golden Medical Discovery,' writes Mrs. Flora Aru, of Dallas, Jackson Co., Mo. "I was tempted to try these medicines after seeing the effect upon my mother. At an early stage of married life I was greatly bothered with painful periods, also a troublesome drain which rendered me very weak and unfit for work of any kind. I became so thin there was nothing left of me but skin and bone. My husband became alarmed and got me a bottle of 'Favorite Prescription.' After he saw the wonderful effects of that one he got me two more, and after I used those up there was no more pain, and I began to gain in flesh very rapidly."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

A MAN OF MYSTERY.

Peculiar Life of Metastasio, the Celebrated Italian Poet.

Metastasio (1698-1782), the celebrated dramatic and operatic poet, spent fifty-five years in Vienna with the Martines family without ever learning German or wishing to learn it.

Besides his utter indifference to all speech but Italian, Metastasio possessed many peculiarities of character. None might mention death in his presence. Those who alluded to smallpox before him he made it a point not to see again. In all his fifty-five years in Vienna he never gave away more than the equivalent of $25 to the poor. He always occupied the same seat at church, but never paid for it. He took all his meals in the most mysterious privacy; his greatest friends had never seen him eat anything but a biscuit with some lemonade. Nothing would induce him to dine away from home. He never changed his wig or the cut or color of his coat.

Metastasio was to have been presented to the pope the day he died and raved about the intended interview in the delirium of his last moments. Mrs. Piozzi (familiar to readers of Boswell's "Life of Dr. Johnson" as Mrs. Thrale) collected these particulars from the ladies of the Martines family, with whom Metastasio was so long domesticated without speaking or understanding a word of their language from first to last.

The Moon and Rain.

"When you see the new moon hangin' straight up and down, lookin' sort of sour like, you're not goin' to have rain for at least two-thirds of the month," said an old observer. "When she comes up lookin' like she wouldn't spill, then it's goin' to be good weather for two-thirds of the mouth.

"You can bank on that, boy. I've been watchin' the moon for weather more'n thirty years on land and sea, and the dip tells the story better than any weather prophet that ever called turns on the weather from headquarters down in Washington.

"Further than gettin' a cue on the weather," he continued, "you can tell by the color of the moon whether it's goin' to be a warm or cold rain.

"If the 'wet moon' looks red it's goin' to be a warm rain. If it looks bright and silvery like it's goin' to be a chilly rain.

"I've been watchin' Luna, as they call her, come up over Jersey for a number of years, and I haven't found her sign to fail yet."

The Munka Bride.

Here is a picturesque incident in the Munka wedding ceremony in India: The bride goes to a stream or well near by with her pitcher and, having filled it, raises it aloft on her head, steadying it with her hand. The bridegroom comes behind, as she turns homeward, and, resting his hand on her shoulder, shoots an arrow along the path in front of her through the loophole formed by her uplifted arm. The bride then walks on to where the arrow lies and picks it up with her foot, still balancing the pitcher on her head. Transferring it gracefully to her hand, she restores it to the bridegroom, thus showing that she can perform her domestic duties well, with hand and foot at his service. He in turn, by shooting the arrow in front of her, has shown his ability to protect her and clear her path of any danger that may beset it.

QUOTATIONS ON THE WALL STREET MARKET.

Slight Upward Movement in Prices This Morning.

The Fluctuations of the Leading Stocks —Market Letters.

The Wall street market opened slightly above the last night's close and throughout the morning continued fairly strong, fractional advances being made in the leading issues. Atchison, which closed last night at 65 1-4, this morning touched 66 1-2, whilst M.O.P. had also a rally of a point and three-quarters, reaching 91 3-4. The sales to noon were 210,700.

During the early afternoon the market showed some weakness, and trading showed but little activity, the advances of the day being mostly wiped out.

The following are some of the principal quotations received by Messrs McMillan & Maguire, stock brokers:—

Sales to noon, 210,300.

Messrs. E. M. Poussett & Co. have received the following:

Waldorf notes.—Another day of bearishness and selling of dull stocks failed to regain confidence in an improving market. It is conceded that dullness may continue within irregular price movement but the feeling among observers is that bad crop news and other adverse conditions are discounted by the present low range of prices. Both crops and railroads are comparatively favourable with the best of other years, which means that railroads have as much business as they can handle. Furthermore the absence of serious injury to the crops in the corn belt us regarded as reassuring and if predicted frosts fail to materialize it is believed then that stocks will advance. Commenting on developments in the stock market, it is said that business was restricted by the wind storm which so closely interfered with telegraph and private business between New York and other cities. There was, however considerable selling of stocks for short account on further weakness in steel and anticipation of bad crop news. On the other hand offerings of rail stocks continued very light.

Liverpool open, wheat, 1-4 lower; corn dull, 1-8 lower; 1.30 p.m., wheat, 1-4 to 3-8 lower; corn dull 3-8 to 1-2 lower. Chicago hogs, 22,000; cattle, 11,000; sheep, 25,000; Kansas City, 45,000; 8,000; 3,000 London 1.30, dec N.Y.C., 3-8; Pa., 3-8; Rg., 1-4; S.P., 3-8; U.P., 3-8; M.S., 1-4; U.S.Q., 3-8; Adv. C.P.R, 1-8; S.T., 1-8.

French country markets quiet but steady. Market promises to be irregular to-day and will be influenced chiefly by the conflicting reports that may be expected to come from Chicago and other points. The steel billet pool will meet to-day and consider selling prices. This will influence trading in U.S.S. The present low prices of U.S.S. have been discounted on nearly everything. There is nothing encouraging from London and as the wires are still crippled out of town business is small.—Town Topics.

"RATEPAYER" ON THE RAILWAY FRANCHISE,

Contends That Present Bylaw is an Illegal one.

To the Editor of the Examiner:

Sir,—In the report of the meeting of the town council, I notice that Alderman Morrison in moving the second reading of the by-law to authorize the execution of the agreement with the Radial Railway Company stated "when we negotiated this contract there was no law that compelled or even allowed us to submit it to the ratepayers."

I notice that Alderman O'Connell at the same meeting of the council stated as follows: "In the first place we had an offer which meant a reduction of some $1,400 a year for ten years for street lighting and it we chose to accept it the Otonabee Power Company is undoubtedly in a position to give ample security whereby we will be provided with safeguards in having the contract carried out. There can be no doubt that by accepting that offer it will mean $1,400 per year less. They may call this a bonus or any other name but the fact remains. It seems to me that the council is taking a great responsibility upon their own shoulders in saying to the citizens, you must pay $14,000 in ten years, extra for street lighting for the privilege of the street railway and without submitting it to the people."

There is no question about it that the town council purpose to give the street railway company a bonus of $14,000. It does not matter whether this is given through the front door or through the back door. The ratepayers will have to pay it.

It appears that Alderman Morrison is altogether wrong in his law. According to the Municipal Act of 1897 Section 699, express provision is made with regard to aid to street railways. According to this section one-fourth of the ratepayers who are owners of property and who represent at least one-third of the assessed value of the property in town may petition the council to aid any street railway, and upon receipt of such petition the council may submit the question to the ratepayers, and after the assent of a majority of the ratepayers has been obtained in the manner provided by the Municipal Act, the council may then pass a by-law granting the bonus applied for in the petition. That being the law upon this subject, there is no doubt that the present by-law is illegal and may be set aside on the application of any ratepayer. It seems strange that this provision of the Municipal Act should have escaped the attention of so shrewd a lawyer as Alderman O'Connell.

The council have not yet passed the by-law affecting the street lighting franchise. They still have the opportunity of setting this right and avoiding expensive litigation by coming out fairly and squarely before the ratepayers and giving them an opportunity of expressing themselves upon the question as to whether or not a bonus of $14,000 should be given to the street railway.

Yours, etc.,
RATEPAYER.

Stocks and Grain.

PETERBOROUGH'S COMING EVENT.

The Farmers Great Annual Holiday Next Week.

PROGRAMME OF THE INDUSTRIAL FAIR.

Information for Guidance of Exhibitors and Public.

Promise of Most Successful Fair in History of Society—Racing Programme on Both Days.

No efforts are being spared by the Directors to make the Industrial Exhibition this year a great success. They have offered much larger prizes than any other county fair, and they have made alterations and improvements to the grounds so that judging of all classes of stock can be done fairly and expeditiously in full view of the public. There are four rings or paddocks, one for the horses, one for cattle, one for sheep, and one for swine. The judging will commence at 10 o'clock sharp on Wednesday morning so that exhibitors should have their stock on the grounds on Tuesday, or very early on Wednesday morning.

A programme has been drawn up giving the hours at which each class will be judged in the rings and also the hours at which each race or event will be called on the half mile track. All classes in the horse ring and on the half mile track will be called by bugle call, and it is thought that this will be a great improvement upon the old method.

Large copies of the programme for both days will be posted in different parts of the grounds so that exhibitors will know when to have their animals ready, and as the judges will have very heavy work to get through on time, exhibitors must be prompt.

The following is a short synopsis of the programme for each day:

Wednesday.

Judging of stock, commencing at 10 o'clock.

Exhibition to be formally opened by Hon. A. G. Blair, ex-Minister of Railways and Canals, Ottawa at 2 p.m.

The races will commence at 3 p.m. and will include:

Farmers' trot, purse $35.
Stallion race, purse $50.
Hurdle race, purse $100.
Tug of war for nine silver medals offered by association at 5.10 p.m.

Thursday.

Judging of stock will commence at 9 a.m.

The races will commence at 1.30 p.m. and will include:

Novelty race, prize $10.
Open trot, or pace, purse $100.
Running race, one mile, purse $100.
Running race, 3-4 mile, purse $100.
Two bicycle races for silver medals.
100 yards dash, Schneider cup.
Men's foot race, silver match boxes
Boys' foot race, silver pins.
Girls' foot race, silver brooches.

The citizens generally should uphold the directors' efforts to make this exhibition a success by their presence on the grounds both days.

HAGGART'S LIST OF SALES.

Friday, Sept. 18 — Auction sale of household furniture of the late Mrs. Emmerson, 28 Division street. Sale at 1 o'clock.

THE LATEST NEWS OF LOCAL SPORT.

RUGBY.

The Toronto Telegram commenting on the Rugby situation, says: "The preparations for the fall Rugby football season are well under way and the most successful year in the history of the game is assured to the junior series. The adoption of the age limit has practically killed the intermediate lineup and the game will to all intents and purposes be confined to the senior and junior series. The former is not too flourishing in prospect from the present moment with Peterborough out and Ottawa ready to drop. The feeling in Toronto is that the Rough Riders should be kicked out. They have come out openly with the statement that they will jump to the Quebec Union just as soon as that body will have them. Meanwhile they are raising all sorts of objections to the new rules and the arrangements of the schedules. As a matter of fact they are too far away from the Ontario centre of Rugby to be financially a good team for the Ontario Union, and on all counts they should be dropped out."

It also adds that there is a concerted action being made in certain quarters to bar all C.L.A. players from membership in Rugby teams in the O.R.F.U., on the ground that to all intents and purposes the C.L.A. is a professional organization.

• • • •

It is unfortunate that Peterborough has dropped out of the O.R.F.U. This will necessitate a change of the schedule of the eastern section, which included Kingston, Ottawa and Peterborough How would it do to put one of the Toronto teams in this section?—Hamilton Spectator.

• • • •

Big Joe Wright sees it coming. It has been coming a long while, but it is now right upon us. The day of the beefy, brawny football man is prettty nearly over, and the veteran of a hundred football frays can prepare to hang up his cleated shoes and make rugs out of his padded clothing. No more can he stride on the field, confident in his mighty muscles, and play the king in little Saturday afternoon dramas. Exit the big powerful fellow with an arm like a leg and a leg like the corner post of an elephant, the chap who plunged into a Rugby melee headlong and emerged after a gladiatorial combat with a little yellow oval tucked under his arm as the sign of his prowess. Enter the little active chap, the man who can punt and run and use his head in strategy. The Burnside rules have awakened Rugby to a new life. Senior teams are springing up in places where the soil was barren under the old rules. Here we have Hamilton and Kingston back in the old senior ranks, with London and Toronto following. Argonauts are still in the swim and so are the formidable Rough Riders. Junior and Intermediate teams are springing up all over the country. The O.R.F.U. never had so many teams as they will have playing this year. If the interest among the players has been so aroused, why there must be an awakening of equal vigour among the spectators, and the new game will draw thousands where the slow old game drew hundreds. Hurrah for the Burnside rules!

• • • •

All members of the Rough Riders Rugby Club are asked to meet at 7.30 o'clock to-night at the corner of Charlotte and Park streets, for a run, weather permitting.

• • • •

The new rugby rules which will prevail in Ontario, were given their first trial at Hamilton on Saturday, and appear to have been favourably received. The Spectartor says: —"Most of those who attended the game between the Tigers and Wellesleys think that the new rules are all right, and believe that the game will become more popular, as the long-drawn-out scrimmages are done away with and there is something for the spectator to see besides a bunch of long-haired athletes struggling in a heap. The new game is faster, more open, and much more interesting than the old one. Weight is not material, and it will not be necessary in future for the Tigers to dig up three husky players to put it over the big trios of the Argonauts and Rough Riders. The teams will have to play according to the rules, because the officials can readily detect off-side play or any violations of the rules."

LACROSSE.

"While you're talking about junior C.L.A. champions keep one eye on that Durham bunch. 'Wes' Theobold, who can play some lacrosse himself, says that if they would get get into shape they could just about trim the Mount Forest Lornes. And Jim Lambert will tell you that any team that can trim Mount Forest Lornes should win a Junior C.L.A. championship in a walk." — Telegram.

BASEBALL.

All members of the Y.M.C.A. baseball club, who have uniforms in their possession are asked to hand them in at the Y.M.C.A. this week.

• • • •

The Excelsiors went to Lindsay at noon to-day to play the return game with the Clippers of that town. The personnel of the team will be the same as that which played the Intermediates on Saturday.

HOCKEY.

Port Hope hockeyists are taking time by the forelock and have already elected officers for the hockey club. It is, according to the Guide, the intention to place a fast team on the ice this winter.

COLONIAL SECRETARY DECIDES TO RESIGN.

Mr. Chamberlain Will Leave British Cabinet.

Could not Remain in Cabinet Without Sacrifice of His Views.

(Special to the Examiner.)

London, Eng., Sept. 17. — Colonial Secretary Chamberlain has decided to resign from the Cabinet on the ground that Premier Balfou's attitude on the fiscal question is not sufficiently advanced to enable Mr. Chamberlain to remain a member of the Government without the sacrifice of his own views.

NEWS NUGGETS.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—The Ladies' Aid of the George street church, are giving a Fruit Social in the school room of the church on Friday evening next.

—If the bulk of coal grew as fast as the price on the way to market, housekeepers would not complain of $3.35 at the mines becoming $7.50 when it reaches Peterborough.

—St. Andrew's choir will practice this evening at 8 o'clock. A reorganization for the winter will take place, in consequence of which all are requested to be in attendance.

—Call and look over our stock of Purses and Hand Bags. Some new lines at remarkably low prices. By the way, we are selling fishing tacle at cost to clear. Salisbury & Co.

—In yesterday's Examiner it should have stated in the report of the hearing of the case against Mrs. Varty, at Havelock, that County Crown Attorney, Mr. R. E. Wood, conducted the case for the prosecution.

—At the Police Court this morning before Police Magistrate D. W. Dumble, Edward O'Brien was charged with being drunok and disorderly on the 10th Inst., and was fined to the tune of $2, as it was his first offence.

—The steamer Water Lily will for the benefit of those who wish to attend the Peterborough Industrial Fair, from Rice Lake and Otonabee River points, make a special trip on Wednesday, September 23rd, leaving Harwood at 6.30 a.m., returning the steamer will leave the C.P.R. wharf at 5 o'clock p.m.

—Blackstock correspondence of the Whitby Chronicle: "The construction of the Hurketon, Lindsay and Bobcaygeon Railway is progressing favourably. The road is expected to be ready for traffic early in December. The station in this vicinity will be located at Nestleton. In the opinion of many the point where the new railway crosses the fourth concession, midway between Blackstock and Cadmus, would be a more convenient place. A flag station would be suitable here."

Dysentery causes the death of more people than small pox and yellow fever combined. In an army it is dreaded more than a battle. It requires prompt and effective treatment. Chamberlain's Colic, Cholera and Diarrhoea Remedy has been used in nine epidemics of dysentery in the United States with perfect success, and has cured the most malignant cases, both of children and adults, and under the most trying conditions. Every household should have a bottle at hand. Get it to-day. It may save a life. Sold by all druggists.

Hints to Housekeepers.

The undersigned desires to inform the public that he is sole agent for the Celebrated Laurentian Range, made in 6 styles, 2 sizes, the best four-hole range on the market. Neat in appearance, perfect in fit and finish, a splendid baker, burns economically any kind of fuel, is easily kept clean, works like a charm in every respect, and is guaranteed to give satisfaction. I have also a large stock of new and second-hand furniture and stoves, and general housefurnishings, and I also buy second-hand furniture and stoves. Call and examine stock before purchasing elsewhere. Stock and prices right. R. Begley, 380 and 382 Water street, opposite the Public Library.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The ten-cent is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 40c.

300 Pairs Mens, Ladies' and Children's Boots, all new goods, from 15c Pair up.

A CABINET CRISIS.

Chamberlain, Ritchie and Hamilton Have Resigned.

REASONS FOR RESIGNATION.

Retiring Colonial Secretary Will Become Missionary of the Imperial Zollverein Idea—His Letter to the Premier and Mr. Balfour's Reply—Both Agree That British Public Opinion Is Against the Change.

London, Sept. 18.—The official announcement of the resignations of Mr. Chamberlain and two other members of the Cabinet, which was announced yesterday, was made late last night at Downing street in the following communication: "The following Ministers have tendered their resignations, which have been accepted by the King: Right Honorable Joseph Chamberlain, Secretary for the Colonies; Right Honorable T. C. Ritchie, Chancellor of the Exchequer, and Lord George Hamilton, Secretary for India. The accompanying correspondence passed between the Premier, Right Hon. A. J. Balfour, and Mr. Chamberlain."

Mr. Chamberlain's Letter.

Then follows Mr. Chamberlain's letter, dated Birmingham, Sept. 9, commencing, "My Dear Balfour," in which he sets forth his reasons for

RT. HON. JOS. CHAMBERLAIN.

his resignation. An extremely interesting feature of the letter is the following statement concerning a preferential tariff:

"For the present at any rate, a preferential agreement with our colonies involving any duty, however small, on articles of food hitherto untaxed, even if accompanied by a reduction on other articles of food equally universal in their consumption, would be unacceptable to the majority of the constituencies. However much we may regret the decision, however mistaken we may think it, no good Government in a democratic country can ignore it. I feel, therefore, that as an immediate practical policy the question of preference to the colonies can not be pressed with any hope of success at the present time, although there is a very strong feeling in favor of the other branch of fiscal reform which would give fuller discretion to the Government in negotiating with foreign countries for a free exchange of commodities and which would enable our representatives to retaliate if no concession was made to our just demands.

Outlines His Policy.

"If, as I believe, you share these views, it seems to me that you will be absolutely justified in adopting them as the policy of your Government, although it will necessarily involve some changes in its constitution. As Secretary for the Colonies during the last eight years, I have been in a special sense the representative of the policy of a firmer union which I firmly believe to be equally necessary in the interests of the colonies and ourselves. I believe it is possible today and may be possible to-morrow to make arrangements for such a union. I have had unexampled opportunities of watching events and appreciating the feelings of our kinsmen beyond the seas. I stand, therefore, in a different position to any of my colleagues, and I think that I should justly be blamed if I remained in office and thus formally accepted the exclusion from my political program of so important a part thereof.

Promote Cause From Outside.

"I think that with absolute loyalty to your Government and with no fear of embarrassing it in any way I can best promote the cause I have at heart from the outside and I cannot but hope that in a perfectly independent position my arguments may be received with less prejudice than would attach to those of a party leader. Accordingly I would suggest that you limit the present policy of the Government to an assertion of our freedom in the case of all commercial relations with foreign countries and that you should agree to my tendering my resignation of my present office to His Majesty and devoting myself to the work of explaining and popularizing these principles of Imperial union which experience has convinced me are essential to our future welfare and prosperity.

"Yours Very Sincerely,
"Joseph Chamberlain."

Mr Chamberlain points out the unyielding opposition of the Liberal party, which "scouted the idea that a system generally accepted in 1846 could possibly require modification in 1903." He goes briefly over the same ground regarding protection, as did Mr. Balfour in his recent statement.

Premier Balfour's Reply.

Mr. Balfour replied to Mr. Chamberlain in a letter dated Sept. 10. In it he says:

"Agreeing as I do with you that the time has come for a change should be made in the fiscal canons by which we bound ourselves in our commercial dealings with other Governments, it was paradoxical indeed that you should leave the Cabinet at the same time that others of my colleagues are leaving it who disagree on the very same point with us both.

"Yet I cannot but admit that there is some force in your arguments in support of that course, based as they are upon your special and personal relation with that portion of the controversy which deals with colonial preference. You have done more than any man living or dead to bring home to the citizens of the Empire the consciousness of Imperial obligation and of interdependence between the various fragments into which the Empire is geographically divided. I believe you to be right in holding that this interdependence should find expression in our commercial as well as in our political and military relations. I believe with you that a closer fiscal union between the Mother Country and the colonies would benefit the trade of both, and that if such closer union could be established on fitting terms, its advantage to both parties would increase with years and as the colonies grow in wealth and populations.

Where They Differ.

"If there has ever been any difference between us in connection with this matter, it has only been with regard to the practicability of the proposal which would seem to require on the part of the colonies a limitation in the all-round development of a protective policy and on the part of this country the establishment of a preference in favor of important colonial products. On the first of these requirements I say nothing; but if the second involves as it most certainly does, a taxation however light upon food stuffs I am convinced with you that public opinion is not yet ripe for such an arrangement. The reasons may easily be found in past political battles, and present political misrepresentations. If then this branch of fiscal reform is not at present within the limits of practical politics, you are surely right in your advice not to treat it as indissolubly connected with that other branch of fiscal reform to which we both attach importance, and which we believed the country is prepared to consider without prejudice. I feel, however, deeply concerned that you should regard this conclusion, however well founded, as one making it difficult in your very special circumstances for you to remain a member of the Government. Yet I do not venture in a matter so strictly personal to raise any objection if you think you can best serve the interests of Imperial unity, for which you have done so much by pressing your views on colonial preference, with the freedom which is possible in an independent position, but hardly compatible with office.

Loss to Government Great.

"How can I criticize your determination? The loss to the Government is great indeed, but the gain to the cause you have at heart may be greater still. If so, what can I do but acquiesce?

"Yours very sincerely,
"A. J. Balfour.

P.S.—"May I say with what gratification, both on personal and public grounds, I learn that Austen Chamberlain is ready to remain a member of the Government? There could be no more conclusive evidence that in your judgment as in mine, the exclusion of the taxation of food from the party program is in the existing circumstances a course best fitted practically to further the cause of fiscal reform."

Others Have Resigned.

The retirement of Colonial Secretary Chamberlain precipitates the most dramatic crisis.

It is understood that the resignations of some other members of the Cabinet are imminent, and Lord Balfour of Burleigh, Secretary for Scotland, has actually resigned. Lord Lansdowne, the Foreign Secretary, left London last night for Balmoral, whither Premier Balfour and his brother are also expected to proceed immediately.

In the Conservative clubs last night the manner in which the crisis was projected was almost as great a surprise as in Liberal quarters.

The Liberals are jubilant and look forward to an appeal to the country with the utmost confidence.

The Radical Daily News declares Mr. Chamberlain's is a lost cause.

Rumors are current that Viscount Milner, the High Commissioner in South Africa, may be invited to become Minister for the Colonies, that Mr. Brodrick will take the India office and that Arnold-Forster will take the War portfolio.

London Press Comments.

(Canadian Associated Press Cable.)

London, Sept. 18.—The London newspaper comments on Mr. Chamberlain's resignation state that the stand he has taken is the only course open to an honorable, high-spirited politician.

The Chronicle says. "He goes out of office because, to use his own words, 'I can best promote the cause I have at heart from the outside.'"

The Morning Post says: "Chamberlain, by his resignation, which the King has been graciously pleased to accept, has crossed the Rubicon. That was but a little stream, but to cross it had an immense significance."

The Times says: "Ritchie's and Hamilton's resignations are matters of quite subordinate importance compared with Chamberlain's, who is by universal admission the strongest member of the Government, and a statesman who has made the most powerful and abiding impression on the masses at home and on the younger nations growing up to manhood within the Empire."

Active Members Rally.

All active members of the Y.M.C.A. are asked to meet at 8 o'clock on Saturday evening in the Bible class room.

OUR CASE STRONGER

Fresh Points Made by Attorney-General Finlay.

A BRILLIANT PRESENTATION

Question of the Parallel Adopted—United States' Claims Have Changed With Time—Russia Accepted Contentions of the British—Canadian Party in London Pleased With Conduct of the Argument.

(Canadian Associated Press.)

London, Sept. 18.—The St. James' Gazette, discussing the argument before the Alaskan Boundary Tribunal, says that Sir Robert Finlay is in his element over the Alaskan Boundary Commission. Whatever may be the conditions of his confreres, no man in the profession, on or off the Bench, knows his law better. Sir Robert Finlay glories in the technicalities and subtleties of a big cause, such as that in which he is now engaged. If he has never been known to crack a joke in court, it is equally true he has never been known to miss a point.

Sir R. B. Finlay Resumes.

When the Tribunal resumed yesterday morning, the Attorney-General produced a volume of Vancouver's charts, obtained from the London Library, which he stated to be identical with the set used yesterday, and which came from the Parliamentary Library at Ottawa. He then proceeded to discuss the argument of the United States, based on the Thalweg rule, which is to the effect that where national territories are divided by a river or stream having several channels, the middle of the deepest channel should be taken as the boundary, and contended that this rule applied only to rivers and streams, and not to an estuary such as Portland Channel.

Again referring to the United States contention that Russia was not likely to have abandoned the only deep channel on the south, Sir Robert Finlay pointed out that there was no question of abandonment, that the right of "innocent passages" would remain, and further that the line was to run, not through any channels, but "le long de la passe."

The Disputed Parallel.

He then touched on one view suggested by the United States, that the lower portions of Portland Canal and Observatory Inlet were held by the negotiators to form one inlet, and, after pointing out the impossibility of this, passed to consideration of the third question, "What course should the line take from the *points of commencement* to the entrance to the Portland Channel?" Dealing with the United States contention that this line should follow along the parallel of 54.40, he showed that there was no warrant for this view; that the treaty explicity declared the point of commencement to be the southernmost points on Prince of Wales' Island and not the parallel of latitude, which was mentioned merely for the purpose of identification. He showed most clearly from the negotiations that, although Canning had the United States Treaty of 1824 before him, in which 54.40 was fixed as the line separating the Russian and the United States sphere of influence, he made no reference to that latitude in his instructions to Bagot, but spoke of the southernmost point of the island as the commencement. The Russians, on their part, steadily claimed 55 degrees as the line, and that was adopted, though, as it cut Prince of Wales' Island, it was modified as regards that island so as to secure it entire to Russia. When the latitude 54 degrees 40 minutes was alluded to by the Russians, it was as being about the latitude of the southern point of the island, as it happens to be. The United States treaty with Russia of 1824 related to trade and commerce; it did not deal with territorial demarcation; so 54 degrees 40 minutes, as being about the southern point of Prince of Wales' Island, was named.

Natural Features Accepted.

But the Treaty of 1825 between Russia and England settled questions of sovereignty. Therefore, accuracy was necessary, and latitudes not known to be correct were discarded for natural features, such as the southernmost point of Prince of Wales' Island and Portland Canal, which forms the first natural opening in the main canal south of 55 degrees. The Attorney-General handed in a list of maps of the period, showing variations in the latitudes of various capes on Prince of Wales' Island, and also the mouth of Portland Canal, in support of his contention that the negotiators in making a treaty defining boundaries preferred natural features to latitudes imperfectly known.

At the afternoon sitting, the Attorney-General proceeded to deal with the action of the parties with reference to the southern boundary subsequent to the treaty, and showed that the Russian Governor in 1835 declared Tongass to be on the frontier of their territory. Now, if the United States' contention is right, it is not Tongass, but Prince of Wales or Pearse Island, that would be on the frontier, yet the Russian says Tongass, and makes no mention of the Southern Islands, evidently regarding them as in British territory. In 1869 the United States themselves selected Tongass as their frontier post.

Vancouver's Charts.

The Attorney-General then drew attention to the fact that a lease taken by the Hudson's Bay Company from the Russian-American Company in 1839 described the territory as extending down to 54, 40 "or thereabouts," showing that they did not consider that precise latitude as constituting the boundary.

He also took Vancouver's charts, which were admitted before the negotiators of the treaty of 1825, and showed that on them a line drawn along 54.40 would not enter either Portland Canal or Observatory Inlet at all, but would strike the continent below that estuary. He argued that the foregoing facts demonstrated that that parallel could not possibly have been intended as the southern boundary. He then touched on the fact of certain storehouses having been erected on Prince of Wales' and Pearse Islands in 1896, and showed how the completing of each building was attended with all the formalities observed on taking possession of newly acquired territory, hoisting flags, cheers, etc., which is inconsistent with a claim to have been in possession of these islands in 1887.

The Attorney-General added that the erection of these buildings was protested against by the British Government as soon as known.

Pleased With His Work.

Mr. Sifton and others of the Canadian party were exceedingly pleased with Attorney-General Finlay's work.

Edward Miall Dead.

Ottawa, Sept. 18.—Edward Miall, for many years Commissioner of Inland Revenue, at Ottawa, died yesterday morning at Aylmer. He was superannuated a couple of years ago.

Fall and Fair Time

.. AT ..

H. LeBRUN & CO'S

Great preparations have been made at the City Clothing Store for a rousing trade as Fair time approaches. Never have we had so extensive and varied a Stock of New Fall and Winter Clothing, in Ready-to-wear Suits and Overcoats, Hats and Furnishings for men and boys.

READY-TO-WEAR DEPT.

Our display of MEN'S FALL SUITS and TOP COATS is a credit to the town. No store can boast of higher styles—no better values anywhere.

OUR NEW FALL SUITS FOR YOUTHS and BOYS reflect great credit on the makers. Natty styles at low prices.

TAILORING DEPT.

In our Custom Department we are making up to order the newest styles of Suits and Overcoats for all occasions. Our heavy stock of Scotch, English and Canadian Cloths cannot be equalled, and gives you choice of many patterns at many prices.

UNDERWEAR.

It's just "up to you" now to buy heavier Underwear and Hosiery. We are stocked with the most reliable grades, Scotch Wool, Natural Wool, Fleece-lined, Wool Fleece, etc., in Shirts and Drawers—all sizes, all qualities, all prices. Make your money travel far by leaving your orders for Fall at the City Clothing Store.

FRIDAY, SEPTEMBER 18, 1903.

NORTH ONTARIO'S CLAY BELT COUNTRY.

No Doubt of Its Great Extent and Fertility.

The Ontario Government and G. T. P. Railway Will Open it for Settlement.

The new blue book on the resources of the country to be traversed by the National Transcontinental Railway deals very exhaustively with the lake Abittibi region which lies to the north-west of Lake Temiskaming. There are evidences of mineral deposits which suggest possibilities of development, but apparently there has been no prospecting work done. One reads of copper and iron pyrites disseminated through beds about three feet thick of a greyish felspathic rock, but it is quite clear that the extent of the mineral wealth of the region is practically unknown.

The Temiskaming county is being rapidly settled, several thousands of people having established homes there. It seems that the Ontario Government officials, who have supervised the process of settlement, have made no effort to attract European immigration. It is a curious fact that although the country is densely forested and every square yard of every farm must be cleared with the axe, a large class of Ontario people prefer this country to the prairies.

For the most part these are people with little or no capital, who understand bush farming. There is a sprinkling of townsmen, who find that the rough methods necessary for the first few years afford them an opportunity of learning to farm, and they regard the forest as an advantage.

Communities of several thousand French and English speaking Canadians who have entered the country with their eyes open, are an effective answer to the charge which was often made during the railway debate, that no settlement had been attempted in the clay belt. This country is now reached by rail and snow road in winter. Next year the railway from North Bay will tap the clay belt.

The question has been asked why, while there are millions of acres waiting for settlement on the southern slope of the height of land, should people seek to set up homes on the northern slope.

The reply to this is that so far as older Canada is concerned, there are no suitable areas unoccupied on the southern slope south of the clay belt. The fertile portions of older Canada lie in the valley of the St. Lawrence. If a line were drawn from Midland to Ottawa, the greater portion of the fertile lands of Ontario would, it is declared by competent authorities, fall to the south of it. North of it occasional fertile places can be found, but the country on the whole has repelled agricultural settlement.

Now it has been discovered that the Laurentian outcrop which lies north of old Canada is only about 150 miles wide, and that beyond it occurs a clay country resembling some of the best portions of old Ontario, whose fertile sections, in common with those of old Quebec, have been filled up for years. It is now a question where the emigration shall go—to the prairies or the new agricultural districts to the north?

Curiously enough a large number of Canadians prefer the bush country to the prairies. This is not a matter of argument, but an obvious fact. The European immigrants hurrying westward to the open plains and the majority of the Canadian immigrants attracted there, but there is a minority, a sturdy minority, who set their faces to the north and their axes to the trees.

A native Canadian community of some hundreds of thousands of farmers would be an enormous political, economic and industrial advantage to the country. The blue book encourages the belief that this is not only possible, but probable.—Ottawa Free Press

MARVELLOUS SUCCESS AT FORT WILLIAM, ONT.

Canadian Engineer.

The complete success of the independent telephone exchange at Fort William, Ont., the rapidly increasing number of subscribers and the unqualified support given it by the people in the face of the most adverse and unfavourable outside circumstances, clearly demonstrate the great advantages and benefits of independent telephony. The plant, which was established by the municipality about a year ago in opposition to the old company, was completely destroyed by the burning of the town hall, in which was located the central office equipment, on March 10th. Immediately after the exchange had been destroyed and it was known that it would be absolutely impossible to give any service whatever for a time, the old company (Canadian Bell), used every effort possible, first to induce the subscribers of the new system to allow the installing of their service, and when it was seen that the subscribers could not be secured even at this disadvantage, they endeavoured to induce the officials to dispose of the lines, offering to take the property at a good figure, and to make practically any concessions asked for. Notwithstanding the most attractive offers from the old company, and the fact of not being able to make any connection with railway companies on account of the existing anti-public Bell-railway compact, it was decided unanimously to re-equip the plant at the earliest date possible. At a meeting of the councillors and committee, the Mayor was authorized to proceed with the work. A telegram was at once sent the International Telephone Mfg. Co., of Chicago, the manufacturers of the equipment first installed, to duplicate the original order for central office equipment at the earliest date possible, on account of fire, and a contract was let for a new building, it having been decided to place the central office in a special building for the exchange. The building was constructed absolutely fire-proof. It was finished ready for the central office, the equipment installed and the plant put in complete operation in about 60 days from the time the first plant was put out of service. It is said that the system has been such a marked improvement in service over the old company's plant, and has given such complete satisfaction that the municipal plant is constantly increasing, while the old company has very few paying subscribers remaining.

THE SEASON'S SHIPPING.

Montreal Leads New York as a Grain Shipping Port.

The sea-going vessels entering this port this season, up to 1st inst., numbered 511, having a tonnage of 1,196,000, as against 485 vessels last year, with a tonnage of 962,000. The Morgan Shipping Trust is blamed in New York and other American ports for diverting trade to Montreal, by their high rates for grain cargoes. Expert opinion is all in favour of this port as the most economical route for grain, owing to its position at the head of navigation in direct connection with inland water transport reaching to the gate of the great West. The New York "Journal of Commerce," of 9th inst., says: "Last year at this time Montreal had slightly surpassed the port of New York in its grain shipments, the excess being a little over 400,000 bushels; but this year the figures show that New York has continued to fall behind and that now Montreal surpasses New York by nearly 2,000,000 bushels. The actual figures are: Montreal, 18,040,2144 bushels; New York, 16,341,519."

SLANDERS OF CANADA.

Two slanders of Canada have been cabled here this week. The chairman of a trade convention, held at Nottingham, told a meeting, that "Canadians had shown no sign of caring for England, and their interests were bound up with the United States." This sapient, but clearly, very ill-informed man appears never to have heard of the Canadian Contingents, the "Strathcona Horse," or of the Preferential Tariff of Canada, in favour of British goods. He probably does not know in which hemisphere Canada is situated. Another slander appears in the last issue of "Truth," a weekly paper of which the title is ironical. "Truth" calls Canada "a rotten colony." We commend this malignant phrase and the sneer of the Nottingham speaker to the attention of the British trade delegates and the Press representatives, who have recently visited this country. We venture to say that every man of them regards such slanders of Canada with indignation and contempt.—Financial Chronicle.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

ORILLIA'S EXPERIMENTS.

And her Experience With Developing Electrical Energy.

Brantford Expositor

Th September issue of the Canadian Engineer contains an interesting chapter on the development of electrical energy by the town of Orillia. Within the last four or five years the town found itself face to face with the problem of how power could be most economically obtained. The applications for water and light were increasing and to meet them an extension of the steam plant had become imperative. The price of fuel had increased. The proposition to employ water power was made, and although the town had no water power close at hand there was a splendid fall at Ragged Rapids, on the Severn, some 20 miles distant, with the whole of Lakes Simcoe and Couchiching as a source of supply. Engineers were consulted who estimated that for an expenditure of $75,000 some 800 horse power generated at these falls could be delivered to the extent of 720 horse-power in the town, the difference representing the loss in transmission. This entailed an annual expenditure of some $4,370 to pay off principal and interest on the capital invested in 30 years, or $50 less than would probably be spent in fuel to supply much less power. The people readily voted the money and the works were gone on with. The revenue the town derives from the various services is about as follows:

Water	$3,000
Light	9,700
Power	6,537
	$21,237

The cost of running the works, with repairs, is about $7,500, adding to which the interest on investment leaves a profit of from $600 to $1,000 on present capacity. In addition the town has its street and municipal building lights free. There are also flat and meter rates. The flat rate for residences is 25 cents per month for each 16 candle-power lamp. In stores, hotels, halls and churches, the charge is 35 cents per month. When ten or more lamps are installed, the current is supplied on a meter basis if desired, at the rate of 13 cents per thousand volts. On all these rates there is a discount of 20 per cent. for payment within ten days of presentation of the bill. Fifteen cents a month is the rental charge for the meter. The charge for power is $15 per horse-power per annum.

The results of Orillia's experience in electric lighting are most interesting and will doubtless, the Brantford Expositor thinks, encourage other places similarly situated to attempt similar undertakings. It is a great advantage to have cheap lighting and cheap power to the extent that Orillia enjoys, but, unfortunately, so far as power is concerned, the amount which it is able to sell is not sufficiently large to attract other than small users.

When so much emphasis is laid upon Orillia's success, and the source of it, we, in Peterborough, are led to a greater appreciation of our natural power facilities. While Orillia has made so great a success with electric energy brought twenty miles, we have in Peterborough, within a stone's cast of the market square, a dam ready to develop eight or ten thousand horse-power, while within four or five miles we have opportunities in various places of developing at least as much more. The importance of this condition cannot be over-estimated in regard to industrial growth, and our town authorities might well give more attention to encouraging development.

NO COAL CURTAILMENT.

Output of Anthracite is as Great as Ever.

Philadelphia, September 16. — Officials of the Reading and Pennsylvania Railroads say no step has yet been taken towards a curtailment of the output of anthracite, and that the matter has not even been considered. It was admitted here by an official of one of the companies that the market for the domestic sizes was practically dead, and that some curtailment of output would have to be made soon. He added that he would not be surprised if the miners were put on four days a week in a short time.

Meanwhile independent operators without any storage facilities for their surplus output are said to be cutting the circular prices for the domestic sizes as much as forty cents per ton, offering the coal for $3.35 at the mines, as against the circular price of $3.75.

BARNARDO CHILDREN.

(Ottawa Journal.)

In 1867 Dr. Barnardo, the English philanthropist, started to send children, reclaimed from the streets of London, to find homes in Canada.

In the 35 years 13,184 children have been given a start here. Last year 1,053 children were sent to Canada, and obtained good homes.

Sometimes objection is made to this class of emigration. The objectors say that children taken from the lowest strata of British life, the wharf rats of Liverpool and the arabs of London, are generally predisposed to a life of crime.

Canadian experience has proven this argument to be ill-founded. True, an occasional crime has been committed by these emigrants, and then the headlines of the press from the Atlantic to the Pacific are studded with such headings as "Brutal Crime by Barnardo Boy."

The probabilities are that the Barnardo boys are pretty much the same as any other boys, and were there accurate means of determining, it would be found that the percentage of crime amongst them was no greater than amongst Canadian youths, born and bred.

And the value to Canada of these thousands of British youths, who are growing up in Canada, who have seen the worst side of life, in the older land, and are determined to accomplish the best in the newer—the value of these lives to Canada is incalculable.

The mechanism by which these Barnardo children are sent to Canada and looked after while they are here seems to be good. At the present time Mr. R. W. Hillyard of the immigration department is on a long trip inspecting homes at which Barnardo children have been placed.

There is room in Canada yet for a good many more homeless people who are willing to work.

REV. HOANERGES HIAWATHA.

A MODERN TRAGEDY.

Duncan McGregor.

All alone knelt Hiawatha,
Knelt and prayed with fear and trembling,
Dreading much the fell ordeal
When as candidate he'd hold forth,
Candidate for Zion's pulpit.
Small church in the town of Sodom.
Slow and slower went the moments,
Fast and faster beat his heart-throb,
Dark and darker grew his vision
As he waited for his judges,
Such inexorable judges,
Deacons keen as any razor,
Elders wiser than all sages,
Members proud of purse and culture
Came to measure Hiawatha,
Taught of good in lonely forest.
Suddenly they rushed upon him,
Heeding not his need of stillness:
"Have you ever preached in Sodom,
Ours are high-toned cultured people!"
Asked a lordly leading deacon;
Not a word spoke Hiawatha.
"Folks in town are mighty clever,
Want a first-class man for Sodom,
Want new ways to catch the sinners,
Want new thoughts and want new ritual,
Want a man of style poetic,
Want no more your 'Come to Jesus,'"
Said the stylish secretary,
Not a word spoke Hiawatha,
Soon to belch out fire and brimstone,
"Look you here, those hymns want changing,
Folks are tired of common gospel,
Give us something new and classic,"
Said the leader of the singers,
Highly paid, ungodly singers,
Laughing, flirting, during service.
Hiawatha sighed and pondered.
Dear to him that grand old poem,
"Rock of Ages, Cleft for me";
Sad at heart, he left it outside.
"Here's a list of intimations,
Most important intimations,
Only twenty intimations,
Read them twice and read them clearly,"
Said a fashionable Judas,
Skilled in shady speculations.
Loud and louder clanged the church bell,
Sounding forth what seemed his death-knell;
On his head fell like a clamour.
"Time to preach," burst in the beadle;
"Time to flee," thought Hiawatha.
When appeared within the pulpit
The majestic Hiawatha,
'Round and 'round a smile went rippling
'Round and 'round his brain went whirling,
Till he felt the mighty Spirit
Speaking through him words of thunder.
Then he soared, he towered above them,
Towered as do the stately pine trees,
High above the poisonous hemlock.
Voice of God was Hiawatha,
Voice of God to ruined mortals
Rushing on to Hell's dark portals;
Voice of Jesus calling, calling
Dying men now failing, failing
Down as fall the leaves in winter;
Spirit's voice yet pleading, pleading—
Such a voice was Hiawatha.
This was not the thing they wanted,
Sodom swells must not be talked to
As if they were common people
Doomed to hell if unbelieving;
High and higher rose their anger,
Dark and darker grew their visage.
Hiawatha—Hiawatha—
Great, rejected Hiawatha!
Home he went to Minnehaha,
Home, to preach no more in Sodom,
Wiping dust from off his sandals,
Wondering greatly if the vandals
Could be than the saints more cruel,
Weary pilgrim, heavy-hearted,
To the land of the Hereafter.

—The Baptist (English).

VALUABLE BULLETINS.

Fruit Division Issues Timely Information to Apple Shippers.

The Fruit Division of the Department of Agriculture, Ottawa, has recently issued two timely bulletins, copies of which have been received at this office. The first is entitled "Export Apple Trade," and is in a large measure a review of the generally accepted principles which form the broad basis of success in the growing and exporting of Canadian apples for European markets. The bulletin deals in the most concise and practical manner with such subjects as varieties to plant, care of the orchard, selling the crop, picking, grading, packing, the package, handling, shipping and storage. The other bulletin, as its name implies, deals in a similar way with the growing and marketing of pears. Each bulletin also contains the text of the Fruit Marks Act in its amended form, and explanatory notes for inspectors, growers, owners and packers of fruit. Everyone interested in the fruit business should write Mr. W. A. MacKinnon, chief of the Fruit Division, Ottawa, for copies of these bulletins, which will be sent free to any address. Letters addressed as above do not require postage.

ST. MARK'S—OTONABEE.

The Harvest Tea and Entertainwhich is an annual event with the congregation of St. Mark's, Otonabee, will be held in the Foresters' Hall, Zion, on Friday, Sept. 18th. Tea will be served from 5 to 7.30. After the tea an entertainment consisting of songs, recitations, etc., will be given, in which the orchestra of Wilson Bros. will take part. Rev. W. R. Tandy, M.A., of Havelock, will be present to give an address. A 'bus will be at the post office corner, Peterborough, on Friday at 6.30, to convey people to Otonabee to attend the concert, for which conveyance 15 cents will be charged.

FALL FAIRS.

The Fairs will be held on the following dates:—

Peterborough Industrial, at Peterborough	Sept. 22-24
East Hastings	Sept. 18-19
Clarke, at Orono	Sept. 21-22
North Hastings	Sept. 22-23
Campbellford	Sept. 24-25
Lindsay	Sept. 24-26
Marmora	Sept. 29
Otonabee, at Keene	Sept. 29-30
L'Amabelle	Sept. 30
Coe Hill	Oct. 1
Millbrook	Oct. 1-2
Harvey, at Lakehurst	Oct. 1-2
Warkworth	Oct. 6-7
Lakefield	Oct. 6-7
Castleton	Oct. 8
Norwood	Oct. 13

GALWAY COUNCIL MEETING.

Sept. 11th, 1903.

Council met, members all present, Charles Coben, reeve, in the chair.

Moved by H. Beckett, seconded by Wm. Hunter, that the minutes of last meeting be read and signed.

Moved by D. Curtin, seconded by Wm. Hunter, that by-law No. 209 to levy and collect the sum of $233.15 for County purposes; $296.68 for municipal purposes; $825.00 for general school rate for schools. S.S. No. 1, $225; Galway portion, $132.50. S.S. No. 3, $124.89; Galway portion, $186.74. S.S. No. 4, $234.98; S.S. No. 5, $160; Galway portion, $32; No. 6, $138.66; No. 7, $163; Galway portion, $59.50. No. 1, Cavendish, $161, and that by-law No. 209 receive its several readings and be signed and sealed.—Carried.

readings and be signed and sealed.—Beckett, that Daniel Sheehan be reappointed collector of rates and taxes for the year 1903.

Moved by D. Curtin, seconded by H. Beckett, that the clerk be instructed to notify the directors of the Kinmount Driving Park Association to remove their fence off the road allowance forthwith as they have no authority from the municipal council to fence said road on lot 42, Con. A, Galway, known as the Reid road.

Moved by Wm. Hunter, seconded by H. Beckett, that polling division No. 1 for municipal election be held at Mrs. Hartnetts and polling division No 2 be held at John Jackson's, and that John Jackson be deputy returning officer and that the corporate seal be attached to this resolution to give it the force of a by-law.

Moved by W. Hunter, seconded by D. Curtin, that the following accounts be paid and orders signed on treasurer for the same:

Jno. Coulter, overcharge on taxes	$ 4 00
Wm. Harding, looking up a road	1 25
D. Sheehan, salary as collector	52 50
D. Sheehan, postage	4 00
D. Sheehan, attending court of revision	1 25
D. Sheehan, equalizing union school No. 1,2,3,5	12 00

—Carried.

Moved by W. Hunter, seconded by H. Beckett, that this meeting adjourn until the 15th day of December, unless called by the reeve.

SHIPPING TIED UP.

Mates of the Lake Steamship Company of the Steel Trust Go Out as Their Vessels Come In.

Cleveland, O., Sept. 18.—One of the greatest contests between capital and labor ever fought out on the great lakes is threatened as a result of a strike of mates on boats of the Pittsburg Steamship Company. Indications are that within a week the biggest individual fleet flying the American flag will be tied up, and that the United States Steel Corporation, owner of the fleet, will begin a finish fight with the Masters and Pilots' Association.

The fleet of the Pittsburg Steamship Company, the lake marine arm of the steel trust, consists of 117 vessels. They are engaged in carrying iron ore from Lake Superior and Lake Michigan shipping points to smelters on Lake Erie at South Chicago. All day yesterday, as fast as trust boats have reached their docks on Lake Erie, their mates have quit work. Crews of all the steamers have been discharged and the boats ordered tied up. Twenty-six ships have already been removed from service on Lake Erie, and no settlement of the trouble is in sight. The cause was the retention by the trust of Capt. Frank Rae, who is not a member of the Masters' Association.

$2,000,000 DAMAGE.

Lives Lost in the Great Storm of Tuesday-Wednesday.

New York, Sept. 18.—Rough estimates of the financial loss due to Wednesday's storm are $2,000,000 on and around Manhattan Island alone. So far eighteen lives are known to have been lost in the storm, and it is believed this number will be double when all reports are in.

20 Lives Lost.

Norfolk, Va., Sept. 18.—The British steamship Roxby, Captain Shields, which arrived here yesterday morning from Port Inglis, has on board Domingo Ballo Reyarboray, the sole survivor of the crew of 22 men on the British steamship Mexicana, which foundered with all on board off the Florida coast Tuesday night.

Two Ships Wrecked—48 Lost.

Damiarecotta, Me., Sept. 18.—Two vessels, the schooner Sadie D. and Lillie, of Prospect, Me., and the mackeral schooner George L. Edwards, of Gloucester, were wrecked on Pamaquid Point during the night and 15 lives were lost.

BALL PASSED THROUGH HEAD.

W. A. Leys, Barrister of Port Arthur, Comes to Sorrowful End.

Port Arthur, Sept. 18.—W. A. Leys, lawyer, of this town, was found dead in his office Wednesday evening. The body was found on the floor, with bullet wounds in the forehead. The ball had evidently passed clear through; there were two holes, as though two balls had entered. In the room was a rifle, with the magaine filled with cartridges. The story is given out as accidental death, while again it is asserted that he was insane, and his actions during the afternoon from those who saw him would seem to bear out the latter supposition.

The late Mr. Leys was a nephew of Col. F. Leys, M.P., of London. His father was John Leys, a well known Toronto barrister.

SLAUGHTER TEN THOUSAND.

Town of Kastoria Destroyed and Inhabitants Murdered by Turks.

Sofia, Bulgaria, Sept. 18.—The Foreign Office here has received reliable information that the Turks have destroyed the town of Kastoria and have massacred the population.

The population of Kastoria numbers about 10,000 persons, and the massacre of such a number in one place, if the report is true, exceeds anything which has yet occurred in Macedonia. The effect of the report of such stupendous slaughter may be most serious.

Plowman Bound and Robbed.

Brighton, Sept. 18.—While Morris Newman, an employe of A. M. Macklam, a farmer, one and a half miles west of here, was plowing in a field near the railroad, he was bound and gagged by two men wearing masks. The robbers then went through his pockets, securing $38.50 in money. They left him tied to the cart and unable to move. Some time after Mrs. Macklam heard his cries and went down to the field and released him.

Salisbury Left $1,551,680.

London, Sept. 18.—The probating of Lord Salisbury's will yesterday showed that he left an estate valued at $1,551,680. No public bequests were made.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address

MANUFACTURERS.

Canadian Association Do Not Want Reciprocity.

INSIST ON TARIFF REVISION.

Emphatic Views Expressed—One Delegate Says They Will Fight For Tariff Revision Till They Get It—Preferential Trade If It Is Reciprocal—Position of Association Towards Organized Labor.

Toronto, Sept. 18.—About 200 members of the Canadian Manufacturers' Association met in convention here yesterday morning. The main features of the session was the annual address of Mr. C. A. Birge, the retiring President and the reports of sections.

Growth During the Past Year.

President Birge referred optimistically to the splendid progress made by Canadian industries and in the growth of the Association during the year. He noted the increase in our imports of British manufactured goods, but claimed that this increase might have been much greater had British manufacturers shown the same aggressiveness shown by those of other competing countries. As to the preferential tariff, he took the stand that there should be no increase in the present tariff without some adequate return from Great Britain. He believed that the signs of the times pointed to the gradual working out of a general Imperial tariff arrangement, base on mutual preference. Canada, he said, was to a large extent the dumping ground for surplus United States products. Our tariff wall should be raised, so as to keep our capital, our resources, and our young men from going to enrich our keenest competitor, instead of our best friend, Great Britain. He pressed for a prompt and thorough revision of the whole tariff, in accord with changed conditions since 1896 and new needs.

Do Not Want Reciprocity.

His remarks, repudiating on the part of manufacturers any desire for reciprocity with the south, were warmly applauded. Every statement of Mr. Birge that Canada asked no favors from the United States, that she had learned to stand alone, and that there was absolutely no sentiment in favor of reciprocity, met with the emphatic approval of the meeting. Equally emphatic, too, were the manufacturers in their approval of the remarks of Mr. Birge that a tariff revision was absolutely necessary, and they applauded the statement of Mr. George B. Drummond, of Montreal, that the manufacturers would fight till they did obtain a revision of the tariff.

The Labor Question.

He endorsed the Railway Commission and argued for a better Atlantic steamship service. In conclusion, he referred to the labor question, emphasizing the mutual dependence of labor and capital. He laid down the basic principle that capability must not be handicapped by incapacity, and that the measure of wages must be the earning power. He frankly admitted the right of labor to organize, but regretted the dominant influence of the central organizations in the States. The prosperity of the manufacturers must depend on the prosperity of their employes, he concluded, and a slump in the industries of the United States might reveal to the labor men of Canada that after all the manufacturers were their best friends.

To-day the association will deal with resolutions, elect officers and decide on the next place of meeting.

Regret Chamberlain's Action.

The Association cabled Hon. Joseph Chamberlain, expressing its regret that his retirement from the British Cabinet had been rendered necessary.

FAIR PROGRESS MADE.

Fourteen Seats Disposed of in the House in Committee Thursday.

Ottawa, Sept. 18.—Fair progress was again made by the House in committee on the redistribution bill, fourteen seats being passed, involving six counties, Kent, Middlesex, Northumberland, Perth, Peterboro' and York, the chief discussions being on Middlesex, Peterboro' and York. Waterloo was also considered and held over. This disposed of Ontario, with the exception of Toronto, which will be taken up this morning, and a few constituencies which were held over for further consideration.

Alleged $400,000 Absconder Arrested.

Toronto, Sept. 18.—Yesterday was out of the ordinary in police circles. It included:

The arrest of Anthony Stanley Howe, said to be an English absconder to the extent of $400,000, who was seeking partnership in a local brokerage office, under an assumed name.

The suicide in High Park by shooting of an unidentified man.

Later the man was identified as George Woolson, proprietor of the White Window jewelry store on Queen street.

Death From Chloroform.

Dundas, Sept. 18.—Yesterday afternoon, at Greensville, Mrs. Brock Green died under very distressing circumstances. Doctors Ross and Bertram, of this town, placed her under chloroform to perform an operation. Before they could get started they were horrified to find that the action of the heart had stopped. They did their best to bring her around, but all their efforts were in vain.

Fired a Straw Stack.

Belleville, Sept. 18.—A tramp went to Frank Ashley's farm and asked for something to eat. Being refused, he set fire to a straw stack and disappeared.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

Don't wait to break down before you begin to build up.

Abbey's Effervescent Salt

forestalls the wear and tear on your liver and kidneys.

Will Shut Down the Mill.

Sault Ste. Marie, Mich., Sept. 18.—All the Steel Workers at the Consolidated Lake Superior Company's rail mill on the Canadian side of the river will be laid off for the remainder of the winter, making a cut in the pay roll of the company of about five hundred dollars per week. There will also be a reduction in the office force along all lines.

CHEESE MARKETS

Yankleek Hill, Ont., Sept. 17.—There were 1078 boxes of white and 70 boxes of colored cheese boarded and sold here to-day. Bidding started by Wenger at 11c. After several calls from different buyers it was finally raised by Wenger to 11 9-16c, who, at this figure secured 381 boxes. Fraser got 346 boxes, McRae got 140 white and 70 colored, McGregor 150 boxes, all same price. Patrons were well satisfied, as most of them did not expect so high a figure. Eight buyers were present.

BRITISH BRAVERY.

Forty-Five Against Several Thousand in South Africa—Capt. Wright's Splendid Performance at Rawai.

As a war department the Colonial Office is most successful, and the operations against Kano and Sokoto were marred by not a single untoward incident. This This was a campaign of drilled blacks against wild natives, and organization and the example of the white officers and non-commissioned officers told in favor of steadiness of front, steadfastness of purpose, and endurance during long marches in waterless wastes. The relations of all concerned appear to have been most happy. Sir Frederick Lugard's despatch to Mr. Chamberlain says: "I have only to add to it an expression of the great pleasure which it gives me to record my keen appreciation of the accurate diagnosis of the situation made by the political officers; the foresight and thoroughness with which the necessary supplies (which proved amply adequate without excess) were collected at a minimum of cost, in spite of great transport difficulties; the ability of the leadership and the forbearance and diciplinary control shown in victory, and the eagerness, loyalty, and gallantry of all ranks." Gen. Kemball similarly compliments all concerned from Col. Morland and Lieut. Col. Festing downward.

One incident is narrated by Sir Frederick Lugard, which illustrates what wonders a British officer can perform with a mere handful of drilled natives:

"I desire to draw your especial attention to the very gallant fight by Lieut. (now Capt.) Wright, at Rawia. That officer, with only forty-five men of the mounted infantry, hampered by carriers on foot, had been sent out to reconnoitre one of the roads along which an army of at least 1,000 horse and 2,000 foot were expected to advance. A skirmish of the previous day had enabled him to gain information that the main body was behind, and he could, at that stage, no doubt, have returned with safety. Meanwhile the general officer commanding sent to warn him that he would encounter large forces of the enemy, and left it to his discretion to act as he thought best. In these circumstances Lieut. Wright decided to maintain his position. He considered that, since the column was now 100 miles from Kanb, and the enemy were more mobile than our troops, if he did not check them, even at the risk of annihilation, they would outpace our column, and (as Gen. Kemball says, 'some thousands of men who meant fighting would have got past our left flank to Kano.' He, therefore, resolved to make a stand with his forty-five men, with the result that he beat off the whole force with great loss. Had his little square been broken, or his men got out of hand, and lost confidence in their leader, the whole of the little party would, no doubt, have been obliterated. I consider that this very gallant action deserves special recognition. Capt. Porter's subsequent charge was also a very gallant performance."

Commenting on this splendid performance by Capt. Wright, Gen. Kemball adds: "Had it not been for the skilful and determined way in which that officer held the road with his small party against vastly superior numbers, a formidable body of fighting men would have succeeded in getting back to Kano, and I should have felt compelled to follow them with Col. Morland's column, a course which would certainly have prolonged the operations considerably. As it was, Lieut. Wright checked the enemy and headed them north, until Capt. Porter completed their discomfiture by his dashing charge."—London Telegraph.

A Medical Decision in 1715.

In 1715 a cellar digger having been stifled at Jena, the medical faculty of the university decided that the cause was not the direct action of the devil, but a deadly gas. Thereupon Professor Loescher of the University of Wittenberg entered a solemn protest, declaring that the decision of the medical faculty was "only a proof of the lamentable license which has so taken possession of us, and which if we are not earnestly on our guard will finally turn away from us the blessing of God."

Patience and Patients.

"You have not taken the medicine I left," asked the physician with some anger. "I declare such actions as that simply make me lose my patience!"

"Well, doctor," meekly smiled the suffering one, "I was afraid if I continued to take your medicine you would lose another of your patients."

Realising that the case was hopeless, the physician left the house.

Now, What Did He Mean?

He—This is the ladies' gallery. Over there is the men's gallery. Just above the speaker's desk is the press gallery.

She—Oh, yes, and where is the rogues' gallery?

He—Why—er—the congressmen sit down there on the main floor.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Post Office, Bowmanville, Ont," will be received at this office until Friday, Sept. 25, inclusively, for the construction of a building for Post Office, etc., at Bowmanville, Ont., according to plans and specifications to be seen at the present post office, Bowmanville, and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied, and signed with the actual signature of the tenderers.

An accepted cheque on a chartered bank payable to the order of the Minister of Public Works, equal to ten per cent (10 p.c.) of the amount of the tenders must accompany each tender. This cheque will be forfeited if the party tendering decline the contract or fail to complete the work contracted for and will be returned in case of non-acceptance of tender. The Department does not bind itself to accept the lowest or any tender.

By order,
FRED GELINAS,
Secretary.

Department of Public Works,
Ottawa, Sept. 5th, 1903.

Newspapers inserting this advertisement without authority from the Department, will not be paid for it.

Cholera Infantum

There is no danger whatever from this disease when taken in time and properly treated. All that is necessary is to give

Chamberlain's Colic, Cholera and Diarrhoea Remedy

after each operation of the bowels more than natural and then castor oil to cleanse the system. It is safe and sure. When reduced with water and sweetened it is pleasant to take.

All Saints Festival To-Night.

The annual Harvest Festival service of All Saint's church will be held this evening at 8 o'clock, when Rev. Chas. J. James, M.A., of Toronto, will preach a special sermon. The church during the past week has been beautifully decorated, which, it is felt, will lend charm to the service as will also the special singing.

T. A. S. Lacrosse Evening.

On Monday evening next the T.A.S. Lacrosse Club tender an "evening" to their friends in the T.A.S. rooms. The members will furnish refreshments and their will be games and music besides. Tickets have been placed at 25 cents, and a general invitation is extended to all the friends of the club.

Y. W. C. A. Anniversary.

The Anniversary services in connection with the Y.W.C.A. will be held on Sunday, Sept. 27th, at 4 15 p.m., while the formal opening will take place on Tuesday, Sept. 29th, at 8 o'clock. Under the new secretary, Miss Lough, the Association opens the new season with excellent prospects for a successful work

Swell Wrist Bags.

We invite the ladies to call at the Peterborough Bookstore and inspect our handsome samples of new wrist bags, labelled "Made in Canada." They are shown in walrus, crocodile, real seal, morocco and snake skin leathers. The clasps, chains and trimmings combine grace with art, in styles that are distinctly and charmingly Canadian. During these millinery show days the freedom of the store is extended to the ladies. A. H. Stratton & Co.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was taking a stroll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

A WELL ATTENDED FINANCIAL MEETING.

Held in Mark Street Church Yesterday.

Programme Arranged for Epworth League Convention—Special Bi-Centenary Missionary Fund.

The annual Financial District meeting of the Methodist Church held yesterday afternoon in Mark street church was attended by the following clergymen:—

Revs. J. P. Wilson, B.A., Chairman; J. G. Lewis, B.A., Financial Secretary, and W. J. Jolliffe, B.C.L., of Peterborough; Rev. J. N. Clarry, B.A., Millbrook; Rev. N. D. Drew, Fraserville; Rev. T. W. Leggott, Lakefield; Rev. J. W. Bunner, Bridgenorth; Rev H. McQuade, Warsaw; Rev. J. E. Robeson, Bethany; Rev. G. W. Marvin, M.A., B.D., Ph.D, and Rev. G. F. Metzler, M.A., B.D., Ph.D.

The laymen present were: Messrs. Wm. Eyres, representing George street; J. Sutherland, from Charlotte street, Peterborough; H. Argue, Millbrook, and W. C. Lynster, of Bridgenorth.

As indicated yesterday, the special feature of the meeting was the discussion on the Bi-Centenary Wesley movement, in which an effort will be made to raise $250,000 for missionary purposes. Special services will be held in all churches in the District between now and January 1st, and arrangements for pulpit supplies for the occasion were made as follows:—

Peterborough, George and Charlotte streets—Rev. Dr. Henderson, (provisional.)

Mark street—Rev. H. V. Montier.

Cavan—Rev. J. G. Lewis, B.A.

South Monigan—Rev. T. W. Leggott.

Lakefield—Rev. N. D. Drew.

Bethany—Rev. J. P. Wilson, B.A.

Pontypool—Rev. J. E. Robeson.

A discussion in reference to the advisability of holding special evangelistic services during the month of October ensued, and it was decided to make an effort to hold such services on all circuits.

The draft of the programme for the Epworth League Convention to be held at Millbrook on Oct. 29th, was presented, and on motion adopted. The convention will be addressed by the following speakers:—

Miss Hughes, Peterborough; Miss Sherin, Lakefield; Rev. Dr. Smith, Rev. H. V. Montier, Rev. J. G. Lewis, B. A., Rev. J. N. Clarry and Mr. Bowerman.

Arrangements will be made to secure the services of the leading singers of the District to take part in the convention.

This was practically all the business transacted at the meeting yesterday, except making the division of the appropriations of the annual conference for missionary purposes.

Federal Union, No. 24.

Members are requested to attend special meeting of the above Union to be held in Sons of England Hall, Friday evening, Sept. 18th, at 8 p.m. Business important. J. McCann, President.

The Premium Plan.

The Executive of the Y.M.C.A. held an important meeting yesterday when the premium plan of membership was adopted as recommended by the Membership Committee. Any member who secures five new ones before Nov. 1st, will have his own ticket extended for a year from the time it expires. It is expected that this plan will be heartily endorsed by the members and result in a large increase. Members should start at once to look up new men. Those who have been out of membership for 12 months will rank as new members. Renewals will not count. With the splendid plant with every convenience for young men and a programme for a new season's work such as never has been presented before, every young man in town should be asking himself, why should I not belong?

WEDDED IN KINGSTON.

Mr. Wm. Armstrong, a Former Resident of This Town Married.

The Kingston Whig contains the following report of the wedding of a young man well known in Peterborough. Mr. Armstrong was employed as a pattern-maker in the Wm. Hamilton Manufacturing Company's foundry:

"A quiet wedding took place at the Archbishop's palace at noon today, when Miss Nora, second daughter of Captain Daniel Murphy, Rideau street, was united in marriage to William H. Armstrong, formerly of Peterborough. The bridesmaid was Miss Lillian Murphy, sister of the bride, and the groom was supported by Daniel Cousins. Both young people are well and favourably known in the city, Mrs. Armstrong for the past few years being soloist in the choir of St. Mary's cathedral. Mr. Armstrong, during his sojourn in the city, has made a host of friends. The happy young couple left at one o'clock for a trip to Ottawa and Montreal followed by the best wishes of a large circle of friends. On their return they will take up their residence here."

PRESENTATION TO MISS M. PRATT

Made Last Night at St. John's Church.

At the conclusion of the Harvest Festival in St. John's church last night, a presentation was made to Miss Margaret Pratt, who for a number of years has been actively engaged in furthering the interests of the Sunday School, Girl's Guild and King's Daughters. On behalf of the congregation Miss Birdie Dawson, secretary of the Girl's Guild, presented Miss Pratt with a handsome silver table service of knives, forks and spoons, in recognition of her faithful service to the different organizations in connection with the church. The Rector, Rev. J. C. Davidson, took occasion in a brief address to pay a tribute to the value of Miss Pratt's service to the church, and regretted her removal from town.

NEWS NUGGETS.

—Yesterday was the last day of the summer, which never came.

—These are the days that one gets hauled up for riding a wheel on the sidewalk.

—Regular meeting of Court Peterborough, C. O. F., No. 29, will be held this evening.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—The man behind the shovel on George street, as well as on the other municipal roads, did very efficient work.

—All officers of the 57th Regiment have been requested to attend the Coldstream Guards band concert in uniform.

—Fred Barrett was charged this morning with riding a bicycle on the sidewalk. He pleaded guilty and was fined $2.

—Young men should hear Mr. C. M. Copeland at the Y.M.C.A. on Sunday at the Bible Study Rally. Mr. N. Jolliffe will sing.

—A young lad named Leo Cassidy had the end taken off one of his fingers while at work at the C. G. E. establishment yesterday

—The Killin-Keough Concert Company, who have been giving a two day's entertainment in the opera house, Brighton, returned this morning.

—By permission of the Commanding Officer, the officers of the 57th Regiment attending the Coldstream Band's concert will appear in uniform, mess or full dress.

—None need be afraid these days. A young man left his wheel outside his office all last night. Such a watchful eye was kept on it that no one dared to commit the theft.

—Call and look over our stock of Purses and Hand Bags. Some new lines at remarkably low prices. By the way, we are selling fishing tackle at cost to clear. Salisbury & Co.

—Mr. Geo. McWilliams in a letter to the Examiner stated that the Manitoba wheat fields were under 4 inches of snow. Of course we all expect the crop to rise up and say "never touched me."

—Two young girls named Davis, who were up in the Police Court at Toronto the other day, stated they came from Peterborough. The Chief thinks the directory man does not know his business, or else the girls are — well never mind.

—"The entries may not be as large as some of the previous years, but the stock will be much better this year,' said the secretary of the Central Exhibition this morning. "We will have a very fine showing of cattle, and expect, if the weather is fine, to have ten thousand persons on the grounds during the Fair."

—The cold wave which has been hovering over the Northwest Territories and Manitoba, and which did considerable damage to the crops in the Prairie Province last Sunday, reached here in a modified form last evening. This morning white frost was to be seen in many places, although no great damage should have been done to vegetation, as the thermometer did not go below 35 degrees during the night. A light white frost was experienced several weeks ago, but that of last night was much more severe.

SHE TOOK THE CAT.

The proprietor of a local feed store has met with a cat-astrophe, and the sad "feline" he experiences is the subject of sympathy of his friends. He maintains a treasure in the form of a tabby, which is at once a pet, and a protection to his shop from the ravages of rodents. He valued it not only for its beauty but for its usefulness, which, in such a shop it can be imagined, would be very great. Yesterday, during the temporary absence of the owner, the cat took a promenade on the street. A passing lady admired it, and being acquainted with the young man in charge, asked if she might have the cat, and he, not thinking her to be in earnest, answered in the affirmative, with the result that the lady in her fullness of heart, took in the wayward creature, leaving the young man to wonder whether she was in earnest or not, and whether she would keep it.

The proprietor, on hearing of his loss was deeply grieved, but does not know how to get back the pearl of great price, which was unintentionally given to the lady.

ATTEND TO-NIGHT'S RUGBY MEETING

To be Held in the Council Chamber.

An Effort Will be Made to Enter a Senior Team in O. R. F. U.

An announcement made in the sporting column of to-day's issue, in reference to the Rugby meeting to be held in the Council Chamber to-night, should be the means of inducing all those interested in the game, to attend. It was felt that it was a fact to be deplored that it should be found necessary for the Senior Team to drop out of the O.R.F.U., and an effort will be made to, if possible, enter a team in the Senior Series.

All lovers of the game, whether players or otherwise, are asked to attend.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Mr. John O'Keefe, of Water street, is a visitor to the Ottawa Fair.

Miss Maggie Beatty is spending a visit at her home in Havelock.

Miss Maggie Beatty, of Peterborough, is home for a visit.—Havelock Standard.

Miss Manly, of Peterborough, is the guest of Miss Ethel Morrison.—Port Hope Times.

Miss Ethel Morrison, who has been visiting friends in Peterborough, has returned home.—Port Hope Times.

Miss A. J. Brown, Peterborough, was the guest of her sister, Mrs. W. Dann, recently.—Port Hope Times.

Mrs D. Menzies, of Peterborough, who has been visiting Mrs. A. George has returned, home. — Port Hope Times

Miss Annie McCracken, of Peterborough, who attended the Toronto Exhibition, is home for a few holidays.—Havelock Standard.

Miss Wilmot, of Peterborough, trained nurse, who has been attending Mrs. Jas. Thompson, left for her home last week.—Havelock Standard.

Mrs. Demerest of White Cloud, Michigan, returned home yesterday after a pleasant visit with her brother, Mr. George Brand, of Cedar street. While here she also visited her sister, Mrs. Meadows, of Port Hope.

The many friends of Mr. Horace E. Ayers will be pleased to learn of his success in New York City as shown in the following clipping from a New York paper: — "Physical Director Ayers has completely won the hearts of the boys. He has not been slow in winning his way among the men as well."

The Washington Post of Wednesday says, Mr. P. C. Larkin, the "Tea King of America" and the head of the "Salada" Tea Company, is at the New Willard for a few days. Mr. Larkin is accompanied by his New York manager, Mr. Jas. A. McGuane.

Mr. W. J. Bryans, of Havelock, resident agent for Swift & Co., Chicago, was in town to-day on his way home from a holiday tour—the first holiday he has taken in twelve years. He spent a month going from place to place in Ontario, and returns home greatly benefitted by his outing. He will return to Havelock physically renewed for another 12 month's devotion to business, tomorrow.

DEATH OF A FORMER PETERBOROUGH LADY.

Mrs. Calder, nee Bertram Dies in Hamilton.

Hamilton, Ont., Sept. 17.—Mrs. W. M. Calder, of Glanford, died yesterday, after an illness of several months. The deceased lady was a sister of Messrs. Peter Bertram, this city; John Bertram, Toronto; Hugh Bertram, of Vinemount, and Alexander, of Peterborough, besides several sisters.—The Globe.

HAVELOCK TO BE ELECTRICALLY LIGHTED.

Plant Will be Ready for Operation in October.

The Havelock Standard of this week, has the following item:

"Work on the Havelock Electric Light and Power Company's plant, at Burnt Dam, commenced on Monday, and now a gang of men under the supervision of Manager Wm. Mathison, is busily engaged in erecting a flume 240 feet in length and 7 feet in diamenter. The large 250 h. p. water wheel will be placed in position in the course of two weeks as will also a 150 k. w. dynamo. Mr. Mathison assures us that the plant will be completed and running by the middle of October."

Early Training.

The story goes that a belated train delayed the arrival of the groom at a wedding in the neighbouring town of Trenton. After waiting an hour at the church, it is alleged, the bride in the sight of a hundred guests, threw her bouquet beneath her feet, tore away her bridal veil, and orange blossoms, and started for the church door, where she met the tardy but excited groom. She returned to the altar, when the ceremony proceeded. Julius Rodner, of Phoenixville, Pa., for he was the man, has received early notice that he will do well to be on time in future. A late train, a bride's train, whisked in vigorous protest, combine to convince the young man that his conjugal training has not been delayed. A late session of the lodge will be as inefficient an excuse as a late train.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

S. A. OKE,
Tel. 18. 376 George street.

OBITUARY.

Mr. Harry T. Myers, Formerly of Peterborough Died in Duluth.

The Minneapolis Tribune has the following report of the death of Mr. Harry T. Myers, well known to many in Peterborough:

"Harry P. Myers, foreman of the street railway shops in Duluth, died on Monday in St. Luke's Hospital in that city. The remains were brought to Minneapolis on the Great Northern this morning, and the funeral will take place on Wednesday afternoon at two o'clock from the residence of Dr. E. S. Bugbee, 2501 Bryant avenue north. Rev. P. A. Cool, pastor of the Fowler Methodist church, will conduct the services. Mr. Myers was prominent among the railway people of Duluth, and was a member of the Modern Samaritans. Several years ago he lived in Minneapolis, and was married here to Miss Edna Price in 1895. Mrs. Myers is left with four small children, and will probably make her home in Minneapolis."

Harry Myers was a half brother of the late Mr. W. A. Sanderson, and an old resident of Peterborough, and has many relatives and friends here. He left Peterborough 16 years ago, going to Minneapolis. Mr. Myers leaves also a half sister and two sisters.

Every member of the Y.M.C.A who secures five new members by Nov. 1st will have his own ticket extended a year without cost. Now is the time to join the Y.M.C.A.

NIGHT SCHOOL at the Peterboro' Business College

BEGINS MONDAY, SEPTEMBER 14th

Those who propose attending the classes should enter as soon as possible in order that the best results may be obtained. Office open to-night.

WM. PRINGLE, Principal

Opposite Post Office.

A ROOM OF WALL PAPER

Rules for Measuring

TO FIND the number of single rolls required, multiply distance around room by height, taking out 20 square feet for each opening and divide by 30. To find quantity for ceiling, multiply length by width and divide by 30.

For 30 inch plain ingrains divide by 60, result will be number of rolls required.

Wall papers are sold by the single roll, but put up in double rolls, as they then cut to better advantage.

Price for border is for a single strip the width of the border and one yard long. Samples mailed free upon application. State what priced papers you wish, width of border and colour effect desired, to enable us to make suitable selection. Ceiling papers same price as walls they match, with the exception of ingrains.

Red Ticket Sale

Regular and Reduced Prices.

On the Red Ticket you can see at a glance the Regular Selling Price and the Reduced Price.

HALLWAY

We offer patterns that fit like a master of ceremonies into the surroundings, beautiful blending of colours, emphasizes good taste, modifies bad. Warm in hue, delicate in design. Regular price 25c, Red Ticket Sale price 18c

PETERBOROUGH'S MODERN STORE.

RICHARD HALL & SON,

Direct Importers, 353 and 355 George Street.

One Door South of Simcoe Street.

ST. JOHN'S SUCCESSFUL HARVEST FESTIVAL.

A Bright and Joyous Service Largely Attended.

Beautiful Harvest Decorations, Becoming Music and a Good Sermon.

Come ye thankful people, come—
Raise the song of Harvest Home.
All is safely gathered in
Ere the winter storms begin.

St. John's church was lent additional beauty last night on the occasion of the Thanksgiving Festival by the handsome and appropriate decorations, the work of the ladies of the congregation; and the perfect blending of the beautiful Harvest service with the results of nature's bounty, as displayed throughout the sacred edifice gave a harmonious effect which added to the effectiveness of the service.

With excellent taste, the interior of the church was decorated, not only with flowers, but fruits and grain were also used. Over the inside door of the porch was a well designed floral wreath, the different tints being perfectly blended, and the effect was very pleasing, while on the inside the results of the same cultivated taste were manifest. Around the massive pillars, grain, fruit and flowers were arranged, and festoons of grain hung from pillar to pillar. In other portions of the church vegetables were combined with the fruit of the field and garden, and gave a most pleasing appropriatness to the occasion.

Every part of the church from porch to reredos shared in the floral adornment. The scarp of every broad window sill was piled with mingled fruit and flowers; altar, pulpit and lectern all were swathed in gracefully disposed flowers, while the rood-screen balustrade was a mass of glowing bloom. It is difficult to recollect from year to year sufficiently to compare closely, but the impression upon the spectator last night was that St. John's had never before been more profusely and at the same time more tastefully decorated.

The service opened with a hymn in which thankfulness for the blessing of harvest was the theme, and the same theme predominated throughout the entire evening, each of the hymns, the sermon, prayers and musical service by the choir continuing along the same line of thought.

Rev. Derwyn T. Owen, of St. James' Cathedral, Toronto, preached the sermon, and his text was taken from St. John 6; 5—13, being the account of Christ's miracle in feeding the five thousand with the loaves and fishes. The preacher said that thankfulness was the keynote to the service in which they were participating. The season of Harvest is always associated with thanksgiving and joy, because in it is manifested more particularly the result of the Divine care and solicitude for the human race. It should also be the occasion for the searching of the heart to find the true cause for thankfulness. He said that since the fall, men have been trying to find happiness, and how they may get the most out of their lives. Thankfulness, he said, was not merely an emotion, but was a state of mind which came as the result of taking life in Christ's way. He said that to the ordinary man, living under ordinary circumstances and looking at life from the human standpoint there was but small prospect of happiness, but the better feeling would be produced by an effort to live as the Divine Master had taught. He counselled his hearers to entertain a deeper desire to find out the true cause for thankfulness.

Mr. Owen's sermon was a thoughtful and appropriate one and was much enjoyed by the congregation, many of whom were acquainted with him before his removal to Toronto.

Rev. W. L. Armitage, Rector of All Saint's church, also assisted in the service, with the Rector of St. John's Rev. J. C. Davidson. The contribution taken at the service, Mr. Davidson explained, was for the maintance of the work of the church in Manitoba and the North-west. An especially pleasing part of the service was the music rendered by the choir.

Though rather short notice was available the choir acquitted itself very creditably and rendered a good programme in a satisfying manner. The Gloria was Beethoven's and the Magnificat of Brackett, was sung, Miss Daisy Sawers taking the soprano solo with good effect; the duo was well taken by Miss Sawers and Mr. Morphet, and Mr. Walter Wesley sang the bass solo on very short notice, Mr. Alex. Elliott, who had prepared it, being laid up at the last moment with a severe cold. The Deus Miserentur was Beethoven's. The offertory anthem was unique. It was Hymn 167, "O Worship the King," as arranged by Smart, in anthem form. The congregation joined in some of the stanzas, sung to the usual setting of the hymn, another stanza being sung by the choir alone, and another by the male voices in unison. Miss Ruth Dawson took the principal solo, soprano, in a very pleasing and effective manner. The choir, which was strengthened for the occasion by other singers, and also assisted by Mr. W. Loch, violinist, and Mr. Hollo, clarinet, will give the same musical service on Sunday evening next.

The Farmers' Holiday

Peterborough Fair, Sept. 22nd, 23rd, 24th.

GOUGH'S PRIZE CLOTHING

To Wear the Red Ribbon!

Right here and now, with a hearty welcome thrown in, we invite the rank and file of the yeomanry — the noble tillers of the soil—the brawny working men, as well as the professional and business men of the West and East Ridings of Peterborough to visit GOUGH'S during the great days of Peterborough's Industrial Fair.

LET US SHAKE HANDS and mutually congratulate each other on the present happy conditions. Wheat crop threshed and selling at good prices; butter, eggs and cheese moving by the carloads at the highest quotations in years; wages going up and labour in great demand.

Going to be busy times from now on, and Gough has prepared for the largest business in years. Every Department of this Mammoth Double Store filled to the rafters with the

Newest Styles of Fall Clothing, Hats and Furnishings, Boots and Shoes.

Gough will cut a wide swath during the Fair Week. Our aim is to make our store the hub of Peterborough's Clothing Trade—the brightest and best men's store in town. Everything is down to date and of the highest class.

OPERA HAUSE QUESTION.

To the Editor of the Examiner:

Dear Sir,—The season for out-door amusements being now about at an end, the question can be heard on all sides: "What are we going to do about an opera house?" The management of the local opera house has closed its doors as far as theatricals are concerned and, I understand, will only rent it out for concerts and such like. Certainly it has served its usefulness. It met the requirements some years ago, but for some time past has not been in keeping with the size and importance of a town like Peterborough. We boast of our enterprise and go-ahead-iveness, but is it not a reflection when we stop and consider the fact that such towns as Lindsay, Barrie and Orillia can boast of modern opera houses? Here we are, reputed to be the best show town in Canada, with no opera house to induce theatrical companies to make a stand here. It is a serious matter, Mr. Editor, and the citizens will realize its seriousness before the season is over. The advocates of an opera house are sometimes met with the argument, "Oh, it will not pay." This is a mistake. Have we not sufficient public-spirited citizens in our community to subscribe stock for the erection of a modern opera house—one that will meet the requirements of the future, for Peterborough is bound to grow. If the co-operation of some of our citizens could be enlisted, as was the case with the new rink, it would not be long before sufficient stock would be subscribed to erect an opera house that would be a credit to the town, and that would prove a good, paying concern. I claim this matter is of great importance, as it certainly would not speak well for our town to have its citizens visit the surrounding towns in order to witness a theatrical production.

Yours, etc.,
VOICE FROM THE GALLERY.

Hints to Housekeepers.

The undersigned desires to inform the public that he is sole agent for the Celebrated Laurentian Range, made in 6 styles, 2 sizes, the best four-hole range on the market. Neat in appearance, perfect in fit and finish, a splendid baker, burns economically any kind of fuel, is easily kept clean, works like a charm in every respect, and is guaranteed to give satisfaction. I have also a large stock of new and second-hand furniture and stoves, and general housefurnishings, and I also buy second-hand furniture and stoves. Call and examine stock before purchasing elsewhere. Stock and prices right. R Begley, 380 and 382 Water street, opposite the Public Library.

An Electrical Event.

Next Saturday afternoon, September 19th, a series of interesting athletic sports and games will be held under the management of the C.G.E. Co. Benefit Society, in the T.A.S. grounds, Murray street. An attractive programme of events is in preparation, which will be well worth the price of admission. Gentlemen's tickets 15c., ladies' 10c. Everybody is invited. W. Christie, Secretary Games Committee.

NEW WHOLESALE FIRM IN PETERBOROUGH.

Perkins Ince & Co. Open Large Warehouse Here.

McAllister Building on Charlotte Street Remodelled and Fitted up—Unexcelled Shipping Facilities—Mr. J. A. Cameron Manager.

A tribute to the growing importance of Peterborough as a commercial centre is found in the fact that wholesale firms are finding it desirable to establish warehouses here. Some little time ago an announcement was made in these columns to the effect that Perkins, Ince & Co., one of the largest wholesale grocery establishments in Toronto, had secured the large brick building lately occupied by the McAllister Milling Company on Charlotte street, near the G.T.R. station, and were about to open a branch of their business here. This move was decided upon because of the extent of business done in towns in the vicinity of Peterborough, and it was thought that it could be better handled from a more central point, such as Peterborough was recognized to be. The excellent shipping facilities possessed by the town, no doubt influenced the company to a large extent in their decision to open a branch here.

The establishment opened for business this week, with Mr. J. A. Cameron acting in the capacity of manager. Mr. Cameron is well-fitted to occupy this position, because of his long connection with the company as their representative in this section of the province. He will spend most of his time on the road, while the warehouse here will be managed by Mr. T. D. Mulholland, who has for a number of years been connected with the company's head office in Toronto.

The warehouse in which the business here is being conducted is one admirably suited to its requirements. Situated on the G.T.R. shipping can be conducted with the least possible labour. The interior of the warehouse has been entirely remodelled to adapt it to the needs of the new business, and the departments each have a separate room. The three floors are connected by an electrically operated elevator, which has just been installed.

In the basement canned goods and dried fruit will be stored, but as yet comparatively few of these have arrived. The first shipment of new raisins was just being received.

The first floor will be the shipping department, and will be also used for storing heavy goods, such as salt, sugar, etc. A special room has been constructed for teas and tobaccos, which, for the amount of space occupied, are very valuable. This room is located immediately at the rear of the office.

On the second floor special provision will be made for light goods, more particularly described as rices, mustards, tapioca, etc. A special shipping room is also located on this floor, in which small goods and bottled commodities will be packed, and from which they will be shipped.

The entire building has been rewired and electric light installed throughout.

On the first floor, fronting on Charlotte street, an office has been fitted up, which will be combined with a sample room. This has been finished in natural wood with hardwood polished floors, and is a fitting indication of a prosperous and well conducted business. A large black and gold sign on the Charlotte street end of the building, bears the firm name, and new awnings have been placed above the windows.

Speaking of the prospects for the business here, Mr. Mulholland, who is in charge of the business, spoke enthusiastically, and said that the volume of business done since opening up had been in excess of their expectations. The firm is not a member of the Canadian Grocers, which means that their prices will not be dictated by a supposed combine, and being one of the oldest firms doing business in Canada, having been established in 1843, they claim to be in a position to serve the trade in a satisfactory manner.

The firm of Perkins, Ince & Co. is welcomed to Peterborough, and will no doubt find their decision to locate here, a profitable one.

A GREAT BAND'S HISTORY,

The Drums of the Goldstreams Date Back to 1660.

The Band of His Majesty's Goldstream Guards, which is now touring Canada, leave being granted by the King, is one of the oldest in the British Army. Its drums date back to 1650, before the English Army in its present establishment was formed. It was not until 1773 that a regular band of the regiment was established and its nucleus was thirteen musicians brought over from Germany by the then Duke of York. At the end of the Napoleonic war when Paris was occupied by the Allies in 1815 the band was stationed for six months in the French Capital, which is probably the only instance in modern times of an English band being quartered in a foreign country. In 1825 Mr. Charles Godfrey was appointed Bandmaster and remained at the head of the regiment's music till 1863. He was followed by his son, Fred Godfrey, who after 17 years, in 1880 was succeeded by Mr. Thomas who gave place to Mr. Rogan, the present bandmaster, in 1886. Under Charles Godfrey the Goldstream Band gained a very high state of efficiency and under Mr. Rogan with its strength increased to 48, has won the distinction of being the finest in the Army. With the exception of two drummers not required for concert purposes, the band in its full regimental strength will be heard here on Wednesday, Sept. 23rd, at the new hockey rink.

Is Your Piano in Tune?

The chance of se[illegible] off [illegible] pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

At $5.00 we are showing a very wide range of styles in very dressy goods.

NOT JUST AS GOOD

Did you ever inquire at a store for certain articles and get for a reply "We have something just as good"? Did it ever occur to you that "Something just as good" is something the dealer has been able to buy much cheaper than the article you inquire for? This is true in drugs, fabrics, groceries, hardware, and in fact every line, including silver-plated ware. If you inquire for 1847 Rogers Bros.' Knives, Forks or Spoons, don't accept any bogus Rogers' stamp because your dealer tells you it's just as good.

1847 ROGERS BROS. TRADE MARK

The above trade mark has been stamped on every article of the original and genuine Rogers Bros.' goods for over 30 years. Get this and you get the best that is made.

QUEEN OF SWINDLERS

HOW MME. HUMBERT SECURED MILLIONS WITH AN EMPTY SAFE.

Head of the Greatest Swindle of the Century—Preface to the Fraud—The Crawford Millions the Basis of the Steal—Story Used for Borrowing Purposes So Taking That Money Flowed In Like Water.

Guilty, declared the Paris jury, and the Humberts were thereby elevated to the top niche in the temple of criminal fame. Guilty of forgery, swindling and a long course of deception extending over a period of seventeen years. Borrowing millions on nothing, using statesmen, lawyers and courts to promote their frauds, causing bankruptcy, ruin and suicide—that was the indictment the Humberts had to face. To the last they brazened out the part they had played so long. Elevated by fraud from poverty to affluence, they were dragged to prison by exposure. Yet they were ever the wrong parties, threatening State-disturbing revelations that never came; hinting at a full and complete explanation and going off to prison the living pictures of injured innocence. From the first the case is full of concocted mystery.

MME. THERESE HUMBERT.

and to the last the atmosphere of dramatic fiction surrounds it.

To go back to the beginning of the story. There lived at Aussonnes, in France, thirty years ago, one Auguste Daurignac, who had a farm that did not prosper. But he had in his strong box, or said he had, certain documents that in due time would make his children wealthy. Near by lived Gustav Humbert, a man of good position, but few scruples. Afterwards he became a life Senator and Minister of Justice in the French Government. But at this time he was in less comfortable circumstances. It occurred to Humbert that it would be an excellent idea to marry his son, Frederic, to one of the children who would some day inherit the mysterious millions. So Frederic Humbert and Therese Daurignac were united in matrimony on a fair day in 1878. To make doubly sure the Pere Humbert consented to his daughter Alice marrying a son of the house of Daurignac. He then began to borrow money on the prospect of the inheritance. This is how the two families came together, but it is only the *preface* to the story of the Humbert frauds.

Fortune did not smile on Frederic Humbert and his bride. A year after their marriage they were in the keenest distress. They had borrowed a little, and the creditors were pressing. The only way they knew of amending their troubles was to borrow more. Madame Humbert, who appears to have been the evil genius of the plot, then planned to open the pocketbooks of the money lenders of Europe to the distressed family.

It was found out that an American millionaire named Robert Henry Crawford had left his fortune, valued at $20,000,000 to Madame Humbert in her maiden name of Therese Daurignac. The will was dated at Nice on Septembre 6, 1877. As the story was not invented and circulated until 1884 some explanation of the concealment was necessary. It was accordingly told that the deceased millionaire had formed a romantic attachment to the mother of Therese, and that the matter had been kept a secret for family reasons. It was a simple matter to invent and circulate such a story, but quite another matter, without a will and without any evidence, to have it accepted by courts and accepted by money lenders as genuine. But here the genius of Madame Humbert reached its greatest and worst development.

When the Humberts were about to enter in the possession of the Crawford wealth, which was contained in a large sealed package of bonds, two other claimants presented themselves. They purported to be Robert and Henry Crawford, nephews of the deceased millionaire, and they produced another will of the same date. By this will Crawford bequeathed his estate to Maria Daurignac, sister of Madame Humbert, and his two nephews, but they were to pay Therese Daurignac a life annuity of $72,000 a year. This was a clear subterfuge, for whether the first or the second will was sustained Therese Daurignac was to be made very wealthy. *Negotiations* were opened with the imaginary claimants. The Crawfords wrote that they were already millionaires and that, therefore, the money did not signify to them. It was agreed, however, that one of the fictitious Crawfords should marry Maria Daurignac when she came of age. In the meantime the papers were to be kept by Madame Humbert in a safe. This story was then used for borrowing purposes. When in due time Maria came of age she declined to carry out her part of the bargain. There was another pretence of negotiation, and finally Madame Humbert announced that she would contest the second will. To that end she started proceedings against the Crawfords. The courts took possession of the mysterious safe and its alleged contents. For seventeen years every expedient known to the law to prolong the case was resorted to. The best lawyers were employed by both sides. Great public interest was excited.

The Humberts were now able to borrow fabulous sums. Money loaded to them to their accommodations. At the recent trial the official receiver in bankruptcy declared that altogether the notes discounted by the Humberts represented $140,000,000. As paper matured it was renewed or repaid with other borrowings. During the period from 1888 to 1903 the average paper in circulation annually was $8,000,000. The family lived in luxury in the most fashionable part of Paris, the avenue of the Grand Army. The housekeeping expenses amounted to $40,000 a year. They had a country chateau with beautiful grounds laid out regardless of expense. There was also a steam yacht and a private dock. The finest art treasures were purchased. Fashionable and clever people were lavishly entertained. Cabinet Ministers and high functionaries of State basked in the sunshine of this borrowed prosperity. Creditors might demand their money, but they were asked to be patient because their lordships the judges would not allow the mysterious safe with the mysterious package to be opened.

At last it occurred to one of the creditors to request the court to open the safe and inspect the treasure. As the tardy application seemed reasonable a scrutiny was ordered for May 9, 1902. Before the day of the inspection the Humberts fled. The safe was solemnly opened in the presence of the judicial Tribunal. It contained absolutely nothing of value. The golden bubble had burst. But there still remained the mystery of the vanished family. For a long time no traces were found of them. At last, seven months after the flight, the Humberts were captured at Madrid. Five years in prison, and a nominal fine, was the maximum punishment inflicted a few days ago. And they lived as millionaires for seventeen years and stole more than $10,000,000.

MAURICE BEST CURED.

Dyspepsia Kept Him in Misery for Years—Dodd's Dyspepsia Tablets and Dodd's Kidney Pills Cured Him.

Indigestion and Dyspepsia have become such common complaints that most people accept their aches and pains as a matter of course. They do not stop to realize to what terrible sufferings they lead unless they are promptly checked and cured. The story of Maurice Best, of Southern Harbour, Newfoundland, should be a warning to them.

"In 1892 I was attacked by Dyspepsia," says Mr. Best. "It gradually grew worse until I was in continual misery. Sometimes I would go off in a faint, and for ten or fifteen minutes I would be more dead than alive.

"I took doctors' advice and prescriptions but although they gave me a little help they failed to cure me. Then I started to use Dodd's Dyspepsia Tablets and Dodd's Kidney Pills. The first two boxes gave me a new life, and a further use of them made me a new man.

"I confess I owe my life to Dodd's Kidney Pills and Dodd's Dyspepsia Tablets."

Your case may not be as bad as that of Maurice Best. But if they saved his life how sure it is they will cure your aches, pains and discomforts.

CHICAGO LIVE STOCK.

Chicago, Sept. 16.—Cattle—Receipts, 21,000, including 200 Texas, 2000 western; $4.50 to $6.80 lower; good to prime steers, $5.40 to $6; poor to medium, $3.90 to $5.25; stockers and feeders, $2.40 to $4.15; cows, $1.50 to $4.60; heifers, $2 to $4.85; canners, $1.40 to $2.60; bulls, $2 to $4.75; calves, $3.50 to $7; Texas steers, $3 to $4.40; western steers, $3.25 to $4.40.

More Fighting in Philippines.

Manila, Sept. 17.—One hundred fanatics attacked the headquarters of the constabulary at San Jose, in the Province of Nueva Ecija, Island of Luzon, and attempted to take the place by storm. After a lively fight, the attacking force were repulsed, with a loss of eight. The constabulary lost five men in the fight.

Married Three Times.

Toronto, Sept. 17.—Jane McConnell, the 21-year-old girl, who confesses to having three husbands living, was remanded for a week in yesterday's Police Court, after ministerial evidence as to the several ceremonies was taken.

Sir Thomas Lipton Ill.

Chicago, Sept. 17.—Sir Thomas Lipton is suffering from "colitis and catarrhal appendicitis," according to an official statement made by his physicians yesterday afternoon. He is, however, progressing favorably.

Will Expend $2,000,000.

Hamburg, Sept. 17.—The Senate yesterday decided to expend $2,000,000 on the improvement of the Elbe Channel and the river terminals.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity. All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

The Second Whip.

Have you ever noticed, says a writer in a London journal, that some tamers carry a second whip in their left hand, which is never used? There is purpose in this. It represents to the wild beast the terrors of the unknown. He has experienced the sharp, stinging flick of the whip in the tamer's right hand, but for the life of him he cannot imagine what anguish lurks in that mysterious whip in the other hand, which is never used. Many a tamer has saved his life in a critical moment by just lifting that unknown terror above a crouching, growling, fury maddened tiger.

ARTHUR STRINGER.

Fine Picture of Canada's New Literary Light—A Stalwart Poet.

A poet of almost heroic build is Arthur Stringer. There are six feet and an inch of him. Also he is more or less good to look at. An English recruiting sergeant would scan him with longing eyes. Seeing him in a crowd you might pick him out for a champion athlete or, by his smooth face, for a matinee idol. There's nothing about him to suggest the poet—save his poetry. Neither does he seem to have the poetic temperament. He is no dreamer, no idler. His mental poise seems to be as sound and as well balanced as his physical carriage, which is saying a good deal.

Canada is rather proud of having produced such a poet, and with good cause. London, Ontario, is his birthplace. His years are about thirty. He comes from a fine old English family in which there's an earldom or something of the sort, but Mr. Stringer carefully keeps this fact in the background. He stands on his own feet. You may see by glancing at him that he needs no coat-of-arms background to proclaim his nobility.

He studied and played football at Toronto University and at Oxford. If they gave him any degrees he has forgotten it. Before he was twenty-five he had published two volumes of verse in Canada. They were slim little volumes which brought him small fame and less money. Yet it was poetry, good poetry. The Canadians, however, prefer to wait until "The States" discover their geniuses before showing their own appreciation. So Mr. Stringer sailed down into New York, prepared to starve in a hall bedroom. But he didn't. The New York magazine editors—who are much maligned, you know—promptly discovered that his poetry was good and paid him well for his verses. Since then, both by short stories and verse, he has been winning wide recognition and the rewards which accompany the same.

Just now, while his new book of poems is being praised by the London critics, while the publishers are issuing his first novel, "The Silver Poppy," Mr. Stringer is up in Ontario, on the shores of Lake Erie, looking after his fruit farm, working in blue shirt and overalls and enjoying himself hugely. Next fall, when his melons and pears and grapes have all been gathered and sold, he will pack his trunks and typewriting machine and start either for New York or London, where he will settle down for a winter's hard work.

Mr. Stringer's novel is likely to receive an extraordinary amount of attention in the newspapers on account of the identity of the well-known writer who figures in the book as Cordelia Vaughn. Mr. Stringer first met the lady in the manner described in the book, and his experiences of this "yellow vampire" are faithfully described. Every writer in New York will know the original of Mr. Stringer's heroine, and few will dispute the truth of his portrayal. It is more than likely that Cordelia Vaughn's real name will soon be suggested in the newspapers.—The Reader.

As to Old Ages.

Thomas Parr and Henry Jenkins are respectively credited with the ages of 152 and 160. Jeanne Serimphan was married when she was 127 and died when she was 128. Dr. Dufournel married at 116 and became the father of two children and died at 120. Marie Prieu reached the age of 158. A woman of Metz, the mother of twenty-four children, died at the age of 100. Surgeon Politman celebrated his one hundred and fortieth birthday. Patrick O'Neil buried seven wives and died at 120, and a Norwegian peasant is recorded as dying at 160 and leaving two sons, one aged 108 and the other only nine summers. Mr. Robert Taylor lived to be 134 and died of excitement on receiving the picture of Queen Victoria signed by herself. An Irishman named Brown, who was a habitual drunkard, lived to be 120. A French drunkard lived to be 112. He had a daily debauch for ninety years. Durand d'Etivel of Cahors lived to be 128. A woman of 124 drank strong coffee in great quantities all her days, while a man of 114 lived on fruit, chiefly melons, and chewed lemon peel.

Was Solomon a Plagiarist?

Two thousand five hundred years before King Solomon made an alliance with Pharaoh and 3,500 years before the birth of Christ there lived in Egypt a prefect, Ptah-he-tep by name, who was a collector of moral maxims which were even then hoary with antiquity. These gems of proverbial wisdom are strikingly like those of the wise Hebrew monarch, although it must be admitted they received additional luster from his hand. These are samples of the Egyptian maxims, as translated in the Literary Digest:

"Be not proud of your wisdom, but speak to the ignorant man as you do to the learned."

"If you must deal with an antagonist while he is in anger and he is more powerful than you, then bend your neck to him."

What is this but the philosophy which warns against the "man wise in his own conceit" and advises the "soft answer that turneth away wrath?"

Wanted the Lambs Handy.

"I want to get a tombstone for my husband's grave," she said, pushing back her somber veil.

"We have all kinds," replied the dealer. "Is there any particular style you wish to get?"

"Yes. I was thinking I would like to have one of those marble blocks with lambs carved on them."

"But those are generally supposed to be placed upon the graves of children."

"Yes, I know—I've noticed that. Still, I think it will please him to have one of them if he can look back here now and see and understand what we are doing. You see, he operated in Wall street, and it will make him happy to always have a lamb there right within reach."

When you do not relish your food and feel dull and stupid after eating, all you need is a dose of Chamberlain's Stomach and Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by all druggists.

MR. ROBERT REFORD.

Sketch of the Montreal Business Man Who Has Just Been Chosen Chairman of Transportation Commission.

Mr. Robert Reford of Montreal, who has been chosen Chairman of the Transportation Commission, is one of the most widely known business men in the Dominion. He is a native of the north of Ireland, and received his primary education at Belfast. Coming to Canada in 1845 a young man, he stayed a short time in Montreal, and then came to Toronto, where in 1850 he began business in his own name. Eleven years later he purchased the wholesale grocery business of William

MR. ROBERT REFORD.

Ross, and soon a branch was started in Montreal. Having moved to that city some years later, Mr. Reford about 1868 began to interest himself in the carriage of merchandise by water, and now he is one of the foremost shippers of the Dominion, his company being agents for the Donaldson, Thomson and Lord Lines. He was one of the first to undertake the transportation of fruit direct from the Mediterranean to Canadian ports. His name has long been identified with the Board of Trade and Harbor Commissioners of Montreal. One of his incidental occupations is importing and breeding of thoroughbred cattle, for which purpose he keeps a magnificent stock farm near Montreal.

Are You Bilious? Blame the Liver.

Scores of the Common Ills of Life Due to Disorders of the Liver and Curable by the Use of

DR. CHASE'S Kidney-Liver Pills.

If you are bilious blame the liver. If your digestion is impaired and you suffer from headache and dizzy spells, blame the liver. If your bowels are irregular, constipation and looseness alternating, blame the liver. If you have pain under the shoulder blades, feelings of fullness after meals, aching limbs, a yellow, muddy complexion, blame the liver.

Torpid, sluggish action of the liver is responsible for all these symptoms, and while you have a right to blame the liver, it may be well for you to set about to help the liver out of difficulty.

Though bile, which the healthy liver filters from the blood, is nature's cathartic and is necessary to healthful and regular action of the bowels, it is poison when left in the blood and gives rise to many distressing symptoms. The use of Dr. Chase's Kidney-Liver Pills promptly cures torpid liver and biliousness, and because of their combined action on liver, kidneys and bowels ensure a thorough cleansing of the system.

There is probably no one organ responsible for so many ills as the liver. Overeating, excessive drinking or irregular meals are very likely to upset the action of the liver, overload the system with bile and bring on biliousness or sick headache. Keep the liver in health by using Dr. Chase's Kidney-Liver Pills and you will avoid many of the common ills of life. There will then be no constipation, no stomach troubles, no danger of kidney and urinary, derangements.

The position which Dr. Chase's Kidney-Liver Pills hold to-day as the leading family medicine is undoubtedly due to their wonderfully prompt action on the liver and their combined effort on the kidneys and bowels. There is no medicine obtainable which is more useful in cases of emergency when the digestive, urinary or excretory systems are deranged than this great prescription of Dr. A. W. Chase. One pill a dose, 25 cents a box, at all dealers or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 8

A LORD AND TWO LADIES

By *Cyrus Dericson*

Scotland Yard had a case on hand that needed to be handled with the utmost delicacy, and it was handed over to Inspector Jones. Jones was a red-headed, homely looking man, seemingly more fitted in every way to handle a crowbar in a quarry than to work up a delicate case in police matters, but as a matter of fact he was all finesse to his fingers' ends. This case was one wherein Lord Bathmoss refused to pay his just debts to certain tradesmen. Some lords refuse to pay their debts because they can't raise the money to do it, but Lord Bathmoss refused to because he denied the bills, though they were sent in by some of the most prominent jewelers in the trade. Not only did the young lord deny the bills and damn the people who sent them, but the daughter of Lady Jane Symonds and the wife of Sir John Bevis likewise denied certain bills incurred at the same time and while in the company of the lord.

When Inspector Jones came to interview the six anxious creditors, each of whom had been let in for at least £1,000, and some of them for three times that sum, they told plain, straight stories. Lord Bathmore had called in company with the ladies at a certain date. He needed no introduction, as he was well known, but he had introduced and thus guaranteed the ladies. In each instance they had been searching for birthday gifts, and nothing but the choicest and the best would satisfy them. That three people of title should call at once was enough to make a shopkeeper gasp for breath, and that the trio should condescend to select liberally of his stock and bear their purchases away with them made him weak in the knees for an hour afterward. Lord Bathmore's credit was good for £20,000 at any shop in London, and it was really too bad that the trio could not be induced to purchase three or four times what they finally selected.

The bills had not been sent until three months later, and they were almost a year old before the various firms dared to add that part payment would be a source of gratification. Then it was that the denials were made, and those denials put the creditors in a hole. It isn't considered proper form in England to serve a titled debtor as they serve a delinquent malefactor. He or she must be treated in a gingerly way until the last hope is gone. It was the flat denial of each one of the trio that sent the case to Scotland Yard and put Inspector Jones to work. It looked like a conspiracy, and it was possible that a trick had been played on the jewelers. It was four weeks before Inspector Jones made his first report, and it ran as follows:

"I find that all the purchases were made in the same week, though on different afternoons. I have had an interview with each debtor, and all deny the purchases. Indeed I have proofs that Lord Bathmore was in Paris all that week and that at least one of the ladies was out of town for the whole month. We must either believe that these three persons are liars and conspirators or that there has been a series of queer mistakes."

It was far longer before a second and final report was sent in. Inspector Jones did not believe the trio to be liars and conspirators, and he ran up against a stone wall at once. In each and every case my lord and his lady friends had been waited on by the head salesman or one of the house, and in each and every case was well known by sight. The jewelers couldn't be sure of the identity of the ladies, but that it was Lord Bathmore who honored them with his presence they were ready to take their affidavits. Inspector Jones begged to differ with them, but he realized that he had work on hand before he could prove his point. It made the case all the more difficult because it was a year old. As a beginning he visited the pawn shops, and after a long hunt he had the good luck to turn up a string of pearls that had been included among the purchases. But in the end it led to nothing, for the description furnished by the pawnbrokers failed to tally with the persons of the three accused.

Inspector Jones, without being able to advance anything but general reasons, got a further stay of proceedings. He had an intuition that he would drop on the right clew if given time, and the creditors reluctantly conceded that if they went to law and were beaten they stood a good chance of being mulcted in heavy damages. A year went by and the inspector seemed no nearer the end of his case. Then luck stepped in to aid him. Business of another nature called him over to Ireland, and one night he found himself hung up in a small town with only one thing to do to pass away a long evening. That was to attend a play to be given at the town hall by a second rate provincial theatrical company. Two short plays were billed, and between them Professor Fairfax was to perform wonderful feats of juggling and impersonate many well known characters.

The inspector attended, and his interest was only so so until the impersonations began. Then it quickened, and by the time the professor had turned himself into Lord Bathmore the detective was enthusiastic. There were the dress, guit, the voice and the gestures of my lord to a T, as any one who knew him must say, and the applause that followed was all that could have been hoped for. An hour later Inspector Jones was interviewing the professor in jail and saying:

"Now, then, my man, I've got you at last, and you might as well make a clean breast of it. I suspected a trick of some sort, but hang me if I thought an actor would have the cheek to do it."

The professor wasn't easy game, but it all came out at last, and it was a thing to excite admiration in its way. While playing under another name at one of the London music halls the professor had planned the affair. He excelled in the art of making up, no matter how bad his acting was, and having £100 to back his scheme he induced two actresses of his acquaintance to go in with him. He counterfeited Lord Bathmore so closely that he even entered one of the clubs and was addressed on the street. When he had tested his disguise he went shopping with the ladies, and the result was a haul of £8,000 of the finest jewelry. He would have doubled it had not the nerve of one of the women failed. The professor had a business head on him. Not one single article was pawned. The pearls had been stolen from one of the women and pawned by the thief. The idea was to let a couple of years go by before converting the plunder into cash. The three impersonators were arrested and the property recovered, and the trio are still playing at large if not overfastidious audiences in male and female prisons.

Dodd's Kidney Pills are the only medicine that will cure Diabetes. Like Bright's Disease this disease was incurable until Dodd's Kidney Pills cured it. Doctors themselves confess that without Dodd's Kidney Pills they are powerless against Diabetes. Dodd's Kidney Pills are the first medicine that ever cured Diabetes. Imitations—box, name and pill, are advertised to do so, but the medicine that *does* cure

Diabetes

is Dodd's Kidney Pills. Dodd's Kidney Pills are fifty cents a box at all druggists.

IN OLD AGE the question of health becomes mainly a question of nutrition. If the stomach and other organs of digestion and nutrition are kept in a healthful condition there will be a well-nourished body, and little liability to disorders of the liver, bowels or such other disorders as may result from innutrition and lack of exercise.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition, and also diseases of other organs which are caused by the diseased condition of the stomach. By enabling the perfect nutrition of the body it increases the vital power and promotes a vigorous old age.

"I was a sufferer from chronic diarrhea for five years," writes Mrs. Mary A. Aroog, of Rolla, Phelps Co., Mo. "I tried different remedies, which would give me relief for a short time only. My trouble would return as bad as ever. I consulted you in July, 1900, and by your advice commenced using Dr. Pierce's remedies. I took two bottles of the 'Golden Medical Discovery,' three vials of the 'Pellets,' and some of the 'Extract of Smart-Weed,' as you advised. I have not had any return of my trouble since using your medicines. Am now seventy-one years old and I never had anything to relieve me so quick. I think Dr. Pierce's medicines the greatest on earth. Should I ever have any return of my trouble shall use your medicine. My thanks to you for your advice and thanks to Almighty God for restoring me to health through your hands."

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach, blood and lungs.

Dr. Pierce's Pleasant Pellets, the best laxative for old people. They cure constipation and biliousness.

WOMEN.

The London Express prints this poem with a double reading. Read it as it stands and woman is highly flattered, but read alternate lines (one and three, two and four of each verse) and the sentiment is very much the reverse:

Happy a man may pass his life
If he's directed by a wife;
If free from matrimonial chains
He's sure to suffer for his pains.

No tongue is able to unfold
The virtues in woman you behold;
The falsehoods that in woman dwell
Are almost impercptible.

In woman's heart you'll see appear
Truth, darking of a heart, sincere;
Hypocrisy, deceit and pride,
In woman never can abide.

The Acanthus in Architecture.

Vitruvius, a Roman architect and engineer who flourished in the reign of Augustus Cæsar, tells the following story:

Callimachus, a Corinthian architect, was one day sitting, lost in thought, in a burial place just outside the city when his attention was drawn to the tomb of a Corinthian maiden of humble birth. The friends of the child had placed on her grave a basket of her toys, and this, covered with a tile to keep out the rain, was placed over an acanthus root.

The leaves of the plant had closely surrounded the basket until they reached the tile, when they had curved outward and downward very gracefully. This so struck the fancy of Callimachus that he set about imitating the figure. His attempts eventually resulted in the invention of the Corinthian style, in which the vase of the capital represents the basket, the abacus the tile, and the volutes the bending leaves.

The era of Callimachus is uncertain, but as the Corinthian column was used by Scopas, the architect of the temple of Athena Alea at Tegea about 394 B. C., he must have lived before that time.

The Value of Sunlight.

One of the greatest cures at the sanitariums established all over the country is the simple sun bath. The solar heat gives to the whole system a strength and vigor which no nourishing food can impart. It is so essential to our health and happiness that when it is taken away from us we become weak, run down and pale. But when we go out into the warm sunlight again new strength and health come to us. The sun bath is essential. Take it every day. Cut down the trees that are so close to the house that they obscure the sun and have every living room flooded with light. If one is forced to stay indoors all day try to get near the sunny window where the full effects of the sunlight can be felt. It will cure neuralgia, nervousness, faintness, weakness and a dozen other complaints. It will give color and beauty to the complexion by making the blood better and purer. The purest and prettiest complexions are those which are wind swept and sun browned during the summer time, and not those which come from a dark room.

Talking Shop.

Dolly—So Simpkins, the cashier of the bank, proposed to you last night?

Polly—Yes, and I promised to marry him.

"Did he ask your father's permission?"

"Yes; he said he would ask papa to indorse my promissory note."—Baltimore Herald.

It Was Not a Lozenger.

The exception to the rule that funerals are among the most solemn of human customs occurred at a burial in a Quaker settlement.

An aged and highly respected man in the community died, and the funeral was largely attended. In a room filled with relatives and friends of the dead sat an old farmer, whose cough, like some of the ailments that afflict humans, was especially aggravated when the mourners were quietest.

He made several efforts to control the hectic spasms; but, being blunt in disposition and not the least self conscious, he did not realize that he had the nerves of half of the room on edge and consequently did not worry himself about stopping the cough. Much annoyed, but full of sympathy, a spinster lady, a neighbor, who sat behind him, plunged her hand quietly into an ancient reticule and, drawing out something in her hand, passed it to him, saying in a whisper, "Here is a lozenger, John; it will stop thee from coughing."

The farmer took it rather indifferently, put it into his mouth, bit hard, then suddenly raised half a foot off his chair, with a wry face. Returning the "lozenger," he said in a voice heard throughout the room:

"Here! Thee should be less careless with thy shoe buttons. I have almost broken a tooth."—Philadelphia Press.

Question of Military Etiquette.

A question of military etiquette has arisen in Melbourne. Sir Malcolm McEachren, the head of a large Anglo-Australian firm, is the Major of a Scottish regiment in that city, and he has accepted the post of Consul for Japan. Are the two positions compatible? Sir John Forrest, the Commonwealth Minister of Defence, thinks not. He doubts very much whether Lord Roberts would allow any British officer to act as Consul for another nation. On his attention being called to the case of Dr. C. S. Ryan, who is Consul for Turkey in Melbourne, and who holds the rank of Colonel as principal medical officer of the Victorian forces, Sir John remarked that the case of a non-combatant was entirely different. Dr Ryan accompanied Osman Pasha to Plevna and had many adventures during the famous siege. He wears two Turkish orders and the war medal.

A Bold Deed.

Agnes—Oh! I'm not unreasonable, but the man who marries me must at least be brave! Hilda (her youngest sister)—I should just think so, dear! The bravest of the brave!—John Bull.

Rebate in Taxes for Wide Tires.

The Council of Hammonton, N. J., has passed an ordinance allowing a rebate of $1 in taxes for each wheel on a wagon having a tire four inches or more in width.

Sales to noon, 130,300.

Messrs. E. M. Toussett & Co. have received the following:

Liverpool, opening, wheat quiet, 3-8 d lower; corn, easy, 1-8 d lower.

Forecast of the Chicago weather bureau returned to Chicago and the following special features: There will be no killing frosts over any section of the middle west to-night. There will be light frosts in Iowa, north Missouri, Illinois and possibly Indiana. The temperature is rising all over the Missouri valley.

Cloudy over Ohio and Michigan will probably save that district even light frosts.

Chicago—hogs, market opened lower than yesterday's average; left over, 6,000; light 4.57-5.50; at 6.10, heavy 5.35-6.00; cattle slow; sheep strong.

Waldorf notes—It must be confessed that to-day's stock market was the most disappointing in the week. With crops better than expected and corn crop good, and in the face of rumors that Secretary Shaw will largely increase at an early date government deposits in national banks, it was expected that stocks would get a substantial recovery, but these encouraging features according to the opinions expressed to-night were contradicted by the weakness in the U.S.S. stocks, velopments which moved the bear contingent, led by H. G. Well, to make a raid.

Despite denials J. D. Rockfeller, Wm. Rockfeller, H. H. Rogers and other Standard Oil magnates have bought heavily into local tractions; there is manifest belief that this element acquired huge interest. It is stated on good authority that in the semi panic last August J. D. Rockfeller bought many thousands of shares of net security from Mr. Whitney on private terms.

New York,—The action of the billet pool in maintaining the selling price of steel billets should have a favourable influence and there is nothing in the developments over night to depress the market. Bearish interest is very large. But the technical position of the market justifies sales on every moderate rally. We look for lower prices for B.R.T., Rr. and some of the industrials, but do not advise the sale of sugar or copper at present. Foreign news this morning is encouraging.—Town Topics.

Liverpool close, 3-4 lower; corn 7-8 lower.

It is reported on good authority that King Peter, the new king of Servia, has been assassinated.

St. Louis—Movement continues good; wheat, from south-west and west principally of hard winter, but it is small from other sections where fall plowing was being delayed by dry weather.

YOUNG'S POINT.

(From our own Correspondent.)

The C.O.F. number 427, of Selwyn, held their excursion this year to Bobcaygeon, on Tuesday, the 15th. Quite a number of the members from the Point attended and everyone voted to having had a pleasant time. The steamer Majestic was engaged for the trip.

Mr. P. P. Young, the proprietor of the Majestic, is building a large scow here. The dimensions are 117 feet long by 26 feet wide. It will be one of the largest and best scows on the Kawartha Lakes.

Mr. E. Young, who is looking after the iron bridge here, had it re-planked last week. Mr. Young had five-inch cedar put on the bridge this time, which should wear a number of years longer than the ordinary plank, which was formerly used.

The following guests are registered at the Lakeview House: Mr. C. C. Gutterson, Peterborough, Mr. and Mrs. Chas. Block, Master F. Block, Mr. and Mrs. Aspenleiter, Miss I. Aspenleiter, Rochester; Mr. and Mrs C. F. Meyer, Mrs. G. Rau, Miss B. Phelan, Montreal; Mr. Chas. H. Clark, Mr. Wm. S. Castleman, Rochester; Mr. and Mrs. F. R. Downs, Medina, N.Y.

THE LATEST NEWS OF LOCAL SPORT.

Rugby Meeting in Council Chamber To-night.

Interesting Items Relating to Turf Club —Excelsiors Lost at Lindsay.

RUGBY.

TO-NIGHT'S MEETING.

A mass meeting of all those interested in Rugby will be held to-night in the Council Chamber at 8.15, when matters of interest to all lovers of the game will be discussed. It is hoped that there will be a large attendance.

HOW TO WIN THE GAMES.

A local expert furnishes the following:—

The play can be summed up in two points: keep possession of the ball, and make ground. During the game each side has possession of the ball a certain number of times, and if it can be retained that side is sure to win. If care is taken in the training good results are sure to follow. Several points should be kept in mind. First, train the players to remain on side of the six wing men motionless on the line until the ball is put in play. A second breach of this rule in the same down and any subsequent breach during the game by the same side, gives possession of the ball to the opponents. A little careful training will avoid this. This can be overcome by the wings standing back a foot or two behind the line of scrimmage and not making any attempt to move. The wings not in possession of the ball are allowed to move, but not across the line. Second, accurate passing and catching are essential; a fumble on the part of the quarter or halves means a loss of yards, if not of possession of the ball. The snapper back should practice a great deal with the quarter, and the quarter with the halves, and the halves with one another, until they are able to catch and pass accurately and without a second's delay. Third, the players should be in first class condition. Endurance, especially on the part of the half backs, is going to be a telling feature in the game. Fourth. The wings and halves should be good tacklers. The style of play will necessarily be to feed the halves and let them run. Kicking will not be employed as much, unless ten yards cannot be made in three draws. The result will be that every time there is a scrimmage a tackle will follow. No better way to develop strength and wind can be had than by practicising running the halves through the wing line and have the wings tackle them. This will develop skill in dodging and tackling, precisely what is required in a game.—Com.

JUNIOR CITY LEAGUE.

A meeting will be held in the Y.M.C.A. rooms on Monday afternoon next at 4.15 for the purpose of arranging a junior series. It is understood that teams will be entered from the Rough Riders, T.A.S., St. John's and All Saint's. Each club wishing to enter is invited to send two representatives to the meeting. Suitable trophies will likely be given to the members of the team winning the series.

• • • •

A meeting of the City League Executive will be held in the Y.M.C.A. parlours to-morrow evening at 8 p. m. All interested in rugby are invited to attend.

• • • •

St. John's choir boys will practice on their grounds, west end, to-morrow afternoon at half past three.

• • • •

The members of the Britannia Rugby team will note that owing to the grounds being engaged for a portion of to-morrow afternoon, they will be unable to secure them for practice until five o'clock. All the players are asked to turn out.

BASEBALL.

The Excelsiors went to Lindsay yesterday, and played a game with the home team on wet, slippery grounds, losing to the Clippers in a score of 3—1. The day was a miserable one for the game, and the crowd of spectators was small. The condition of the grounds not being conducive to fast playing the game was devoid of any sensational features, while the Excelsiors seemed to suffer rather more from the condition of the grounds than the Clippers. Flaherty pitched his usual effective game, striking out 12 of the opponent's men, while Miller for the Clippers succeeded in making only 6. Excelsiors fan the air. Had Flaherty received the support which Miller did there would have been a different story to tell. The visitors also had the misfortune to have more men left on bases than did the home team. The feature of the game was a double play made unassisted, by Pilling.

Both pitchers were in splendid form. Miller allowed but 2 hits, while Flaherty was touched up for three.

The score by innings is as follows:

	R.	H.	E.
Excelsiors ... ...000100000—	1	2	6
Clippers ... ...000000210—	3	3	2

Batteries—Flaherty and Bellegham; Miller and Cinnamon. Umpire—Walters.

Struck out by Flaherty, 12; by Miller, 6. Base on balls, by Miller 3.

• • • •

A game between the Excelsiors of town, and the Clippers of Lindsay, will be played at the latter town probably on Saturday, September 26, for a cup valued at $50. It is proposed to run an excursion from here to Lindsay on the day of the game.

LACROSSE.

At Hanover yesterday, Durham defeated Southampton in a junior C.L.A. semi-final game by a score of 10—1. This will bring Durham and Elora into the finals for the championship.

• • • •

Fergus and Copper Clift crossed sticks at Orillia yesterday in an intermediate C.L.A. semi-final game, Fergus winning from the Nickel Town by a score of 5—3. Fergus and Seaforth will now fight it out for the championship.

TURF.

Mr. Johnston, veterinary surgeon, of Peterborough, passed through today to Woodville with his two trotting horses, "Keep-a-Bell" and "Blucher." He will compete in the free-for-all race.—Lindsay Post.

• • • •

Three horses arrived to-day from Stouffville and have been quartered at the Turf Club's track. They will start in some of the racing events arranged for the Peterborough Industrial Fair. They are:—"Hal. Forest," owned by Oliver Forsythe; and has a mark of 2.19 1-4 made on the track here in the fall meet of 1902; "Rob Roy" and "Red Pat," both owned by Mr. Martin, of Stouffville.

• • • •

"Blucher" is now the property of Mr. Martin Connors, of town, he having purchased the horse from R. H. Smith, of Toronto. Mr. Connors and Dr. Johnston are now at the Woodville races with "Blucher" and "Keep-a-Bell."

• • • •

"Happy Paddy" has been sold to Dr. Archer, by Mr. Geo. Graham.

"Prince Hal., Jr." and "Black Mac," both owned in Keene, are now at the track in training for the stallion race to be held on Wednesday, Sept. 23rd. The latter has a mark of 2.19 1-4.

• • • •

John Clancy's "Lapidist," the other day stepped a mile in 2.30 at the Turf Club's track. He also will be a starter in the stallion race.

• • • •

Mrs. Geo. Slowson, of Colman, York County, has entered two horses for the running race to be held on the second day of the fair.

• • • •

A likely looking colt, owned by Mr. John Kenny, of Bobcaygeon, is now in training at the track and will probably start in some of the events. He is a full brother of the great "Freeborn."

• • • •

Pat Clinan is getting "Cheat 'Em" in shape for the hurdle race on the first day of the fair. He is jumping well and should give a good account of himself.

MISCELLANEOUS.

C. G. E. FIELD DAY.

The Canadian General Electric Company's Benefit Society will hold a field day of sports on Saturday, September 19th, at the Murray street grounds, and the event promises to be one of unusual interest, by reason of the programme arranged, which will include a full list of popular events. The proposal had been made to run an excursion during this month, but it has been thought advisable to hold a field day of sports instead.

The first event will be a football match between the Auburns and C. G.E., commencing at 1.30 p.m. This will be followed by a baseball game in which the opposing teams will be those representing Lindsay and Peterborough. This game will be called at three o'clock, and will doubtless be one of considerable interest, because of the rivalry which all season has existed between these teams.

The following miscellaneous programme will then be run off:

100 yards foot race, shop.
220 yards foot race, open.
Race around the baseball diamond against time.
Broad jump.
Running broad jump.
Running high jump.
Running hop, step and jump.
Fat men's race.
Married men's race.
Boys' race, shop.
Girls' race, open.

A special feature will be a matched 100 yards race between Fred Derocher and Percy White.

For all the above valuable prizes are being offered, which will, no doubt, induce a large list of entries.

The admission fee has been placed very low, 15 cents for gentlemen and 10 cents for ladies, and as the object of the event is to help reduce the deficit in the funds of the society, it should be well patronized.

FATE OF QUEEN'S COLLEGE HANGS IN THE BALANCE.

Unless Presbyterians Come to the Rescue, It Will Have to Separate From the Church.

Kingston, Sept. 16.—Shall Queen's University be nationalised or retained by the Presbyterian Church, as it has been since its foundation, is being discussed by a committee of the General Assembly and Queen's trustees in Association Hall. The gathering convened at 4 o'clock yesterday. Rev. Dr. Fletcher, moderator of the General Assembly, presided, and Rev. Dr. Campbell was made secretary. It was decided to have the meeting open.

Principal Gordon, of Queen's outlined the situation, and said that nationalization was desired, as the Church to-day, as at the time of union, was not willing to assume the responsibility of the support of the university. He spoke of the university's relation to her ever-increasing graduates and to the Ontario Government. The question is: "Shall the relation of Queen's to the Church—her mother—be made more real than it has been, or shall the university look to her sons and daughters for support?"

Rev. Dr. Armstrong, Rev. Dr. Lyle, Rev. John Neil, all favoured retaintaining Queen's and loyally supporting her.

David Marrice did not want Queen's made a scheme of the Church.

Rev. Dr. Milligan said Principal Grant favoured church connection, and his step towards separation was regretfully taken. Whether Queen's separates or not, the speaker was glad to see the General Assembly coming back to her first love.

The evening discussion was along the line of church loyalty to Queen's. Dr. Warden declared that $1,000,000 could be raised to endow Queen's, but it must come chiefly from Ontario, as the far West or the Maritime Provinces could not give much aid.

Dr. Gordon stated that in his opinion there was more hope of endowment from the Presbyterian community than from other sources.

Rev. Prof. Bryce, of Winnipeg, said there was a most friendly feeling in the West towards Queen's, and the West would do its share in supporting it financially.

Mr. J. K. MacDonald, Toronto, advocated letting the university continue in its present position and appealing to the liberality of the Presbyterian community.

Rev. John MacKie, Kingston, declared that to bring the university into closer relation with the church would not be to narrow it.

You will see a pleased expression on the face of the man who wears "Jooke Shirts" He knows he has the best. They Fit well, Wear well, Look well.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Bergos, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 45c.

300 Pairs Men's, Ladies' and Children's Boots, all new goods, from 15c Pair up.

Oilcloth, 1¼ yards wide, regular 35c, for 23c

100 Chatelaine and Wrist Bags, in leather and fancy beads, regular 50c. to $2.00, for 25c

124 Ladies' and Gentlemen's Rainproof and Raglan Coats, up-to-date styles, regular $5.00 to $14.00, for, from $2.75 to $8.00

Men's Blue Serge and Tweed Suits, regular $8 and $10, for from $4.50 to $5.50

Job Lot of Boys' Moleskin Knickers, for ages 5 to 12, regular 50c. for 15c

Men's Worsted, Tweed and Serge Vests, regular $1.00 to $2.00, for 74c

44 dozen Ladies' Wrappers, Night Gowns and Drawers, made from new fall materials and new styles. Sold elsewhere for from 40c to $2.00, yours at 25c to $1.00

45 dozen Black Silk Spool Thread (only 2 to one customer) regular 5c, for 2c

Piles of New Fall Underwear, Hosiery, Boots and Shoes and hundreds of other great bargains too numerous to mention.

Good chance for peddlers and small storekeepers to stock up.

SOO WORKS CLOSED

Three Thousand Five Hundred Men Out of Employment.

THE OFFICIAL STATEMENT.

An Army of Unemployed Produces General Feeling of Uneasiness in View of Approaching Winter—How Business Men Will Be Affected—Patience Counselled—Hope For Dawn of Better Times.

Sault Ste. Marie, Ont., Sept. 19.—All of the operations of the Consolidated Lake Superior Company were closed down last night, and the great industries are silent for the first time in six years. The various plants are in charge of watchmen, and the town is filled with the unemployed. There is a general feeling of uneasiness among the citizens, who dread the inevitable approach of an extremely hard winter, combined with the more immediate danger of what may happen when the three thousand dismissed employees of the company are assembled in town, within the next day or two, unable to get their overdue wages. The town is ill-prepared for an emergency of this kind, and it is to be hoped that money will be forthcoming very soon to pay these men off.

Business Men Concerned.

The business men of the town are deeply concerned over the situation, as they realize that while the ultimate outcome of these prolonged difficulties at the works will be beneficial to the place, inasmuch as the industries of the consolidated companies will be put upon a much more substantial basis, they also feel that many will suffer meanwhile, as it will be necessary to conduct their affairs upon a strictly cash line.

Situation Not Hopeless.

The situation, so far as the town is concerned, is by no means hopeless. In fact the contrary view is taken by many who have regarded reorganization as inevitable for two or three years past. It is confidently believed by the people that if the business men can tide over the winter months the spring will bring brighter prospects than have ever been experienced in the past. It is most irrational to believe that these magnificent industries, with their great earning possibilities, can long remain idle.

Sympathy For President Shields.

Much sympathy is felt for President Shields, who has spent the past three months in an heroic effort to work out a solution of this difficulty, but whose lack of success has been almost solely due to the unprecedented depression in the money markets.

OFFICIAL STATEMENT.

3,500 Men Are Thrown Out of Employment by Shut Down.

The following, issued by Manager Coyne, explains the situation. Apparently, Spencer & Company have decided to take proceedings to foreclose their mortgage, and the shutting down of the plants is the first step:

"President Shields, on account of not having funds to meet pay roll and current accounts, and no immediate prospects of securing money to meet them, is unwilling to proceed longer incurring liabilities on account of its officers, men or other creditors, and, in consequence, to-day have suspended all operations whatsoever, except the Tagona Water & Light Company and Street Railway service in the Canadian Soo, and the ferry service and the street railway service in the American Soo. Shall run but one train per week on the Algoma Central Railway between the Soo and end of steel, or about 60 miles."

All Are Idle.

"The Helen ore mine, employing 300 men; the Grace Gold Mine, employing 70 men; the Michipicoten branch of the railway, employing 50 men; the veneer mill at Soo, Ont., employing 75 men; the sawmill at Soo, Ont., employing 100 men; the car shops at Soo, Ont., employing 20 men; the Algoma Iron Works at Soo, Ont., employing 100 men; the Sulphite pulp mill at Soo, Ont., employing 100 men; the ground wood pulp mill at Soo, Ont., employing 100 men; the Gertrude Nickel Mine at Sudbury, Ont., employing 80 men; the reduction works at Soo, Ont., employing 40 men; the paper mill at Soo, Mich., employing 20 men; the Michigan Lake Superior Power Company at Soo, Mich., employing 50 men; the pine veneer log pulp, log, charcoal operations along line Algoma Central Railway, employing 1,700 men, the retort plant at Soo, Ont., employing 90 men; and the Algoma steel plant at Soo, Ont., employing 150 men, will be absolutely closed down to-day, leaving at each operation simply one caretaker in the daytime and two watchment at night to protect the property.

"The general office staff and the Algoma Central main line staff will be reduced proportionally, the probabilities being that not more than 15 of the entire staff of 90 men will be retained.

Patience Counselled.

"It is with deep regret this announcement is made, but it is the only alternative. For the past 90 days everything that human intelligence could suggest or tireless energy compass has been done to raise funds to finance this immense magnificent property, but without avail. The hardships that this will bring upon many officers and employes must be borne patiently as possible, trusting that the future may bring about a happy solution and settlement of all difficulties.

"Above all else, I must ask you to remember that we are all law-abiding citizens, and that our misfortunes, while hard to bear, are not likely to continue forever, and are not as hard as our ancestors, or even our fellow citizens have borne and come through triumphantly.

"The company's loss on account of this necessary shut-down will be almost irretrievable, for the reason that no pulp-wood, sawlogs or veneer logs will be available to run the pulp mills, saw mills, or veneer mills next year."

MANUFACTURERS CLOSE.

Canadian Association Winds Up Its Business For the Year—Want a Tariff Commission—The New Officers.

Toronto, Sept. 19.—The business of the annual convention of the Canadian Manufacturers' Association was concluded yesterday morning. In the afternoon the visiting delegates had a drive around the city, and in the evening the annual banquet of the Association was held. About 160 of the delegates are going on a trip to the Pacific coast, and will leave to-day.

The most important business of the morning was the passage of the report of the Tariff Committee. The Association placed itself in decided opposition to reciprocity with the United States, skirted the question of Imperial preferential trade, and declared strongly in favor of a tariff commission of a thoroughly independent character. The latter proposal was the only one which called for any detailed discussion, and this was all along the lines of how the tariff could best be kept out of politics. A resolution by the woollen section, said to be inimical to the British preference, was not discussed. The labor question was the other momentous matter dealt with by the convention. The Association seemed a unit in resistance to the more aggressive elements of organized labor and resolved to protect the interests of what is termed "free labor."

The election of officers resulted as follows: President, George E. Drummond, Montreal; First vice-president, W. K. George, Toronto; Ontario vice-president, H. Cockshutt, Brantford; Quebec vice-president, Hon. J. D. Rolland, Montreal; N. S. vice-president, D. W. Robb, Halifax; B. C. vice-president, John Hendry, Vancouver; Manitoba vice-president, E. L. Drury, Winnipeg; N.W.T. vice-president, W. S. Fisher, Calgary; treasurer, George Booth, Toronto.

The Annual Banquet.

In the evening a banquet was held at the King Edward hotel. There were 200 covers. Hon. Geo. E. Drummond occupied the chair, and during the evening delivered his inaugural address as the new President. Other speakers were Lieut.-Gov. Clark, Mr. C. A. Birge, Sir Wm. Mulock, Premier Ross, Hon. Wm. Paterson, Mr. W. K. George, Mr. A. Robert Munro, Mr. W. K. McNaught, Hon. Thos. A. Brassey, M.P., and Mayor Urquhart. Imperial trade was the keynote of the speeches, and great cheering greeted a reply telegram from Hon. Joseph Chamberlain, who regretted he would not be able to visit Canada this year.

NEARLY COMPLETE.

Only Three Counties Remain in the Readjustment of the Constituencies—Petitions Against G.T.P.

Ottawa, Sept. 19.—There are only three counties remaining undisposed of, which announcement by the Premier indicated that the redistribution bill has practically received the endorsement of the House. The assertion was made just before the adjournment last night, and was a welcome conclusion to a week's hard work. The principal topic of debate yesterday was the redistribution of Toronto, which occupied the whole of the morning session and a large part of the afternoon sitting. Mr. Brock made an attack upon the Minister of Public Works, whom he blamed for having manipulated the measure for party advantage. A dignified retort by Mr. Sutherland was followed by a vigorous speech by Mr. Arch. Campbell who recalled Mr. Brock's denunciation of the Liberals as "hypocrites," and his characterization of the Toronto trades unionists as "rioters, deceivers and men who shoot from behind hedges," as evidence of the generally extravagant character of Mr. Brock's language.

Petitions Against the G. T. P.

The reign of the petition was resumed when the House opened yesterday morning, for no less than ten members of the Opposition presented petitions asking that the Grand Trunk Pacific Railway bill be laid over until full and accurate information shall have been obtained and laid before Parliament. The petitions were all printed, and of a uniform style. They were presented by the following members: Messrs. Sproule, Clancy, Cargill, Henderson, Birkett, Fowler, Porter, T. I. Thomson, Wilson and Blain.

Hon. Mr. Fitzpatrick introduced a bill to provide for the additional representation in the Senate of two Senators for Manitoba, making four in all. With the recent rapid increase in population, he said, this would give about the same unit of population as existed for Senators in Ontario.

Mr. Fitzpatrick also introduced a bill to provide that two Judges shall constitute a quorum in the regular Supreme Court.

After a Family Quarrel.

Toronto, Sept. 19.—Mrs. Louise Woodgate, after a family quarrel last night, rose in the night and, after writing a note to her husband, took rough-on-rats from which she died.

Goodeve Provincial Secretary.

Vancouver, B.C., Sept. 19.—Ex-Mayor Goodeve, Rossland, and Conservative candidate in the coming election, was sworn in yesterday morning as Provincial Secretary.

REORGANIZATION OF RUGBY CLUB.

Was Effected Last Night at a Mass Meeting.

IN INTERMEDIATE SERIES.

New Officers Elected and Club Starts with Good Prospects—Support of Citizens will be Forthcoming—Players are Enthusiastic over Outlook.

"Intermediate Championship, 1903." This is the motto of the newly re-organized Rugby Club, and, with the material from which to select a team, it should not be difficult to win the cup, which has already been captured two years in succession, and thus make it the permanent property of the club.

A meeting which was well attended and enthusiastic, was held last night in the council chamber, the object being to devise ways and means of effecting a resuscitation of the disbanded Rugby Club. There are many lovers of this game outside those numbered in the ranks of players, and it had been felt that it would indeed be a serious setback to the game, should the season be allowed to pass without a Senior or Intermediate team representing the town, being placed in the O.R.F.U., and at the request of a number of the business men the meeting last night was called. Previous to the meeting some of those interested had waited upon many of the merchants with a view of ascertaining whether there would be any financial assistance forthcoming should the team decide to re-organize, and the result of this was most satisfactory, and it was made evident that the great majority of the business men in town were prepared to support liberally a Rugby team.

The meeting last night was attended by a number of the business men as well as players, and a pleasing spirit of harmony prevailed, which augurs well for the success of the team.

On motion of Mr. W. Crowley, Mr. E. S. Clarry, who has rendered efficient services in the past as secretary-treasurer of the Rugby Club, was voted to the chair, and Mr. C. G. Graham was elected secretary of the meeting.

Mr. Clarry, in explaining the object of the meeting, said that all lovers of the game had learned with regret that it had been thought impracticable to place a team in the Senior Series of the O.R.F.U., and the disbandment of the team as a consequence of this decision, had been considered a severe blow to the game. In speaking with a number of citizens it had been learned that the feeling was general among them that a team should be placed in the field, and that they were willing to support such a team. Mr. Clarry then read letters from D. Walker, President of the Town Rugby League Mr. Kenner, L. Potvin and others, in each of which regret was expressed that the writer was unable to be present at the meeting, and promising support should a team be re-organized. The chairman then called upon Mr. Hollingshead to express his views upon the advisability of trying to effect a re-organization. Mr. Hollingshead said that he knew the feeling of the players and many of the business men was that a team should be placed in the O.R.F.U., and that if such were done financial support would not be lacking. He thought it would be a pity not to have Peterborough represented in Rugby circles this year, as he felt confident there was sufficient material here to win the Intermediate championship, and while he felt it might be impossible to finance a Senior Team, with the number of long trips which it would have to make, an Intermediate team could quite easily be conducted, as the only teams entered in the Intermediate series were three Toronto teams.

Mr. W. Crowley followed, speaking along the same lines. He also felt that it would be comparatively easy to place a team in the field which would make a good showing in the Intermediate series. The team at present was out of debt and could start with a clean slate.

Messrs. E. Dillon, A. Noble and F. Bradburn each spoke along the same lines, and counselled organising an intermediate team instead of a senior.

Mr. J. M. Brooks then asked as to the probable amount of money required to place an intermediate team in the union, and, on being told that it would require $200, expressed his belief that it could be easily raised. He felt certain that all the business men in town would be willing to help the boys. He suggested that the most satisfactory way to raise the necessary amount would be by selling tickets. The Turf Club had found this the best method and was willing to help the team himself, as he knew the business men generally, were. Messrs. R. J. Munro and A. Rountree, of the Turf Club also expressed their views in similar terms, offering the team the support of the Turf Club. As a sequence to this discussion Mr. W. Crowley moved, seconded by Mr. R. Thornton, that the club be re-organized. This motion was enthusiastically supported. The election of officers was then proceeded with and resulted as follows:

Hon. President—Mr. R. A. Morrow.
President—Mr. E. S. Clarry.
1st Vice-President—Mr. W. Crowley.
2nd Vice-President—Mr. F. E. Clarke.
Secretary-Treasurer — Mr. C. G. Graham.
Captain—Mr. W. Crowley.
Committee of Management — Messrs. J. M. Brooks, E. Dillon, A. A. Hollingshead, Pascoe and A. Noble.

The membership fee was placed at one dollar and it was also decided to make application to the O.R.F.U. for admission to the intermediate series.

The re-organized club start out with excellent prospects, with a good set of officers, thoroughly energetic, and the support of the citizens. It is felt that a winning team will represent Peterborough this year, as in the past. The first practice was held at Nicholls Oval this afternoon when many of the old players and some new ones were out. An effort will be made to have a scheduled game here for Thanksgiving Day.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron went aking a stoll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

Y. W. C. A. Anniversary.

The Anniversary services in connection with the Y.W.C.A. will be held on Sunday, Sept. 27th, at 4.15 p.m., while the formal opening will take place on Tuesday, Sept. 29th, at 8 o'clock. Under the new secretary, Miss Lough, the Association opens the new season with excellent prospects for a successful work.

A little Sunlight Soap will clean cut glass and other articles until they shine and sparkle. Sunlight Soap will wash other things than clothes.

Fall and Fair Time

.. AT ..

HLeBRUN & CO'S

Great preparations have been made at the City Clothing Store for a rousing trade as Fair time approaches. Never have we had so extensive and varied a Stock of New Fall and Winter Clothing, in Ready-to-wear Suits and Overcoats, Hats and Furnishings for men and boys.

READY-TO-WEAR DEPT.

Our display of MEN'S FALL SUITS and TOP COATS is a credit to the town. No store can boast of higher styles—no better values anywhere.

OUR NEW FALL SUITS FOR YOUTHS and BOYS reflect great credit on the makers. Natty styles at low prices.

TAILORING DEPT.

In our Custom Department we are making up to order the newest styles of Suits and Overcoats for all occasions. Our heavy stock of Scotch, English and Canadian Cloths cannot be equalled, and gives you choice of many patterns at many prices.

UNDERWEAR.

It's just "up to you" now to buy heavier Underwear and Hosiery. We are stocked with the most reliable grades, Scotch Wool, Natural Wool, Fleece-lined, Wool Fleece, etc., in Shirts and Drawers—all sizes, all qualities, all prices. Make your money travel far by leaving your orders for Fall at the City Clothing Store.

TWO ENTRANCES—George and Hunter Streets.

SATURDAY, SEPTEMBER 19, 1903.

THE TWO FACTIONS OF CONSERVATIVES.

Disgruntled Section Propose Mass Meeting With Tarte and Gamey.

WHERE ARE THOSE FUNDS?

Robt. Birmingham Trying to Discover Where big Sums of Money Vanished to.

(Toronto Star.)

New headquarters for a wing of the Conservative party are now established on Queen street west, Toronto, not far from the shadow of the City Hall. The active spirits who assemble there will shortly arrange for a series of Ontario political gatherings to be addressed by Hon. J. Israel Tarte, M.P., R. R. Gamey, M.P.P., and others. This combination or new organization is composed of the shattered fragments of the old P. P. A. body, and its members are determined to smash things generally. They are not in hearty sympathy with Robert Birmingham, who was for many years the chief organizer of the Conservative party, but was obliged to seek for a time a less open mode of warfare. His friends never forgot the slight cast upon him, and a few months ago, when he was given full charge of North Renfrew, there was a flutter in the dovecotes on King street, Toronto. Those who welcomed his return to active work said that the party would no longer be managed by:

"The St. Johns, the Wrights, and the Mabees;
The Nesbitts, the Leavitts, and the Gameys."

Birmingham's success has not yet been complete; those who welcome his return to the party management assert that he must devote his attention to showing up what became of the enormous funds collected for the elections and protests in 1898 and 1902. The funds then collected were to achieve wonders, and Mr. Whitney was so misled that time and time again he proclaimed that victory was just within his grasp. The candidates and workers in the ridings wanted to know where the funds went, but Mr. Whitney's advisers urged him to shout "victory is at hand." Victory did not come, but the funds vanished, and the candidates got no explanation of the hundreds of thousands of dollars obtained from stock brokers, candidates, and others.

TO DISPLACE ONE FACTION.

To keep the restive spirits from demanding to know the whereabouts of the money, Mr. Whitney was advised to shout that the Grits were corrupt, and he played nicely into the hands of those who did not wish to account for the funds. Birmingham will, therefore, have no peace unless he gets for the great body of Conservatives some satisfactory explanation of the funds, although during those "fat times" he had not control of the party management. Now, however, that the persons who for a time placed him aside are disposed of in rhyme, he will either confidentially get some statement regarding the funds so sumptuously absorbed or get a new batch of men to handle the protests and the funds, which seem to be had for the asking. Mr. Whitney may still cling to the advice of his "eminent political talent," but the Conservative members of the House of Commons show no inclination to approve of this. They did not come up in force to cheer Gamey at the Island picnic, and very few came from outside ridings to join in the loud acclaim to Gamey and the dispensers of the protest funds. The annual meeting of the Dr. Beattie Nesbitt-Whitney organization was attended by few indeed from outside the city, and Conservative Dominion election workers were conspicuous by their absence. With Birmingham, as riding organizer and chief of the forces in the constituencies, aided by Samuel Barker, M.P., Hamilton, and Andrew Broder, M.P., Morrisburg, as Parliamentary organizers, directing his movements, there is not much chance for the late Nesbitt-Whitney organizations:

"The St. Johns, the Wrights, and the Mabees;
The Nesbitts, the Leavitts, and the Gameys."

Those who have established the new headquarters fully realize this, and they are confident that they can start the "ball a-rolling" by a monster mass meeting, to be held in Massey Hall, to be addressed by Hon. Mr. Tarte, R. R. Gamey, M.P.P., and other leaders. Combinations will be made out of all sorts of elements, and the old adage, "Politics makes strange bed-fellows," will be fully exemplified. Funds will be forthcoming for the new wing know the names of those who in 1900 subscribed a fund to get election workers from Buffalo, New York, Brooklyn and other foreign cities, to manipulate on behalf of Sir Charles Tupper in Ontario. They also know the names of those who furnished the funds to import foreigners to work against Premier Ross in 1902. Birmingham has many elements to handle, but it will be difficult for him to boom R. L. Borden, M.P., the Dominion Conservative leader, in face of the action taken by the real leaders in Ontario, but with the guidance of Messrs. Barker and Broder and the experience of Hon. J. G. Haggart, Hon. Dr. W. H. Montague, Lt.-Col. Sam Hughes and others, he ought to succeed in keeping at bay Dr. Beattie Nesbitt and the Tupper faction, who have shown no inclination to help Mr R. L. Borden in his struggle to get the Opposition forces to unite on at least one sensible proposition. They simply stand aside and wait.

SKIN DISASESE.

Invariably due to Poor and Watery Blood.

Pimples, Blotches, Boils and Ugly Rashes Easily Cleared From the Blood.

From the Advocate, Exeter, Ont.

All diseases of the skin and complexion are caused by bad blood. Paleness and pimples, blotches and boils, ugly rashes and open sores, itching eczema and burning erysipelas—all these blemishes come from—bad blood. A bad skin is a sure sign of bad blood, thin blood, watery blood, blood poisoned with impurities. You can't have a healthy, clear skin till you make your blood pure and rich with Dr. Williams' Pink Pills. These pills are a sure and speedy cure for all skin diseases, for agonizing eczema or bothersome little pimples—for a bad complexion or ugly open sores. No claim is ever made for Dr. Williams' Pink Pills not backed by the most positive proof, and in this connection we offer the testimonial of Mrs. Nicholas McAvoy, a life-long, much-respected resident of Exeter, Ont. To a reporter of the Advocate Mrs. McAvoy said: "Some years ago I was taken with a slight itching under one of my arms. I gave it little attention at first thinking it would pass away, but in this I was mistaken for as time went on it became worse and soon developed into an aggravated case of eczema, causing a great deal of pain, irritation and suffering. In fact I was compelled to endure tortures. I consulted a doctor and took his medicine for several months, but the trouble did not leave, neither did it get any better. In fact it took a turn for the worse and developed into scrofula. As the doctor's medicine did not help me I tried several advertised medicines, but with no better results. Finally a lady friend strongly urged me to try Dr. Williams' Pink Pills. The effect was almost magical. In a few weeks there was a decided change for the better, and as time went on the trouble gradually left and to-day I am entirely free from it. I owe my complete recovery—if not my life—to Dr. Williams' Pink Pills, a fact I wish to put on record that others may benefit as I have done."

There is absolutely no disease due to poor blood—and most diseases are due to this trouble—that Dr. Williams' Pink Pills will not cure. You can get these pills from any druggist or they will be sent post paid at 50c a box or six boxes for $2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont. Remember that substitutes cannot possibly cure.

ST. MARK'S—OTONABEE.

The Harvest Tea and Entertainment which is an annual event with the congregation of St. Mark's, Otonabee, will be held in the Foresters' Hall, Zion, on Friday, Sept. 18th. Tea will be served from 5 to 7.30. After the tea an entertainment consisting of songs, recitations, etc., will be given, in which the orchestra of Wilson Bros. will take part. Rev. W. R. Tandy, M.A., of Havelock, will be present to give an address. A 'bus will be at the post office corner, Peterborough, on Friday at 6.30, to convey people to Otonabee to attend the concert, for which conveyance 15 cents will be charged.

RIVER ROAD, OTONABEE.

The General Improvement Society held a business meeting in the union hall, on Monday evening, Sept. 14, to re-organize for the fall and winter months. Rev. J. G. Lewis acted as chairman for the evening and the following officers were elected:—

Honorary Presidents — Rev. Mr. Wilson, of St. Paul's and Rev. Mr. Lewis of the Mark street church.
President—Miss S. Kerr.
Vice-President — Clayton Hambidge.
Secretary — Will Hambidge.
Treasurer—Gordon Savigny.
Organist—Maud Stewart.

The first public meeting of the society will be held on Thursday, October 1st, when a good programme will be given, including addresses by Rev. Mr. Lewis and Rev. Mr. Wilson.

INJUNCTION ISSUED

Gurney Foundry Company and Labour Union.

Charge of Boycotting of Workmen, Contractors, Architects and Customeres in St. Catharines—Affidavit by C. H. Hoople.

The Gurney Foundry Co. applied for and obtained Thursday an injunction restraining moulders and other union men from continuing to boycott the goods of the company. In the affidavit attached to the application the company state that so keen has the boycott been in St. Catharines that the local agent of the company, Mr. A. E. Noble, had to resign his position. It is also charged that in addition to the boycotting, the defendants threatened and intimidated all agents or representatives of the company. It is further charged that the defendants intimidated and threatened the workmen, contractors and architects who were at work on buildings where the Gurney Company goods were used. The affidavit asserts that boycotting letters from Toronto and St. Catharines have been sent to all parts of Canada, thus hampering and injuring the company's trade. Customers who dealt with the Gurney Company were also threatened and intimidated. Among customers intimidated were Wood Bros., J. D. Tait, and Welstead. In the case of J. D. Tait, after an old boiler had been removed the labour organizations would not permit the Gurney Company to put in a new boiler, with the result that an American-made boiler was put in, and the plaintiffs lost the work.

Mr. C. H. Hoople, plumber and tinsmith of St. Catharines, also filed an affidavit, stating that the union had ordered him to cease using Gurney Company material, had threatened to boycott him if he refused, and had in various other ways harassed him in his business.

The defendants are: John A. McGlashan and P. O'Gorman, the president and secretary of the Plumbers' and Steamfitters' Union; William F. Harvey and W. E. Hall, who hold like offices in the Machinists' Union; Robert Shannon and Charles Welby of the Metal Polishers, Buffers' and Platers' Union; E. A. Day and William Chapman of the Building Section of the Trades and Labour Council; Thos. Wiley and Jas. Carty of the Carpenters' Union; J. W. Walsh, Jas. A. Wiley and J. D. Wright of the District Trades and Labour Councils of St. Catharines, where all the locals of these unions have their headquarters. The case will be called again on Thursday next.—Globe.

HAS MUNICIPAL SYSTEM.

Short Order in Which Street Railway was Built.

A despatch from London, Eng., says: Lowestoft corporation recently inaugurated its electric tram undertaking which has involved an outlay of some 80,000 pounds. Six and a half miles of track has been laid, and overhead equipment completed, within the short period of three months, the contractors having been stimulated to expedition by the offer of a bonus of 1,500 pounds. Four decorated cars made the first trip, conveying a party of invited guests. Starting from the tram depot the four cars made the trial run over the whole route, and then 150 guests were entertained to luncheon at the Grand Hotel by the contractors. The public service at once commenced, and the guests found fares in operation when they made a return trip after luncheon.—Montreal Herald.

Change Baby's Diet at Once.

The persistent and even regular feeding of babies with foods that lack the necessary nutritive elements of mothers' milk, and that tax the weak powers of digestion, will induce sickness and suffering. If your baby is not thriving change its diet at once. Give it Lactated Food, that delicious invigorating food that the baby relishes at the first feeding. Lactated Food has saved thousands of weak and sickly children in the past. Mrs. R. J. Kirk, Dungannon, Ont., says: "We have a baby six months old who was greatly benefitted by the use of Lactated Food. He was very thin and scarcely grew any till we commenced giving him Lactated Food; he now weighs 25 pounds and is very bright and lively." All druggists.

As It Is To-Day.

Famous Patient—Doctor, please give me my medicine now.

Doctor—Pardon me. I'm simply the doctor in charge of issuing bulletins; the other doctor will be here presently.

HOW THE BEST FARMERS PRACTICE UNDERDRAINING.

A Valuable Treatise on this Interesting Subject.

Bulletin from Agricultural Department Gives Suggestions—Some Important Points to be Considered.

In a previous article some of the advantages of under-draining were pointed out; in this case an outline of the method of draining practised by our best farmers will be given. To secure satisfactory results careful study should first of all be given to the best manner of laying out a system of drains the aim being to secure the greatest fall, the least outlay for tile the least amount of digging, and the most perfect drainage.

TILE.

For underdraining there is nothing better than the ordinary round drain tile. The size to be used can only be decided by a study of the conditions under which the drain is to work. They should be large enough to carry off in twenty-four to forty-eight hours the surplus water from the heaviest rains, but it is important that they should not be too large, as the cost of underdraining is governed largely by the size of the tile used. It may be mentioned tha the capacity of round pipes is in proportion to the squares of their diameters. That is, under the same conditions, a two-inch pipe will carry four times as much water, and a three inch pipe nine times as much as a one-inch pipe. In fact the larger pipe will carry even more than this proportion, because of the greater friction in the small pipe. In ordinary cases, five or six inch tile are recommended for the lower part of a main drain and four inch for the upper portion; for the branches two and a half to three inch are preferable.

DEPTH AND DISTANCE APART.

It is seldom necessary to lay drains more than four feet below the surface, and in most cases two and a half to three and a half feet will be found sufficient. The proper distance between branch drains depends on the quantity of water to be carried off and the nature of the subsoil. In general practice the lines of tile are usually placed from fifty to one hundred feet apart. In a tenacious clay soil, however, thirty feet would not be too close.

DIGGING THE DRAIN

The drain may be opened up in the first place by passing three or four times along the same track with an ordinary plow. In this way the earth may be loosened to a depth of two feet or more and thrown out with narrow shovels. The bottom of the drain should be dug with narrow draining spades made for the purpose. The ditch should be kept straight by means of a line stretched tight near the ground and about four inches back from the edge. In ordinary cases the ditch need not be more than a foot wide at the top and four to six inches at the bottom, the width, of course increasing in proportion to the depth of the drain and the size of the tile.

GRADING.

As a rule drains should be given as much fall as possible, and the gradient should not be less than two inches in one hundred feet if this can be secured. Careful leveling is necessary to ensure a uniform fall throughout the course of a drain. As a simple method for this purpose, one of our leading authorities recommends the ditcher to use several cross heads made from strips of one-inch boards, three or four inches wide. The length of the standards varies according to the depth of the drain. A cross piece about two feet long is nailed on the top of the standard. These cross-heads are then placed along the line of the ditch so that the cross-pieces are in line. The proper grade is ascertained by the ordinary spirit level. When ready to lay the tile a standard should be set at the bottom of the drain and marked in line with the tops of the cross-heads; this will, by testing every few feet, give a true grade for the tiles.

LAYING THE TILE.

When the bottom of the drain has been brought to the proper size and shape, the tile should be laid very carefully to secure perfectly close joints. With the aid of a tile hook they may be placed rapidly and accurately without getting into the ditch. Some prefer to place the tile with the hand, standing in the ditch and stepping carefully on each tile as laid. In covering it is preferable to put the surface soil next the tiles, for if properly packed, it will prevent the sub-soil from getting in at the joints. The laying should begin at the outlet of the main drain, and where connection is made with branch lines enough of the branch should be laid to permit the main to be partly filled in.

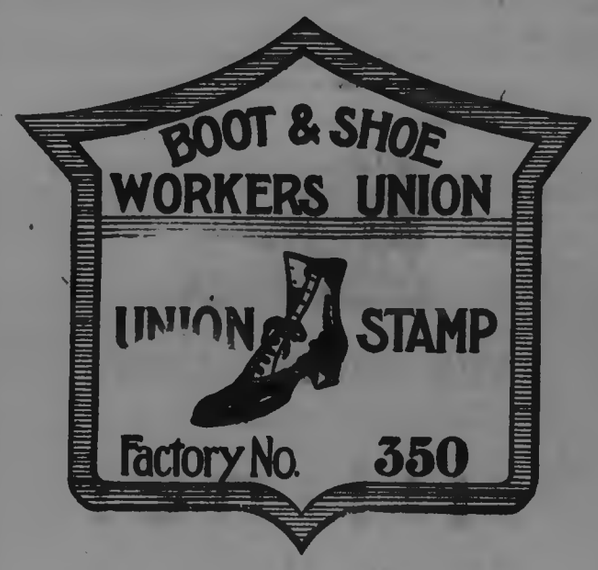
JUNCTIONS AND OUTLETS.

All junctions and branches with the main line should be made at an acute angle, or where the fall is sufficient, from above the axis of the main. This is necessary in order to prevent the deposit of silt and the consequent blocking of the tile at the junction. Specially made joint tile may be used, or the connection may be made by cutting a hole in the main tile with a tile pick. The outlet of the drain should be so placed that there will be a free flow of water. If protected with masonry and a grating to keep out animals so much the better. In this country glazed sewer pipe or glazed drain tile may be used to advantage for the last ten or fifteen feet to prevent injury by frost. In closing it may be well to recall the fact that trees should not be allowed to grow near a line of tile, through which water flows during the greater part of the year, as the roots are apt to enter at the joints in search of water, and in course of time close the drain. Willows, poplars and elms are particularly objectionable in this respect.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

Why the "Slater Shoe" Is now a Union Shoe.



The "Slater Shoe" factory has always paid the highest wages in Canada, because the class of men employed could demand such wages irrespective of Union backing.

Also, the "Slater Shoe" factory has always been up to Union standards in lighting, ventilation and sanitary arrangements.

But even these highly favorable conditions cannot secure from inefficiently organized labor complete co-operation between employer and employee.

So the "Slater Shoe" makers decided to make their factory a Union factory in name as well as in actuality.

Henceforward all "Slater Shoes" will bear the stamp of the Boot and Shoe Workers' Union with the factory Number 350.

(This number will also identify the shoe bearing it as the genuine "Slater Shoe," as no other makers have the right to use it).

This Union Stamp stands for co-operation of employer and employee, for mutual good understanding, for immunity from strikes and lockouts, for the principle of arbitration, for a continuous supply of first-class help, for uniformity of workmanship, for fair conditions all round.

Reduces cost by increasing producing efficiency, by reducing number of spoiled pairs of shoes, by its greater uniformity of workmanship, by the more thorough organization of factory.

It makes better shoes.

Don't forget the "Slater Shoe" factory, Number 350—three fifty—same as the "Slater" three fifty shoe.

When you see that number you will know you have a genuine Goodyear Welted Union-made

Slater Shoe

For Men - $3.50 $5.00 - For Women

Pandora Range

Fire responds promptly to dampers—will boil a pot of tea quickly.

When friends visit you unexpectedly and you ask them to have a cup of tea, you realize the advantage of a good range. Special damper arrangements in the Pandora insure a strong draft and quick fire at all times—no tedious waits for the kettle to boil, but rather a sense of pride from its promptness.

A handsome range to show your callers, too—has a beauty, grace and solidity in appearance not seen in old style ranges.

The Pandora range has many new and important features, such as enameled reservoir, sheet steel high shelf and warming closet, triple triangular grates and a special flue construction which forces the heat around the oven twice and directly under every pot hole—is a perfect baker and a perfect cooker at the same time.

Sold by all enterprising dealers. Booklet free to any address.

BATTLE IS NOW ON.

No Time Has Been Lost In Starting British Campaign.

CHAMBERLAIN'S 2ND LETTER

This Time He Writes to the Tariff Reform League—Says He Agrees With the Views of the League, and That They Have Now sufficient Facts and Figures to Begin Work.

London, Sept. 19.—The newspapers this morning are crammed with discussions and speculations regarding the political situation brought about by the resignation of Mr. Chamberlain, Chancellor of the Exchequer Ritchie, and Lord George Hamilton, but no fresh development has yet been announced. The Marquis of Lansdowne, regarding whose intentions there is the greatest interest has gone to Balmoral to relieve Lord Balfour of Burleigh, as the Minister in attendance on the King.

Begins Active Preparations.

Both political parties have already commenced active preparations for the coming campaign, and the opinion is sought of every man of prominence at home and in the colonies, whose ideas are likely to have influence. Mr. Asquith, who is by many regarded as the future leader of the Liberal party, telegraphed yesterday: "The situation in all its essentials is unchanged. The duty of the Liberals to defend free trade is as plain and urgent as before."

The opinion of the colonies is anxiously canvassed as being the most important factor in the situation. Sir Edmund Barton, the Premier of the Australian Commonwealth, has declared in an interview that he is convinced that Mr. Chamberlain will ultimately triumph, and that until that triumph is achieved there will be no real union of the Empire.

The Standard to-day anticipates that Mr. Balfour will have at least four Cabinet seats and two or more under secretaryships at his disposal, and strongly urges him to make a clean sweep of the discredited ministers and appoint men of real ability, even such men as Lord Cromer and Lord Milner, as the country would gain thereby.

The Premier's Explanation.

Mr. Balfour has reiterated to friends that his letter to Mr. Chamberlain, accepting his resignation, was not a formal expression regarding Mr. Chamberlain's policy, but that he meant what he said. On the face of it, Mr. Chamberlain and Mr. Balfour will continue to work together, but the former Colonial Secretary is free from Governmental obligations and will be able to conduct his educational campaign along the line he has all along advocated.

Writing yesterday from his home at Highbury, Birmingham, Mr. Chamberlain made his first public statement since his resignation. His letter is in reply to C. A. Pearson, chairman of the Executive Council of the Tariff Reform League, who asked if Chamberlain coincides with his view, that the examination of the tariff may be considered as sufficiently advanced, and that the league should now use its resources to advocate the employment of a tariff for the purpose of consolidating and developing the resources of the Empire and defending the industries of the United Kingdom.

Mr. Chamberlain Agrees.

Mr. Chamberlain says: "I agree with your views, that we have sufficient material in the way of facts and figures. We have now to state our conclusions and endeavor to get the people to adopt them."

Mr. Chamberlain then gives his understanding of the position of the Tariff Reform League under two heads, as coinciding with his position. Their object, he says, are:

"First, a closer union with the colonies by means of preferential tariffs, in order to endeavor to make the Empire self-sufficing as regards its food supply.

"Second, the employment of a tariff as a weapon to secure greater reciprocity with foreign nations; or, failing such arrangement, to prevent loss to the home industrial markets under the competition of protected countries by retaliating upon them the treatment they mete out to us."

"On this understanding," Mr Chamberlain concludes, "I wish the league success, and the support of everyone desiring the union of the Empire and the continued prosperity of British commerce."

Canada's Opinion of Chamberlain.

London, Sept 19.—(C.A.P.)—W. L Griffith Lord Strathcona's secretary, interviewed, said that Canadians, whatever their political color, would freely admit that the administration of Chamberlain as Colonial Secretary has been a distinct advance in many respects. It was not much to say that Chamberlain in Canada is the most popular living English statesman. Lord Strathcona's very high opinion of Chamberlain was well known.

Be Quick.

Not a minute should be lost after a child shows symptoms of cholera infantum. The first unusual looseness of the bowels should be sufficient warning. If immediate and proper treatment is given, serious consequences will be averted. Chamberlain's Colic, Cholera and Diarrhoea Remedy is the sole reliance of thousands of mothers and by its aid they have often saved their children's lives. Every household should have a bottle at hand. Get it to-day. It may save a life. For sale by all druggists.

Miss Haigh May Die.

Hamilton, Sept. 19.—Miss Maria Haigh, 318 South Hess street, an elderly lady who keeps the books for her father, who runs a bookbinding establishment at 60 West King street, last evening was a passenger on a street car. As the car was speeding down the incline on Margaret street, the power wire snapped, fell on Motorman Edward Marshall's cap, making a great flare and knocking him back from his motor. As soon as he recovered, he stopped the car, ran back to recover his cap and found Miss Haigh lying unconscious by the track. She had evidently got frightened, and jumped off, alighting on the back of her head. She has a very slight chance to get better.

SLEEPLESS BABIES.

When a little one is sleepless and cross, it is the surest sign in the world that it is suffering from some derangement of the stomach and bowels — the seat of nine-tenths of all baby ailments. In cases of this kind Baby's Own Tablets act like magic. They sweeten the sour little stomach, relax the distended little bowels, cool the parched, fevered mouth and bring natural, health giving sleep. An experienced mother, Mrs. Ed. Godin, Griffith, Ont., says: "I have used Baby's Own Tablets for many ailments peculiar to babyhood, such as fevers, indigestion, diarrhoea, etc., and I have found them the most effective medicine I have ever tried. I can only add that I would not be without them in the house, so much do I think of them."

Other mothers who wish health for their little ones cannot do better than follow Mrs. Godin's example. You can get the Tablets from all medicine dealers or they will be sent by mail at 25 cents a box by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont.

MARKET REPORTS.

Liverpool Wheat Closed Higher, But Chicago Went Down 1 1-4 Cents—Live Stock—Latest Quotations.

Friday Evening, Sept. 18.

Liverpool wheat futures closed ¾d lower than yesterday, and corn futures ¾d lower.

At Chicago December wheat closed 1¼c lower than yesterday, December corn 1¼c lower and December oats ½c lower.

Hogs—Best select bacon hogs, not less than 160 lbs. nor more than 200 lbs. each, off cars, sold at $4.00 per cwt.; lights and fats at $3.75; sows, $4 to $4.25 per cwt. and stags at $2 to $3 per cwt.

EAST BUFFALO CATTLE MARKET.

East Buffalo, Sept. 18.—Cattle—Receipts, 450 head; slow, prices unchanged. Veals—Receipts, 250 head; 50c higher, at $6.25 to $9. Hogs—Receipts, 7200 head; active and 5c higher; heavy, $4.85 to $4.50; mixed, $4.40 to $4.50; Yorkers, $4.40 to $4.55; pigs, $4.75 to $4; roughs, $3.2 5to $3.50; stags, $4 to $4.50; dairies and grassers, $4 to $4.40. Sheep and lambs—Receipts, 6000 head; sheep firm; lambs 15c higher; Year-25c higher; lambs, $5.50 to $5.90 yearlings, $4.25 to $4.75; ewes, $3.50 to $3.75; wethers, $4 to $4.25, sheep, mixed, $1.50 to $4.00.

CHEESE MARKETS

Perth, Sept. 18.—On the market to-day there were 1740 boxes of white cheese and 580 September make, all sold at 11⅞c. Buyers present were Bissell, Webster, How and Ferguson.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

Received With Satisfaction.

London, Sept. 19.—(C A P.)—Lord Strathcona's cabled denial of any truth in the report of Canadian crops' failure is received here with the greatest satisfaction. I have had inquiries from midland towns re. the truth of the reports cabled a day or two ago.

The Financial News says: "It is reassuring to learn on the authority of Lord Strathcona, that the reports are being grossly exaggerated."

29,000 to Be Idle.

Philadelphia, Sept 19.—Seven anthracite collieries operated by the Pennsylvania Railroad Company in the Wyoming, Shamokin and Schuylkill Districts will be closed down to-day. About 29,000 men and boys will be idle as a result.

THE BELMONT GOLD MINES LIMITED.

Government Report on the Works at Cordova.

Doubling of the Stamp Mill Capacity to a Total of 60 Stamps is Proposed.

The report of the Bureau of Mines for 1903, has been issued and with reference to the Belmont Gold Mine at Cordova, contains the following which undoubtedly will be read with interest.

BELMONT MINE.

"The Belmont Gold Mines, Limited, with head office at Newcastle on-Tyne, England, and Canadian office at Cordova, Ont., was organized last fall as a separate company to take over and conduct operations at the Belmont mine. The transfer of the property was made on 1st January, 1903, by the parent concern, the Cordova Exploration Syndicate, of England. Mr. D. G. Kerr remains as manager. The Belmont property now covers 450 acres in one block in Belmont township, Peterborough county, and the adjoining township of Marmora, Hastings county. A considerable portion of this has been surveyed into town lots, which are for lease to employees or others desirous of building at Cordova. The company itself has erected a number of private frame buildings for rent to the employees. Altogether the town about the mine is assuming respectable proportions.

Last summer active interest was taken in adjoining lots by parties prospecting for the extensions of the Belmont lodes and the success attained in the work leads to the expectation that more systematic development will fillow this year.

Inspection of the mine was made on 8th and 9th January, 1903. It was found that mining had during the year been confined mainly to stoping and raising the ore previously blocked out in Nos. 1, 2, and 3 shaft workings without much drifting or other development either here or in the rest of the shafts, for the reason that until completion of the new hydraulic plant to furnish compressed air, insufficient power was available for more than getting out the supply of ore for the mill. A good deal of stripping was done over the surface for the purpose of locating the various lodes in greater length.

No. 1 shaft, depth 410 feet, (the same.) First and second levels, no new developments. Third level, west drift 190 feet, (85 feet increase;) east drift, 135 feet, (1 feet increase), with at 40 feet east a cross cut 40 feet south, 40 feet in width, from the end of which a drift runs southeast 170 feet. Fourth level, east drift, 200 feet, (11 feet increase.) The stopes noted in the last report as just open have been extended, and crosscuts run through them on the different levels to both walls of the ore body. Along some of these crosscuts the stopes have been widened out to the full extent of the vein, which is thus seen to vary from 8 feet to nearly 00 feet in width. In some places the stopes measure from 30 to 50 feet in width, all reported to be pay ore. At some points however this large body is broken in two veins by the presence of a barren rock which has been incompleted or not at all metamorphosed with the rest of the ore.

The stope timbers are well loaded with ore ready for removal. All the rock is hoisted to the shaft house floor, washed sufficiently to roughly sort out the gangue, and then trammed around to the mill. The working levels are being solidly timbered and lagged overhead, in the wide stopes the square set system being adopted.

No. 2 shaft is still maintained with complete hoisting appliances as an auxiliary to No. 3 shaft, and for a ventilation way

No. 3 shaft is continuing down, being at the above date 40 feet below the third level or 325 feet deep in all. First level, unchanged. Second level; the only development consisted in connecting the winze for good ventilation. The stopes between Nos. 2 and 3 shafts and those west of No. 2, have been changed and extended down to the third level. East of No. 3 shaft the stope between the first and second level now extends down to the third level, and is showing the ore body up as a chimney of somewhat irregular outline about 40 feet wide by 90 feet long. There is reported to be about 18,000 tons of ore on the timbers in all these stopes.

No. 7 shaft was re-opened in December, 1902, and sunk a few feet deeper to allow of completing the timbering which work is now in progress.

At the other shafts no resumption of development has yet taken place.

The hydraulic power plant has been entirely completed as per specifications given in my last report, with the result that now all the mine, mill and other machinery is operated by means of the compressed air furnished by it. The present duplex turbine connected with and operating the compressor is capable of generating only 1,000-h.p. of the total 1,300-h.p capacity of the water power, and to develop the remaining 300-h.p. a "T" connection has been left on the flume beside the present terminal to attach another Leffel turbine; this would operate the dynamo at this point, which is now run by compressed air from the mine. This addition to the plant is expected during the present season. The old steam power plant at the mine has up to the present been left in set, and will so remain until such time as it can be sold.

Several alterations and additions to the surface and mining plant are proposed for this season, such as the doubling of the stamp mill capacity to a total of 60 stamps, and the removal of the crushing plant from the top mill back 200 feet or so to No. 1 shaft, to be there set up again, in a new combined shaft crusher and sorting house, where all ore will be treated before entering the mill.

T. W. Fisher and W. Scott fill the position of foreman with 170 employees under them.

Was Hovering Between Life and Death

A few days trial of Lactated Food will convince any intelligent mother that it is the right form of nourishment for her weak and puny baby. No other food can give such prompt and happy results at a time when the little one is hovering between life and death. A Montreal lady last August wrote as follows: — "My baby was so weak and sickly a few weeks ago that we despaired of her life. We tried nourishment of every kind, but could not get anything to remain on its stomach. We heard of Lactated Food, and commenced its use. There was an improvement the very first week, and to-day our baby is well and strong. Lactated Food saved her life." Sold at all Drug stores.

BEAUTIFUL WOMEN WHO USE PE-RU-NA.

HEALTHY WOMEN

Praise Pe-ru-na as a Cure and Preventative of Catarrhal Disorders.

Miss Elizabeth Uber, No. 9 Bassett street, Albany, N. Y., writes:

"I have always dreaded the fall and winter because of my extreme liability to catch cold, when catarrhal trouble would quickly develop through my entire system which it would take weeks to drive away. I am thankful to say that since I have taken Peruna, I do not have any reason to dread this any more. Last fall when I suffered with my old trouble I took Peruna and in nine days was completely cured and since that time, if I have been at all exposed to the damp, wet or cold weather, I take a dose or two of Peruna and it throws out any hint of sickness from my system. I gladly indorse it."—Miss Elizabeth Uber.

Mrs. Wm. Dewey, Saranac Lake, N. Y., is second cousin of Admiral Dewey. In a recent letter she says:

"Peruna is the most valuable of any remedy that I have ever used for coughs, colds, etc. I cheerfully recommend it as a certain cure if used according to directions."—Mrs. Wm. Dewey.

Miss Rosa Gerbing, a popular society woman of Crown Point, Ind., writes:

"Last winter I took a long drive in the country, and being too thinly clad I caught a bad cold which settled on my lungs, and which I could not seem to shake off. I had heard a great deal of Peruna for colds and catarrh and I bought a bottle to try. I am pleased that I did for it brought speedy relief. It only took two bottles and I consider this money well spent.

"You have a firm friend in me, and I not only advise its use to my friends, but have purchased several bottles to give to those without the means to buy, and have noticed without exception that it has brought about a speedy cure wherever it has been used."—Miss Rosa Gerbing.

To neglect a cold is to invite chronic catarrh. As soon as anyone discovers the first symptoms of catching cold he should at once begin the use of Peruna according to directions on the bottle, and the cold is sure to pass away without leaving any bad effects.

Unless this is done the cold is almost sure to end in the second stage of catarrh which is making so many lives miserable. If Peruna was taken every time one has a cold or cough chronic catarrh would be practically an unknown disease.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

ANNIVERSARY OF ST. ANDREW'S GUILD.

Fifth Anniversary to be Held To-morrow.

Special Sermon by Rev. D. D. McLeod, D. D., of Barrie—Music will be Pleasing Feature—Guild Commences New Season's Work.

St. Andrew's Young Men's Guild will to-morrow celebrate the fifth anniversary of its organization, and special services will be held in St. Andrew's church in commemoration of the event. The preacher will be Rev. D. D. McLeod, D.D., of Barrie, who in the evening will preach a sermon, particularly to young men. In connection with the service an especially pleasing musical programme is being arranged. Solos will be rendered by Miss Miller and Miss Helen Davies, the latter will sing "I heard the voice of Jesus say," by Rathbun, and a solo from Mendelsshon's St. Paul, entitled "Jerusalem—Thou that Killest the Prophets."

The Guild has recently elected officers, and is preparing to enter upon the season's programme, and the services to-morrow will be an appropriate opening to the work of the Guild for the season, the prospects for which are very bright.

MISS DELANEY'S AUTUMN OPENING.

A Beautiful and Varied Display of Millinery That Pleases Feminine Tastes.

The throng of enthusiastic visitors which have been in attendance at Miss Delaney's millinery receptions during the past two days is a practical compliment to the beautiful and attractive display of Autumn and Winter styles. Never were "Opening Days" dedicated to more fashionable novelties, and never were they made more enticing to the ladies. Everybody remarked that the millinery shapes this season are unusually varied—large, small and medium. Beautiful walking and dress hats were very prominent. It was remarked that fur hats seem to be the thing this year; that they are worn more off the face, that the crowns are odd and higher; picture hats have sweeping broad brims; turbans are in some cases three cornered; tuques are higher, graceful and lovely. plumes, birds, wings, and other feathery decorations are very pronounced. The favourite colours are white, brown, blue, pink, violet and black. Velvet, felt, flowers, feathers, silk, satin, fur, etc., worked by expert designers and deft trimmers into graceful shapes and colour-harmonies, resulting in a surpassing exposition of millinery fashions.

Included are numerous exact copies of pattern hats and bonnets imported for the occasion; made by noted French and American designers. The styles included of many of which there is but one, thus affording customers the privilege of selecting something original and exclusive.

Miss Delaney has made arrangements for the continuance of this display during the fair days next week, and all are invited who are interested in the latest and best creations in fashion fancies for the season.

ENJOYABLE FRUIT SOCIAL

Was That Held at George Street Last Night.

An enjoyable fruit social was held in the school room of the George street Methodist church last night, under the auspices of the Ladies' Aid Society. The social was held in aid of the church relief fund, and was very successful from every standpoint. Rev. J. P. Wilson, B.A., pastor of the church, acted as chairman, and announced a pleasing programme of musical and literary numbers. Rev. J. G. Lewis, B.A., of the Mark street church, gave a short address, and a programme, consisting of recitations by Miss Aldridge, Miss White, and Little Miss Mabel Pringle, was rendered. A vocal solo by Miss Clara Belloghem, vocal duet by the Misses Chasty, and piano solos by Miss Sanderson and Miss Gumpricht, added to the enjoyment of the audience. Miss Mary Fife gave an address on her work at Harvard University, which was very interesting.

At the conclusion of the programme refreshments, of fruit, cake and coffee were served. The social was well attended and was a success from the financial as well as other standpoints.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Miss Annie Brace has just returned from a week's vacation in Hamilton and Toronto.

The Steamer Empress will be taker off the Stony Lake route after Saturday the 19th.

ALL SAINTS' CHURCH'S HARVEST FESTIVAL.

A Large Congregation was in Attendance.

Rev. Chas. J. James of Toronto, Preached—The Decorations.

A large congregation attended the Harvest Festival Service at All Saints' Church last night and the beautiful little church was filled in every part.

The decorations were almost more than abundant, but were beautiful in the extreme, and the bounty of nature was in sympathy with the profuse yield of flowers and fruits of all kinds. At the first glance it was noticeable that considerable labour had been voluntarily expended in decorating the interior of the church. Everywhere were bunches of wheat and oats, which, as hymns were sung quivered like aspen leaves. The golden corn on the stalk standing along the aisle looked very pretty as did the abundance of fruit and vegetables, with which the inside window sills were loaded The chancel decorated with lovely cut flowers, was, perhaps, the prettiest portion of the church. However, it is felt that the large congregation were not only attracted by the decorations but by the beautiful Church of England service, perhaps, especially beautiful at Harvest tide. Its beauty, its sincerity, its modesty are not only undeniable, and are not only universally admitted, but are universally acclaimed. As the hymns were sung, the psalms said and the scriptures read, it was very noticeable that the presence of the fruits were not the only thanks to the Supreme Being for the bounteous harvest; there was a grateful feeling at heart. Everybody sang the praises of Him in seemingly a different atmosphere. The service throughout was in keeping and began with, perhaps, the most beautiful of all the special Harvest hymns, No. 389, being "Come ye Thankful People, Come." The special Magnificat which was sung was by Thos. Eddon, while the Deus Misereatur was Mammat's. The hymns during the remainder of the service were "Praise, O Praise Our God, the King," "O Lord of Heaven and Earth and Sea," and "We Plough the Fields and Scatter."

A beautiful sermon in harmony with the rest of the service was preached by Rev. Chas. J. James, of the Church of the Redeemer, Toronto. He took his text from Amos Chap. 8, verse 1: "Thus hath the Lord God shewed unto me; and behold a basket of summer fruit." Rev. Mr James dwelt on the fruits of this land, which he termed as one flowing with milk and honey. He wondered if the prophet Amos saw such fruits as were displayed in the church and continued by remarking that as we pride ourselves we must acknowledge that we owe everything to our ancestors and should, by our works, make the future generations indebted to us as we are to our forefathers. There should be something in our lives for His many mercies—for the many things which he has given us. As day by day, said the preacher, the fruit in the summer sun grew and became riper and riper, so should we daily in the presence of the Spirit get nearer perfection in spiritual matters. He dwelt at some length on love, long-suffering and temperance, explaining the necessity of these. In conclusion the preacher said, we are all members of Christ's church, we are communicants and therefore in Christ. If we do not yield forth fruits we will be cut down and cast away.

During the offertory the anthem, "All thy works Praise Thee, O Lord," by T. Mee. Pattison, was sung, Mr. J. Legg taking the solo tenor parts.

The service was conducted by the rector, Rev. W. L. Armitage, assisted by Rev. J. C. Davidson, of St. John's church.

OBITUARY.

Infant Son of Mr. Samuel Bickle Passed Away.

After a very brief illness, Eric Hill Bickle, the son of Mr. Samuel Bickle, of Lake street, Ashburnham, died yesterday. The child was but 2 months and 18 days old, and his loss is severely felt by his sorrowing parents. The funeral took place this afternoon at 4 o'clock from the family residence, Ashburnham, to the Roman Catholic cemetery.

Sunday School Association.

The Sunday School Association Executive met last evening and made preliminary arrangements for the house-to-house canvas of the town. The different churches are uniting in this work, and much good is expected as the result

CREATIONS OF THE MILLINER'S ART

Will be on Display This Week and Next.

Some of the Newest Effects in Headwear—Prevailing Styles in Cloaks and Jackets.

During this week and next, thousands of Peterborough ladies will visit the different millinery stores, and departments of drygoods stores, with the view of becoming informed as to the latest vagaries of Dame Fashion, with respect to headwear for the fall season, which is now upon us, and that of the winter, which is close at hand. Two of these establishments which are always popular with the ladies, are to-day having their fall openings, and before the close of next week, the remainder will have made their opening display, and the ladies will have become fully versed in the newest creations.

A visit to the show rooms reveals the fact that some very pretty effects are being produced in this season's hats. The popular colourings will be royal and pale blue, foliage, myrtle and serpent greens, poppy and geranium reds, helitrope and royal purple.

In trimmings, "furs," genuine and imitation, are being used extensively, Persian lamb, ermine, squirrel, and Chinchilla Astrachan taking the lead.

Regarding the shapes that will be seen there is a tendency to odd and unusual shaped crowns and brims until one wonders how they will look when trimmed and placed on the wearer's head. The new blocks include the Torpedo, Tricorns, Shamrock Reliance and Gainsborough. These are in many shapes and sizes of tuques and turbans.

Many dry goods houses are also opening up their new cloaks and jackets. The newest in this line will be collarless, and may be either box-pleated or tight-fitting. They will be worn both with and without capes, and those embracing this feature will be seen with single, double and triple capes. A variety of cloths will be made use of in producing the effects noted above. The predominating material will be the beaver cloth, tweeds, in black and white effects. Zibelines in long hair and silk camels hair will also be largely used.

In suits the Russian blouse coat is a style that is the most fashionable, the skirted coat being most in demand, the skirt of which is shown both combined and detachable, which adds greatly to the gracefulness of the garment. On the whole the new creations designed for this fall's wear show a marked improvement over those of former years in point of effectiveness both in materials and styles of make-up.

HARVEST FESTIVAL AT ST. MARK'S CHURCH.

That Held Last Night was a Success.

Addresses on "Work" by Rev W. R. Tandy M.A., of Havelock—Enjoyable Programme of Musical and Literary Numbers.

The annual Harvest Home Festival of St. Mark's Church, Otonabee, was held last night, and was in every respect highly successful. The attendance was good and everyone present had an enjoyable evening.

The tea was served in the basement of Zion Foresters' Hall, and was in every way a credit to the ladies of St. Mark's church, by whom the bountiful repast was provided and served. A perfect spirit of harmony prevailed throughout the entire evening. After tea had been served a programme of unusual excellence was served in the main hall which was presided over by Rev. E. A. Langfeldt, and on the platform was Rev. W. R. Tandy, M.A., and others. A number of musical selections were rendered by the Wilson Bros.' Orchestra, assisted by Mr. Armstrong, organist of St. Luke's church. Rev. Mr. Langfeldt in his opening address, welcomed those present and expressed his gratitude to those who came from other churches to attend the festival, which he felt sure all would enjoy. Rev. W. R. Tandy, M.A., of Havelock, then delivered an address on "Work," in the course of which he paid a tribute to the heroism of honest labour. Mr. Tandy's address was a thoughtful, as well as a helpful one, and was much appreciated. Other numbers comprising the programme were a solo by Miss Maude Curtis, of Ashburnham; a recitation by Miss Deyell, on "Josiah Allen's Wife in a Departmental Store," a very humourous number; an orchestra selection and a second solo by Miss Curtis. At the conclusion of the programme, Mr. Wm. Lawson, church warden, moved, and Mr. John Dickson, church warden, seconded a vote of thanks to Rev. Mr. Tandy, and to all those who had assisted in the programme. The entertainment closed with the National Anthem. A number from Peterborough, and other places in the vicinity attended the Festival, the proceeds of which were about $50.00.

GILMOUR MEMORIAL HARVEST FESTIVAL.

The harvest home services in connection with the Gilmour Memorial church, will be held on Sunday and Monday, September 27th and 28th. Services will be conducted by Rev. A. H. Brace, when special thank-offerings will be taken at each service. A tea and entertainment will be held on Monday at which addresses will be given by clergymen and others. A musical and literary entertainment will be provided. Tea will be served from 6 to 8 o'clock on Monday.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

S. A. OKE,
Tel. 18. 376 George street.

THE BEEHIVE'S IMPROVEMENTS

Important Addition to its Appearance and Facilities.

The Beehive has fitted up elegant quarters on the second floor for its splendid new mantle department, and emporium of dress skirts, underskirts, ladies' tailored costumes, blouses, wrappers, etc. The stairs leading up to this department have been covered with new carpets, and the floors have been similarly treated, and fine mirrors and other necessary accessories have been provided with a liberality sure to meet the approval of the lady patrons of the establishment. Connected with the display room are the necessary well-equipped work and fitting rooms, and great success has been achieved in fitting up a suitable home for this important department of the Beehive's business. The shop on the first floor has also felt the hand of improvement, and the show windows have been provided with elegant new mirrors, the improvements generally adding greatly to the appearance of the premises, as well as to the facilities for service, and the convenience of customers, and in this work of improvement the Beehive's motto, "What we do we do well," has been very faithfully carried out.

Hear C. M. Copeland, of Toronto. Bible Study Rally, Y.M.C.A. hall, Sunday at 4 p. m., "Life and Work." Norman Jolliffe will sing.

NIGHT SCHOOL
at the
Peterboro' Business College
BEGINS MONDAY, SEPTEMBER 14th

Those who propose attending the classes should enter as soon as possible in order that the best results may be obtained. Office open to-night.

WM. PRINGLE, Principal
Opposite Post Office.

A ROOM OF WALL PAPER

Rules for Measuring

TO FIND the number of single rolls required, multiply distance around room by height, taking out 20 square feet for each opening and divide by 30. To find quantity for ceiling, multiply length by width and divide by 30.

For 30 inch plain ingrains divide by 60, result will be number of rolls required.

Wall papers are sold by the single roll, but put up in double rolls, as they then cut to better advantage.

Price for border is for a single strip the width of the border and one yard long. Samples mailed free upon application. State what priced papers you wish, width of border and colour effect desired, to enable us to make suitable selection.

Ceiling papers same price as walls they match, with the exception of ingrains.

Red Ticket Sale

Regular and Reduced Prices.

On the Red Ticket you can see at a glance the Regular Selling Price and the Reduced Price.

HALLWAY

We offer patterns that fit like a master of ceremonies into the surroundings, beautiful blending of colours, emphasizes good taste, modifies bad. Warm in hue, delicate in design. Regular price 25c, Red Ticket Sale price **18c**

PARLOR

Chaste designs which fulfil the promise of the hallway. Distinguished by a subdued richness. Elaborate patterns, the beauty of which escape analysis — but its there. Regular price 35c, Red Ticket Sale price **22c**

DINING ROOM

Blends of Olive Green, Dainty Marcons and Silver Dash; wreath pattern. Puts you in good humor with your surroundings. Makes the transition from the parlour a harmony, not a discord. Regular price 21c, Red Ticket Sale **12c**

INGRAINS

The popular favourite in the standard shades, pleasing plainess to suit connoisseurs in taste — 25 inches wide, guaranteed good quality. Regular price 18c, Red Ticket Sale price..... **12c**

SITTING ROOM

Designs and hues that shake hands with the furniture, and include the carpet. A glance reveals the possibilities of any one of the patterns. Regular price 15c, Red Ticket Sale Price..... **11c**

BED ROOM

A dream maker — the patterns melt into your drowsy nods — colours your fancies. Dainty designs over which climb roses, in all but scent. Not pronounced, just suggestive, and all exquisite. Regular price 10c, Red Ticket Sale **7c**

CORNICE POLES

Artistic Poles and Trimmings—Cherry, Ash, Walnut, Oak, White Enamel, complete with English brass trimmings, or silvered. Regular price 25c, Red Ticket Sale price..... **18c**

WINDOW SHADES

Lace, six to eight inches, mounted on good spring rollers. 36 inches wide by six feet long. Regular 75c, Red Ticket Sale.... **62½c**

NOTHING BETTER AT ANY PRICE.

NOTHING ELSEWHERE NEARLY SO GOOD AT SAME PRICE.

THE STORE THAT NEVER DISAPPOINTS

A Decided Success --OUR-- Millinery AND Mantle Opening

Our Mantle Opening Monday Evening and our Millinery and Mantle Opening last night ranks in point of Success from a selling stand point, ahead of any previous opening we have had, and we take it that this point means that our

Goods and Styles are Correct.

So much labour and thought is devoted to this Semi-Annual Event that success is bound to crown our efforts.

The orders taken and sales made in these Two Departments Last Night is a grand opening to a successful season. Early buying in these Departments is advised, both from a Fashion and Price stand point.

YOU ARE INVITED TO VISIT THESE DEPARTMENTS WHETHER TO BUY OR JUST TO LOOK.

Cressman

385 and 387 GEORGE STREET. 'PHONE 171

GENERALLY SPEAKING

THE TOUCH-AND-GO experience, as noted in these columns a day or two ago of Mr. Ozias Leplante, barrister, emphasizes the necessity of the town authorities taking steps to enforce the proper use of the railway gates at the George street crossing. Mr. Leplante had a narrow escape from a terrible death or almost equally terrible mutilation. If the railway gates had been down—closed—as they should have been he would have been subjected to no such risk for he would have known that there was danger from a train in the vicinity. But doubtless reasoning, as any other person might reason—knowing that there were gates at this crossing—that the gates being open there was safe passage of the crossing he made the attempt to cross. The gates at the Grand Trunk crossings on Bothune at Charlotte and Simcoe streets are effectively manned and operated, and the public life is protected, except in the cases of those who choose to disregard the gates and take their own risk in crossing. But there is no danger of anyone being misled—when the gates are down there is danger on the tracks; when they are up the crossing is safe. Mr. Leplante's experience was that the gates were up and yet he came very near being hurled into eternity. Under these circumstances the gates are worse than nothing, for they lure the public into danger. If they were not there passengers would take the precaution to look on either side before crossing.

• • •

WHY IS THERE NOT A MAN provided to operate these gates? That duty is now coupled with that of baggageman at the busiest station on the line between Toronto and Montreal. It is as impossible for any one man to perform both duties as for a man to serve two masters requiring his presence in two places at the same moment. Why do not the town authorities see that a man is provided to look after these gates? The town worked for years to get gates at the George street crossing and now that they are secured, the way they are looked after makes them as useless as gates over the C. P. R. track at Winnipeg would be to protect human life at the George street crossing. Shall we have to wait till somebody is killed, for our authorities to again bestir themselves to action. The price of getting the gates was a human life. Will the price of getting them operated properly be another life lost?

• • •

COMPLAINTS have reached "Generally Speaking" of the delay caused by the use of the gates in question contrary to law. While the gates are not regularly operated, they often keep the highway crossing closed to the public for half an hour at a time. The law permits a train to obstruct a crossing track no longer than five minutes at a time. The statement is made that the gates are closed to permit of uninterrupted "shunting" for as long as half an hour. And who do you think makes to complaint to the press but an alderman? If he laid his complaint before a Magistrate the matter could be remedied in an hour. One must expect the railway employees to make things as easy as possible for themselves, and small blame to them if they are permitted, and even encouraged, to do so by the apathy of the authorities. The best Christian in Peterborough would take a "short cut" across your lawn or private grounds if you allowed him to do so. Don't blame the railway authorities, for useless gates, or closed crossings. Blame those whose duty it is to see that the life of the public is protected and the rights of the public respected.

• • •

WE CAN'T claim to be aesthetic in Peterborough. Look at the flower show if you please. After the directors of the Horticultural Society worked hard to arouse public sympathy with their efforts to develop a taste for the beautiful, what followed? There were hardly enough of the public present at the flower show to form a quorum for a midsummer prayer meeting, when all the parsons are off on their vacation and everybody is taking a holiday but the devil himself. Why is this? Peterborough is the liveliest town, and the best town in many ways, on the Western Hemisphere, but in some matters we are as dead as Pharaoh. It's a pity so many of us are tetotallers, for we need a stimulant badly. Too many of us have a taste for spirituous stimulants, and too few for spiritual. Most of us have a very properly well-developed taste for the stimulant of business bustle and gain-getting, but too few of us have a taste for the beautiful, as much God-created as gold and cattle and wheat and lands, and a necessary complement to a perfect world. The veriest sceptic can well believe that man is made of mud, when he sees man's mind in the mud—sees him ever busy with the muck-rake groping for filthy lucre.

• • •

WHY IS THIS SO, to such a sad extent, in this town? Ask our Aldermen, our representatives, and our public men. Do they encourage the beautification of the town? Do they encourage the Horticultural Society, with their personal sympathy and personal co-operation? The City Fathers may put their hands in your pocket, dear ratepayer, and make a grant of money, but is the weight of their influence, as representative men, thrown on the side of helping the people make the town beautiful. A citizen creates a boulevard in front of his residence to please the public eye. The town lays down a new walk on a new grade, and in so doing destroys the nicely seeded, sodded and mowed boulevard, and instead of restoring the former condition, if the citizen coming on his knees, begs a barrowful of earth from the town to repair, at his own expense, the destruction of public beauty the town has wrought, he is denounced as a "grafter." The town is tender to careless citizens, and allows them, without check or hindrance, to pile upon the street, (generally upon the opposite side of the street), all sorts of rubbish, lawn rakings, dead leaves, dead brush, etc., etc., till parts of some streets look like the "slash" clearing in the back field of a slatternly settler in a back township. The Water Commissioners, trustees of the people's money invested in water works, fine citizens for having fine tastes—by clapping a tax on them for the water they use to beautify public property—boulevards. Getting a revenue is a laudable ambition, but it must be remembered that the trees, the trim lawns and tidy boulevards of Peterborough, have a very big share in creating the favourable first impressions which visitors from outside form of Peterborough.

• • •

FLOWER-PLOTS planted to potatoes would yield more revenue than tulips, and a hay crop on a lawn would "pay" better than the eye-delighting velvet of shaven turf. He that runs may read.

• • •

PETERBOROUGH is coming to the front, or rather staying at the front, as a place of commercial importance, and a distributing point in this district. We have now two wholesale grocery warehouses, a wholesale liquor house, a wholesale cigar house, and a wholesale electrical supplies house in town, and before long we hope to add a wholesale drygoods house. The spacious premises on Simcoe street, recently vacated by Richard Hall & Son, for still more spacious premises on George street, are as admirably adapted for a wholesale drygoods house as the town is as a distributing point on account of its central location, and unsurpassed railway facilities. Not only would such an establishment draw ample patronage from our local retail merchants, who would gladly exchange the opportunity of "sorting up" for the certainty of paying big bills for freight and express charges, and suffering delay in fulfilment of orders. Besides a wide area of trade—between Toronto and Montreal—could be made profitably tributary to Peterborough through a well-stocked drygoods wholesale house in addition to the wholesale grocery and other houses we now have. What we have we'll hold; but we can hold more.

• • •

YESTERDAY'S Examiner contained an article taken from the Canadian Engineer, setting forth Orillia's success with her electric lighting in furnishing cheap light. The article stated that the flat rate for electric lighting for residences was 25 cents per month for each 16-candle-power lamp, and stores, hotels halls and churches, are charged 35 cents each light, with a discount of 20 per cent for prompt payment. Thanks to competition we can do better than that in Peterborough. The Orillia rate for residences is $3 per year for each light, in Peterborough the rate for residences is $1 per year for each 16-candle-power lamp. In Peterborough a householder using ten lamps pays $10 a year net, in Orillia a householder using the same number of lamps pays $30 a year—or, less 20 per cent. discount for prompt payment, $24 net, or nearly two and a half times more than is paid in Peterborough. In Peterborough the charge for light on the metre basis is five cents per thousand watts; in Orillia the charge is 13 cents per thousand. In Orillia the charge per light for churches is $4.20 per lamp, with 20 per cent. off; in Peterborough the rate is $1 per light, or even less—one church in town getting its 75 lights for $70 per year. In Peterborough there is no charge for metre rental; in Orillia the metre charge is $1.80 per year.

• • •

RUGBY, and the sporting spirit, are not dead in Peterborough yet. In a blue moment the Rugby Club disbanded for lack of financial support. Last night's public meeting showed that public spirited citizens would not allow the town to rest under such a stigma. The team is put upon its feet this year by the help of its friends, who have very creditably come to its rescue. Next year sport will be able to stand alone. The operation of the street railway will make splendid athletic grounds available at the Driving Park, and will make access so easy that the great desideratum, "a gate," can be collected. It will be to the interest of the railway to encourage attendance, and if special rates for sporting events are not given, the moral aid of the company will certainly be extended. Nicholls Park will still be available for practices, and the driving park grounds for matches. Peterborough citizens will do a good deal for the good name of the town.

The Proper Treatment for a Sprained Ankle.

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is usually two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days. For sale by all druggists.

FINE FURS.

We're ready with advance styles of fine Furs for the season. The showing already discounts anything within your reach for fetching features. Every novelty worth consideration, every really new design finds representation at Lech's.

Scarfs and Stoles in all Furs and Grades for early Fall wear.

JACKETS for later use in newest designs.

PERSIAN LAMB will again take the lead. We have them trimmed with Sable, Chinchilla, Stone, Marten, Mink and Alaska Sable. Order early, as already we have many Jacket orders to fill. Seal Garments a specialty.

LET US SEND NOW FOR YOUR FURS FOR REMODELLING.

You should attend to this matter right away—there is better service now than later on.

WM. LECH & SONS HATTERS and FURRIERS 413 GEORGE STREET.

Miss Delaney's

MODEL FALL MILLINERY OPENING

Of French and American Pattern Hats and Bonnets and Latest Novelties in Millinery and Trimmings.

FRIDAY, SEPTEMBER 18TH

and following day.

The fashion-approved creations of noted Milliners of New York, London and Paris will be faithfully exhibited, as well as our own productions, embracing the very best foreign ideas.

STORE OPEN FRIDAY EVENING.

In extending a cordial invitation to our Opening Receptions, we can safely say that the display will be of surpassing richness and rare elegance.

THE FIFTH RALLY.

Mr. C. M. Copeland, Provincial Secretary, will conduct the fifth Bible Study Rally in connection with the Bible study of the Department, which opens that work for another season.

Mr. Copeland is a most gifted Bible teacher, and there should be a large attendance at the rally at 4 o'clock. Mr. Norman Jolliffe will sing.

To-night at 8 Mr. Copeland will lead a conference on the religious work of the association in the Bible class room.

On Sunday morning at ten o'clock the Boys' studying groups, seven in number, will begin work.

Is Your Piano in Tune?

The change of season affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

Swell Wrist Bags.

We invite the ladies to call at the Peterborough Bookstore and inspect our handsome samples of new wrist bags, labelled "Made in Canada." They are shown in walrus, crocodile, real seal, morocco and snake skin leathers. The clasps, chains and trimmings combine grace with art, in styles that are distinctly and charmingly Canadian. During these millinery show days the freedom of the store is extended to the ladies. A. H. Stratton & Co.

Hints to Housekeepers.

The undersigned desires to inform the public that he is sole agent for the Celebrated Laurentian Range, made in 6 styles, 2 sizes, the best four-hole range on the market. Neat in appearance, perfect in fit and finish, a splendid baker, burns economically any kind of fuel, is easily kept clean, works like a charm in every respect, and is guaranteed to give satisfaction. I have also a large stock of new and second-hand furniture and stoves, and general housefurnishings, and I also buy second-hand furniture and stoves. Call and examine stock before purchasing elsewhere. Stock and prices right. R. Begley, 380 and 382 Water street, opposite the Public Library.

THE AMERICA'S CUP.

Canadian Account of the Win as Made in 1851.

An interesting account of how the Americas Cup was won in 1851 is published by a Canadian contemporary: When the yacht America, it says, arrived in England in 1850-51 her owner, Stevens, published a challenge to sail anything for £1,000 to £10,000, but he laid down so many stipulations that the challenge was not accepted. Then the Americans appeared to think they were being treated discourteously, and the Royal Yacht Squadron went out of its way to offer a cup, value £100, to be sailed for—open to all—without conditions or time allowance, course, round the Isle of Wight. Now this is the cup that the Americans are pleased to call the Queen's Cup for some reason only known to themselves. Possibly the hall mark on silver in England being a crown, the Yankees assumed that this must be Her Majesty's private totem. In 1851 five Queen's cups were given, not one bearing the slightest resemblance to the Royal Yacht Squadron Cup. Aug. 22 was the eventful day. Fifteen yachts started, ranging from the barque Brilliant, 393 tons, to the cuttar Aurora, 47 tons. Only five could be termed racers or ever won a prize. The five were the Freak, Volante, Arrow, Alarm and Aurora. The start was very peculiar. The fleet went one way—the America another. "Round the Isle of Wight," in yacht racing parlance, means round the Nab—and then right away. Round the Nab went the Britishers, but the Yankee, to the amusement of the spectators and the disgust of the officials, took no notice of the distant lightship, but headed straight for the corner of the island, scraped over Bembridge Ledge and then took a short line to Culver Cliff, thereby effecting a saving of from 11 to 13 miles. Off Bonchurch the Britishers caught up and the Freak and Volante got to windward of the America. Then a series of disasters occurred. The Arrow grounded off Ventnor, and the Alarm went to her assistance; off St. Lawrence the Freak fouled the Volante. Thus four of the five British racers were out of it. Passing the Needles the America was a long way ahead, but coming up the Solent the little Aurora gained rapidly and reached Cowes eight minutes behind the America. The Aurora sailed the course, the America had not, and the Britishers claimed the cup, but as the Squadron people had omitted to tell the Yankees that they must round the Nab, they saw no other way out of the difficulty but to hand the cup to the first yacht in.

Mr. Charles Blair's Promotion.

Mr. Charles Mair, the author of several volumes of verse, including "Tecumseh," and who for the past five years has been hiding his poetic light under the bushel of departmental routine in the Immigration Office at Winnipeg, has been promoted to Lethbridge, and leaves shortly for that land of Mormons, coal mines and irrigation ditches. In the United States, as has been said, they make their poets ambassadors, while we have a more economical method, and utilize their fine frenzy in describing to an intending settler the quality of the soil on Sec. 13, Township 6, Range 10, or explaining to a Sheffield cutler what are the chances of obtaining work at his trade at Otaskwan, Alberta. One of the productions of Mr. Mair's which the West appreciates best is his "Open the Bay," and, though his hair is silvered, it is to be hoped Mr. Mair will live and flourish in the genial climate of Alberta long after his appeal has been heeded and his prophecy fulfilled, and Hudson Bay has become a highway for commerce. Mr. Mair is a genial, philosophic and optimistic soul, and he will be much missed by many friends in Winnipeg.

The Wily Heathen.

An Englishman who was appointed to an important post in China got married soon after. Among the recipients of the usual little cardboard boxes containing a piece of wedding cake was a Chinese merchant with whom the bridegroom had an outstanding account for goods supplied. After the honeymoon one of the first persons the newly wedded husband met was his Celestial creditor.

"And how did you like the cake?" said the Englishman laughingly after the usual congratulations.

"Ah, ha!" returned the Chinaman, with a cunning leer. "Me no such big fool to eat him, sah. Me put cakee in fire. Burn him up. He, he!"

"Oh, that's too bad!" said the Englishman, very much hurt. "You might have tasted it, at least, out of compliment to my wife and myself. Why didn't you?"

"Me too clute, sah," said the Celestial, with the same cunning smile. "You owe me money, sah; sendee poison cakee; I eat him; I die; you no payee up. Houp la! He, he, he! I know you Ingleesh!"

DIABETES

Is a Fast Wasting Form of Kidney Disease.

Kidney-Wort Tablets.

Quickly Arrest the Disease and Rebuild the Whole System.

Diabetes is a fast wasting form of kidney disease. In its advanced stage it is marked by the passage of an excessive amount of urine containing a large proportion of sugar. Other prominent signs are, great thirst, loss of strength, harsh, dry skin, swelling of limbs and physical weakness.

Dr. Pettingill's Kidney-Wort Tablets quick lyarrest the progress of this frightful disease and rebuild the whole system. They have saved thousands, and can save you. Fully guaranteed by Druggists everywhere. Price 50 cents per bottle or six bottles for $2.50.

Consoling.

Daughter (pleading for her lover)—But, father, I am positive that it is not my money he is after. He says he would marry me if I were ever so poor.

Stern and Prosaic Father:—Yes, he looks as if he had no better sense.

PAINE'S CELERY COMPOUND.

AUSTRALIA'S MILITIA POLICY.

General Hutton's Scheme Adopted by the Commonwealth.

The Federal Executive Council has adopted the army organization scheme, prepared by Major-General Hutton, commanding the Australia Commonwealth troops. The scheme proposes to raise a mobile field force well equipped and capable of undertaking military operations at the shortest notice wherever the Commonwealth desires, and a garrison force not necessarily mobile for the protection of pre-determined strategical points and places of commercial importance to the Commonwealth. General Hutton, in his scheme, explains that the field force will comprise eighteen regiments of light horse organized in six brigades, twelve regiments of infantry organized in brigades and complete artillery departments. This force will consist entirely of militia. The troops will number 18,911 men, with sixty guns, but may be increased in time of war to 27,758 men, with eighty-four guns. The garrison force, which will include the small local reserve, will consist largely of volunteers, and will number 11,988 men and twenty-six guns. Thus under the new scheme there will be available 25,807 men and eighty-six guns, which number could in time of war be increased to 39,649 men and 110 guns. The garrison force does not include the rifle clubs.

SHE HAD TO SIT UP IN A CHAIR.

Mr. Jas. Kinsella Cured by Dodd's Kidney Pills.

Peculiar Medical Case Ends in Another Victory for the Great Kidney Remedy.

St. Malachie, Dorchester Co., Que., Sept. 14.—Special.—A medical case of particular interest, especially to women, is causing much talk here. Mrs. James Kinsella suffered from Kidney Disease, which so affected her that she could not sleep and she was obliged for two summers to pass her nights sitting in a chair. To-day she is practically a well woman. Interviewed regarding her cure she said:

"I had a pain in my right hip, in the back and was swollen all down that side of the abdomen. I could not sleep at night and I was obliged to sit up in a chair for two summers. "Reading of cures by Dodd's Kidney Pills I bought one box. That gave me such relief that I continued to use them. They did me a world of good and now I can go to bed like other people. I have never had to sit up in a chair since I used Dodd's Kidney Pills."

Female complaints are caused by Kidneys. Dodd's Kidney Pills never fail to cure them.

Love Letter Romance.

Half a century ago a young Englishman while traveling met a beautiful girl and promptly fell in love with her. A few days later he returned home, and his first act was to write her a love letter. In it he told her that he could not be happy without her and that if she regarded his proposal favorably he would expect a reply by the next mail.

To this letter he received no answer, and so disappointed was he that from that time until his death, which occurred recently, he shut himself up in his home and lived like a hermit. Most of his time was spent in reading, and the day after his funeral the heirs began to search the books in his library, for they thought it quite possible that the eccentric old man might have hidden some bank notes in them.

They found none, but in a tattered old pamphlet they found another kind of note, the love letter which was written fifty years ago and which the writer had forgotten to mail.

The Successful Physician.

During the time spent in this hospital I learned many things that no textbook teaches, among them the secret of the successful physician. I discovered that while knowledge was a necessity it was not the only thing; tact, energy, sympathy and kindliness counted for more. The most competent physician was not inevitably the most prosperous, while the assiduously attentive ignoramus who made up in care what he lacked in skill kept the hospital crowded and in the fullness of time had his own sanitarium.—Everybody's Magazine.

Gave Him a Rise.

"Books that have helped me!" chuckled Tommy as he piled enough bound volumes of the Congressional Record on a chair to enable him to reach the shelf where his mother kept the marmalade.

KING AS AN ORATOR.

Gladstone and Phelps Rank Him High Upon Roll of Fame.

"There are few speakers," said the late Mr. Gladstone, "whom I listen to with more pleasure than the Prince of Wales. His speeches are invariably marvels of conciseness, graceful expression and clear elocution," and Mr. Phelps, the late American ambassador, himself "a man of silver tongue," declared, says a writer in Tit-Bits, that there was probably only one better after-dinner speaker in England, if indeed Lord Rosebery was the Prince's superior.

King Edward VII. has been endowed with that prime requisite of a public speaker, a clear and beautiful voice, which can make itself heard without apparent effort in the largest hall. This voice is largely natural, as anyone who can recall his oratorical efforts of forty years or so ago will admit; but it is also partly the result of a long training in elocution by one of its best masters.

In the early years of manhood the King hated no part of his public duties so much as the necessity of making speeches, but he early determined that "as he had to speak he would, at any rate, make sure of being heard," and under the guidance of his father—himself a trained and effective speaker—and under an elocution master, he rapidly acquired that clearness of enunciation which makes his speeches so pleasant to listen to.

In those days he used to practice so assiduously that if ever he could not be found it was always concluded by his brothers and sisters that "Bertie was somewhere learning to spout," and stories are told of how he would try his 'prentice oratory on his young brothers, planting them at different angles and distances and practicing until each one heard every word.

In those early days the Prince was obviously and painfully nervous; and even to-day, although long familiarity has moderated his tremors and he has better learned the art of concealing his sensations, he has confessed: "I always have a bad quarter of an hour before I make a speech in public, and there are times when I would give much to slip quietly away."

And yet to all appearance the King, as he chats genially with one and another or listens with a smile to an address, is the most self-possessed man present; but a close observer will detect certain nervous movements—the furtive stroking of his moustache, the toying with his watch chain, hat or stick—which prove that after all the King is human and has nerves.

In his infancy as speaker his speeches were carefully prepared, copied out and committed to memory. On one memorable occasion the Prince had forgotten to take his manuscript, and although he rarely referred to the copy of a speech, the knowledge that in this case it was not available for emergencies so unnerved him that his memory completely failed him and he had for once to trust to his own impromptu efforts.

Fortunately he succeeded so well that he was encouraged to trust less in future to memory and more to inspiration, with the happiest results. Now his speeches are only typed in outline.

"Brevity," he considers, "is the soul of oratory," as of wit; and he not only makes short speeches himself, but expects them of others. He studiously avoids quotation, especially of poetry, and never tries to be funny, although he succeeds in being both bright and witty. His attitude is easy and unconventional; his left hand resting on the table or on his hip and the right hand left free for the very limited gestures with which he emphasizes the points of his speech.

Sketch of Lord Brassey.

Lord Brassey, President of the Congress of Chambers of Commerce of the Empire, recently held in Montreal, was born Feb. 11, 1836, son of the late Thomas Brassey, one of the contractors of the Grand Trunk Railway. He was educated at Rugby and afterwards at University College, Oxford, where he obtained the degree of B.A., with honors in the history school. He is also a D.C.L. (hon.) and M.A. of Oxford, and was called to the Bar in 1866. Having entered politics, he was first elected Liberal M.P. for Devonport in 1865, and later represented Hastings from 1868 to 1886, when he was raised to the Peerage. Among the positions he has held are President of the Statistical Society, 1879-1880; Civil Lord of the Admiralty, 1880-1883; Secretary to the Admiralty, 1883-1885; served on Royal Commission on Unseaworthy Ships, Defence of Coaling Stations, Relief of Aged Poor, Chairman of Opium Commission; Lord-in-Waiting, 1894; President of the Institution of Naval Architects, 1893-1895; Governor of Victoria, 1895-1900. Lord Brassey married first in 1861 a daughter of Mr. John Allnutt, who died at sea on the Sunbeam in 1887; second in 1890, a daughter of Viscount Malden. Among his publications are:— "Work and Wages," "Naval Annual, British Navy," five volumes, "British Seamen," "British Work and Foreign Wages." Among his recreations are yachting and hunting, and it was on the famous yacht Sunbeam that he came to Canada.

Are You Bilious? Blame the Liver.

Scores of the Common Ills of Life Due to Disorders of the Liver and Curable by the Use of

DR. CHASE'S Kidney-Liver Pills.

If you are bilious blame the liver. If your digestion is impaired and you suffer from headache and dizzy spells, blame the liver. If your bowels are irregular, constipation and looseness alternating, blame the liver. If you have pain under the shoulder blades, feelings of fullness after meals, aching limbs, a yellow, muddy complexion, blame the liver.

Torpid, sluggish action of the liver is responsible for all these symptoms, and while you have a right to blame the liver, it may be well for you to set about to help the liver out of difficulty.

Though bile, which the healthy liver filters from the blood, is nature's cathartic and is necessary to healthful and regular action of the bowels, it is poison when left in the blood and gives rise to many distressing symptoms. The use of Dr. Chase's Kidney-Liver Pills promptly cures torpid liver and biliousness, and because of their combined action on liver, kidneys and bowels ensure a thorough cleansing of the system.

There is probably no one organ responsible for so many ills as the liver. Overeating, excessive drinking or irregular meals are very likely to upset the action of the liver, overload the system with bile and bring on biliousness or sick headache. Keep the liver in health by using Dr. Chase's Kidney-Liver Pills and you will avoid many of the common ills of life. There will then be no constipation, no stomach troubles, no danger of kidney and urinary derangements.

The position which Dr. Chase's Kidney-Liver Pills hold to-day as the leading family medicine is undoubtedly due to their wonderfully prompt action on the liver and their combined effort on the kidneys and bowels. There is no medicine obtainable which is more useful in cases of emergency when the digestive, urinary or excretory systems are deranged than this great prescription of Dr. A. W. Chase. One pill a dose, 25 cents a box, at all dealers or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 8

NOT JUST AS GOOD

Did you ever inquire at a store for certain articles and get for a reply "We have something just as good"? Did it ever occur to you that "Something just as good" is something the dealer has been able to buy much cheaper than the articles you inquire for? This is true in drugs, fabrics, groceries, hardware, and in fact every line, including silver-plated ware. If you inquire for 1847 Rogers Bros.' Knives, Forks or Spoons, don't accept any bogus Rogers' stamp because your dealer tells you it's just as good.

1847 TRADE MARK ROGERS BROS

The above trade mark has been stamped on every article of the original and genuine Rogers Bros.' goods for over 50 years. Get this and you get the best that is made.

Blood Starvation

Blood that is starved because it has lost the capacity for absorbing oxygen; thin blood which has not been properly nourished; weak blood which has lost the power to repair the waste and build new tissue; blood that is lacking in red corpuscles—all show that a re-constructor is urgently needed and that without delay.

Ferrol IS the most effective regenerator of the blood known to Medical Science, because it contains the very constituents of rich, healthy blood in a form so palatable and easily assimilated that even an infant can take and assimilate it without difficulty.

A SUPERANNUATED HAS BEEN

By William H. Osborne

...Copyright, 1903, by T. C. McClure...

He ascended the high stone steps in a slow and somewhat hesitating manner and shuffled uncertainly into the bank. His hat was rusty with age, and the silk binding was innocent of silk and shone with a new luster from afar. His coat, which bore the appearance of having been made for some one else, hung upon his shrunken frame in folds. The bottom of his trousers barely reached his shoe tops. His collar was a bit frayed about the edge. He was no longer young, and yet his age was uncertain. He might have been fifty years of age or seventy-five. He used a cane.

A thin gold chain was somewhat ostentatiously displayed. One end of it reposed in his vest pocket. Whether it was attached to a watch or no he only knew. It seemed to be the last relic of former prosperity.

He stepped inside the door and glanced about, peering around as though seeking for something, he knew not what. Finally his gaze settled upon the glass door leading into the office of the president. With a sudden resolve the old man stepped forward and entered the room. He sat down in a chair with a sigh of relief and pulled out a white handkerchief, which as yet had not been unfolded, and wiped his brow. He was a clean old fellow, neatly shaved and with his scant locks well brushed, but he was shabby—too shabby, thought the president of the Monroe National bank as he looked him over.

"Well, sir?" he said curtly to the old man. The old man looked at him for a few seconds in silence. Then he replied:

"I thought," he began, "that I would stop in and see the old bank. It was—let me see—some twenty years ago that I was here. Everything looks so familiar to me. It seems like yesterday when I was here, I tell you, sir. But I see no familiar faces. I see none of the men who were here in my time." He said this with a forlorn air. "Even you, yourself, sir, are a stranger to me. Dear me! Burke and Hallowell and Stephens—they're all gone now. I ought

THE OLD MAN TAPPED BOLDLY AND IN HIS AGITATION SOMEWHAT TOO LOUDLY.

to have known that, too, for seems to me I heard there was new management here. I"—

The old man rambled on. But the president, after his first glance at the man, frowned and kept his eyes on his work.

"Chatterton," he called, "I want to write that letter to the County National of New York. We'll need about $250,000 from them, and I want to enumerate the securities we can put up. Bring them out here, will you?"

A man came out bearing a little drawer full of bonds. The old man looked on. The president glanced once more at him and then swung around in an impatient manner.

"I beg your pardon, sir," he said testily, "but you see I am very busy. You don't want to see me on business, do you?"

The old man looked first at the president and then at the bonds. There was an intelligent look in his eyes. But he shook his head.

"Just wanted to see the old bank," he replied forlornly. "Used to work here myself, you know."

"Well, then," continued the president curtly, "you must excuse me. I'm a busy man."

"Good day, sir," replied the old man. The president turned his back. He did not deign to reply.

The old man stepped to the cashier's window. He nodded to the cashier in a conciliatory manner, but the cashier, who had watched affairs in the private office, was ready for him.

"Well, sir," he remarked in a businesslike tone, "draw or deposit?" He reached out his hand as though to receive either a check or some bills. None was forthcoming. The old man shook his head once more. "I used to be employed in this bank," he began, "twenty years ago"— The cashier reached to one side and seized some bills and began to count them hastily.

"Sorry, sir," he explained, with an impudent grin, "but my time belongs to the bank, and I can't stop to talk, you know."

As a matter of fact he had nothing to do, but he didn't propose to be bored by an old duffer like that. And so the old man passed sorrowfully down the bank, looking for some familiar face. Suddenly, however, his glance brightened. Inside the last cage he saw a stout, good natured man. The instant he saw him the old man tapped somewhat boldly, and in his agitation somewhat too loudly, on the window. The other man looked around, and then an expression of astonishment appeared upon his countenance. He hurried out.

"Well, Mr.— well, Jim," he corrected, in a hearty voice, as he led the old man inside, "what are you doing here? And how glad I am to see you. Let me see—why, it's twenty years since you and I"— And on he rattled. The old man's face became flushed with pleasure. For some twenty minutes he and the other man conversed with their heads together. The employees of the bank went, one by one, to take a look at the two. "Gee!" they remarked. "Wolverton is a soft mark. Always ready for any old guy that comes along, be is."

Wolverton finally put on his hat and coat. "I am going out to dinner," he announced. Every man stopped work and watched Wolverton lead the old man out of the bank and down the steps and across to the hotel.

"Now, Chatterton," remarked the president inside, "I guess that's all right. Send this letter right off and express the securities. The County National treats us white and we pay a good low rate of interest to them, and we want to hold their favor if we can. And I think that's a pretty fair letter that I've written to them."

Later Wolverton came back alone. The cashier called to him and a few others sauntered up to hear what was said.

"Say, Wolverton," began the cashier, "who's your poorhouse crony?"

Wolverton turned a bit red. "Oh," he answered shortly, "he's a man that used to work here a long while ago; that's all."

"Say," remarked the cashier, "you'll have enough old men on your list pretty soon to start a home. What's his name?"

Wolverton turned redder still. "His name," he replied, "is Minturn."

"Minturn," repeated the cashier—"seems to me I've heard the name. Where does he hail from anyway?"

"Well," returned Wolverton reluctantly, "I'll tell you. He's a sort of a director in some railroads—seventeen of 'em, in fact."

"What!" exclaimed the cashier.

"And he's president of three others," went on the other.

"What you giving us?" sarcastically remarked the cashier.

"And what's more," went on Wolverton, "he's—he's president of—of a bank."

"A bank!" demanded the other. "What bank?"

Wolverton smiled. "Of the County National bank of New York. His full name," he continued apologetically, "is J. Prentiss Minturn. You have heard of him."

The cashier turned pale and reached under his desk for a book. It contained the portraits of every bank president in the United States. He leafed it over rapidly. Finally he found the place. "Great Cæsar's ghost!" he exclaimed. "You're right. It's the very man. I'd heard that he was that kind of an old duck too. But I never supposed— Geel And I've been trying for the last six months to get a place in his bank too!"

Wolverton nodded soothingly. "I know," he replied. "I haven't been trying to get a job there, but I've just been offered one at twice my present salary. I think," he went on slowly—"I think I'll take it, maybe."

Two days later the president received a letter from the president of the County National of New York. It ran like this:

We find ourselves unable to make further loans to you at 3 per cent. We must hereafter demand 3½ or more, as the occasion dictates. Your securities are hardly sufficient to cover loan. Better send more at once. Hereafter kindly make applications for loans to our new loan, note and discount officer, Charles J. Wolverton, Esq. He is empowered to deal for the bank in all matters of this kind. Yours, etc.,

J. PRENTISS MINTURN,
President.

"By George!" exclaimed the cashier ruefully to the president. "That man's a bird!"

"He is," repented the president sorrowfully, "a very fine bird, but with very indifferent feathers, unfortunately for us."

Animals That Squint.

The eyes of an animal can only work together when they can be brought to bear upon an object at the same time; so that, as a rule, the eyes of a fish must work more or less independently. This is sometimes also the case when the eyes can co-operate, as any one who watches a plaice or other flatfish in an aquarium will soon discover.

This is true, too, of the curious bulging optics of a chameleon, which roll round swivelwise in a somewhat aimless manner. When they do converge it is bad for the insect upon which they fix themselves.

Many animals possess more than three eyes, which do not all act together. A leech, for example, has ten eyes on the top of its head, which do not work in concert, and a kind of marine worm has two eyes on the head and a row down each side of the body. Some lizards have an extra eye on the top of the head, which does not act with the other two. A bee or wasp has two large compound eyes, which possibly help each other and are used for near vision, and also three little simple eyes on the top of the head, which are employed for seeing things a long way off.

If It Only Were.

"After all, my friend," said the moralist, "life is but a dream."

"Not much it ain't!" snorted the hard headed man. "In nearly every dream I ever had I was gettin' more money than I knew what to do with."—Philadelphia Ledger.

Handy For Speechmaking.

"Yes," said the nervous man, "I have a habit of talking in my sleep."

And the eminent citizen who is expected to respond to an ovation in every town that the train goes through murmured:

"What a valuable accomplishment!"

Dressing the Pillow.

A little child, not three years old, was sleepy and his mother carried him to his crib, but the pillow slip had been removed by the maid for the laundry and the child, looking up beseechingly into his mother's face, said, "Please, mamma, put a shirt on my pillow."

Presence of Mind.

She—You're so bashful, Mr. Callow, I really believe that if you ever marry the lady will have to propose.

He—W-well, but I might have—er—nerve enough to decline.

Hopeless Case.

"Why don't you make hay while the sun shines and"—

"Huh! If I tried to do that it'd just be my luck to get sunstruck."

A stone weighs less in water than it does outside, but a trout always weighs most in the water.

Neuralgia

is Rheumatism of the face. Uric Acid left in the blood by disordered kidneys lodges along the nerve which branches from the eye over the forehead, and across the cheek to the side of the nose. The cause is the same as in all Rheumatism— disordered Kidneys. The cure is likewise the same—

"IMPOSSIBLE,"

for you to enjoy the happiness of motherhood," says the doctor. Sometimes he qualifies the statement, and says: "Impossible without an operation." Yet both these "impossibles" have been made possibles by the use of Dr. Pierce's Favorite Prescription. Many times the hindrances to motherhood are to be found in womanly diseases or weaknesses, which are perfectly and permanently cured by "Favorite Prescription." This great medicine for women cures irregularity and dries debilitating drains. It heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"I wish to add my testimony to hundreds of others as to the value of Dr. Pierce's medicines," writes Mrs. Ida M. De Ford, of Latona, Hubbard Co., Minn. "Have doctored with a great many physicians—some specialists; have twice been in a hospital for treatment. My case has been regarded as a hopeless one, and they knew not what the trouble was. Heart was bad; stomach all out of order; tired out; severe pains in all parts of the body; sinking spells, and nearly every ailment a woman could have. I took many a bottle of 'patent medicines' without effect. I began taking Dr. Pierce's Favorite Prescription, and ten months afterward I gave birth to a ten-pound boy. *All physicians had stated as a fact that I never could bear a child.* Both the baby and myself were strong, and I got along splendidly—thanks to your medicine."

The Common Sense Medical Adviser, 1008 large pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

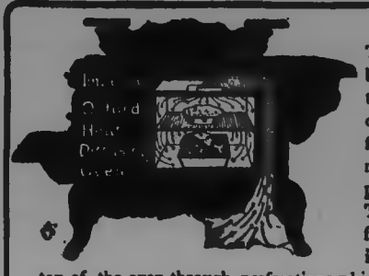
THOS. HOOPER'S GEORGE STREET NEAR CHARLOTTE



The secret of the excellent baking and roasting qualities of the Imperial Oxford oven is found in the diffusive flue — an improvement which no other range possesses.

This flue draws fresh air from the floor, superheats it and delivers it into the top of the oven through perforations which diffuse it evenly to front, sides and back. This gives a uniform heat throughout the oven, resulting in uniformly cooked food.

It is simple to prove the fuel economy of the heat-diffusing flue of the

Imperial Oxford Range

When your oven is at baking heat block up the inlet and you will find the temperature of the oven will drop immediately, just like an ordinary range, unless the fire is stirred and more fuel added.

The fuel economy and cooking perfection of the Imperial Oxford Range is equalled by no other range on the market.

QUOTATIONS ON THE WALL STREET MARKET.

The Wall street market was decidedly weak this morning and prices fell all along the line. Met. broke to 110 3-4 and C. P. R. to 120 1-8. The industrial group was exceptionally weak, American Car Foundry dropping to 25, but recovered to 28. The bank statement however was more favourable than was expected, and a sharp rally was in evidence towards the close. C.P.R. recovered to 121 1-8, and Met. to 111 3-4, but closed at 111 3-8.

CHURCH CHIMES.

Everyone looking for money-saving chances should embrace this opportunity. Vastness of stock a feature. In buying at the Peterborough Bookstore there always is the pleasing satisfaction of knowing that goods are perfectly new as well as up-to-date. A. H. Stratton & Co.

THE CONFERENCE OF PASTORS AND DEACONS

Representing the Peterborough Baptist Association.

Important Subjects Ably Treated in Address and Discussion.

The following report of the Pastors' and Deacons' Conference in connection with the Peterborough Baptist Association has been supplied by Rev. L. McKinnon, Secretary of the Conference:—

The Pastors' and Deacons' Conference of the Peterborough Association of Baptist Churches, met on Sept. 15th and 16th, with the church at Hubble Hill, near the Village of Stirling. There was in attendance a fair representation of the pastors and deacons of the Association, and the welcome and entertainment by Pastor T. C. Robinson and the friends of Hubble Hill was warm and hospitable; and the gathering afforded a pleasant opportunity for delightful fellowship. The aim of the conference is, through discussion and fellowship, to be helpful to the spiritual life and service of its members and through them to the life and service of the churches, and the programme is arranged with this end in view. During the sessions of this gathering the conference was served with two expository treatments; the one an excellent paper on Jonah, by Rev. J. E. Trotter, whom old friends and new were glad to welcome again to this conference; the other, a very interesting address on the Book of Job, by Rev. R. W. Kelly. Pastor Trotter also spoke on the mission of Baptist churches in relation to one another, indicating as fundamental the common conviction and spirit of confidence, unselfishness and helpfulness that should characterize them in voluntary co-operation with one another.

"The dangers and difficulties of the pastor's life" was the subject of an address, practical and pertinent to the inner and real things of life and spirit, by Pastor O. C. Elliott. By reason of the regard and respect with which his office invests him, there is, sometimes, danger that the pastor will arrogate to himself too much of the lord, rather than the spirit and temper of a servant. There is a danger too of being more theoretical than practical and of lacking heart. Instability in the people is one difficulty that meets the pastor. Pastor A. N. Whitman read a good paper on "The Value of, and how to Secure a Good Prayer Meeting," and veterans were roused, and the much neglected prayer meeting became the storm-centre of some very earnest remarks. Good Deacon Turner could not hear and had to be specially informed when the subject was on, then he was heard with much interest and gladness. Pastor T. C. Robinson led in a discussion on special evangelistic work, and under the head of "Every Pastor his own Evangelist," he spoke of the necessity there is in some cases, of the pastor, unaided, except by his own people, engaging in special services. Rev. W. E. Orton in a well prepared paper discussed "Law and Grace" with special reference to the sabbath. While all the statements of the speaker did not meet with the unqualified endorsation of other members of the conference, yet; his thorough and scriptural setting forth of the character of grace was much appreciated and the subject provoked some helpful discussion. The evening meetings are specially designed for the interest and profit of the community with which the conference meets. On Tuesday evening Rev. A. H. Brace conducted a stirring evangelistic service, preaching a sermon on "Redemption" from Rom 3; 24. On Wednesday evening Rev. J. Bastow, in the Spirit of I Peter 3; 15 spoke on "The Distinctive Principles of Baptists," pointing out,—the Bible as the supreme authority, regenerate church membership, baptism by immersion only, independence of the church, and the complete separation of church and state, as the principles of which the Baptists merely as a sect have no monopoly, but for which they distinctively and loyally stand, that they may be the actual inheritance of all the church of Christ on earth. A question drawer closed this service and this meeting of the conference; the committee being instructed to arrange for another meeting in March or April.

FOR WOMEN

Much That Every Woman Desires to Know

About Sanative Antiseptic Cleansing

And about the Care of the Skin, Scalp, Hair and Hands.

Too much stress cannot be placed on the great value of Cuticura Soap, Ointment and Resolvent in the antiseptic cleansing of the mucous surfaces and of the blood and circulating fluids, thus affording pure, sweet and economical local and constitutional treatment for weakening ulcerations, inflammations, itchings, irritations, relaxations, displacements, pains and irregularities peculiar to females. Hence the Cuticura remedies have a wonderful influence in restoring health, strength and beauty to weary women, who have been prematurely aged and invalided by these distressing ailments, as well as such sympathetic afflictions as anæmia, chlorosis, hysteria, nervousness and debility.

Women from the very first have fully appreciated the purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety and great economy which have made the Cuticura remedies the standard skin cures and humour remedies of the civilized world.

Millions of women use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for annoying irritations, and ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath and nursery.

Cuticura Resolvent, Liquid and in the form of Chocolate Coated Pills, Cuticura Ointment and Cuticura Soap are sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Australia, R. Towns & Co., Sydney; Boston, 137 Columbus Ave. Potter Drug & Chemical Corp., Sole Proprietors.

Send for "A Book for Women."

THE CHURCHES.

ALL SAINT'S CHURCH.

There will be a celebration of the Holy Communion on Sunday at 8.30 a.m. The harvest festival music will be repeated in the evening.

ST. PAUL'S CHURCH.

Rev. Dr. Torrance will have charge of the morning service at 11 o'clock, and Rev. J. A. Wilson the evening service at 7 o'clock. Mrs. K. Eardley Wilmot will sing at St. Paul's church in the evening.

ST. PAUL'S MISSION.

Rev. J. A. Wilson will preach at 11 a.m., and Rev Dr. Torrance at 7 p.m.

ST. JOHN'S CHURCH.

St. John's Harvest Thanksgiving Festival services will be continued to-morrow, with special music. St. John's Bible Class will re-assemble to-morrow afternoon at 3 o'clock in the Guild Room.

MURRAY STREET BAPTIST.

The pastor, Rev. J. Bastow, will preach both morning and evening; in the morning upon "The Distinctive Features of Baptists," and the evening theme will be "Friendship." The public will be heartily welcomed. The Sunday school and Bible Classes will meet at 3 o'clock.

PARK STREET BAPTIST.

Subject for the evening service to-morrow, by Rev. A. H. Brace, "The Darling Attribute." At the close of sermon the ordinance of Baptism and the Lord's Supper will be observed.

CHARLOTTE STREET CHURCH.

The Rev. J. Ferguson of Belleville, will conduct both services to-morrow morning and evening. All are welcome.

GEORGE STREET METHODIST.

At the George street Methodist church to-morrow evening. Mr. Mulligan will sing the solo, "Now Heaven in fullest Glory Shone," from Hadyn's "Creation."

ST. ANDREW'S CHURCH.

The fifth anniversary of the organization of the Young Men's Guild of St. Andrew's church, will be conducted by the Rev. L. D. McLeod, D.D., of Barrie. Dr. McLeod is deeply interested in the Guild work and will especially address young men in the evening; subject, "Supremacy of Conscience."

At the morning service Miss Miller will sing, and in the evening Miss Miller and Miss Nellie Davies will both assist in the service of praise. Seats are free; strangers welcome.

ST. LUKE'S CHURCH.

A meeting of the Decoration Chapter and Chancel Guild will be held in St. Luke's vestry on Monday afternoon at three o'clock, to arrange for the decorations on the occasion of the Harvest Festival. A large attendance is asked for.

When you do not relish your food and feel dull and stupid after eating, all you need is a dose of Chamberlain's Stomach and Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by all druggists.

THE LATEST NEWS OF LOCAL SPORT.

RUGBY.

The Britannia Rugby team will practice this afternoon at 5 o'clock in the T.A.S. grounds.

• • • •

A meeting of the T.A.S. will be held on Monday night to organize a junior rugby team. All those interested will no doubt be in attendance.

• • • •

Captain Crowley of the Peterborough rugby team would like to meet all rugby players who have lately come to town.

TURF.

The prospects for a successful programme of races at the Peterborough Industrial Fair are very bright. Word has been received that two fast horses, now at the Woodville races, will be here next week, "Aloyanium Boy," who has a mark of 2.19 1-4, owned by Burns & Shepherd, of Toronto, will start in some of the events here; also "Looking Glass," formerly owned by Dr. Foran.

• • • •

At the track yesterday "Sphinx B." had a good work out, doing four miles in 2.26, 2.22, 2.21 1-2 and 2.20, respectively. "Hal. Forest" was also in harness and did four miles in heats ranging in time from 2.25 to 2.20.

• • • •

"Prince Hal. Jr." yesterday went the half mile in 1.06.

• • • •

The Turf Club will this fall level the grounds facing the Grand Stand at the track and when this has been done the greatest obstacle in the way of holding games in town will have been overcome. At the Rugby meeting last night, Mr. Rountree, on behalf of the Turf Club, offered to make an effort to have the grounds in readiness for the scheduled Rugby games this season, should the Club decide to hold them on the track. It was pointed out that the difference in the distance from the corner of Hunter and George streets to the Track and to Nicholls Oval, is not more than 300 yards, and it was thought that arrangements could be made with the liverymen to run a 'bus service to the grounds. At any rate the Turf Club has shown its interest in the game by making the offer and it is to be hoped that some arrangements may be made.

METHODIST GUILDS' ANNUAL MEETING.

Charlotte Street Y. M. G. Elected New Officers Last Night.

The annual meeting of the Charlotte Street Young Men's Guild was held last night and the following officers were elected:

Hon. Vice-Pres—Mrs. R. J. Kidd.
Hon.-Pres—Rev. W. J. Jolliffe,
President—Mr. Wm. Galbraith.
Vice.-Pres.—Mr. R. P. Dormer.
Rec.-Sec.—Mr. C. E. Brown.
Corres. Sec.—Mr. E. Cart.
Treasurer—Mr. A. Fife.
Councillors—Messrs. R. Orr, H. Goodwin, R. D. Morrison.
Pianist—Mr. A. Frowde.

The following gentlemen were elected chairmen of the several committees:
Musical Committee—Mr. A. Frowde.
Lookout Committee—Mr. W.L. Gowie
Religious Committee—Mr. A. W. Irwin.
Literary Committee — Mr. W. J. Robinson.
Social Committee—Mr. A. Brown.
Sports Committee—Dr. Jeffs.

The entertainment committee reported having made an engagement with the Killin-Keough Concert Co., for the Opera House on October 9th.

After the regular business had been transacted Rev. Mr. Jolliffe gave a short address on the Physical and Moral Development of Young Men, while Mr. Dormer gave a brief history of the Y. M. C. A. in Peterborough, its aims and objects, and made a strong appeal for new members, as it was the object of the Y. M. C. A. membership committee to double its membership this year.

During the evening Mr. Archie Frowde favoured the guild with a number of vocal selections.

The meeting closed with the pronouncing of the benediction by Rev. Mr. Jolliffe.

DISSOLUTION OF PARTNERSHIP

The partnership in the implement business heretofore carried on by Henry Owens and J. W. Caldwell in the Town of Peterborough has been this day dissolved by mutual consent. All liabilities of the said business will be discharged by the aforesaid Henry Owens to whom all accounts due the said firm are payable.

HENRY OWENS,
J. W. CALDWELL.

MEN COME IN FROM MINES.

Directors of Lake Superior Company Meet To-Day at New York and Only Solution Seems to Be Sale of Property to Satisfy Speyer Claim—Stockholders May Press For a Receivership.

Sault Ste. Marie, Mich., Sept. 21.—The shutting down of the Consolidated Lake Superior Company's plants, shutting off $7,000 a day in wages alone, has caused a panic in the Canadian Soo, which is in a worse condition than ever before in its history. Many people are preparing to leave that city at once, while merchants are curtailing their stocks and preparing in every way to get through the winter in the best possible manner with the least expense.

A special train left Saturday night up the Algoma Central Railroad for the purpose of bringing in the 1,600 or more men employed in the woods and mines. They are expected today, and not a man of them will have a penny with which to buy food or lodging. The company will pay the men in checks, which will be good for nothing until money has been raised and deposited.

The feeling of the people is that, with so large a number of men turned loose in the city, hungry and ugly, and with no money, the situation will be dangerous. A guard has been placed around the office of the paymaster of the company, and the people are making desperate efforts to arrange means for feeding and housing the men until they can be taken out of town.

Meeting of Directors.

Philadelphia, Pa., Sept. 21.—A meeting of directors of the Consolidated Lake Superior Company, to be held to-day in New York, is expected to bring another crisis in the affairs of the entangled corporation the only way out for the company now seems to be a sale of the property to satisfy the claim of the syndicate headed by Speyer & Co., which advanced $5,050,000 several months ago to put the company on its feet. There have been rumors that Speyer & Co. are interested in the formation of a syndicate to organize a new company, and after a sale of the assets to let the Consolidated Lake Superior stockholders in again. Stockholders of the company will, however, doubtless carry the matter into the courts and press for a receivership, in which event any scheme for a new company would be of no avail.

RETURNING FROM MINES.

Soo Filling Up With Men Who Went Their Back Pay.

Sault Ste. Marie, Sept. 21.—The situation in the Consolidated Lake Superior Company is unchanged. The public do not yet seem to have come to a full realization of the blow, but they will before long, and each day will intensify the pressure.

The monthly pay roll of the company for some time past has averaged from $180,000 to $150,000, and in addition thousands of dollars have been disbursed locally for camp and other supplies. The cutting off of those large amounts without a day's warning is therefore a bad slap in the face for everybody.

So many sad cases of distress are already coming to light that at the Mayor's suggestion it is proposed to form a committee to furnish relief to those who require it the most.

On Saturday afternoon 150 men came in from the charcoal furnaces. Some of them had three months' pay due them, and they were out upon the street, the majority without a cent to buy even a loaf of bread. They laid siege to the general office and the special policemen who had been sworn in to meet the emergency found difficulty in keeping them in control. Finally, Mr. Coyne, the assistant to the general manager, issued orders to provide stretchers for them in the street railway car shed, and they were furnished with food from a supply that the company has on hand.

Residents of the Sault are banking a good deal upon F. G. Clergue being successful in enlisting English capitalists to take over the works. A trio of London, Eng., steel and iron men, A. H. Harvey, A. W. Wilson and T. Bullock, were here for some days going over the various departments at the works. With Mr. Clergue they left yesterday for New York to take the boat for Liverpool. They will lay their report before a London syndicate.

At the International Hotel word was received to reserve accommodation for Mr. Jessop, the big English steel manufacturer, and party, who are expected to arrive here to-day. It looks very much, therefore, as if English capital may be enlisted to once more set our industries going, and that for their rehabilitation Mr. Clergue would be mainly responsible.

Premier Ross' Views.

Toronto, Sept. 21.—Premier Ross was seen on Saturday in regard to the closing down of the works at the Soo. He very much regretted the suspension of the works, he said, but expressed the utmost confidence that it was merely temporary. The amount of capital invested was too large to admit of a permanent closing of the works, and the enterprise was happily so situated that it could not fail ultimately to be a success. "The Helen mine and the other mines under the control of the syndicate have been thoroughly tested and the quality of the ore which they produce is so well known that there could be no failure ultimately on that score."

The action of the Dominion Government in proposing a duty on steel rails, together with a bounty for the manufacture of steel would indicate that under ordinary conditions the steel works would be very profitable. All the other enterprises depending upon the supply of pulpwood or of hardwood produce the materials greatly in demand in local and foreign markets, and were it not for the stringency in the money market in the United States there is no doubt the work would have gone on without any interruption. The reports of the experts have shown, with the exception, perhaps, of the railway, that they are really revenue-producing, and probably the loan made by Speyer & Company of New York, has been one of the causes for the suspension.

Mr. Ross hopes that the people of the Soo, who are more immediately affected, will not be discouraged by this temporary interruption of one of the greatest enterprises ever undertaken in Canada.

Hamilton Girl May Die.

Hamilton, Sept. 21.—Fanny Capes, aged 19, is lying at point of death in the City Hospital as a result of being hit by a stone thrown by John Mulholland. Boys had been teasing Mulholland and he chased several girls into the yard of 17 Bold street, and when Mrs. Marcey, who lives at that address, went to close the gate on him he threw the boulder at her, but it missed and struck the Capes girl, tearing part of her ear away and inflicting a deep gash in her skull.

Wrecked Near Cape Ray.

St. John's, Nfld., Sept. 21.—The French fishing vessel Aiglon was wrecked at Cape Ray within two miles of the spot where the British steamer Topaz was wrecked Saturday. The crew escaped. Another French fishing vessel, the Alliance, stranded at Miquelon yesterday. Her crew was rescued.

Verdict For the Defence.

Owen Sound, Sept. 19.—The case of Matthew C. Beckett v. A. G. Mackay, for slander, the jury, after deliberation of an hour, brought in a verdict for the defendant, and the action was dismissed without costs. The jury stated in their verdict that the slanderous words used in connection with Mr. Beckett were not sufficiently so as to warrant any damages.

Did Son Shoot Father?

Napanee, Sept. 19.—Hiram Smith, 20 years of age, is under arrest, charged with shooting his father, Stephen Smith, a U. S. pensioner, in the thigh. Both had been drinking and quarrelling.

RIVER BOAT BURNED

Three Passengers Dead and Many Seriously Injured.

MATE STUCK TO THE WHEEL

While Pilot House Blazed He Bravely Held to His Post and Beached Steamer—Two of the Crew Crazed by Fear and Jumped Overboard—Five Caught in Cargo of Hay and Burned Rapidly.

St. John, N.B., Sept 21.—The river steamer, David Weston, running between St. John and Fredericton, caught fire on her downward trip Saturday afternoon, and in an incredibly short time burned to the water's edge. Three of the passengers are dead, and many seriously injured. That any escaped is due to the high courage and presence of mind of Mate William Whelpley, who, with the pilot house wrapped in flames, stuck to the wheel until the steamer was beached. The dead are:

Etta Morrill, a waitress, crazed, jumped overboard.

Stephen Rowen, boy passenger, drowned in the rush to escape; trampled on by others.

Frederick Downie, deck hand, paralyzed by fright, would not be saved.

The steamer carried a large cargo of hay amidships, and it is supposed children playing there set it on fire. As soon as the alarm was given the boat's head was turned for the nearest shore. Within three minutes the whole middle section was a mass of roaring flames. The pilot house, with the mate, was almost in the midst of the furnace. The passengers, about forty in number, clustered in frantic, panic-stricken groups fore and aft and watched the race that meant life or death for them.

One girl, Etta Morrill, a waitress on the boat, mad with fright, jumped overboard. No stop could be made and she drowned quickly. Capt Day's coolness and encouraging words kept the passengers from similar desparation.

When the boat was beached, near Westfield, 10 miles from St. John, frenzied people jumped over into the shallow water and trampled and fought each other on their way to shore. The stern of the boat was in deep water, and the only boat not burned was launched and saved most of the people who jumped from there.

The mate escaped from the pilot house badly burned, but stayed on board and helped the last of the women and children ashore before he was carried away.

Stephen Rowen, a little English boy visiting here, jumped over and was drowned in the rush, and Frederick Downie, a deck hand, paralyzed with fright, refused to jump into the boat sent to rescue him and clung to the paddle box till the flames seized him. These two bodies are not recovered.

Killed Relative and Self.

Buffalo, N.Y., Sept. 21.—James Mears, 70 years old, yesterday fatally wounded his son-in-law, Michael Crotty, 35 years old, and then sent a bullet through his own brain, dying instantly. Family quarrels were the cause of the crime.

Wife Follows Husband.

Paris, Sept. 21.—James L. Ferriere, a well-known newspaper man of New York, died here yesterday, as the result of a paralytic stroke. His wife, in a fit of distraction soon afterwards, took her life.

Perished in the Flames.

Ottawa, Sept. 21.—Lorenzo Chouinard, aged 16, of Wright's, Hull, was burned to death Sunday morning. He was alone in the house when the building took fire and he perished in the flames.

TARTE AT LAPRAIRIE.

Course of the Ex-Minister Severely Criticised by Messrs. Bourassa and Monet —Torrent of Personalities.

Laprairie, Que., Sept. 21.—A rather interesting political meeting was held here Saturday evening, when Hon. J. Israel Tarte, on invitation from Mr. D. Monet, M.P., for Napierville and Laprairie, crossed swords with Mr. Henri Bourassa, M.P., and Mr. Monet. It developed into a torrent of personalities, centering on the withdrawal of the late Minister of Public Works from the Laurier Cabinet, and his subsequent conduct of La Patrie, which, it was insinuated, had been misappropriated to further Conservative interests. A pamphlet was distributed among the crowd, which numbered several thousands. It dealt with Mr. Tarte, saying that no prestidigitateur, however famous, no equilibrist, however celebrated, no juggler, past or present, had ever rivalled the slipping and balancing acts on political strings performed by "Israel of the Tribe of Judas."

Mr. Tarte's speech was largely a repetition of his high tariff utterances, and took in no new matter. His ready responses were quite entertaining.

Mr. Monet dwelt upon Mr. Tarte and La Patrie, and accused the ex-Minister of inconsistency and desertion.

Mr. Bourassa attacked Mr. Chamberlain and Imperialism, and called Mr. Tarte the Colonial Secretary's apostle in Canada. The Chamberlain idea was destructive of Canadian autonomy, he asserted; it was conducive of the abrogation of rights which the people of the Province of Quebec held sacred. Protection to a greater extent than now obtains means the creation of trusts. He was especially vigorous and effective in quoting Mr. Tarte's recorded views of the days gone by against Mr. Tarte's recent utterances in La Patrie and on the hustings.

Six Miles Under Water.

Portage, Wis., Sept. 21.—The Wisconsin River reached a stage of 12.2 feet at the Government lock at noon yesterday, when the city levee on the west side of the river broke, and the entire district between the Wisconsin River bridge and the Baraboo River, covering a space of six miles, is one sea of water. Farm residences in the district are surrounded and hundreds of acres of potatoes, corn and millet are ruined.

Big Building Combine.

Chicago, Sept. 21.—Industrial combinations that have raised the price of materials and caused the postponement of the erection of many large buildings in Chicago, will be investigated this week by the September grand jury. Complaints of the existence of pools in all lines of the building industry will claim the attention of the examining body.

Chief of Police a Forger.

Salem, Mass., Sept. 21.—An indictment for forgery has been returned against Edward H. Oakes, chief of police of Revere, Mass. Oakes is charged with the forgery of a note purporting to have been signed by A. W. Gore, a Boston merchant.

85 degrees in the shade yesterday.

A little Sunlight Soap will clean cut glass, and other articles until they shine and sparkle. Sunlight Soap will wash other things than clothes.

FIGHT AGAINST NOXIOUS WEEDS.

Dominion Legislation in the Interests of Farmers.

To Destroy one of the Worst Foes of Successful Farming.

We read in Grecian mythology of a contest between Hercules and the giant Antaeus, son of Mother Earth, and famed for his strength and skill in wrestling. Although Hercules was able to throw his antagonist to the ground, from each fall Antaeus would rise from mother Earth stronger than before. Hercules finally killed him by lifting him from the ground and squeezing him to death. The struggle of the farmer to free his fields from the domination of noxious weeds has been appropriately likened to that of the Greek Fable. Everyone who is interested in Agriculture knows well the great extent to which weeds exist in our cultivated lands. Hitherto our farmers have been about as successful in their fight against weeds as Hercules was in th earlier stages of his contest with Antaeus. They have been fighting away blindly, treating all kinds of weeds in the same way, with the result that some weeds are killed, some are merely kept in check and some flourish and increase. If they are ever to be eradicated entirely, their habits of growth, their strong and weak points, must be studied by the cultivators of the soil, even as Hercules studied the weakness of his adversary.

During the last year or two a good deal has been done by the agricultural departments through the medium of the newspapers, bulletins, and agricultural meetings to disseminate information on this subject. The process of education, however, is necessarily slow, and it seems to be the general opinion of progressive farmers, as revealed by the farmers' institute meetings all over the country, that the time has come when a herculean effort must be made to lift this giant of weed domination from the earth and destroy it. This is why the bill regarding "The Inspection and sale of seeds," recently introduced by the Hon. Sydney Fisher, was pronounced by Mr. Girard of Chicoutimi and Saugenay to be "the most important that has ever been submitted to Parliament in the interest of farmers."

In explaining his bill to the committee of two whole, the Minister of Agriculture pointed out that extensive tests by the seed laboratory of his department had revealed a rather startling state of affairs in connection with the seed trade of the country. The investigations showed that in many instances a large proportion of the seed sold would not grow; in other cases samples contained a large amount of dirt and other inert matter. This condition of affairs was bad enough, but it was comparatively unimportant in view of the fact that many samples of grass and clover seeds were found to be foul with the seeds of noxious weeds, which can only be eradicated from the soil by years of labour. One could well understand the incalculable loss inflicted on the farmers of the country in that way. In other countries efforts have been made to protect the farmers from the results of the trade in bad or impure seeds. In England, in Germany, in Switzerland and in other countries attention had been directed to the matter, and various forms of legislation had been adopted. In some of the states of the Union, in Manitoba, and in the North-West Territories the magnitude of the evil had been recognized, and efforts had been made to lessen it by legislation, but no general attempt had yet been made to grapple with the evil. The proposed bill, which requires that seeds offered for sale be tested for purity and vitality and graded according to quality, was the result of two years' careful study and he did not think it would interfere with legitimate trade. However, he was desirous of having the details threshed out in committee and was quite willing to accept such amendments as the House might deem desirable.

In the course of the discussion member after member, Conservative as well as Liberal, spoke of the seriousness of the weed problem and expressed approval of the principle of the bill. Here are some quotations from Hansard: "I fully sympathise with the object of the bill." (Mr. Clancy.) "This has become a serious matter and I think this step has not been taken one day too soon." (Mr. Fowler.) "I can readily see that it is absolutely necessary that some law should be put in force in order to regulate the sale of such important farm products as seeds." (Mr. Ross, Ontario.) "I regard this as one of the most important measures for our farmers ever introduced in this Dominion parliament." (Mr. Wright) "I admit the desirability of trying to prevent the use of seed containing an admixture of the seeds of noxious weeds." (Mr. Sproule.) "The Minister of Agriculture is to be congratulated in introducing this bill. If he will make this bill workable and succeed in eradicating foul seeds from this country so that our fields will grow nothing but what is sown on them he will double the value of our farms." (Mr. Robinson, Elgin.) "What we want is a law that will in some measure stop the spread of these foul weeds and the depreciation in value of farms all over the country." (Mr. Maclean.) "I am thoroughly in accordance with the purpose of this bill." (Mr. Richardson.) "I think it will have a most decisive effect in checking the the spread of weeds. It would be wasting time to urge this point any further." (Mr. Angers, Charlevoix.)

About the only objections to the principle of the bill were raised by one or two members who *seemed* to have no practical knowledge of agriculture and who failed to realize the gravity of the subject. The details of the proposed legislation came in for considerable criticism, which was to be expected, in view of the fact that it is based upon the systems of seed control which have proved successful in other countries and with which few of the members appeared to be familiar. It was pointed out by Mr. Ross, Ontario, that, as this year's crop of seed will be harvested, threshed and in the market for sale at an early date, it would be impossible for the trade to offer such seed as the bill called for by the first of September, the date specified in the bill. The Minister of Agriculture and the Committee generally agreed with this view, and concluded that it would not be advisable to bring this bill into operation until next year. A similar proceedure was followed in the case of the Fruit Marks Act, the details of which were rather severely criticised on its introduction but which time has shown to be of inestimable benefit to the fruit interests of Canada.

Before the Committee rose to report *progress* the Minister of Agriculture summed up the result of the debate in the following language: I think I have had the advantage of the opinion of the members of the House which I asked for when I first introduced the bill in committee. I am sure that these opinions and the discussions which have taken place this session will not be lost by any means. I trust that as a consequence of the discussion the people who are interested in the seed trade, the farmers who purchase, the men who handle and the dealers who grade the seeds, will study the proposed law, and will give us the benefit of that study, and I trust that, as a result of all this the law will be more perfect than it could otherwise have been made on a first attempt of this kind."

Then Mr. Bruce, of Hamilton, the well-known seedsman and a member of the Opposition, closed the debate with the following words of tribute to the spirit in which the bill had been handled by the Minister: "I desire to thank the honourable Minister of Agriculture for the painstaking and careful way in way in which he has listened to every suggestion that has been offered."

ELECTRICAL FIRES.

The quarterly fire report of the Electrical Bureau of the National Board of Fire Underwriters just issued reports the following summary of fires and casualties due to electricity during the three months ending July 10:—

Twenty-eight fires were caused by the grounding of circuits of which thirteen were on awnings, metal work and roofs of buildings, and ten were on gas pipes.

Reports have been received of twenty fires due to crosses of telephone, telegraph and signal wires with high potential circuits.

Five fires were occasioned by open link fuses not enclosed in cabinets.

Ten fires are reported as due to short circuit in flexible cords.

Ten fires were caused by lightning, in four of which the lightning entered over wires, and in two cases over sprinkler pipes.

Five fires were occasioned by overheated rheostats, two of which were on electric cars.

Three fires were due to overheated pressing irons.

Five fires in show windows are reported.

Reports of one hundred and twenty-eight electrical fires, losses aggregating $471,700, have been received during the last quarter.

Reports have been received of one hundred and forty-four fires losses aggregating $833,400, supposed to have been due to electricity, but they are not included in this report, as the causes could not be definitely proven as electrical, principally because the fires destroyed the conclusive evidences of their origins.

Forty fires, losses aggregating $146,500, reported as due to electricity, during the last quarter, have upon further and more reliable investigation, been found to have been due to other causes. Of these:—A $17,000 loss, a $10,000 loss and a $6,000 loss are attributed to sontaneous ignition; a $4,000 loss was caused by a lighted pipe in a coat pocket: a $10,000 loss was caused by a boy playing with fire. Other fires attributed to electricity were found to have been caused by rats and matches, a gasoline, a boiler, charcoal, etc.

Dominion Iron and Steel Co., and Dominion Coal Co.

After prolonged negotiations an agreement has been arrived at between the Dominion Iron & Steel Company and the Dominion Coal Company, respecting the terms under which their interests are to be separated, chiefly respecting the surrender of the Coal Company's lease.

The agreement is stated to be that the Coal Company is to pay to the Iron & Steel Company $2,635,000, is to assume the current liabilities for wages, supplies, etc., of the coal department of the Steel Company's business, and is to receive the benefit of the cash assets of the business, consisting of accounts receivable, coal on hand and in transit stores. It is estimated that the net amount the net value of these assets would be about $1,500,000, so that the Coal Company, under this agreement, will pay $1,100,000 to the Iron & Steel Company, for the surrender of the lease and revision of the contract for supply of coal. By the management above out-lined the Iron & Steel Company secures the release of the capital it had engaged in the Coal Company and the obligations it had undertaken in connection therewith. As those are stated to amount to $2,635,000 the company will have a supply of capital for completing its works at Sydney and making extensions, from which advantages the best results are anticipated.

A new contract for a supply of coal has been arranged with is reported to be mutually satisfactory.

So much is involved in the Sydney *iron and steel enterprise*, both of capital and the future of these industries of this class in Canada, that universal satisfaction will be expressed at the new conditions being the prelude to an era of prosperity.

THE GRAND TRUNK PACIFIC.

The Tory bosses having signally failed to advance any valid reasons for their objections to the Grand Trunk Pacific bill in the House, are now circulating petitions asking Parliament not to act on it. The scheme is intended for electioneering purposes, and savours largely of farce, and it is very improbable that Parliament or the Government will give any heed to such a transparent device.

When Mr. W. F. McLean declared that the Grand Trunk Pacific scheme was so advantageous that it would have the support of every province in the Dominion, using that as a reason why the Opposition should delay the bill so as to stave off an appeal to the country, he bore testimony to the Government's wisdom and foresight. The people of all the Provinces are wiser than any coterie of Parliament; they are the final legislators.

The Halifax Recorder styles Mr. Borden "member for Portland." He has at least won the applause of that Maine city by his opposition to the Canadian transcontinental railway.

The statement of Mr. Borden, that in the United States more than 75 per cent. of the grain crop is carried by the water routes, has been *effectually disproved* of by Hon. Mr. Fisher, who showed by Chicago Board of Trade reports in 1900, 1901 and 1902 the totals of grain and animal products for the three years that were carried by all rail were considerably in excess of what went by rail and water, with but one exception. The exception was in 1902, when 1,760,000 tons of grain were shipped by rail and water, and 1,609,000 tons by all-rail, the only time shipments of grain by rail and water exceeded the tonnage by rail. The grand totals for the three years were 7,720,000 tons by rail and water, and 12,298,000 tons by all rail.—Hamilton Times.

MORE POSTS VACANT

Lord Balfour of Burleigh Leaves the Cabinet.

WITH HON. ARTHUR R. ELLIOT

Four Cabinet Positions and One Secretaryship For Premier Balfour to Fill, and His Efforts to Keep Ministry Going With Remnants Excite Laughter—Dissolution Inevitable Before End of Summer.

London, Sept. 21.—Lord Balfour of Burleigh, Secretary for Scotland, and Arthur Ralph Douglas Elliot, Financial Secretary of the Treasury, have resigned, and their resignations have been accepted by the King. Mr. Elliot was not in the Cabinet. These two resignations make a total of four vacant Cabinet posts and one secretaryship at Mr. Balfour's disposition.

Hon. Mr. Elliot is a Liberal Unionist, and sits for the City of Durham, which is a close constituency. He is editor of The Edinburgh Review, and is also a Scotchman.

Lord Balfour of Burleigh, is a strong Conservative. He was born in 1849, and is one of the largest landowners in the United Kingdom. He holds 3,000 acres. He is a Scotchman.

Dissolution Inevitable.

Mr. Balfour's efforts to keep the Ministry going with remnants only excite laughter. With Mr. Chamberlain and his 150 members of Parliament let loose in the constituencies armed with a definite policy, dissolution is inevitable and probable before the end of next summer. Unless past experience is to be belied, there will be the bitterest fight of this generation. With Mr. Chamberlain every man who is not an avowed friend is an enemy to be hit above or below the belt. No one has forgotten his recent election cry, "Every vote given for the Liberals is a vote given for the Boers," and for the first time in his career Mr. Chamberlain has no compeer and much less leader to restrain his zeal.

Four Distinct Camps.

Mr. Balfour and Mr. Chamberlain write to each other as though his resignation had made no breach in the party. In truth, the party has been split asunder for two months past. To-day, it consists of four distinct camps. First, the retaliators, under Mr. Balfour; second, the preferentialists, under Mr. Chamberlain; third, the free traders, under Lord Goschen, Sir Michael Hicks-Beach, and Mr. Ritchie; fourth, the wobblers, under nobody in particular. The retaliators and the preferentialists together made up about three-fourths of the party. Mr. Chamberlain is confident that all but an insignificant section of these will come under his banner.

Devonshire Will Remain.

With the resignation of Lord Balfour and Financial Secretary Elliott, both strong free traders, it is understood that the Ministerial resignations are completed and apparently the Duke of Devonshire has decided to remain in the Cabinet.

It is practically certain that Austen Chamberlain, Lord Milner and Mr. Brodrick will take the Exchequer, Colonies and India portfolios respectively, and the only surprise in the new appointments is likely to be the nomination of a strong man to the War Office to determine how far the recommendations of the South African War Commission can be carried out.

Home Secretary Akers-Douglas started for Balmoral to-night, and he will probably be involved in the reconstruction changes.

Tariff Reform League.

As a part of the organization of the Tariff Reform League, a committee of colonial gentlemen, resident in this country, has been formed to secure a full and effective expression of opinion on behalf of colonials here and in the colonies in support of the fiscal proposals of Chamberlain. At the first meeting a resolution was passed, in which the committee expressed its sincere and heartfelt regret that Chamberlain has resigned his position as Colonial Secretary. Sir Charles Tupper's name was added to the committee.

Want Free Trade.

Birmingham, Eng., Sept. 21.—A conference of 330 delegates, representing 240,000 workingmen, members of unions and co-operative societies, was held here Saturday. The conference adopted a resolution expressing belief in the advantage of free trade and condemning proferential tariffs.

Foundered in a Gale.

Grand Marais, Mich., Sept. 21.—In a furious southwest gale which swept over Lake Superior Saturday, the steamer A. A. Parker, laden with iron ore, foundered four miles north of Grand Marais. By heroic work the life-saving crew from the station here saved the entire crew of eighteen men from the sinking ship.

Fire at Kingston.

Kingston, Sept. 21.—There was a big fire near Cataraqui bridge Sunday morning, and the Montreal Transportation Company's machine shops and saw mills, and C. Knapp's moulding shop and a wing of his residence were destroyed. Loss $12,000, with small insurance, especially on the company's building.

To Settle Strikes.

St. Louis, Mo., Sept. 21.—A labor union, the fundamental principles of which are opposition to all strikes, and in favor of settling disputes with employes by arbitration, was organized here yesterday.

Died of Heart Failure.

Port Arthur, Sept. 21.—W. Dawby, aged 79 years, father-in-law of T. H. Keefer, lawyer, dropped dead, of heart disease.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

A SEPTEMBER HOLIDAY.

Peterboro' Industrial Exhibition

TUESDAY
WEDNESDAY
THURSDAY
SEPT. 22-24

Owing to the Liberal and Substantial Subscriptions made by Peterborough Citizens the Directors of the Exhibition Association have been enabled to have the PRIZE LIST thoroughly revised and the amounts offered as Prizes largely increased, particularly in the lines of Horses, Cattle, Sheep and Swine. The advance, in many cases, equals from 100 to 300 per cent. It is expected that the enterprise shown in this respect will ensure an active competition in all classes of farm stock.

SPECIAL ATTRACTIONS:

Farmers' Trot or Pace—1st, 20; 2nd, $10; 3rd, $5.

Open Pace or Trot—1st, $50, 2nd, $25; 3rd, $15; 4th, $10.

The Band of the 57th Regt. will play during the afternoons of the Fair days.

Special Fares and Rates on all Steamboats and Trains.

HON. J. R. STRATTON, Hon. President. D. HUGHES-CHARLES, President. C. B. McALLISTER, 1st Vice-President.

E. M. ELLIOTT, Superintendent. W. J. GREEN, Secretary, Treasurer.

LATEST FASHION NOTES.

RECEPTION GOWN OF PRIMROSE GAUZE

A beautiful reception gown is of primrose gauze, cut decollette. A novel bodice trimming consists of graduated bands of black velvet ribbon, which also appear on the elbow sleeves.

Shirring, done to deep hip-yoke

depth, which is now so popular, being especially effective on thin goods, adds much to the beauty of this gown, which beauty is further augmented by the use of Corticelli sewing silk in the same shade as the goods. The graduated bands of velvet on the skirt, corresponding with those on the waist, complete a most charming creation.

NOTICE OF APPLICATION FOR LETTERS OF GUARDIANSHIP.

Notice is hereby given that after the expiration of twenty days from the first publication of this notice, application will be made to the Surrogate Court of the County of Peterborough for a grant to the Trusts & Guarantee Company, Limited, of Letters of Guardianship of the estate of May Georgina Dunford, George Edwin Dunford and William Charles Dunford, the infant children of the late Albert Dunford in his lifetime of the Town of Peterborough, in the County of Peterborough, carpenter, deceased.

MACEDONIANS MASSING.

Such a State of Anarchy Will Be Caused That Turks Will Retire and Leave Country to Macedonian Survivors.

London, Sept. 21.—The Daily Mail's correspondent at Sofia telegraphs:

"One of the revolutionary chiefs has informed me that they are massing thousands of men at various points on the frontier, and their laboratories are working incessantly to replenish their stock of bombs and explosives. They do not count much on war between Turkey and Bulgaria, but on the day they hear that the meeting between the Czar and Emperor Francis Joseph has not had the desired result for Macedonia, the world will witness the beginning of massacres, burning and destruction compared with which the Turkish atrocities will seem child's play.

"The banner of revolution, my informant says, will be unfurled in all the border districts. The cities and the villages, whether the inhabitants are friends or foes, will be destroyed, and such a state of anarchy will be caused that the Turks will step out voluntarily and leave the country to the Macedonian survivors. We have selected the frontier districts for these final operations, so that Europe may hear the despairing cries of the dying nation which the Turks would stifle."

MARKET REPORTS.

Liverpool Wheat 1-4d Higher and Chicago Wheat 7-8c Lower—Live Stock —The Latest Quotations.

Saturday Evening, Sept. 19.

Brice, 735 boxes for 21c; Hugh Allen, 152 boxes for 20¾c, 95 boxes for 20¼c, and 83 boxes for 20¼c; James Dalrymple, 40 boxes, for 20¼c; all sold.

Cornwall, Sept. 19.—At the Cornwall Cheese Board to-day 2940 boxes were boarded, 1168 white, 193 colored and 86 U.S.; all sold on the board at 12c, except one lot of 90 boxes. The sales were: J. Alexander, 1025; Hodgson Bros., 484; Ayer Co., 365; T. S. Williamson, 25; A. W. Grant, 127.

London, Sept. 19.—Sixteen factories offered 2900 boxes. Sold, 175 at 11¾c, 250 at 12c, 150 at 12⅛c. Bids, 11¼c, 11⅜c, 11½c, 11⅝c, 11¾c, 11⅞c, 11 15-16c, 12c and 12 1-16c.

Just Saved From Starvation.

When in 1891 Miss Balfour was visiting the west of Ireland and studying the condition of the people she asked one of them how they were getting on in a particular village. "Arrah, miss, sure and if it wasn't for the famine we'd be shtarving!"

Two Sides of a Case.

Slowpay—Doctor, I suppose you can recommend your tailor to me?

Doctor—Certainly, but you will have to get some one else to recommend you to my tailor.—Medical Brief.

REIGN OF TERROR.

London Newspaper Man in Monastir Tells the Horrible Truth—Burning of Kastoria Indescribably Terrible.

London, Sept. 19.—As a result of the intervention of the British Ambassador, the decree of expulsion has not been enforced against The Daily Mail's correspondent at Monastir, who, under the date of Sept. 16, telegraphs:

"A veritable reign of terror exists here. Suspected Christians vanish utterly, presumably to prison. Spies about on every hand. The following are some tales of atrocities which I have thoroughly authenticated:

"The Turks burned 18 children to death in a baking oven at Pisoder, near Atmenko, on Sept. 12. They massacred 300 women and children at Jervas in revenge for a defeat at the hands of the insurgents."

More Turkish Massacres.

Sofia, Sept. 19.—A serious fight has occurred at Ulavitza, in the mountains of Kratovo, between 2,000 Turks and 80 insurgents. It continued for eight hours. The insurgents used bombs with deadly effect. About 100 Turks are reported to have been killed and many were wounded. The insurgents had two men wounded.

A fight is also reported to have taken place at Rupel Paso, near Seres, 48 miles from Salonica.

Further reports from Kastoria say the city is burning and that the massacre of its population (estimated to have numbered 10,000 persons), was indescribably terrible. The Turks slaughtered indiscriminately Bulgarians, and Greeks, men, women and children.

BASEBALL FRIDAY.

Eastern League.

Toronto ....0 4 0 0 0 1 0 0 4—9
Jersey City ....0 1 5 0 0 0 0 3 0—9

Left on bases—Jersey City 2, Toronto 7. First base on balls—Off Mills 1, off Thielman 2. Struck out—By Mills 4, by Barnett 3. Three-base hits—Murray, McCormick and Doolin. Two-base hits—Clements, Cassidy. Stolen bases—Doolin, Rapp. Double plays—McManus and Bean, Rapp to Kuhns. Hit by pitcher—By Thielman 1, by Barnett 1. Wild pitches—Thielman 1, Barnett 1. Passed balls—McManus, Umpire—Swartwood. Time—1.55. Attendance—3500.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

Kitty D. Seizure.

Welland, Sept. 21.—The hearing of the case of the fishing tug Kittie D., under seizure for fishing in Canadian waters, was continued Saturday. The evidence all being taken, argument will be made in Toronto at a later date not yet decided upon. The officers of the Petrel gave evidence which was not very positive as to the exact spot of the seizure, although they contended they were well on the Canadian side of the boundary.

The Lash For Burglars.

Victoria, B. C., Sept 21.—In the Police Court, James Leonard, alias Billy Dunn, alias J. H. Burnett and William Lorenzo, pleaded guilty to the charge of robbery, with violence, at the Western Hotel last Monday night. The former, the man who had the gun, was sentenced to seven years' imprisonment and twenty strokes, and Lorenzo to six years and an equal number of strokes.

Deadlock Broken.

Cayuga, Sept. 21.—The Haldimand County Council compromised after being in deadlock for three days and a half over the appointment of a County Clerk, by selecting R. F. Miller, County Councillor for Rainham, clerk pro tem, in order to do business which had to be attended to.

FIRE OF QUESTIONS.

Commissioners Aroused by Canada's Argument.

THE TESTIMONY OF THE MAPS

Attorney-General Sir R. Finlay Says They Support the British Contention—Meaning of Various Words Important to the Issue of the Case—Coast and Ocean, "Tide Water" and "Salt Water."

London, Sept. 19.—(A.P.)—When the Alaskan Boundary Commission resumed its sessions yesterday, Attorney-General Finlay was subjected by War Secretary Root and Senators Lodge and Turner to a fire of questions in connection with his attempt to show that the boundary should run from the head of Portland Canal directly westward to the point where the mountains, claimed by the Canadians as the boundary, intersect the 56th parallel of latitude. The contention of the United States is that the boundary continues up to Bear River Valley from the head of Portland Canal to the 56th parallel.

Mr. Root asked if it was not natural to suppose that the signatories of the treaty intended the line to follow this pass to the 56th degree? The Attorney-General replied that the line, under the treaty, could not run farther than the water canal and from that point must seek the mountains at the 56th parallel.

The Attorney-General passed during the afternoon to the discussion of the location of the line from the 56th parallel to Mount St. Elias, asserting that if the contention of the United States, that the boundary should go around the heads of inlets was admitted, then correspondingly Canada should gain by the tribunal deciding that the line should follow ten marine leagues from the shores of peninsulas.

CANADIAN ARGUMENT TELLS.

Sir R. Finlay Continues His Able Speech in Canada's Behalf.

(Canadian Associated Press.)

London, Sept. 19.—When the Alaskan Boundary Tribunal assembled at 11 yesterday morning, the Attorney-General, Sir Robert Finlay, in support of his argument that the boundary should run up Vancouver's Portland Channel, dealt with the maps subsequent to the Treaty of 1825, referring first to the Russian map of 1826, which affords but little indication of the boundary. Arrowsmith's map of 1833 is partly for, partly against, the British contention, Wales and Pearse Islands being colored Russian, but Portland Canal is drawn as running down to the sea. The French map of 1833, prepared by Bruc, gives Wales Island to the Russians, but Pearse to the British. Observatory Inlet is carried down to the sea. Tanner's map, prepared at Philadelphia in 1839, shows both channels running down to the sea. Greenshow's map, with 44th parallel marked, likewise carries both Portland Channel and Observatory Inlet to the sea, and carries the boundary north of Wales and Pearse Islands.

A French Authority.

A French map from the Foreign Office, drawn in 1844, shows Portland Canal running down to the sea, and gives Wales and Pearse Islands to Great Britain. The Russian official map of 1844 shows each channel running to the sea. The official map of 1849 shows the Northern Channel very distinctly. Bouchette's Canadian map of 1853 shows both channels in one, and has words Observatory Inlet running out into the sea. A map of 1857, used by Sir Geo. Simpson before the House of Commons, shows the names of Portland Canal and Observatory Inlet going to the sea, as does the Russian map of 1861. The Admiralty charts of 1863 are marked as "not surveyed," and styles Observatory Inlet and Portland Inlet, which designation is the first which appears on the Admiralty charts of 1853. Imrie's map of 1869 shows Portland Inlet and Portland Canal on the western side in clear type, and Observatory Inlet in small type. At the head of the inlet at Dawson the Canadian map of 1880 shows the name "Portland Inlet," but colors the disputed islands British. The Canadian biological map of 1879-80 calls Observatory Inlet "Portland Inlet," and runs the boundary up to it.

Favors Great Britain.

Three maps prepared by Ivan Petroff, the special agent of the United States in 1880 to '82, shows the boundary from Prince of Wales Island as a wavy line not pointing to follow a parallel of latitude, and on a second map this line passes to the north of Wales and Pearse Islands.

The Attorney-General, while not wishing to attach much weight to these maps, contended that the weight of their evidence was in favor of Great Britain, whose contention is that the line should pass from Prince of Wales Island by the shortest way to the north of Vancouver's Portland Channel, north of Wales and Pearse Islands, which should be declared to belong to Great Britain. He then passed to the fourth question, which he stated seemed to him to be based on a misconception of the negotiators, who assumed that Portland Channel went up to the 56th parallel, which it does not.

Coast and Ocean.

Attorney-General Finlay quoted from the negotiations preceding the treaty of 1825 in support of his view, and asked the tribunal to answer the fourth question by deciding that Portland Canal and the point on the 56th parallel where mountains are found, should be joined by the most direct line. He then proceeded to discuss the last three questions of reference, and with regard to the fifth and sixth (see treaty of 1903), he said the United States contention was that Russia was to have a continuous strip of coast running round all the inlet and that Great Britain was to be at every point excluded from the sea. To that view he asked the tribunal to return a decided negative.

Answers to these questions, which are closely related, depend largely upon the true meaning of the words "coast" and "ocean" in the treaty. He contended that "coast" meant the general outline of continental shore, and that it could never have been meant to call heads or narrow inlets running hundreds of miles inland "ocean." He instanced the case of Russia forbidding the approach of a ship 100 miles from the coast, and asked could the skipper of a vessel lying off the mouth of the inlet urge that he was outside the forbidden distance because he was more than one hundred miles from the head disputed.

There is an implication in the United States' case that "tide-water" and "salt water" are synonymous terms. He illustrated this by reference to the Thames and other large rivers. He questioned the analysis of "coast" in the United States' case, and declared that the meaning depends upon the circumstance in which the word is used.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address

Some Odd Ears.

In human beings the two ears frequently do not match, though, as both cannot be properly seen at the same time, this defect usually escapes our notice. The same thing is true to some extent of monkeys and quadrupeds, and owls have one ear directed upward and the other downward, which enables them to hear both above and below as they fly.

Taking the word "ear" in a broader sense, there are some animals which possess two kinds of these organs. A fish, for example, has a pair of ears imbedded in its head, and also a peculiar streak—the lateral line—running down each side of the body, which appears to perform some of the functions of hearing, as it is concerned with the detection of movements in the surrounding water.

The two feelers which project from the head of an insect are almost certainly auditory organs, and when these are supplemented by ears of another kind we can say that the ears are not all alike.

Grasshoppers and locusts have extra ears in their legs, and the common house fly has a pair of little club shaped projections behind the wings (balancers) which probably help it to hear. —Stray Stories.

Odd Death of a Bird.

A curious instance of bird death is recorded by W. E. D. Scott in his "Story of a Bird Lover." He tells a story of a kingfisher who was shot, pursued his flight, apparently unhurt, for 200 feet, and then dropped dead. Still, when the body was examined there was no mark of a wound upon it, which gave rise to the possibility that a wild bird could be frightened to death. "I have seen the same thing happen many times since," continues the story. "I know now the reason for this. A single shot striking a bird in flight, penetrating the thin side of his body and entering his lungs, makes a very small hole, and no external hemorrhage ensues. There is little or no shock to the bird. I fancy he hardly feels pain, but presently the internal hemorrhage from the great blood vessels that have been severed makes him suddenly unconscious, and in a moment he is dead. The time, however, between the penetrating of the shot and the internal hemorrhage is sufficient to allow the animal to travel a very considerable distance seemingly uninjured."

UNION LABEL

Daily Examiner.

MONDAY, SEPTEMBER 21, 1903.

George St. Guild.

The Young Men's Guild of George street church will meet to-morrow evening at 8 o'clock in the lecture room of George street church. As this is the first meeting of the season a good turn-out of the members is expected. Besides a good musical programme which has been prepared, the annual election of officers will take place and plans will be discussed for the coming fall and winter's work.

NARCISSUS BULBS FOR SALE.

Orders left at Ormond & Walsh's. $2.00 a hundred.

Fire on Park Street.

A fire on Saturday night about 9.30 o'clock, occurred in the stables of Mr. Bolton, Park street, at the extreme southern end of the street. The brigade was quickly on the scene but owing to the distance from the nearest hydrant were somewhat handicapped, but succeeded after an hour's work in saving the house. A portion of the kitchen was burned, and the sheds and stables completely destroyed. The blaze lit up the whole southern heavens, and a large crowd was attracted to the scene

A Runaway.

A runaway which might easily have resulted disastrously occurred this afternoon. A horse driven in a single buggy by a lady, became unmanageable, and dashed along Hunter street across the bridge, when coming opposite the Peterborough Mattress Company's warehouse, the horse attempted to pass between two posts, the space between which being too limited to allow the buggy to go through, the latter became fast, while the horse, breaking the harness, extricated itself from it and ran some distance further, where it was caught. The lady driver showed great pluck and remained in the buggy. She, luckily, was unhurt, and the buggy sustained but slight injury.

BIRTHS.

HASKILL.—In Peterborough on Friday, September 18th, 1903, the wife of Mr J. D. Haskill, of a son.

LAFFERTY. At Peterborough, on Saturday, Sept. 19th, the wife of Mr. L. H Lafferty, a son.

SADLY SUDDEN DEATH OF MR. EDWARD PHELAN.

He Passed Away This Afternoon at Four O'clock.

His Illness Suddenly Developed a Fatal Character—Funeral on Wednesday at Ten o'clock.

The Examiner regrets to announce the sad fact of the death at four o'clock this afternoon of Mr. Edward Phelan, for three score and ten years a respected resident of this town and county. He has never been in robust health since the death of Mrs. Phelan a year ago, About six weeks since he had an attack of asthma, associated with heart trouble. Hope of his recovery was entertained, but death came this afternoon at four o'clock The funeral will take place on Wednesday morning at ten o'clock.

A MILLIONAIRE'S LIFE IS FAR FROM HAPPY.

Was Proved in the Police Court This Morning.

Chap. 80; Section 8; clause b, (1) of the Act respecting the protection of children, runs as follows: — No child under fourteen years of age charged with an offense against the laws of this Province shall be committed to any gaol or police station or lockup pending trial, nor if so admitted shall any sheriff, gaoler or police official receive any child apparently under the age of fourteen years for confinement in any lockup or gaol commonly used for the detention of adults.

In consequence of this a small boy was not sent to gaol but was remanded to the Children's Shelter for one week for the theft of the sum of $15. His two companions who knew it to be "stolen gold" but who nevertheless helped him to spend it right royally, were discharged with a very severe warning from Police Magistrate D. W. Dumble.

It was learned during the course of the evidence that the three boys, none of whom were over fourteen years of age, on two or three occasions hired a horse and buggy from R. Wolstenholm, liverman, and drove to Lakefield, Chemong and various other aristocratic summer resorts. The Magistrate said that the liveryman in question did wrong in hiring his vehicles to such small boys as he must have known that they could not have obtained the money, honestly. He remarked that it was as bad as receiving money which it was known had been stolen.

NEWS NUGGETS.

—A large number of cattle arrived on the Fair grounds this morning.

—Go to Kennedy's Meat Market for choicest fresh and cooked meats.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. E. Hoover. 'Phone 199.

—The inquiry into the death of Robt. McAuliffe, late G.T.R. engineer, will be resumed this evening in the Council Chamber.

—The Canadian Engineer says that Orillia has let contracts for the extension of its electrical development works to double its capacity the contract for the necessary hydraulic installation going to the Wm. Hamilton Company, of Peterborough.

Is Your Piano in Tune?

The change of seasons affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

CORONERS INQUEST IN OTONABEE.

A Postmortem Examination Ordered and Made.

Coroner's Jury Empannelled by Dr. Gray—Death of a Young Married Woman Under Circumstances Suggesting Investigation.

On Saturday at 11 o'clock Dr. Gray, coroner, was notified of the death of a young married woman, aged about 30 years, under circumstances, which to some minds warranted investigation. Accordingly Dr. Gray proceeded to Zion, Otonabee Township, yesterday, where the deceased person had lived.

After inquiry the coroner considered that an inquest was warranted and a coroner's jury was empannelled, composed of the following:—Joshua Smithson, foreman; Wm. Shaw, Thos. G. Hazlett, Samuel Redmond, Henry Crane, Thos. Hunter, Robt Scollie, Arthur Morgan, Anthony Taylor, John Kindred, Richard J. Swan, Chas. F. Graystock, Richard Nurse, Robt. H. Orde.

After the formal view of the body had been made, and a little evidence taken, a post mortem examination was ordered, the jury meanwhile adjourning till nine o'clock on Tuesday morning, when the inquest will be resumed at Foresters' Hall, Graystock. The post mortem examination was performed by Dr. Shaw and Dr. McWilliams of Keene.

THE CHURCHES.

CHARLOTTE STREET CHURCH.

A pleasing musical service was that rendered at the Charlotte street church yesterday. The morning anthem was "O Lord, Most Holy," Miss Belleghem taking the soprano solo. A duet was sung by Miss Belleghem and Mr. N. Jolliffe, "Guide Me, O Thou Great Jehovah," in a very satisfying manner. In the evening the choir rendered "O Be Joyful," and a solo, "The Good Shepherd," was given by Miss Belleghem. Miss Clarry presided at the organ.

ST. JOHN'S CHURCH.

There was an unusually large congregation at the evening service last night. The Harvest Festival music was repeated, in part. The benefit of rehearsal was shown in a smoother and more effective rendering, the soloists having gained confidence. Mr. Alex. Elliott took the bass solo in the Magnificat in splendid form. Miss Daisy Sawers' singing of her solo was excellent, as was the duet by her and Mr. Morphet. In the offertory hymn, Miss Ruth Dawson's solo was very sweetly and cleverly sung. Altogether good finish and taste marked last night's music.

Miss Nellie Davies sang at the offertory at the morning service, "The Ninety and Nine." The sweetness and roundness of tone, artistic execution, taste and feeling, which marked her singing of this selection, distinguish Miss Davies as a vocalist of high order, not a mere singer, but an artiste, whose musicianly work has only to be heard to be appreciated.

ALL SAINT'S CHURCH.

Rev. Mr. Spencer of Millbrook, conducted the services in All Saints, yesterday, preaching very impressive sermons. The Harvest Festival music was repeated with splendid effect.

Rev. W. L. Armitage preached Harvest Thanksgiving sermons in St. John's and Trinity churches, in the Millbrook parish.

ST. PAUL'S CHURCH.

In St. Paul's church last night, Mrs. K. Eardley Wilmot delighted the congregation with a solo rendered in a very artistic manner. Mrs. Wilmott possesses a pleasing mezzo-soprano voice, which was heard to good advantage in her selection last night.

GEORGE STREET METHODIST.

The pastor occupied the pulpit at the George street church yesterday at both services, and the choir under the leadership of Mr. Mulligan, rendered very effective music at both services. In the morning the anthem was "Thou who like the wind dost blow," while the offertory selection was "The King of Love my Shepherd is," by Shelley, Mr. Mulligan taking the baritone solo.

At the evening service, the music was a conspicuous feature, the anthem being "As Christ upon the Cross," and for the offertory Mr. Mulligan sang, "The Heavens in full-cast glory shone," from the Creation.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Mr Thos. Finley, of Norcood, was in town on Saturday.

Mr D. Grose, of Dayton, Ohio, is in town, a guest at the Oriental.

Rev. E. A. Langfeldt is attending the Rural Deanery Meeting in Lakefield.

Miss Edyth Pearson, of Ottawa, is the guest of Mrs. Leary, McDonel street.

Mr. Percy Longford of Winnipeg, is a guest at the home of his father, Mr. Wm. Langford.

Mr. W. Ireland, of the Parry Sound Star, was in town on a business trip on Saturday and to-day.

Mr. Wm. Pearson, of Ottawa and Mr. Mackie, of North Bay, are at the Oriental Hotel during the week.

Miss Lillian E. Bartlett, of Battle Creek, Mich., who has been in town for the past week, left on Saturday for Brantford.

Mr. and Mrs. Frank LePlante, and daughter, Irene, of Rochester, N.Y., are visiting the former's parents, Rubidge street.

Mr. Raymond Mahoney, who has been visiting his parents in town for the past fortnight, left to-day for Battle Creek, Mich

Mr. and Mrs. Henry Walton of New York, are in town for a few days' visit with Mr. Walton's father, Mr. Robert Walton, 675 Water street.

Mr. Geo. G. Gladman, of Parry Sound is in town and will remain over for the Exhibition Mr. Gladman is the first of the Parry Sound contingent to arrive.

Rev. W. R. Tandy, Rector of the Church of St. John the Evangelist, Havelock, was in town to-day en route for Lakefield, where he will preach the sermon at the meeting of the Rural Deanery of Northumberland. Rev. Mr. Tandy reports progress in St. John's, the congregation having this summer succeeded in wiping off the debt of $500 on the church, to which the liberality of Mr. Henry Johnston, of Hastings, contributed not a little.

BRITISH CABINET VACANCIES FILLED.

King Edward has Approved of Appointments.

Belief that Lord Stanley will be made Postmaster General.

(Special to the Examiner.)

London, England, Sept. 21st.—The St. James Gazette to-day announces that King Edward has approved the appointment of the following named men to the posts in the Cabinet made vacant by resignations: Austen Chamberlain, Chancellor of Exchequer; Lord Selbourne, Colonial Secretary; Arnold Forster, Secretary for War; W. St. John Broderick, Secretary for India. The Gazette adds that it has good reasons to believe that Lord Stanley will be made Post Master General to succeed Austen Chamberlain.

DIED AT MILLBROOK.

Demise of a Highly Respected Resident, Mr. Wm. Redmond.

This morning Mr. William Redmond, a highly respected resident of Cavan died, at the family residence, lot 14, 4th concession of Cavan, about a mile south of Millbrook, after a brief illness, at the age of 69 years. The deceased gentleman was a native of Cavan where he passed his whole life, winning by his good qualities as a citizen and neighbour, the high esteem of the community. Mr. Redmond was a farmer of unusual enterprise and abiolity, his specialty being stock breeding at which he was successful, achieving a provincial reputation for his high bred shorthorns. This is evidently a family peculiarity, for his brother, the late Jos. Redmond, of Elm Grove Stock Farm, Otonabee, will be well remembered for his prominence as an enthusiastic and successful breeder of Durhams. Mr. Redmond leaves behind him a widow and four children, the sons are Messrs. Thomas, Samuel and Joseph, and the daughter, Miss Fanny. Mr. Redmond was a Roman Catholic in religion and the circumstance of his enjoying so high a degree of respect in Cavan, where he passed his life, speaks volumns for his excellent qualities of character. The funeral will take place on Wednesday, and the remains will be interred in the Roman Catholic Cemetry, Peterborough.

COMING TO PETERBOROUGH.

Mr. Lindman, of Montreal, will be at the Oriental Hotel on Wednesday and Thursday next, prepared to relieve sufferers with uncontrollable ruptures. Consultation free. Read the following testimonials:—

Montreal June 22, 1903.

B. Lindman, 130 Peel street, Montreal:

Dear Sir,—I feel it due to you to state in writing the following facts:

For years I suffered from scrotal hernia and after using several kinds of trusses which were recommended to me, I was on May 26, 1902, fitted with one of your well-known trusses, and I after wearing the same for about nine months I was entirely cured and thereupon discontinued the use of your truss and have not, up to the present time, required its use and feel as if I had never been troubled with hernia. I may add that I am now 67 years of age and have never felt better than I do at present.

Yours gratefully,

(Signed) CHARLES TAYLOR

On this 22nd day of June, 1903, before me, the undersigned notary, appeared Charles Taylor, of the city of Montreal, mechanical engineer, to me known, who solemnly declared unto me that the statements contained in the foregoing letter are true and correct.

(Signed) G. P. W. KITTSON.

Montreal July 2, 1903.

John Hamilton, Carpenter and Builder, 249 St. Martin street.

Mr. Lindman:—I have used your truss for six months, and I think it is the best truss on the market, as I tried several before I got yours. I was examined by a doctor and he said I was cured of rupture. I have left your truss off for several days and I think that I am completely cured and I would recommend your truss to any one that is obliged to wear one, as yours has given me great satisfaction.

(Signed) JOHN HAMILTON.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was taking a stroll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

PURSES—Those cute little ones to put inside of hand-bags, at 10c, 15c and 20c.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

S. A. OKE,

Tel. 18, 376 George street.

Fair Opened at Stratton's

The Peterborough Bookstore has a gorgeous outspread for visitors. Those who want to "make hay while the sun shines" will have big opportunities at STRATTON'S. AN INCIDENT IN HARVEY TOWNSHIP.

At the County Police Court This Morning.

At the Court House this morning before County Police Magistrate Edmison, Joseph Stabler of the Township of Harvey was charged with pointing a gun at Robert Shaw and also of carrying loaded arms, a danger to the public welfare. He pleaded not guilty.

George Easson was the first witness called. He said that while going to the post office on August 14th he stopped at Stabler's place. Mr. and Mrs. Stabler were in the yard, the former harnessing a horse into his buggy. Witness heard accused tell his wife to fetch his gun as he wished to shoot someone. (Accused somewhat intoxicated. Witness deeming discretion the better part of valour, immediately left. It was then about 2 o'clock in the afternoon.

William Mann, of Bridgenorth was next sworn. He said that he was working at the Harvey bridge when accused drove up in his buggy. He got out and went and spoke to Mr. Shaw. He then went back; took a gun out of his buggy, looked at it and then laid it down. He soon after drove away.

Peter Morrison also gave evidence.

Mr. Dennistoun, who appeared for accused, said that his client was going to walk home in the hope of securing some game. After speaking to Mr. Shaw he went back to the buggy took out the gun but found he had no shot. He consequently drove home. Mr. Donnistoun suggested that Stabler's actions had been misinterpreted.

Mr. Edmison said he could not convict on the evidence before him and dismissed the case. Mr. R. E. Wood prosecuted.

Is Your Piano in Tune?

The change of seasons affect pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

Hints to Housekeepers.

The undersigned desires to inform the public that he is sole agent for the Celebrated Laurentian Range, made in 6 styles, 2 sizes, the best four-hole range on the market. Neat in appearance, perfect in fit and finish, a splendid baker, burns economically any kind of fuel, is easily kept clean, works like a charm in every respect, and is guaranteed to give satisfaction. I have also a large stock of new and second-hand furniture and stoves, and general housefurnishings, and I also buy second-hand furniture and stoves. Call and examine stock before purchasing elsewhere. Stock and prices right. R. Begley, 380 and 382 Water street, opposite the Public Library.

RETURNED FROM SOUTH AFRICA.

Miss MacFarlane Home After 18 Months' Residence There.

Speaks of Educational Institutions in That Country Conditions of the Boers Described.

Some very interesting facts relating to South Africa, and, especially, in reference to the educational work being done, as a consequence of the British possession of the country, were learned in an interview which Miss Maude MacFarlane graciously granted the Examiner. Miss MacFarlane, it will be remembered, left Peterborough in April, 1902, for South Africa, where she went in response to a call for public school teachers for educational institutions established by the British Government, after the surrender of the Boer troops. Miss MacFarlane left Peterborough in company with Miss Yenney, who is still in South Africa, at Klerksdorp's, and sailed from Halifax, on the "Corinthian," with about twenty teachers from Ontario, en route to the British colony in South Africa. After a highly enjoyable trip, rendered so by the comfortable appointments on the steamer and the pleasant weather, the party landed at Cape Town, and the journey to the interior taken. Miss MacFarlane, from the time of her arrival until February last, taught in the central school at Potchefstroom, a town of about 5,000 population, situated nearly 1,100 miles from Cape Town. This is a garrison town, and at the present time there are between 8,000 and 10,000 troops stationed at a camp in the vicinity of the town. There were five schools in the place, the one in which Miss MacFarlane taught being a special school, where a fee was charged. It was attended, for the most part, by children of English families, and of the more wealthy Boers, the system of teaching being similar to that employed in the schools of Ontario. Miss MacFarlane's residence in Potchefstroom was very pleasant, made so by the fact that being a garrison town, entertainments of a social nature were numerous. After having remained in that town some months, an opportunity presented itself of experiencing a new mode of living, and Miss MacFarlane and Miss Hoover, the latter a Toronto lady, in response to a call for volunteers to teach a farm school, left Potchefstroom or Roodeport, a settlement about ten miles from the former town, and established a school, at which the children of the Boer families received instruction. The building, although rudely constructed, and utterly devoid of architectural beauty, contained about forty pupils, all of whom were very anxious to learn, and by their application to the work assigned them, and the care with which they preserved the text books supplied them, put to shame many scholars in the Canadian schools.

Miss MacFarlane's impressions of the average Boer farmer, led to the belief that not much in the way of effecting a very exalted standard of civilization, or education, is to be expected in respect to those who have grown up, but high hopes are entertained for the coming generation, who, with the introduction of the English language, and enlightened customs, will develop into a very important factor in British colonial life. As has been stated above, the children are studious, and show a marked adaptation to British customs, which is a most hopeful sign.

The teachers in the farm schools are to a considerable extent isolated from social life. In Miss MacFarlane's case, it was seldom that she and Miss Hoover were able to visit town, although they were but ten miles distant, because of the rudely primitive means of conveyance. The Boer farmers use oxen entirely, and a trip to town is made in a springless waggon drawn by four or five yoke of oxen, and occupies an entire day. Apart from the isolation, the teacher's life, however, is rather a pleasant one. The hours are short, and salaries are immensely superior to those in this country. But three hours and a half per day are occupied with teaching. A disagreeable feature of life in that country is the trying climate one has to endure. It is almost continually warm; sometimes the heat becoming exceedingly oppressive. The winter season commences in April, and the months of June and July are the coldest months, while October is characterized by high winds which, by reason of the sandy nature of the soil, are very unpleasant.

The land in the vicinity of Potchefstroom is not well adapted to farming operations, although agriculture is carried on to a certain extent. The great drawback is the almost total lack of rainfall. The town is under a system of irrigation, water being pumped to a reservoir, from which it is allowed to flow through trenches along the streets of the town, and into the gardens, certain streets being allowed water each day.

Numbers of those who went to that country after having enlisted, are now purchasing their discharges and are engaging in commercial pursuits, for which liberal salaries are paid to Englishmen and Canadians.

The Boers, outwardly at least, are loyal to the British crown, and they are no doubt, recognizing the fact that their condition is being very much improved under British institutions. They made a vigorous effort to have their language used in the schools, but the Government was firm on this point, and it is treated in the same manner as French and German is taught in our schools; five hours per week is devoted to the Dutch language.

One of the most pleasing experiences Miss MacFarlane had while in that country was her attendance at a convention of public school teachers, held in Johannesburg, in July, 1902, and attended by all the teachers in South Africa, nearly nine hundred being present. The entire expenses of this convention were paid by the Educational Department, and during their stay in that city, the teachers were very pleasantly entertained. Lord Milner gave a reception, as did Lady Fitzpatrick. Two theatres were engaged for two days and were reserved for the teachers and their escorts. They were taken down the mines, and enjoyed this feature of their entertainment. A course of lectures was prepared, including a series on astronomy, by Sir David Gill, a prominent astronomer of Cape Town.

The journey home from the southern British possession, was a very pleasant one. From Cape Town to England, the trip, occupying eighteen days, was made by the steamer "Saxon," on board which every attention was paid the teachers. Miss Sharp of Scotland, accompanied Miss Macfarlane and Miss Hoover, and a week was enjoyably spent in London before Miss Sharp left her companions to return to her home. For the trip across the Atlantic, the steamer "Canada" was the one chosen. This steamer has an historic interest, because of the fact that on it Lord Roberts made his trip to South Africa and return. The steamer landed at Boston, where the Canadian passengers were transferred to an excursion steamer and conveyed to Montreal, stopping at Quebec en route.

Lt.-Colonel Greenwood and his two sons, well known in Peterborough, returned to England by the same steamer as that on which Miss MacFarlane travelled.

Miss MacFarlane will not return to South Africa, although Miss Hoover, after spending a three months' vacation, will go back to that country to resume teaching. Both ladies were on the whole, well pleased with their trip. Miss MacFarlane speaks in the highest terms of the courtesy of the officials in South Africa, and is well satisfied with her sojourn in that country. Her many friends welcome her back to her home, and are pleased with her decision to remain here.

Swell Wrist Bags.

We invite the ladies to call at the Peterborough Bookstore and inspect our handsome samples of new wrist bags, labelled "Made in Canada." They are shown in walrus, crocodile, real seal, morocco and snake skin leathers. The clasps, chains and trimmings combine grace with art, in styles that are distinctly and charmingly Canadian. During these millinery show days the freedom of the store is extended to the ladies. A. H. Stratton & Co.

FIFTH ANNIVERSARY YOUNG MEN'S GUILD.

Special Service at St. Andrews Church.

Sermon by Rev. Dr. McLeod of Barrie—A Large Congregation.

A large congregation attended St. Andrew's church last evening when a special service to commemorate the fifth anniversary of the organization of the Young Men's Guild of that church was held. The service which was conducted by Rev. L. D. McLeod, D. D., of Barrie, was opened by a vocal solo by Miss Nellie Davies, entitled "Hear O Israel." During the course of the evening Miss Miller sang "Face to Face," while Miss Davies gave a second solo, "I Heard the Voice of Jesus Say." The anthem "Jubilate" was well sung, Miss Miller taking the solo parts.

Rev. Dr. McLeod took for his text the answer which Shadrack, Meshack and Abednego gave to King Nebuchadnezzar when he ordered them to worship the golden image: "Be it known unto thee, O King, that we will not serve thy gods, neither will we worship the golden image which thou hast set up," Daniel 3, vs. 18.

When there are two ways to deal with a question, said the preacher, it is hard for us to know which to take. Some men go one way, others another. But there must be some rule by which we can be guided. The mariner crosses the ocean directed by the aid of his compass or by watching the stars. It would be absurd for him to launch out hoping that the winds would blow him to his desired haven. As we go through life we aim for a certain destination. There is not one of us that does not desire to reach the haven of eternal rest, but the question is, "How are we to get there?" It is hard to follow the straight road but we can do it by noticing those who have drifted aimlessly through life, who have allowed themselves to be tossed about, and been finally wrecked. Then we have the example of Him, who shed His blood on the cross for us. We must strive to follow His example, for if we drift through life not caring whether we reach the goal for which we aim, we are like the sailor who throws his compass overboard, and leaves the vessel to the mercy of the winds. "I am the way," said our Lord. Besides His example we have the example of others, like the three who refused to worship the idol of gold, and who were thrown into the fiery furnace. Finally, we have conscience, but, for various reasons, we must have courage to obey it. Shadrack, Meshack and Abednego were commanded by their King to worship the golden image, but they trusted in God, and fearlessly obeyed what their conscience told them to do. No authority whatever must come before our conscience. We must obey it, wholly and without fear, for the God who delivered the three Christians from the burning fiery furnace, will also deliver us.

Now in this twentieth century men are turning to the image of gold, as did their fellow men in the olden time to the golden idol of King Nebuchadnezzar. It is a temptation which makes men sell honour, truth and conscience, things which are not ours to sell. How few of us will put the worship of God before the worship of gold! How few of us will say, "We will not worship the image." And yet we know that we sin, and we know that we have the one living God on our side, but we do not heed. If we want to reach the goal, where after the storms of life we can have everlasting rest, then we must obey our conscience and worship the one and only God, as did Shadrack, Meshack Abednego, who did not have this blessed example to follow.

At the conclusion of the sermon, Miss Nellie Davies sang, "I hear the voice of Jesus say." The service concluded with the singing of the hymn beginning, "Stand up, stand up, for Jesus."

THEY WILL TOUR ALL OVER ONTARIO.

Killin-Keough Concert Company Left Peterborough This Morning.

The Killin-Keough Concert Company, comprising Mr. Keough, basso; Mrs. Killin-Keough, prima donna soprano; Miss Brown, pianiste, and Miss A. H. Terry, elocutionist, left this morning for a tour through Ontario, and this evening they will give an entertainment in Havelock. On October 9th they will appear in Bradburn's opera house under the auspices of the Young Men's Guild of Charlotte street Methodist church. Mr. and Mrs. Keough and Miss Brown have been in Peterborough for the past six months and their entertainments have always been well attended and highly successful. Mr. Keough's voice is deep and mellow and his selections always receive high appreciation. Mrs. Killin-Keough has a voice of high range and great clearness, while Miss Brown as a pianiste is considered excellent. As yet Miss Terry has not been heard in town, but at Brighton last week she made a decidedly pronounced impression.

THE OLDEST REGIMENT

In the English Army is the Goldstream Guards.

The Coldstream Guards is the oldest regiment in the English army. It was formed in 1650 by General George Monck. As Monck's regiment it fought at Dunbar, and when returning from Scotland on the march to the south to restore King Charles II., Monck's regiment received the name which it now bears from the little town of Coldstream. This name given in 1660, has not been changed up to the present day, and is one of the very few instances of a regiment's official title remaining unchanged through all vicissitudes. The regiment's war record is well known. Its name is written high in the annals of Malplaquet, Fontenoy, the Peninsular War and Waterloo, but it was at Inkerman in 1854 that its name was immortalized for all time when the Coldstreams, out of 17 officers and 400 men, had 8 officers killed, 5 wounded and 200 of the rank and file killed and wounded. It was the Coldstreamers who were the first to ford the Modder River in South Africa in the teeth of a terrible fire.

The drums were organized as early as 1685, and the band is not only the finest but one of the earliest in the service. With its full playing strength of 46 musicians, assisted by a most talented prima donna, the Coldstream Guards will be heard here on Wednesday, September 23, in the New Hockey Rink. Shall YOU hear it?

PETERBOROUGH'S ELECTRIC POWER.

Cheap Power Obtainable Here Attracting Other Towns.

A Proposal may be Made to Supply Power to Outside Manufactories.

That Peterborough is destined to become one of the most prominent manufacturing cities in the Dominion, is being amply evidenced. As an indication of the fact that the advantages possessed by Peterborough, in respect of cheap power, are being recognized by other municipalities, one of the most highly quoted authorities on municipal questions in Ontario, and a member of the Toronto City Council, expressed his opinion with reference to a town about 50 miles from Peterborough, Bowmanville, that it would be cheaper to obtain power from Peterborough, than to generate it at home. If this be the truth, and there seems to be no reason to doubt the fact, it places Peterborough in an extremely advantageous position. If power can be generated here and transmitted for a distance of nearly fifty miles cheaper than it can be produced there, this should prove a very effective argument in favour of manufacturing industries requiring power, to locate here. As a matter of fact, although it may not be generally known, electrical energy is sold in Peterborough at a lower rate than in places which claim to have the cheapest power in Ontario. As a matter of comparison it may be stated that in Bowmanville electric light for residences costs $3.60 per year per 16 c. p. light, as compared with $1 per year in Peterborough.

It would appear that the great advantages possessed by this town in having at our doors practically an unlimited supply of power, are not fully appreciated by the majority of our citizens. The fact remains, however, that there are few, if any, towns or cities in Canada where power can be produced as cheaply as in Peterborough, and instead of transmitting the power to other towns to turn the wheels of industries there, why should not these industries be induced to locate here, and obtain their power at first hand?

It is possible that on the strength of the opinion of the municipal authority quoted above, steps may be taken with a view of endeavouring to secure power from Peterborough for use in neighbouring towns, and should there be a surplus of power after all the local industries have been supplied, and all the industries induced to locate here which it is possible to obtain, this might be supplied, but the first care should be to obtain for our own town all the manufacturing industries possible. This town is destined by nature to become a great manufacturing centre, but this can only be accomplished by centralizing the industries in this town, and not by supplying power to outside towns, which will reap the benefit, and become, to some extent, competitors as centres of industry.

SALUBRIOUS TUMUT.
New Capital of the Australian Commonwealth is Also Picturesque.

Tumut, the new capital of the Australian Commonwealth, half-way between Sydney and Melbourne, is at the present moment so remote from the outer world that it is fully twenty miles distant from the nearest line of railroad, with which it keeps in touch by means of a daily coach service. But what it lacks in prosperity and in accessibility it makes up in salubrity and in the picturesque beauty of its surroundings.

The town as now constituted has a population of about thirteen hundred, with four banks, four churches, curiously placed, as if they were the reflection of the pointer stars of the Southern Cross; a few schools, a lecture hall and three inns. The principle buildings are of red brick, while the others are of the weatherboard verandah fronted, corrugated iron roof variety, as common in the small western towns of this country as in Australia, and are protected on the slope of the hillside, along the banks of the River Tumut, from which the town takes its name, and which, unlike most Australian rivers, does not become infinitesimally small during the hot weather, but remains at the high water mark always, thanks, perhaps, to the melting snows of the neighboring mountains, the loftiest of which is Mount Kosciusko, the culminating point of the entire continent.

This abundance of water all the year round—so rare in Australia—contributes to render the Town of Tumut and its vicinity a perfect garden from January to December. The river is overhung by closely set willows, while the roads are bordered by hedgerows of sweet briar, intermingled with wattle, the golden blossom of which is the floral emblem of Australia. Long lines of poplars are dwarfed here and there by huge gum trees, while the valley is green with Indian corn, Tumut maize commanding the top prices in the markets of Sydney and Melbourne. In fact, the vegetation of Tumut never becomes the withered, bone dry spectacle, so familiar during the heated season in other parts of Australia; and situated as it is in a sheltered mountain valley, its climatic conditions are those of a sanatorium as compared with those of Sydney and Melbourne. Indeed, it is difficult to conceive of political strife taking any acute form at Tumut, where the mountain air, cooled by the snows of towering Kosciusko, will always be at hand to soothe the heated passions and to calm the fevered brow of the Australian legislators.

Tumut has the rare advantage of being able to have its name spelled forward or backward, according to the wishes of its inhabitants, and, moreover, is aboriginally and therefore characteristically Australian.

POSTMASTER IS MADE HAPPY

After Years of Sickness Dodd's Kidney Pills Cured Him.

Plain Statement of a New Brunswick Postmaster Whose Kidney Pains Have Gone Never to Return.

Lower Windsor, Carleton Co., N. B., Sept. 20.—Special.—T. H. Belyea, postmaster here, well known and widely respected, is happy in the discovery of a permanent cure for the Kidney pains that have troubled him for years.

"I have been bothered with Kidney Trouble for years," Postmaster Belyea says: "I have tried many medicines and plasters without getting any lasting benefit till hearing Dodd's Kidney Pills so highly spoken of I determined to try them. They seem to have made a complete cure in my case as I feel as well as ever I was.

"I believe that Dodd's Kidney Pills are the right medicine for kidney Trouble and will do all they are claimed to do."

Dodd's Kidney Pills cure the Kidneys and with healthy Kidneys no one can have Bright's Disease, Lumbago, Rheumatism, Dropsy or Pain in the Back. Thousands will tell you this out of their own experience.

The Most Costly Hair.

Every year, two or three days after the fete of St. John, a market of human hair is held at Limoges. Girls, matrons and old women from the country around bargain to obtain the best price for their tresses, which are shorn off in the market place. White hair always fetches the highest price, because the color cannot be produced with dyes. It is often worth $25 per pound. Gray hair comes next in market value, then flaxen colored, golden auburn, light and dark brown, in that order. The cheapest is black hair.

Hen Oil for Incubators.

An extraordinary step in the artificial incubation of eggs is the result of some years of labor on the part of Mr. E. V. Boyes, a young North London chemist. He has discovered that "something," the lack of which, from the time of the Egyptian downwards, has qualified the success of all artificial incubators. With the knowledge that the perspirations and its complex constituents of a sitting hen are important factors to a successful hatch, Mr Boyes secured a quantity of the perspiration of a large number of hens feverish with the maternal instinct, and commenced experimenting. He found, on chemical analysis, that it consisted of a fatty matter, moisture, and an ethereal substance of acetic odor, with a little dust or dirt. Further experiments have resulted in his now offering the poultry farmer a novel article of commerce in the form of "hen oil." He claims that by putting a little of this curious concoction into the moisture tray under the egg drawer in the incubator, it will be automatically evaporated and diffused by the internal heat, and will do all the instinctive work of a sitting hen. But this is not all. Mr Boyes has invented a tablet which will provide the lifeless incubator with "animal magnetism." The tablet also is placed in the moisture tray, and as it dissolves gives rise to a continuous non-varying current which aids in bringing forth a larger percentage of healthy chicks than is at present obtainable.

LARGE FAMILIES.
Ten Lincolnshire Laborers With One Hundred and Forty-two Children—How They Are Encouraged.

It is remarkable that although large families are rather the rule than the exception in many agricultural counties the rural population are innumerable households which is continually decreasing.

In Lincolnshire, for instance, there contain fourteen, fifteen, and sixteen children, and when a man boasts of twenty offspring no one considers it worthy of more than passing notice.

The Lincolnshire Agricultural Society, with commendable judgment, has offered a prize for many years which is calculated to encourage in ways of careful management those rural laborers who find that their wage of 14s., 15s., or 16s. a week has to feed a family of very large proportions. It awards premiums of £4, £3, £2, and £1 to "laborers in husbandry who have brought up and placed out the greatest number of children without having received parochial relief or occupied more than half an acre of land."

This year the result was as follows:

(1) Thomas Hought, Tealby, Market Rasen, 19 children born, 17 brought up, 12 placed out.

(2) James West, Covenham St. Bartholomew, Lincoln, 15 children born, 13 brought up, 13 placed out.

(3) James Sewell, 14 children born, 14 brought up, and 12 placed out.

(4) Robert Bonner, Lessington, Lincoln, 16 children born, 12 brought up, 12 placed out.

The ten laborers entering for this prize had had an aggregate of 141 children.

"Where have your children gone?" Mrs. Hought was asked.

Mrs. Hought could not remember. Only the three youngest of the nineteen were hers, she said, for the first Mrs. Hought had died peacefully after having given birth to sixteen. The second Mrs. Hought, a fine, tall woman, apparently about thirty, was nursing the baby, Charles Edward, who was ten months old. Gladys, aged four, and Beatrice, aged two, tugged at her skirts.

"I can't tell you about them all," she said. "You see, you can't think of all their names."

Mrs. Hought, however, managed to remember eleven of the sixteen children who formed the first family. The oldest, she believed, was about forty-five. Two or three of the family are dead.

Summarized, the names and destinies of those members of the Hought family who are not forgotten are as follows:

Leonard, a joiner, works at Doncaster.

Margaret married a shoemaker and lives at Lincoln.

Elizabeth is the wife of a foreman foundry worker employed at Lincoln.

Kate is married to an agent living at Lincoln.

Walter is a fitter in a Lincoln workshop.

Tom, a tailor, works at Lincoln.

Edith, who is unmarried, is a clerk in a Lincoln office.

Lily married a grocer's assistant living at Grantham.

Jessie is a mother's help at Grantham.

Elsie is in service at Halifax.

Florrie married a wagoner and lives at Claxby.

The Hought family is an admirable example of Lincolnshire country folk generally. Tealby is a paradise on a hill. Tree-topped downs decline on to stretches of meadowland and corn, and woods of fir, in which rabbits and squirrels start at your footstep as you pass.

The younger generation preferred the congested towns, however, and have fled from the land. Out of twenty-two young men reared in a row of houses at Nocton sixteen have forsaken the country for the town.

In large families, it is said, some of the older ones have to leave home from sheer lack of accommodation. That is not the chief reason however. The engineering shops at Sheffield, Grantham, and Lincoln seems to have swallowed the young active lives which should have stayed on the land. The army, too, has absorbed much of the ripe young manhood which on the land lives to a green old age and leaves behind it many young lives to renew its strength in other generations.

Where Lincolnshire folk have stayed on the land they have stayed long. There are innumerable bailiffs, shepherds, and wagoners who have lived four and five decades in the service of one family. Continuous service of fifty-seven, fifty-three, and fifty-one years obtained suitable rewards at the Lincoln show last week.

Lincolnshire's fertile acres could find employment just now for much more labor than is to be obtained. In the towns thousands are without employment, and the poor rates mount high. The lesson is obvious. —London Mail.

Singing Cattle to Sleep.

A curious instance of the power of music comes from the western ranches, where the cowboys have learned that they can sing cattle to sleep. At "bedding time" a rider will ride to the front of a herd, stop it, and then he will ride rapidly around and around it till the cattle are herded close together. He usually sings or whistles while he is doing this, and presently one of the herd lies down, to be followed in quick succession by the others, till in ten minutes a herd of 500 may be all down. The cowboy now rides slowly around them, stopping occasionally if he desires to, and whistling or singing, as he likes. But should the herd get up or become excited in the night he rides around rapidly and sings until they are quiet.

Seeing With One Eye.

A great many, perhaps the majority, of otherwise well informed people believe that they see the same with one eye as with both eyes. That this is not the case one can easily convince himself by the following simple experiment: Cover one of the eyes with a hand or a bandage and let the experimenter attempt to snuff out a candle suddenly placed within a few feet of him. He will almost invariably miss the flame, either overreaching, underreaching or putting the fingers too far to the right or left of the flame. With both eyes normal and open the accommodation for distance and direction is instantaneous.

SHORT-SIGHTED LOVE

PENNILESS HONEYMOONS OF SOME FAMOUS PEOPLE.

Southey Parted From His Bride at the Church Door After the Ceremony—How Carlyle Made It Easy for Leigh Hunt to Borrow—Actors Who Had Slim Purses, But Infinite Faith in Themselves.

If Love is not so blind as he is credited with being, he is at least very short-sighted at times, and little disposed to take any thought for the morrow, so long as to-day's happiness is ensured.

This was undoubtedly Southey's frame of mind when one day in November, 1795, he led Coleridge's sister-in-law, the fair Miss Edith Fricker, to the altar. It was only by dint of resolute saving—even to the extent of dispensing with many a day's dinner—that he was able to pay his wedding expenses, and so empty was his purse when he had done this that he was compelled to part from his bride at the church door after the ceremony, as he did not know where his next meal was to come from.

Coleridge was almost equally improvident, for after a few weeks of an ideal honeymoon in a rustic cottage in the heart of the country he loved so well he "saw poverty staring at him through the lattice-panes." His small stock of money was quite exhausted, and many years of struggle and privation followed on the heels of his brief dream of happiness.

The story of Leigh Hunt's domestic straits is better known, perhaps. He was the most unpractical of men, and his wife was almost as unworldly as himself; and their domestic condition is generally considered to have been one of chronic financial difficulties. Happily he had many good friends, one of whom was Carlyle, his neighbor, who, whenever he expected a visit from Hunt, would leave a sovereign or two lying exposed on the mantlepiece, so as to make the inevitable borrowing as easy as possible.

Many pathetic stories are told of the privations of Mozart and his young wife during their early married years. Mozart wilfully wedded a penniless girl against the advice of his friends, saying proudly, "I have that within me which will enable me to support the woman I love." But poverty was long an unwelcome guest in their house before Fame discovered their address; and not only was the family-cupboard often bare, but more than once they were caught dancing together to keep themselves warm, when there were no coals in the house.

Wagner was just as confident of his powers to support a wife as Mozart, when at the age of twenty-six he married a beautiful, but penniless, singer; and yet within a few weeks of his honeymoon we find him declaring that the two things he coveted most on earth were a warm overcoat and some firewood. For twenty years it was a desperate fight for bare existence, and many a time they would have gone hungry to bed if it had not been for the kindness of Liszt and a few other friends.

Samuel Phelps, the great actor, never did a more daring or a wiser thing than when he faced the altar "with a smiling face and an income, all told, of 18s a week." So poor was he that when he secured an engagement at Leeds he would tramp to York every Saturday night to spend a few hours with his wife, starting on his return journey as the clock struck twelve on Saturday night. In later years, when he had drunk deeply of the cup of Fame, and when his wife was no longer with him to share it, he exclaimed, "Ah! I was much happier then on eighteen shillings a week with her to share it than I am now with 'half the house' for myself every night."

Edmund Kean's purse was so empty on the eve of his wedding that he had to borrow half a sovereign from a friend to pay for the ring, and it was only through the generosity of the landlady of the Dog Tavern that he was able to offer his bride a breakfast.

Charles Mathews, the "King of Comedians," had such infinite faith in himself, and, perhaps even more, such an impetuous love of Miss Strong, that he undertook the responsibilities of married life on 12 shillings a week, and smiled when his friends predicted a honeymoon in the workhouse. And yet during the four short years of their wedded life no couple in England were more perfectly happy.

When John Scott, known to fame in later years as Lord Eldon, ran away with Miss Surtees, the banker's beautiful, if wayward, daughter, his purse was so slender that he had reached the bottom of it on the third day of his honeymoon, and was on the predicament of "having no home to go to, and of not knowing whether our friends would ever speak to us again."

Shelley had a similar experience when, as a boy of nineteen, he eloped with his sister's school-friend, Miss Westbrook. Before the runaway couple had got as far as York on their way to Edinburgh they found themselves parting with their last shilling, and the too ardent lover had to appeal to Hogg to send him £10 to relieve "a slight pecuniary distress."

There was surely never a bride and bridegroom more impecunious than Flaxman and his brave young wife. Even his best friends declared that he was a ruined man from the moment he stood before the altar, and it is true that for some time starvation was never far from his door. But Mrs. Flaxman determined that if her husband was to be ruined it should not be through her, and she practised her economies so skilfully that within five years she had saved sufficient money to enable him to study the works of his great predecessors in Rome.

The Skeleton at Large.

"Do you know," she said, "the Browns have a skeleton in the closet?"

"Oh, no," he replied carelessly.

"But I'm sure of it," she insisted.

"And I'm just as sure you're wrong," he returned. "The comments I've heard are enough to prove that that skeleton of theirs isn't in the closet at all; it's wandering all over the neighborhood."

FIGHTER AND AUTHOR.
Pierre Loti, Who is to Command a Cruiser at Constantinople.

In the stirring times that many experienced observers see ahead of us at Constantinople probably one of the most conspicuous figures will be Pierre Loti, the well known French author, whose works in translations have enjoyed wide popularity in this country. In ordinary life Pierre Loti is Louis Marie Julien Viaud, captain in the French navy. By recent promotion he is to have command of the cruiser Vantour, stationed at the

PIERRE LOTI.

Golden Horn. If his duties allow him the time he will probably write a novel dealing with Constantinople.

Although the navy of France has had among its officers a number of writers, none of them has ever attained such eminence as Pierre Loti. He is one of the most popular authors of his country and time, and his works have been crowned by his election to the French Academy, making him one of the forty "immortals." Captain Viaud is a native of Rochefort and is fifty-three years of age.

Her Nightly Habit.

The Doctor—Is your wife a good sleeper, Mr. Stubb?

Stubb—Yes; pretty good.

The Doctor—Does she go to sleep as soon as she touches the pillow?

Stubb—Well—er—she goes to sleep as soon as she touches my vest pocket.

Smart Girl.

"Do you know," said Miss Bunting, "Mildred Gildersleeve almost coaxed Mr. Fillmore to propose to her. That's how she became engaged."

"Ah, begged the question, did she?" replied Mr. Larkin.

How easy, is it not, for the strong to advise the weak, for the well to advise the sick.

To live long it is necessary to live slowly.—Cicero.

Health and Vigor for Sickly Women.

By Supplying an Abundance of Rich, Red, Life-Sustaining and System-building Blood,

Dr. Chase's Nerve Food

Thoroughly Cures the Ills Peculiar to Women.

The feminine organism is an intricate mass of delicate and sensitive nerves which require an enormous amount of pure, rich blood to nourish them and supply them with the vital force necessary to properly perform their functions.

When the blood is lacking in quantity or quality the nerve cells waste and shrivel up and by means of pain and irregularities make known their starved and depleted condition.

Unless the nervous system is put in proper condition all the medicine in the world will never cure the weakness and irregularities peculiar to women. Because Dr. Chase's Nerve Food contains the elements of nature which go to form new, rich blood and create new nerve force it is the most certain cure obtainable for such ailments.

When the nervous system becomes exhausted the whole body is more or less affected and the various organs fail to perform the duties devolving upon them. Digestion is impaired; there are feelings of discomfort in the stomach after meals, nervous sick headaches, irritability, sleeplessness; spells of weakness and dizziness come over you; you feel downhearted, discouraged and despondent and fear prostration, paralysis or insanity.

But there is no hope for you in the use of Dr. Chase's Nerve Food. Not the false hope which is aroused by medicines composed of alcohol and other stimulants, but the hope which finds foundation in added flesh and tissue, in better appetite, more buoyant feelings and gradual disappearance of annoying symptoms.

As a blood builder and nerve restorative Dr. Chase's Nerve Food is bound to benefit your whole system. By noting your increase in weight while using it you can prove this beyond a doubt.

Fifty cents a box; 6 boxes for $2.50, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 10

SONS OF THE WILL.

We are the choice of the Will: God, when
He gave the word
That called us into line, set in our hand
a sword;

Set us a sword to wield none else could
lift and draw,
And bade us forth to the sound of the
trumpet of the Law.

East and west and north, wherever the
battle grew,
As men to a feast we fared, the work of
the Will to do.

Beat upon vast beginnings, bidding an-
archy cease—
(Had we hacked it to the Pit, we had left
it a place of peace!)—

Marching, building, sailing, pillar of cloud
or fire,
Sons of the Will, we fought the fight of
the Will, our sire.

Road was never so rough that we left its
purpose dark,
Stark was ever the sea, but our ships were
yet more stark.

We tracked the winds of the world to the
steps of their very thrones;
The secret parts of the world were salted
with our bones;

Till now the name of names, England, the
name of might,
Flames from the sunset bounds to the ends
of the northern light;

And the call of her morning drum goes in
a girdle of sound,
Like the voice of the sun in song, the great
globe round and round;

And the shadow of her flag when it shouts
to the mother-breeze
Floats from shore to shore of the universal
seas;

And the loneliest heath is fair with a mem-
ory of her flowers,
And the end of the road to Hell with the
scene of her deeds and showers!

Who says that we shall pass, or the fame
of us fade and die,
While the living stars fulfil their round in
the living sky?

—W. E. Henley.

London Parks.

London, says the Earl of Meath, now possesses 318 parks and open spaces, which have cost £2,199,000. This gives a proportion of one acre to 752 of the population, which now numbers rather more than four and a half millions. Twenty years ago the number of parks was and their cost £829,350, affording one acre to 951 of the population of 3,834,000.

Imitations

of Dodd's Kidney Pills are legion. The box is imitated, the outside coating and shape of the pills are imitated and the name—Dodd's Kidney Pills is imitated. Imitations are dangerous. The original is safe. Dodd's Kidney Pills have a reputation. Imitators have none or they wouldn't imitate. So they trade on the reputation of Dodd's Kidney Pills. Do not be deceived. There is only one DODD'S. Dodd's is the original. Dodd's is the name to be careful about—

A BLAST FROM TOLSTOI.

The Russian Count, Who Lives as a Peasant Lives, Declares Signs of the Senility of the United States.

America has lost her youth—her hair is gray, her teeth are falling out; she is becoming senile.

Voltaire said that France was rotten before she was ripe, but what shall be said of a nation whose ideals have perished almost in one generation? Your Emersons, Garrisons and Whittiers are all gone. You produce nothing but rich men. In the years before and after the civil war the soul life of your people flow-

COUNT LEO TOLSTOI.

ered and bore fruit. You are pitiful materialists now.

What is needed in America is a great religious movement. Truth will make your people free. When they bandon pleasure as an object of life they will not need so much money. Your workingmen can never win the fight against capital by labor unions. Capital will always have the Government and the army on its side.

True religion is this: If I believe that I have a spark of the divine in me, then I am part of God, and I know my place in the universe, and I know that I have a nuty to all other men. If I believe that I am simply an animal I will live like an animal and work for myself. The man who becomes a true Christian has a centre from which he can see all things clearly.

Why should Americans send a petition to Russia? We have a crime like the Kishineff outbreak once in a period of years. In the United States they have lynchings every year, every month, every week, almost every day. They hang negroes, shoot them, roast them. It is an ordinary thing in the United States.

Some one asked Emerson what he should do if the sun should grow cold and the earth die. He answered, "I think that I could get along without them." That was a good reply. It showed that he was sure of his spiritual life. Why do Americans neglect their souls for the sake of trade, for the sake of money, for the sake of pleasure? Some one invents the automobile. At once everybody feels that automobiles must be used. But why should a man waste his time in dashing about the country in an automobile? As soon as you invent something to save time you begin to waste time by using it constantly and without reason.

Five hundred years hence the descendants of the race will look back with astonishment to a time when their ancestors wasted their strength in building up such nonsensical structures and devoted a large part of their lives to preposterous rapid travel.

I have but one ambition—I would die a martyr's death. So a man whose mind is occupied with trusts, labor unions, politics or money can hardly understand me.

A Tale of Tailless Cats.

Travelers have noted that in the Bismarck archipelago cats without tails are very numerous. The explanation as given in the World Today is curious. The natives of the islands have a superstitious belief that remnants of food falling into the hands of an enemy enable him to cast a spell over the eaters of the meal at which the remnants were left. Now, the natives value their cats less as pets than as a convenient source of fresh meat. It follows that thefts of cats are frequent, or rather were frequent until some genius evolved the happy scheme of cutting off their tails and storing them away in a

The man on the stage who does the trick of escaping from firmly tied ropes, submits to the bonds with a smile. He knows he can get out of the ropes that are being knotted. Put the same man in the woods and let Indian captors bind him to a tree for torture and he would struggle to the last against the bonds.

When the stomach is diseased there are bonds being woven every hour about the organs dependent on the stomach—heart, lungs, liver, kidneys, etc. The folly of mankind is to passively submit to the fastening of these bonds with no effort to escape until the pain they cause arouses fear.

Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It cures diseases of heart, liver, lungs, kidneys and other organs, when these diseases, as is often the case, have their origin in the diseased stomach.

"For a long time I was suffering and was hardly able to get about," writes Mr. Andrew J. Jennings of Thomas, Tucker Co., W. Va., Box 194. "Was bothered with kidney trouble and my whole system was out of order; had no appetite. A friend of mine told me to try Dr Pierce's Golden Medical Discovery. I did so and the first bottle restored my appetite. I took six bottles of 'Golden Medical Discovery' and some of the 'Pleasant Pellets' and feel like a new person."

Dr. Pierce's Pleasant Pellets cleanse the clogged system from impurities.

Sweltering Days

Call for thirst assuagers, with a little more taste to them than plain water, good as that may be. LONG'S Soda Water and Ice Cream meets every thirst requirement—cold, ice cold—and flavours to suit every taste—and pure, every drop of it.

LONG BROS.

James Long, No. 384, George street H. Long's Palm Gardens, No. 414 George

safe place. "For," said he, "if a thief should steal my cat and eat it, an incantation muttered over its residue will make the miscreant so sick that he will be sorry he ever tasted stolen cat's flesh." It was an idea worthy of the great chancellor himself, and the humble, brown Bismarckian, in pursuing the blood and iron policy which it entailed, was, like him, serenely indifferent to bloodshed, pain and caterwaulings so long as he secured his ends or his cats' ends.

Tree and Plant Leaves.

The general arrangement of the leaves on limbs and stalks of trees and plants secures between each sufficient space to prevent one leaf from interfering with another. And not only are leaves so arranged as to exist independently of each other, but in a general way they have taken upon themselves the forms best adapted to secure the maximum of sunlight as it is showered upon them in different latitudes. At the equator, where the sun's rays are vertical, we find large flat leaves like those of the banana, plantain and the various species of the cactus.

Farther north, where sunlight strikes at an angle, small leaves and pine "needles" are found. Then again note the peculiarity of the Australian gum tree. Instead of exposing their broad faces to the sun the edges only are so turned. Were it otherwise the sun would rob them of all their moisture, it being a well known fact that the gum tree grows in the driest region on earth.

The Bald Dr. Smith.

While Dr. Theobald Smith was a lecturer on bacteriology in the medical department of the Columbian university a boy came to him with a message from a relative who was visiting in Washington. When the boy saw the doctor he put the note back in his pocket, saying, "It's another Dr. Smith the note is for."

"Let me see the name on the envelope," said the doctor curiously. "That is my name. The note is for me."

"But I was told," replied the boy, "to give it to the bald Dr. Smith."

"Oh, you got turned around a little on the name, that's all," replied the doctor, reaching for the note.

And it took considerable argument to convince the boy he was the right man.

Sun Drunkenness.

To become sun drunk is a condition into which any one may fall in the tropics. Exposure to the sun's rays will reduce a man to a condition almost exactly resembling drunkenness. He staggers about and is usually compelled to lie down and "sleep it off." Sun drunkenness is sometimes accompanied by nausea. Another curious fact in connection with life in the tropics, where the sun rises at the same time all the year round, is that if you do not get up before sunrise you do not feel well all day. You feel heavy, out of sorts and have a tendency to sickness.

Your Shadow.

Every one of us casts a shadow. There hangs about us a sort of penumbra—a strange indefinable something which we call personal influence—which has its effect on every other life on which it falls. It goes with us wherever we go. It is not something we can have when we want to have it and then lay aside at will; as we lay aside a garment. It is something that always pours out from our life, like light from a lamp, like heat from a flame, like perfume from a flower.

Color Tones For Whistler.

About the time James MacNeill Whistler, the artist, was causing a sensation with the painting which he called "A Harmony In Black and Red," "A Nocturne In Blue" or some such name he had a misunderstanding with his club regarding dues. The secretary finally wrote to Mr. Whistler saying that the club would be glad to receive from him "an arrangement in gold and silver."

Two Fatal Mistakes.

Marie Antoinette, escaping from the Tuileries, turned to the right instead of to the left after passing the inner arch. She lost her way, lost time and by this means lost her own head and the head of Louis XIV. So the story of Carlyle runs.

Queen Draga of Servia meant to leave Belgrade, but waited for a going away gown, being anxious that as a fugitive she should appear in becoming attire. It was a fatal delay.

Lucky or Not.

"Eve was really a very lucky woman," remarked Mr. Henpeque. "She didn't have any woman to criticise her clothes."

Mrs. Henpeque's eyes snapped.

"On the other hand," she retorted, "she didn't have any woman around to envy the first gowns a woman ever had."

True Refinement.

Silas Sopephat (to footman)—Now, John, before it is time for our guests to arrive I want you to go down to the finger post at the bend of the road and put a white kid glove on it.

A QUEEN'S FAVORITE.

Story of Roger Mortimer, Who Conspired Against Edward II.

Roger Mortimer, after being one of the most zealous adherents of Edward II., conspired against him, and was sent to the Tower. Having escaped to France, he subsequently, with Queen Isabella, the wife of Edward, made a descent upon England. Edward was taken prisoner and murdered in Berkeley castle, his son, Edward II., being placed upon the throne in his fifteenth year. For three years Mortimer exercised absolute power in the name of the young monarch. He assumed a splendor even outvying royalty, and, like all favorites, grasped at riches and honors. At length the conduct of the Queen-Dowager and Mortimer became so openly scandalous that young Edward resolved to take action. The guilty couple resided in Nottingham castle, where every precaution was taken to secure their safety. A strong military guard was placed at the gates at night, while the keys were conveyed to the Queen. Eland, the governor, however, had been won over to the side of the young King. By him, Edward's followers were admitted through a passage under the castle still called "Mortimer's Hole." Making their way to the bedchamber the party burst open the door and killed two of Mortimer's friends who attempted to make a defence. Queen Isabella rushed in terror from her bed, imploring her "sweet son" to spare her "gentle Mortimer." Her tears and entreaties for "her worthy knight, her dearest friend, her beloved cousin," were in vain. The Lord of the Marches and dictator of the Kingdom was led away in custody, and on the morrow brought before Parliament on the charges of having usurped the Royal power, of having procured the death of Edward II., and for many other crimes and misdemeanors. In the informality of the times Mortimer was not allowed to make any defence. He was declared at once guilty from the notoriety of his crimes, and was hanged at the Elms, near London, on Nov. 29, 1330. Edward then took the Government in his own hands and shut his mother up in her house at Risings, her allowance being reduced to £3,000 a year.

Progress and Politeness.

On two recent occasions, when school children were to the fore, attention was called by disinterested observers to their lack of courtesy, says The Globe.

The Governor-General, in addressing the children in the park on Empire Day, said: "With all the self-reliance that marks a new country like this, it would be well to remember the generous traditions and the courteous manners of the old country. There was sometimes a tendency to demonstrate self-reliance by a want of respect to fellow-men and to those in authority."

Mr. William Scott, Principal of the Normal School, speaking at the luncheon given by the directors of the Exhibition on "School Children's Day," contrasted the kind and courteous ways of the boys and girls of Quebec with the rudeness, or at least bluntness, of those in Ontario. He had considerable experience in Quebec, and was inclined to think one reason for the difference is that the people there live in the past, while those of this Province are more democratic.

If Mr. Scott's theory is correct, it ought to be possible to reconcile progress with politeness.

Puerto Cabello has a fine harbor and La Guayra an open roadstead with a costly breakwater.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 18c to 40c.

Sales to noon, 303,100.

Messrs. E. M. Poussett & Co. have received the following:

Town Topics: The market promises to be higher in the early trading in response to the London market and to the more favourable view of the bank statement as indicated by the reduced loan account shown by the bank statement Saturday. The developments over Sunday were not unfavourable and the foreign political outlook has improved. We do not look, however for anything more than a moderate recovery in prices and still consider the market a sale on rallies.

Chicago—Cash wheat at Chicago was 250,000 bushels and 450,000 bushels corn. Chicago hogs—24,000; 25,000; 30,000. Omaha hogs—15,000; 25,000. Market opened 5 cents higher. Rects. hogs, 33,000 mixed 770 at 680; heavy 575 at 620; sows, 545 at 570. Cattle 10c lower; sheep steady.

Paris opening—Wheat unchanged to 1-8 lower, flour steady. No rain the past 24 hours except a very light shower in Manitoba. Temperature seasonable. Conditions perfect for the movement of wheat and maturing of corn.

Liverpool opening, wheat 1-2 lower; corn 1-2 lower. 1. 30 p.m., wheat 3-8 lower. London market early for Americans steady.

French country market quiet but steady,; weather fine.

The introduction to Henry Clews' weekly market letter, dated Sept 19th, says:

The events of the week have not been of a particularly encouraging character. Damage to crops in the Northwest and fears that the Balkan crisis might cause disturbing complications in Europe started a fresh selling movement, checking a revival of confidence and precipitating a partial return of recent liquidation. A portion of the selling was attributed to the closing out of accounts which were tided over the last heavy break; while the bear attacks were further stimulated by unfavourable developments connected with some of the larger industrials, also the lower prices for iron which those pessimistically inclined profess to believe are indicative of business reaction. These are the only new developments in an otherwise sound situation, and to them alone is due the irregularities of the week just ended

Mr. J. A. Fife, B. A., Tells the Story of His Travels.

NUMBER TWO.

The Lumsden Company operates a line of steamers on Lake Temiscamingue and on their largest boat — the Meteor—we were to continue our journey northward. This steamer is a staunch little craft having a nicely furnished saloon and first and second class dining rooms and also staterooms for a considerable number of passengers, and is scarcely able to cope with the traffic.

The quantity of freight and personal baggage which was transferred to the steamer for points northward was a surprise to us; it consisted of dry goods, oats, baled hay, pork, tourist and surveyor's outfits, etc.

It was with some little difficulty that we succeeded in getting our party on board for Bateese and Dave had quite frequently refreshed themselves from a large flask which they brought from Mattawa. (don't know what was in it; think they called it "whiskey blanc"). Consequently they were in such a hilarious condition that they did not care whether they went with us or back to to Mattawa. However, after some little persuasion and promises of good times ahead, they decided to go along.

Above Temiscamingue the Ottawa gradually expands into Lake Temiscamingue—a beautiful sheet of water about eighty miles long and varying from half a mile to seven miles in width; the name is Indian and means "deep water." The shores at the south end are somewhat similar to those of the river already described, but a little more rocky, in some places being

PERPENDICULAR CLIFFS

Of granite fifty or sixty feet in height. On the east the lake receives the Keepawa river, the boiling rapids at its mouth being clearly seen as we passed. On the west the Montreal and Madapitchion rivers enter; their mouths being almost together. On the east shore, probably about fifty miles from the foot of the lake is situated Fort Temiscamingue—a Hudson Bay post. It is a pretty little place nestling close to the shore at the foot of a beautifully wooded hill. A few miles farther on is Ville Marie, a thriving village, around which, we are told, is a very fair farming country. About five miles farther up, also close to the east shore, is Brown's Island, on a beautiful point of which is the summer home of a wealthy Philadelphia gentleman; the appearance of his cottage was in harmony with its charming natural surroundings, and in front of it the Stars and Stripes snapped in the very stiff breeze which was blowing down the lake at the time. This was the first cottage which we observed and certainly its site was well chosen. The Americans generally know a good thing when they see it and are not slow in getting hold of it. About six miles from Brown's Island on the Ontario shore is the village of Haileybury, consisting of about one hundred houses all wooden and mostly unpainted, and about half of them built this season. Two steam saw mills were in operation as we passed and these alone comprise the

MANUFACTURING INDUSTRIES

Of the place. The lake at this point is quite shallow and passengers and freight were landed in a large punt, but, on the return trip I observed that a very respectable wharf had been built far enough out to enable the steamer to run along side of it.

Just above Haileybury the soil on the shore changes to what appeared to be very fair farming land timbered with fair-sized birch, poplar and balm of gilead. Four miles above Haileybury, situated at the head of Wabis Bay is New Liskeard—the Chicago of New Ontario. It is a stirring little town of about 1,100 population, an increase of about 400 since March last. The lake is very shallow for some distance out from shore and it was with difficulty that the Meteor made her way up the muddy channel. As she neared the wharf the New Liskeard brass band struck up a stirring air of welcome—not to the survey party, but to the Hon. F. R. Latchford, Commissioner of Public Works, who was on board. The citizens had turned out in large numbers to welcome the Cabinet Minister and a very complimentary address was presented to him. The honourable gentleman replied in a short speech, the chief subject of which was "The Development of New Ontario" and particularly in connection with the government railway which was in progress and

THE POLICY OF THE GOVERNMENT

Regarding its extension to connect with the proposed Grand Trunk Pacific. The completion of the railway as far as New Liskeard is expected by July next and it will certainly be a great boon to the whole district, bringing it within about nine hours' ride of Toronto, thus giving it a winter outlet which at present can only be accomplished by driving down the lake. Building operations in New Liskard have been very brisk during the past two years and a very respectable town now stands where a short time ago was an unbroken spruce and poplar forest.

Two large hotels cater to the wants of the travelling public and business places of all kinds rival those of many older towns. The busy citizens in their eager haste to acquire wealth have not neglected their children's educational needs, having now a very respectable public school which is full to overflowing and are considering the building of a new one to accommodate the influx of population.

The pioneer bank is the Union Bank which has a good business and has also opened a branch at Haileybury where Mr. Ross Cameron, late of Norwood, is in charge.

We also met Mr. Hugh McFee, formerly of Keene, who conducts a good business in men's furnishings, and heard, too, of his brother James, who

IS SUCEEDING WELL

Farming a short distance out of town. Enquiry after other citizens from this neighbourhood elicited the name of Mr. Tighe, late caretaker of our central school, who is settled on Sutton's Bay, eight miles from town. His Liskeard friends have dubbed him Old Peterborough, and it is said that the sum and substance of his conversation is Peterborough, and I shouldn't wonder if his encounters with the board of education and the principal of the collegiate institute occasionally furnished him with a topic.

The soil around Liskeard is a whitish clay which is said to pulverize like flour when exposed to the frost and sun. It certainly produces good crops, samples of which we saw put up for the late Toronto exhibition; timothy fully five and a half feet high, oats about five feet and fine samples of wheat, flax and all kinds of vegetables.

Real estate is bringing very high prices, some idea of which may be given by the fact that several acres in the suburbs were a year ago a forest and now chopped, burned and divided into lots 33feet by about 100 feet and are selling readily at $125 each. One gentleman informed us that he had bought eighty acres two years ago for $250 and that a few weeks ago he had refused an offer of $3000 for twelve acres of it which are now within the town limits.

THE LATEST NEWS OF LOCAL SPORT.

C. G. E. Benefit Society's Field Day of Sports.

Peterborough Team Admitted to O. R. F.U. Intermediate Series—Notes of Timely Interest.

The Field Day held on Saturday by the C.G.E. Benefit Society was a complete success, both as regards the financial side and that of the sporting. A large number was in attendance and the different events on an unusually attractive programme were well contested. This Field Day was the first in the history of the Society, and was held instead of an excursion, which had all first been proposed.

The first event was a football match, played between the Auburns and C.G.E., and was won by the latter, the score being 4—1.

This was followed by a baseball game in which the opposing teams were the champions of 1900 and the Y.M.C.A. This was a good exhibition of the game, and the champions showed their ability to still play winning ball, the score being 3—1 in their favour. The batteries were—Quinlan and Gillespie for the Y.M.C.A., and Earls and Graham for the Champions.

A list of running and jumping contests was then run off, in which the winners were as follows:—

100 yds. race—(shop)—W. Crowley, G. Gauthier.

100 yards race, shop—1st, W. Crowley; 2nd, G. Gauthier.

220 yards, open — E. McNicholls, D. Belland.

220 yards, shop — W. Crowley, E. Renton.

Race around bases against time — W. Crowley, time 13 1-2 seconds; W. Jackson, time 14 seconds.

Running hop, step and jump — W. Crowley, 39 feet, 7 inches; E. Renton, 39 feet 3 inches.

Running broad jump — W. Jackson, 16 feet 6 inches; W. Crowley, 16 feet.

Running high jump — W. Crowley, 4 feet 11 inches.

Married men's race — Ed. Renton, R. Martin.

Matched race, 100 yards between Fred Derocher and Percy White—Won by the former.

The feature of this part of the programme was supplied in the 220 yards race, when Eugene McNicholl defeated Belland by two yards.

The committee to whom credit must be given for the success of the field day, was composed of Messrs. J. G. Scott, chairman; H. W. Christie, secretary; H. Jeffrey, treasurer; J. O'Brien, W. Robinson, W. Joyce, R. Martin. The committee desire to thank the following gentlemen for having contributed prizes to be competed for: Messrs. T. Hooper, R. C. Braund, R. H. Edmison, J. T. Stenson, Ormond & Walsh, Best Stove Co., J. Savigny, Budd & Co., J. Giles, Gough Bros., J. Lynch, The Metropole, H. Meredith, Talbot Bros., W. Morgan.

RUGBY.

Mr. E. S. Clarry has been in communication with Mr. Woodworth, secretary of the O. R. F. U., who states that the union will welcome the Peterborough team into the Intermediate series, and a schedule will be arranged to convenience Peterborough as much as possible. There are three Toronto teams entered in this series, Peterborough being the only outside team. The secretary expresses his pleasure at the revival of the game in Peterborough, and the union will do all possible to stimulate the interest revived.

• • • •

A meeting of the Peterborough Rugby Club Executive will be held at the Oriental Hotel to-night at 7.30. Every member is expected to be present. It is not the intention of the Executive to occupy whole evenings in an executive meeting, hence the hour at which it is announced. The meeting will in all probibility be over by 8 o'clock.

• • • •

St. Peter's T.A.S. will meet to organize a junior rugby team to-night.

• • • •

St. John's Choir Boys' rugby team had a good practice at their field on Homewood avenue Saturday afternoon. Mr. Hollingshead was on the field coaching the boys.

BASEBALL.

Mr. C. G. Graham was in Lindsay on Saturday trying to arrange the game between the Excelsiors and Clippers for the $50 cup. The Lindsay team, however, was unable to promise a game for Saturday, as had been originally proposed. It is not known now when the game will be held.

• • • •

All members of the Auburn Baseball Club are asked to hand in their uniforms to Mr. C. G. Graham not later than Wednesday.

• • • •

THE PASSING AWAY OF EDWARD PHELAN.

Death of an old and Highly Respected Citizen.

Brief Reference to the Chief Events of his Life.

Edward Phelan, whose death was briefly recorded in yesterday's issue of the Examiner, has for many years been a prominent feature in the citizenship of Peterborough, town and county. He was born in King's County Ireland, about the year 1829 and came to Canada with his father's family when only three months old—nearly seventy-five years ago. On his arrival in Canada Mr. Phelan's father first settled in the township of Dummer, from which after several years he removed to Douro, near Young's Point where he remained till his death about 1850. Edward Phelan set out to face the world on his own account at the early age of thirteen years, and, the success be made of life, from the human point of view, is a proof of his native force of character. He was for many years associated with the lumbering business. It is stated that he piloted the first timber that came down the back waters to Peterborough, receiving for his services $16 per day. About the year 1854, Mr. Phelan began conducting the Phelan House hotel, which has been so long and widely and so creditably associated with his name, as a model hotel of its class—always admirably conducted and noted for its strict observance both of the law of hospitality and the law of the land. Here it may be mentioned that the late Mr. Phelan was, what it is rare to find among the generality of men in active life half a century ago—not to speak of hotel keepers—a lifelong total abstainer from intoxicants. With his thrifty, industrious habits and with a hotel conducted in so excellent and law-abiding a manner, it was no surprise that Mr. Phelan prospered in business and amassed considerable means. He conducted the hotel continuously till 1882, and, after a brief retirement, for some time subsequently. He retired finally a few years ago and took private residence at the corner of Stewart and Simcoe streets, where he suffered the loss of his life. Mrs. Phelan, who had been his constant companion, his faithful help-meet, and acknowledged right-hand of his worldly success, dying in June, 1902. This sad event was a sad blow to Mr. Phelan, from which he never rallied, for from the time of Mrs. Phelan's death, June 10th, 1902, his joviality of spirit departed, and his health visibly declined. He has been in more or less unsatisfactory health for a year past, but six weeks ago he suffered an attack of bronchial asthma, complicated with an affection of the heart. About ten days ago his condition seemed in some ways, improved, and though the dangerous character of his illness could not be ignored, hope was entertained of some further prolongation of life, but yesterday a sudden change supervened, and death took place, somewhat unexpectedly; for the only one of his three sons present was Rev. Father C. J. Phelan, of Young's Point, who at that sad moment was at the bedside in the double capacity of ghostly father and dutiful son.

In July, 1853, Mr Phelan was united in marriage to Miss Mary Sullivan, daughter of the late John Sullivan. To this marriage were born seven sons, only three of whom are living, Harry Phelan, of Peterborough; Rev. Father C. J. Phelan, of Young's Point; and Walter Phelan, of the License Branch of the Provincial Secretary's Department. Mr. and Mrs. Phelan could have celebrated their golden wedding anniversary last July, had Mrs. Phelan lived till that time.

Mr. Phelan won a high degree of respect in the community, of which he was a member for three score and ten years. Though he never took much interest in municipal matters, he was for many years actively associated with Dominion politics, in the Conservative interests. In religion, the late Mr. Phelan was a Roman Catholic, earnestly devoted to the interests of Mother Church, as especially represented by St. Peter's cathedral—a member of its congregation, upon whom, so far as a layman's services were concerned, the clergy could always confidently depend.

One of the late Mr. Phelan's practices, which may almost be said to have become a habit, was his constant presence at funerals, where he was always to be seen, occupying a place at the close of the procession, independently of the age, sex, creed or social position of the deceased. From his long association with the public, there were few men in town or country more widely known or more highly respected.

The funeral will take place tomorrow at ten o'clock, from the family residence, corner of Stewart and Simcoe streets, to St. Peter's Cathedral. After the singing of the requiem high mass, the remains will be conveyed to the Roman Catholic cemetery for interment.

DEATH OF MR. ROBT. McAULIFFE.

Adjourned Inquest Held Yesterday Evening.

The Jury's Verdict—Engine 168 not an Exceptionally bad one.

"We find that the late Robert McAuliffe died from the effects of a scalding on July 5th, 1903, due to the collapsing of the crown sheet of engine No. 168, of the Grand Trunk Railway system, which he was driving at that time.

"We find that the crown sheet collapsed in consequence of overheating, due to low water in the boiler.

"We find that the engine was repeatedly reported as steaming very badly and that successful efforts to correct this fault were not made.

"We believe that if an engine steams very badly the engineer in his efforts to keep his train in motion is tempted to feed water too slowly and hence we think that the extremely faulty steaming of this engine should have been corrected or the engine should have been put out of heavy service."

The above is the verdict which the jury brought in last night at the inquest concerning the death of Robt. McAuliffe, late G.T.R. engineer, who met his death in an explosion of a part of the boiler of an engine he was driving on the Grand Junction Railway on July 5th, last.

Mr. Fessenden, the foreman, who had been appointed to examine the record of engine No. 168, presented at the previous sitting of the inquiry, stated that he had examined the record, mileage and repair books of engine No. 168, and had compared them with the reports of other engines. He did not find that engine No. 168 was more frequently repaired than the average engine of the system. He had noticed that the engineers frequently reported No. 168 as "steaming badly" and added the suggestion that she needed her flues cleaning or her tubes refitting. He noticed that although in the evidence it was stated that the engine "worked water"—that is carried water with the steam down the steam pipe, through the cylinder out of the exhaust pipe and up the funnel, yet no such complaint was registered by the engineers in the books for that purpose.

Mr. Pratt, a representative of the Railway Company concerned, had previously read a long letter which went to show that McAuliffe's engine after a thorough examination had been found to be in first class condition.

Mr. Dennistoun said that the long letter giving the engine such an excellent character was a voluntary recommendation, had not been asked for and had not been written under oath, consequently it could not be taken as evidence. In the evidence statements had been made which showed the accident occurred only one way, which was that the engine wasted water faster than one injector could supply. Another thing to be considered was the evidence of Milne, who said that the engine concerned was deemed unfit for service and that many engineers were afraid of her while all considered her dangerous.

After some further discussion the jury retired and later presented their verdict.

MUTILATED BY A BEAR.

A Peterborough Boy's Mishap at the Soo.

A young son of Mr. J. Spiers, who was formerly employed as a pattern maker at the William Hamilton Company's works, but is now a resident of the Soo, met with a serious accident recently. The young lad, in company with some other children, was viewing some "tame" bears, belonging to Mr. Clergue, the Soo magnate, and incautiously put his hand between the bars to stroke Bruin. The bear did not appreciate this token of friendship, and grabbed the boy by the hand, mutilating his hand and arm badly, and also pulling the shoulder out of joint. A gentleman fortunately passing by showered some blows over the bear's eyes with a cane which he carried, causing the animal to release his hold, and saved the lad's life.

SOME WELLS WERE ORDERED CLOSED

At Board of Health Meeting This Morning.

The Board of Health met this morning in the Town Clerk's office, with the following members present: Messrs. Eyres, Parker, Schneider and Dr. Burnham. Mr. Eyres was, on motion appointed chairman pro tem.

A letter was read from a citizen asking that the water in his well be examined. On resolution the medical health officer was instructed to comply with the request.

An account was presented from St. Joseph's Hospital for expenses in connection with the treatment of infectious diseases. It was referred to the medical health officer to report on.

A letter was read from Mr. John Crane, secretary of Nicholls' Hospital Board, confirming the resolution of the Board not to accept patients suffering from contagious diseases after November 1st.

The wells at 334, 330 and 324 Water street, and also one in the Commercial hotel yard, on the analysis of the Provincial board of health laboratory, were ordered closed.

The board, on motion adjourned for two weeks.

What shrunk your woolens?
Why did holes wear so soon?
You used common soap.

TUESDAY, SEPTEMBER 22, 1903.

THE PARTY OF "PURITY."

For a long time the leader of the Conservative party in Ontario in default of a constructive policy has borrowed and appropriated the policy of the Pharisee of old, the holier than thou policy. Mr. Whitney's loud-voiced attacks against the Ontario Government have been on the line of of attributing to the Liberal party in Ontario, practice of political corruption with the assumption of perfect purity on the part of the virtuous Conservative party in Ontario. This hypocritical attitude has been so impudently assumed and so persistently urged that a little exposure of the hollowness may not be untimely. The revelations of the election courts have shown from time to time that the Conservative party's methods have been marked with the most ingenious details of the most pestilent corruption. It has transpired that immense corruption funds were provided by the Conservative party for the elections of 1898 and 1902, and the row in the Conservative camp between the two factions into which it is divided, only emphasizes the fact of the existence of large corruption funds for the political benefit of the party of purity. A side light or rather full blaze upon Conservative election methods is furnished by the evidence brought out in the North Gray slander suit in which Mr. A. G. McKay, M.P.P., was sued for slander in respect of certain public statements made regarding the manner in which local Conservatives debauched the electorate. The alleged slanderous statements consisted of charges against local Conservatives, of debauching electors with drink and the verdict of the jury in favour of Mr. McKay showed that he was guilty of no slander in making charges that were true. The evidence adduced brought out the fact that the Conservative committee rooms were at times a mere whiskey den. Whiskey flowed freely, and electors were housed there "boisterously drunk," the whole night long. It was testified that electors were taken from their bedsides and summoned to the Conservative Committee rooms and primed with whiskey to put them in proper frame to vote for the party of purity the next day, which was election day. A witness testified that he was in the Conservative committee rooms at 7 o'clock on election day, and saw men lying in the sawdust, or sleeping in chairs, and in an inside room, or "cooler," were half a dozen electors lying asleep, after the night's debauch, ready to be taken to the polls, to vote for the party of purity. The hypocrisy of the whole thing is intensified by the fact that the Conservative party of purity did not supply even pure whiskey for their campaign. A witness testified that the whiskey supplied was "drugged" whiskey, that would "kill at forty rods." This evidence of Conservative methods is bad enough in itself, but when it is contrasted with the claim of the purity of the party, and their denunciation of Liberal corruption, the crime of hypocrisy is added to the practice of rotten and corrupting methods of the most vulgar type. There is no excuse for corruption of any kind practised, by any person or party, but the public who are appealed to by the Conservatives to give their party the Government of the province, because the Liberal party is corrupt, and the Conservative party pure, are in a position to see the hollow hypocrisy of the plea urged. A party that poses as a party of purity, and enforces its claim by means of drugged whiskey, a party which raises enormous corruption funds, and imports Yankee thugs and election workers from the slums of American cities to bedevil the electors of a British province, must establish some better claim to public confidence than its hypocritical claim of purity.

MOUNT PLEASANT.

(From our own Correspondent.)

Miss Victoria and Miss Gertie Argue were at the exhibition held in Toronto. They also visited relatives at Richmond Hill

Mr. Joe Love and his wife were visitors at the Toronto exhibition, as well as a large number of others from this place.

Messrs. Herb Shield, John Hartley and their wives, were visitors at the Ottawa exhibition

The Methodist minister from Bethany delivered a special and highly instructive discourse in the Methodist church here, on the 20th inst, from the words, "What is your life?"

Mrs. Wm. Shield has returned home from visiting her father in the Northwest. She reports him to be convalescent.

From information received from Hon. J. R. Stratton, the Government has granted the sum of $3,000 to assist in draining the Cavan swamp, which will be a great benefit financially and otherwise to the township of Cavan. For years past Mr. Stratton has taken great interest in the drainage of this swamp. By it, two leading roads will be opened, which will shorten the distance going from here to Peterborough and returning, seven miles.

Sound Kidneys Mean Life and Health.

Kidney-Wort Tablets

Make Weak and Diseased Kidneys Well.

It is now an established fact that Dr. Pettingill's Kidney-Wort Tablets cure kidney diseases and all urinary and bladder troubles. The thousands cured tell the gladsome news to others and the good work goes on from day to day. Physicians everywhere acknowledge their superiority over all other known kidney remedies.

Kidney-Wort Tablets are purely vegetable and entirely free from alcohol, that terrible enemy of the kidneys. Begin at once to help the kidneys back to strength and proper action by using Kidney-Wort Tablets. Guaranteed by all druggists. Price 50 cents a bottle or 6 bottles for $2.50.

INDIAN BIVER NEWS.

(From Our Own Correspondent.)

Miss Lily Duff was visiting with friends in Norwood last week.

Messrs. Kelly and Breckenridge were in Warsaw last week.

Potatoes are said to be rotting badly in low places around here.

The annual harvest home held by the Indian River Baptist church, was largely attended by the people of the neighbourhood, and representatives from all the towns and villages near by.

The first item on the programme was races for the Sunday school scholars. The results were as follows:

1. Male — 1st prize, H. Nelson; 2nd prize, Wm. Breckenridge.
2. Female — Miss Fife, Miss Shearer.
3. Male — James Duff, Thomas Samuel.
4. Male — A. E. Borland, A. S. Elmhirst.
5. Female — Mary Elmhirst, Mary Evans
6. Male. — Harold Patterson, Fred Fife.
7. Female — E. Robertson, P. Borland.
8. Male — Wm. Elmhirst, Charles Elmhirst.
9. Male — Charles Whibbs, Fern Shearer.

After tea a good programme was rendered, those taking part being Miss Renwick, of Allandale, who gave several recitations; Messrs. Stocker and Greenslade, of Peterborough, who gave several fine selections. The Comstock band displayed to advantage their mastership of music. Miss Annie Duff, our own musician, also played during the evening.

One of the best games of football ever witnessed in this village was played on the 16th inst., at the annual Harvest Home held by the Baptist church of this place, between Indian River and the 7th Line football teams.

The ball was faced at 6.40 and after about nine minutes of splendid football the first goal was scored for Indian River on a neat drop from the corner by Wright. Some hard playing followed in which the Seventh Line, although they played excellent combination, was completely out-pointed by the home team.

In the second half the Seventh Line went in to win, but although they pressed their opponents' goal with great vigor, the defence of the home team was too strong for them, and in a brilliant rush by the Indian River forwards O'Leary succeeded in putting another ball between the posts. Soon afterward goal-keeper Miller, in an effort to stop the ball, received a severe kick on the head, which rendered him "hors de combat," and put an end to the game, after 28 minutes' play, with a score of 3 to 0 in favour of Indian River. Although very much crestfallen by their defeat, the Seventh Line boys recovered sufficiently to do ample justice to the excellent "fowl" supper of tea and tomatoes which was afterwards served by the ladies of the congregation.

The line-up was as follows:

Indian River		Seventh Line
W. Breckinridge	goal	T. Miller
M. O'Brien	Back	H. Weir
B. Fife	"	R. Goodfellow
A. Fife	Half-back	N. Stark
L. Sullivan	"	P. Pilky
J. Duff	"	W. Henderson
W. Wright	Forward	J. Henderson
H. Nelson	"	F. Goodfellow
W. O'Leary	"	W. Stark
A. Carveth	"	G. Weir
K. Eason	"	F. Weir

Referee—Elmer Davis.

Much credit is due to Referee Davis for the gentlemanly way in which he conducted.

NEWS BUDGET FROM NORWOOD.

Social at Presbyterian Church—Social and Personal Items.

(From our own Correspondent.)

Miss Lena Deegan, of Smith's Falls, is the guest of Miss Clara McNichol.

Prof. H. E. Ford, of Washington & Jefferson College, Washington, Pa., who has been spending his holidays under the parental roof left on Monday to resume his duties at the college.

Mrs. Geo. Taylor left on Tuesday on a visit to her son, Mr. Ira D. Taylor, of Meadow Lea, Man. She also intends visiting her brother at Moosomin before returning.

Andrew Scott, a young Asphodel farmer, about 32 years of age, left his home one evening last week and had not been heard from for about a week. His continued absence caused his friends to grow alarmed, but on Wednesday they received word he was employed with some farmer near Tweed.

Messrs. Finlay & Son shipped on Monday one car load of hubs to Galt.

Mr Terry Smith shipped last week one car load of wood to Mr. J. E. Fitzgerald, Peterborough.

The J. Allan Seed Company, Picton, shipped three car loads of seed peas to Picton, and Mr. A. E. Donaghy, of Colborne, the apple king of Ontario, shipped one car load of apples to Liverpool.

Mr. Thos Fraser, of the firm of Fraser Bros., Hastings, and children, spent Sunday at the home of Mr. Thos. Fraser.

Miss Keel, of Toronto, is the guest of Mrs. E. C. Squire, Queen street.

Mr. and Mrs. Thomas Devitt and son, of Toronto, are the guests of Mrs. Devitt's mother, Mrs. J. Patterson, King street.

Miss Helen Pearce is visiting at her uncle's, Mr. J. W. Pearce, M. P.P., Marmora.

In the absence of Rev. Mr. Parker of the Methodist church, Mr. Wm. Thistlewaite occupied the pulpit in the morning, and Rev. Mr. Foley, South Dummer, in the evening.

The ladies of the Presbyterian church held a peach social on Friday evening, September 18th, in the basement of the church, which was very largely attended. Besides peaches and cake being served a good programme was rendered. Those taking part were as follows:

Anthem..... ....Choir
Address..... ....The pastor
Duet, "Whispering Hope"...Mrs. Davidson and Miss Lillie
Solo, "King of the Mighty Deep"..... Rev. G. A. McLennan, B.A.
Recitation, "He was Scotch" .....Miss Muriel McLennan
Duet and chorus, "Raise Me, Jesus" Miss Edith Nicholls and Mrs. A. Cunningham, Messrs. McLennan and Morrison.
Solo, "Mary of Argyle".....Mrs. Chas. A. Stuart
Male quartette, "Beautiful River"... Messrs. McLennan, Finlay, Roxburg and Morrison.
Duet, "Come unto Me" Mrs. Calendar and Mr. McLennan
Duet, "Crooked Bawbee"..Mrs. Stewart and Rev. Mr. McLennan

The proceeds of the social amounted to $33.

Mr. David Kelly of Dummer who has been seriously ill for some time, is able to be around again.

An adjourned meeting of the village council was held on Monday evening, the 14th inst, at eight. Members all present.

Bylaw No. 276, to assess, levy and collect a sum of money to pay county and village rates, was read the usual number of times and passed.

Moved by Mr. Cuffe, seconded by Mr. Robertson, that the account of William Puffer for lumber mounting to $15.75, and that of J. n Rork to $16.31, for plank, nails, etc., be paid —Carried.

A committee from the Board of Education asked for the loan of some chairs: the request was granted, and the council then adjourned.

Cornfield Philosophy.

A book of sketches and essays that are full of quaint, homely philosophy of the lumbermen, the farm and the city, that will make you feel better and be better; "not intended to reform anybody or to turn the world upside down," the author says.

Finely illustrated, handsomely printed and bound—at half the price of most books. $1.00 postpaid on receipt of money.

"As good as David Harum," a noted critic says.

THE LEWIS COMPANY
460 44th Street. CHICAGO, U.S.A.

ROBBERS FOILED AGAIN.

Gagged Wrong Men in Attempt on Express Car.

Chicago, Sept. 22.—A bold attempt by two men to lock themselves in a Michigan Central car with the express messenger, overpower him after the train had left the yards, and then rifle the two safes in the car, was frustrated Sunday night. William Ganghin, an express man, was knocked unconscious and gagged in the express car shortly after eight o'clock. The men discovered he was not the express messenger and fled. The messenger, who has charge of the car, left Chicago at 8.30 o'clock yesterday morning with one guard and about $25,000 in two safes.

Windsor Murder Trial.

Windsor, Sept. 22.—With Chancellor Boyd presiding, the Fall Assizes for Essex County began at Sandwich yesterday afternoon. Col. J. C. Hegler, of Ingersoll, is the Crown prosecutor. There is a heavy docket, the most important case being that of the King v. Oliver Richardson for murder. This case will be begun this afternoon or Wednesday morning. The grand jury returned a true bill against Richardson.

Sir Charles Gets Busy.

London, Sept. 22.—(C.A.P.)—The Westminster Gazette says: Sir Chas. Tupper, having recently entered his eighty-third year, apparently thinks he ought to make a fresh start in public work, and so has entered actively into the fiscal campaign. He delivered a vigorous address at Plumstead, and more is to be heard from him.

MORTGAGE SALE

—OF—

DOUBLE DWELLING HOUSES.

Under and by virtue of the powers contained in a certain mortgage, which will be produced at the time of sale, there will be offered for sale, by public auction, on WEDNESDAY, the 30th day of September, 1903, at the hour of three o'clock in the afternoon, at the MUNRO HOUSE, in the Town of Peterborough, by John Haggart, Auctioneer, the following property, known as Street Numbers 13 and 15 Cross street, Peterborough, and which said property is more particularly known and described as part of Lot Number 9, shown on registered plan No. 33, for the said Town of Peterborough, more particularly described as follows, that is to say, commencing at the north-east angle of the said lot, thence southerly along the eastern limit of said lot 45 feet, thence westerly parallel to the northern boundary of the said lot to the rear of said lot, thence northerly 45 feet parallel with Cross street to the northern limit of said lot, thence easterly in a straight line to the place of beginning.

On the said property there is said to be erected on a stone foundation a double two story frame dwelling house; cellar under the front part of each house. Front part of each house being about 22 feet by 20 feet, with a one story kitchen attached to each house, on a stone foundation, about 18 feet by 12 feet, and a summer kitchen about 15 feet by 10 feet. Each house has shingled wood shed annexed to it about 12 feet by 15 feet. The said buildings are said to be in good state of repair and there is a verandah along the front of the house and a well on the premises.

TERMS—10 per cent. of the purchase money to be paid at the time of sale, and balance to be paid within fifteen days thereafter without interest.

For further particulars and conditions of sale, apply to

STRATTON & HALL, Vendor's Solicitors,

JOHN HAGGART, Auctioneer.

Dated at Peterborough, this 27th day of August, 1903.

UP TO SPEYER & CO.

Lake Superior Consolidated Waiting For Next Move.

COULD DEVISE NO RELIEF.

Meeting of Directors in New York Yesterday Admittedly Failed to Come to Any Conclusion as to Company's Future—President Shields Presided—Back Salaries Amount to $200,000.

New York, Sept. 22.—"The fate of the Consolidated Lake Superior Co. is in the hands of Speyer & Co.," said First Vice-President Edward H. Sanborn last night, after a meeting of its directors in this city.

From Philadelphia came Vice-President Sanborn and Directors James S. Swartz, George Phillor, H. G. Lloyd, jr., and T. C. Search, with F. S. Lewis, an ex-president of the company, who has been active in endeavoring to relieve the corporation of the present financial embarrassment.

The deliberations of the board lasted until nearly 6 o'clock, when all the members, except Mr. Sanborn, vanished by a rear door of the building, giving various reasons for not saying anything about the meeting.

Mr. Sanborn said: "It amounts to this. It's up to Speyer & Co. to do what they see fit in the matter of that loan of $5,050,000. I mean to say that nothing in the way of devising a plan of relief for the company was done to-day. Nothing of this kind has been accomplished, and I may say that we have no hope of raising the money that we need to rescue the corporation. What Speyer & Co. will do I cannot say. Will they realize on the collateral that they hold, or will they give us an opportunity to redeem it? That is for the future. No possible plan of relief was presented to-day.

"The meeting was our regular monthly one and President Shields presided. I repeat, all depends on what Speyer & Company do. We have no fault to find with them. They have been very kind, very lenient with us for the past three months. I cannot say what we will do. The officers are not going to resign just at present, for whatever Speyer & Co. may do, the holding company, the Consolidated Lake Superior, will exist. No plan to finance our difficulties was presented to-day. We had no communication from Speyer & Co., and sent them none. What has been called the Equitable-Morton of adjustment was not considered to-day.

Owe $200,000 Wages.

"The doors of our plants in the Sault Ste. Marie district were closed through our own action. Our men there have not been paid $200,000 due them as wages for six weeks and none are more in sympathy with them than we. As to the general rumor in regard to financial hostility to our endeavors to relieve ourselves of a strait, this is a subject I do not care to discuss. But I say again, that the fate of the Consolidated Lake Superior Company is in the hands of Speyer & Co. The question of antagonistic influences to our detriment is a matter of opinion and may not warrant an expression of views. Speyer & Co. hold all the assets of the Consolidated Operating Company, stocks, bonds and other equities.

"They may be put on the market. The transaction was in the character of a time loan. The securities represented $30,000,000 spent on the properties and it ought to be borne in mind that there are $4,500,000 of prior liens, so that if the property goes to Speyer & Co. it goes for not less than $9,550,000 and not $9,005,000, the amount of the loan.

"As to reorganization, we are not up to that point. I cannot now discuss the future in that regard."

Lenient With Company.

Charles H. Tweed, representing the Speyer syndicate, referring to the action of the directors of the Consolidated Lake Superior Company, said yesterday:

"We have been very lenient with the company. We will probably foreclose the loan, selling the collateral pledges at auction. The syndicate will seek reimbursement for its outlay."

A suggestion that the syndicate might take over the company and run it pending a reorganization was not seriously entertained by Mr. Tweed.

An acknowledgment was practically made that the directors believed that their plans for placing the company in a sound position had been blocked by the great financial interests that are behind rival steel companies.

EMPLOYES SEE MANAGER.

Would Like Their Pay and Answer Promised To-Day.

Sault Ste. Marie, Sept. 22.—At a mass meeting of Consolidated Lake Superior employes held yesterday a committee that had been appointed to wait upon Assistant Manager Coyne, reported that he could not say definitely whether the wages due the men would be paid next Monday or not, but he promised to let them know for certain to-day what the management would do. He assured them that any cases of absolute destitution would be relieved if reported to him.

To-day there was an exodus of employes from the town, those going out to seek employment elsewhere leaving their time cheques with friends for collection. There will be a general pilgrimage for new pastures after the ghost has walked. Employment agencies are active here in securing men for outside points, and it now looks as if the woodsmen would be drawn off in bunches as they come down from up the line. One firm arranged to take 500 men for work on the Canadian Northern.

For a Long Tie-Up.

While hopes to the contrary are cherished, the general impression is that the works are in for a long tie-up, and business men are arranging their plans accordingly. Some have announced their intention to move their stocks out of town, and others will sit tight to try to weather it out.

Color Anything Any Color.

DISASTER FOR TURKS.

Army of 1,000 Surrounded by Insurgents and Annihilated—Another Body of Turks Wiped Out by Dynamite.

Sofia, Sept. 22.—A special despatch from Rila gives details of the fighting in Perin. On Sept. 16 1,000 Turkish troops surrounded the village and attacked the insurgent bands. The latter were reinforced and the combined forces turned on the Turks and completely annihilated them.

It is reported here that 500 Turks have been killed with dynamite, while fighting against a body of insurgents in the Kresna defile.

War Coming Sure.

London, Sept. 22.—A despatch from Guitchevo, on the Turco-Bulgarian frontier, to The Daily Mail, reports that great excitement prevails in the district because of a skirmish between Turkish and Bulgarian troops Saturday on the mountain range which forms the border line. The general impression is that war is only a question of a few days.

RUMORS OF APPOINTMENT.

Austen Chamberlain to Be Chancellor of Exchequer and Lord Milner For Colonial Secretaryship.

London, Sept. 22.—King Edward is reported to have approved the appointment of:

Austen Chamberlain, the Postmaster-General, to be Chancellor of the Exchequer, in succession to Charles T. Ritchie.

Mr. Arnold-Forster, Secretary to the Admiralty, to be Secretary for War, in succession to Mr. Brodrick.

Mr. Brodrick, the Secretary for War, to be Secretary for India, in succession to Lord George Hamilton.

Lord Selborne, the First Lord of the Admiralty, to be Secretary for the Colonies, in succession to Joseph Chamberlain.

No official confirmation of the appointments has yet been forthcoming. It is known that Lord Milner, the British High Commissioner of South Africa, was offered the Colonial Secretaryship.

Premier Balfour's private secretary informed the Associated Press later that the reported Cabinet appointments had not yet been made.

Apparently Lord Milner is still considering the offer of the Colonial Secretaryship.

The Daily Express says it understands the Government has decided not to bring Lord Kitchener to the War Office.

Support of Nationalists.

The question of the support of the Nationalist party for the new fiscal policy of retaliation is said to be the subject of negotiations between the Government and the Irish leaders. It is reported that Chief Irish Secretary Wyndham is offering a concession in the shape of a Roman Catholic College at Dublin, while the Nationalists, on the other hand, are demanding a measure of local self-Government as the price of their support. Whether or not these statements are well founded it appears clear that the Nationalists intend to use the Cabinet crisis as a lever.

William O'Brien, M.P., speaking at Cork last night, declared unequivocally that both of the English parties were broken and the solid Irish party would meet whichever came out on top. The future aim of the Irish party, he said, was "Ireland a nation," and they intended to adopt a position of independence and hold their hands until it was discovered from whom the best terms could be obtained. The means which secured the abolition of landlordism, declared the Irish leader, could easily on the same lines achieve Home Rule.

No Foundation For It.

London, Sept. 22.—(C. A. P.)—A recent cablegram from Canada stated that the proposal to give preferential treatment to Canadian wheat alone was condemned in the strongest manner by the Canadian supporters of Chamberlain. If this policy was passed there would probably be a cession movement or one for closer reciprocity with the United States. Chamberlain's secretary, replying to the correspondent, said that Mr. Chamberlain did not think there were the slightest foundation for the statement, but it would be much better left unsaid.

The Proper Treatment for a Sprained Ankle.

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is usually two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days. For sale by all druggists.

Dropped Dead.

Belleville, Sept. 22.—Simon Sheehan, an Irishman, who for 55 years had resided in this city, dropped dead yesterday morning while at work. Heart failure was the cause.

Sir Thomas Improving.

Chicago, Sept. 22.—Sir Thomas Lipton will probably be strong enough to leave for London by the [illegible] week.

Is Your Piano in Tune?

The change of seasons affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

Be Sure and see Roy's Photograph Exhibit at Peterborough Exhibition.

St. Luke's Church.

A meeting of the Girls' Guild will be held at the residence of Miss Calcutt this evening at eight o'clock. The friends and members of St. Luke's are requested to send contributions of grain, vegetables, fruits, etc., to the church for the harvest decorations. Flowers will be thankfully received on Friday.

Choir practice on Thursday evening at eight o'clock.

George St. Guild.

The Young Men's Guild of George street church will meet to-night at eight o'clock in the lecture room of George street church. As this is the first meeting of the season a good turn-out of the members is expected. Besides a good musical programme which has been prepared, the annual election of officers will take place and plans will be discussed for the coming fall and winter's work.

Hunting Season.

The Grand Trunk Railway has issued a very handsome illustrated pamphlet, entitled "Haunts of Fish and Game," giving information regarding season for shooting deer, moose, reindeer, caribou, etc., in the "Highlands of Ontario," and at other points along the line of the Grand Trunk. Copies of the same will be furnished on application at Grand Trunk tieckt offices or to J. D. McDonald, District Passenger Agent, Toronto. d68

Annual Western Excursions, Sept. 24, 25 and 26.

Remember the Grand Trunk is the most convenient and up-to-date service to the west for those taking in the annual Western Excursions. Return tickets will be issued at single fare for the Round Trip to Port Huron, Detroit, Saginaw, Bay City, Grand Rapids, Chicago, Dayton, Cleveland, Columbus, Indianapolis. Tickets good going September 24th, 25th and 28th, valid for return until October 12th. For further information and tickets call at Grand Trunk offices. 5d68

Now is the Time.

Now is the time to join the Y. M. C. A. just as the season's work begins. The fees are within the reach of every young man who has any interest in himself. There was never a time when so many were talking of what the Y.M.C.A. has to offer young men. Many of those who are now members are working to secure others. Many more are asked to join in the present movement to boom the membership. Any member who secures five new ones before Nov. 1st will have his own membership extended for 12 months from the time it expires. Now is the time to bring in the new members.

PURSES—Those cute little ones to put inside of hand-bags, at 10c, 15c and 20c at Sailsbury's.

POPULAR YOUNG LADY MARRIED.

Miss Margaret A. Pratt Wedded to Mr. Albert G. J. Roberts.

Ceremony Performed in St. John's Church This Afternoon—The Bride a Valued Member of Church and Will be Greatly Missed.

St. John's Church was very prettily decorated this afternoon on the occasion of the wedding of Miss Margaret A. Pratt to Mr. Albert G. J. Roberts, which took place at 1.30, the floral decorations being the loving work of the young ladies of the church, with whom the bride had been associated in the past.

The beautiful Harvest Festival decorations, which had been allowed to remain, were supplemented by the kindness of the young ladies of the Guild and the King's Daughters, with many floral designs, which gave an added brightness to the joyous occasion. An arch of evergreens and hydrangeas was built at the entrance and under it the party passed. A very handsome floral bell was suspended, and under it the ceremony was performed. The bell was the work of the Girls' Guild and was of a very artistic design. The whole scheme of floral decorations was one which evidenced a cultivated taste, and was very appropriate.

The bride was very tastily attired in a gown of white figured silk organdie over white taffeta silk, trimmed with ribbon and applique and chiffon fischu. She wore a veil and the usual orange blossoms. She entered the church with her brother, Mr. R. A. Pratt, of Brantford, by whom she was given away. The bridesmaid Miss Helen M. Pratt, of Toronto, sister of the bride, was dressed in pink mousseline de soie, over pink silk. She wore a black picture hat and carried a large bouquet of pink roses. The groom was attended by his brother, Mr. Harry Roberts, of Toronto. The ushers were Mr. W. G. Howden, Mr. Jos. Legg, Mr. J. Cocks and Mr. A. H. Scobell.

The beautiful Church of England wedding ceremony was performed by the Rector, Rev. J. C. Davidson, in the presence of a large number of friends of the bride and groom. The choir, of which the bride was a valued member rendered a very pleasing musical programme, Mr. Schneider presided at the organ and played the wedding march.

After the wedding the party partook of a dainty dejeuner at the residence of the bride's mother, Mrs. Helen A. Pratt, 271 Simcoe street, which was very prettily decorated with flowers and maple leaves, the flowers being sent from Bowmanville. The happy couple left on the 5.10 C.P.R. train for the west and the bride will be at home in her new home, 623 Gerrard street east, after October 5th. Her going away gown was made of navy blue broadcloth, with hat to match, and she wore a grey ostrich feather boa.

The out of town guests were:—Miss Alice Chandler, Norwood; Miss L. Cochrane, Millbrook; Mr. and Mrs. F. H. Fee, Omemee; Mr. Geo. Gardner, Barrie; Mr. and Mrs. F. J. Cocks, Toronto; Mr. and Mrs. W. J. Roberts, Cleveland, Ohio; and Mr. Gregg Irwin, Springfield, Mass.

The bride was the recipient of a large number of valuable presents, attesting to her popularity with her many friends here. A very handsome gift was that presented by friends of St. John's church, consisting of an oak cabinet of silver, bearing on the lid an engraved inscription, "Presented to Miss M. Pratt from her friends and fellow workers of St. John's church." The groom's gift to the bride was a gold watch and chain, while to the bridesmaid he gave an opal ring, and to the groomsman a gold-mounted umbrella. The bride has been actively associated with many of the organizations in connection with St. John's church, being a member of the choir, President of the Girls' Guild, and a member of the King's Daughters. She has always taken a deep interest in church work, and will be greatly missed in the different departments where she has rendered such valuable services.

Mr. Roberts was formerly a resident of Peterborough, but for some years has not been living here. He has spent the last four years in England, returning from there last April. The young couple start on their married life with the heartiest good wishes of their many friends for continued happiness.

AN ACCIDENT IN OTONABEE.

Miss Bella Morgan Injured in Accident Yesterday.

An accident which was attended with serious results occurred yesterday afternoon, as Mr. and Mrs. McWilliams, Mr. Alex. Rutherford and Miss Bella Morgan, of Ashburnham were returning from Otonabee where they had been attending the funeral of Mrs. Miller. Near Downer's corners a traction engine was met and on returning to the road from the ditch where the buggy had been driven to pass the engine, the turn was made too quickly with the result that the buggy upset and Miss Morgan's leg was broken at the ankle. As the fracture is rather a serious one Miss Morgan will probably be laid up for some little time. The buggy was considerably damaged, and it is an extremely fortunate circumstance that no one else was injured.

A Specialist in Boys' Work.

Mr. E. M. Robinson, of New York City, who visits Peterborough on Friday next, in the interests of the Boys' Work, is a specialist in this department. No citizen or worker interested in boys should miss hearing him. Conference for ladies at 3 o'clock on Friday. Conference for men from 4 to 9 with tea provided by the Association. Citizens interested should note these dates.

BIRTHS.

HARDILL—In Peterborough on Friday, Sept. 18th, the wife of Mr. John Hardill of a son.

DIED.

LORD—In Peterborough on Monday, Sept. 21st, 1903, Harold, infant son of Mr. and Mrs. E. E. Lord, aged two months and two days.

THE OTONABEE INQUEST CLOSED.

Evidence Taken as to Cause of Death of Mrs. Margaret Miller.

The adjourned inquest into the circumstances attending the death of Mrs. Margaret Miller, of Otonabee, which took place on Saturday night, September 19th, was resumed at the Foresters' Hall, Zion, this morning at 9 o'clock, Dr. Gray presiding. County Crown Attorney Wood was present in the interests of the Crown and High County Constable Geo. Cochrane was also in attendance.

The room was cleared of all except the jury, officials, witnesses and press representatives. The witnesses examined were Henry Miller, husband of deceased; Mrs. Miller, mother-in-law of deceased; Mrs. Metheral, sister of deceased; Mrs. Dickson, another sister; Elizabeth Perry, a young girl in the employ of Mrs. Dickson; Dr. Harrison, and Dr. Shaw and Dr. McWilliams, the two latter presenting their report of the post mortem examination made by them.

The evidence was of a character unsuitable for publication. Although the witnesses were admitted separately, and none heard the story of another before testifying, there was no contradiction in statement.

After brief instructions from the coroner the jury retired.

Up to the time of going to press the verdict had not been received.

AN UNCONFIRMED REPORT.

Mr. Oliver Dusty Said to have Met with Accident at Havelock.

A report which it has been impossible to confirm, has reached town to the effect that Mr. Oliver Dusty, formerly of Peterborough, and well known here, had met with an accident at Havelock on the C.P.R. and is seriously injured. The Examiner sought to obtain information in reference to the alleged accident over the telephone from Havelock, but up to the time of going to press was unable to have the report verified, and all hope that it is unfounded. Mr. Dusty was in town a few days ago.

A TEAM'S NARROW ESCAPE.

Horses Saved by Timely Aid of Citizens.

A team of horses belonging to Mr. R. J. Wolstenholm had a very narrow escape from death on Saturday. A high pile of cordwood fell on the team completely burying them, and but for the timely aid of a number of gentlemen who were in the vicinity, the horses would undoubtedly have died, as it was, the gentlemen referred to immediately came to the assistance of Mr. Wolstenholm and the the animals were liberated without having suffered any serious consequences. Mr. Wolstenholm desires, through the Examiner, to express his thanks to all those who assisted him to save the team. He did not have an opportunity of thanking them personally and wishes to do so in this manner.

DEAF AND DUMB INSTITUTION, BELLEVILLE,

Re-opens for Admission of Pupils on Sept. 23rd.

The Provincial institution for the Deaf and Dumb, Belleville, opens on September 23rd, and the following instructions as to the best way for pupils to reach Belleville, is dealt with in a circular issued by Mr. R. Mathieson, superintendent, as follows:

"Pupils from Peterborough, Lindsay, Kinmount, Irondale Junction, Haliburton, Fenelon Falls, Coboconk, Brechin, Gekert and other points in this district, will be expected on the train reaching Port Hope at 12.50, when a member of the staff will be present to take charge of pupils when it arrives at Port Hope."

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Messrs. William Whitty and Alphonse Delaire are in Stirling for a few days' visit with the former's parents.

Mr. Walter Stocker and Mr. W. Greenslade took part in a concert under the auspices of the Indian River Baptist church, each giving a vocal selection.

Mr. Harry L. Cocks, of Colorado Springs, Colorado, who has been in Buffalo attending as a delegate, the 77th biennal session of the High Court, A.O.F., spent a few days in Peterborough visiting his uncle, Mr. W. Cocks.

Mrs. Oscar O'Shea has recovered sufficiently from her illness occasioned by typhoid fever, to be removed from St. Joseph's Hospital, where she has been for four weeks, to the home of Mr. and Mrs. O'Shea, at the Commercial House. She is still very weak but is improving satisfactorily.

The Port Hope Guide in its report of the services in the Methodist church there, has the following tribute to a Peterborough vocalist:—"Mr. G. K. Martin of Peterborough, sang in a strong tenor voice, 'The Light of the World,' which was much appreciated by the congregation."

PRIZE WINNERS.

Budd & Co., tea Merchants, Give Away Handsome Tea Sets.

It's not often one comes across a genuine "snap," however, three persons are this week feeling in the best of spirits through having done so, for each of them, Mrs. Hardwick, 7 Cross street; Mr. W. Mitchell, 127 Smith street, and Mrs. Simmott, 371 Stewart street, won a beautiful tea set comprising 42 pieces. They went to Budd & Co., tea merchants, Hunter street, and were given the tea sets gratis. It is seldom that such handsome gifts are given away and persons cannot miss the chance. Go to Budd's, buy some tea and run a good chance of getting a prize.

Now is the Time

To take a trip to the Highlands of Ontario, as the beautiful Muskoka Lakes, Lake of Bays and Georgian Bay are now at their best. Tourist tickets are on sale daily. For tickets and information as to train service, etc., call at Grand Trunk ticket offices. 5d68

MR. WALTER YOUNG DIED IN TORONTO.

Well-known in Peterborough Laudanum Said to be Cause of Death.

The man referred to in the following item, taken from the Toronto Globe, was at one time employed with Mr. A. Rountree, at the Windsor Hotel here, and was well known to many in town, who will regret to learn of his untimely death. Mrs. Young is the daughter of Mr. and Mrs. C. W. Simmons, of 57 Chambers street, and has been visiting here for a few weeks. The Globe says:

The dead body of Walter H. Young, a street railway conductor, was found about 2 o'clock yesterday afternoon, at his apartments at 481 Gerrard street east. Three empty laudanum bottles told the story of another who had ended his existence. It was the fourth case of suicide brought to the notice of Chief Coroner A. J. Johnson within a week.

Young was last seen alive about 10 o'clock on Sunday night, when he retired, apparently in the best of spirits, after playing with a dog for nearly an hour. Yesterday afternoon the inmates of the house became alarmed, and Mr. Geo. Edgowes, on going to the room, found Young dead. Coroner Pickering, after inquiring into all the circumstances, decided that an inquest was unnecessary.

Elizabeth Young, wife of the deceased, returned to the city last night from the home of her parents in Peterborough, in response to a telegraph message. Mrs. Young asserts that when she left Toronto, on August 25th, her husband was in the best of health and spirits, and to her knowledge was not addicted to the use of laudanum or any other drug. Young took laudanum on one occasion to stop the toothache. He was not known to be in any trouble which would prompt him to end his life. His death was a mystery to Mrs. Young. They had been married about two years.

The sum of $2.50 in cash and a silver watch were found on his person. His pouch was empty. The company advance their men from $15 to $25 in cash and tickets. Young was 23 years of age.

The Evidence You Value.

By word of mouth from friend to friend Dr. Chase's Ointment has received more unsolicited recommendations than probably any medicine you can mention. The fact that it is an absolute cure for piles has put it in a class all by itself as a preparation of inestimable value and people recommend it knowing that it is a certain cure.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

COLDSTREAMS RAISE GREAT ENTHUSIASM.

Remarkable Demonstration at Last Night's Concert.

Enthusiasm Never Before Equalled - Hundreds Turned Away From Massey Hall.

As an evidence of the undying popularity of the Coldstream Guads' Band which will appear here tomorrow night, the enthusiasm which was awakened by the occasion of their fifth concert in Toronto, held last night, the following from the Mail and Empire may be quoted:—

"Last night's Coldstream Band concert attracted an audience that for numbers and enthusiasm has never before been equalled at a musical entertainment in Massey Hall. By 8.15 o'clock every seat was occupied, and standing-room was sold until the police interfered. Hundreds of late-comers who had been unable to secure their seats at the advance sale were turned away by the policemen at the door, and a good many of them did the next best thing, and sat on the kerbs on Victoria street, hearing the programme fairly well through the intermediary of the Music Hall walls. But it was not the programme which made the concert memorable, it was the demonstration which marked its close. After the massed bands had played "Rule, Britannia," and "God Save the King" as an accompaniment to the magnificent chorus of the 5,000 singers in the audience, Bandmaster Rogan was given three rousing cheers, and demands were made for a speech."

NEWS NUGGETS.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—All Saints' Senior Girls' Guild will hold an open meeting this evening at eight o'clock, and invite new members to join.

—The annual opening reception for the young men of the town will be held in the Y.M.C.A. on Tuesday evening, September 29th.

—The George Matthews Company, Limited, has secured the property near the C.P.R. tracks, known as the Leonard property, where a cold storage and provision warehouse will be erected as soon as possible. It is learned that there will be 200,000 cubic feet of refrigerating space.

—The Coldstream Guards Band seems to affect the people like money—the more they get the more they want. At the fifth concert in Toronto, Massey Hall was a crush of humanity to the doors, and thousands, who could not get in, sat on kerbstones and listened to the concert through stone walls.

—At the police court this morning five persons were charged with having created a disturbance on Water street. Those charged with the offense were: James Crouter, Sidney Crouter, Roland Butcher, William Brough, I. Crouter and Mrs. W. Brough. The Police Magistrate decided that sufficient evidence had not been produced to convict the defendants, and they were acquitted. D. O'Connell appeared for the defendants.

Comfort for the Aged.

Judging from the letters of people up in years there is no medicine which so promptly frees them from aches and pains and insures regularity of the liver, kidneys and bowels as Dr. Chase's Kidney-Liver Pills. Even when all other means have failed old people can turn to this great medicine with full assurance of relief and cure.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was taking a stroll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

THE INDUSTRIAL FAIR OPENS ITS GATES TO-DAY.

The Work of Placing Exhibits is in Progress.

To-Morrow is the Formal Opening Day of the Exhibition.

The weather clerk seems to have been retained by the directors of the first Peterborough Industrial Fair, for there is promise of splendid weather, such as greets the first day of the exhibition. Yesterday was the autumnal equinox, whose usual storm seems to have come and spent its force a few days ago.

To-day the grounds are a scene of bustle, though there is no attendance of visitors — merely exhibitors preparing for the formal opening to-morrow.

The stock exhibits are pouring into the grounds and there is promise of a grand display. The presence of fine herds of Polled Angus and Ayrshires from as far east as Brockville, show that the prize list is attracting outside exhibitors.

THE FORMAL OPENING.

To-morrow at two o'clock the formal opening ceremonies will take place, when Hon. A. G. Blair, will formally open the exhibition.

In the horse, cattle and sheep ring the judges will be busy with their work from ten a.m. till three p.m.

After the formal opening, namely at 3 p.m., the scheduled events in the speeding ring will be run off at the call of the bugle. The following events are booked for to-morrow afternoon at the times mentioned:

Farmers' trot, first heat, 3 p.m.
Judging of Roadsters, class 29, single, 15.3 and over, 3.15 p.m.
Stallion race, first heat, 3.30 p.m.
Farmers' trot, second heat, 3.45 p.m.
Judging of roadsters, class 32, pairs, under 15.3, 4 p.m.
Stallion race, second heat, 4.20 p.m.
Farmers' trot, third heat, 4.35 p.m.
Hurdle race, 4.50 p.m.
Tug of war, 5.10 p.m.
Stallion race, third heat, 5.30 p.m.

Swell Wrist Bags.

We invite the ladies to call at the Peterborough Bookstore and inspect our handsome samples of new wrist bags, labelled "Made in Canada." They are shown in walrus, crocodile, real seal, morocco and snake skin leathers. The clasps, chains and trimmings combine grace with art, in styles that are distinctly and charmingly Canadian. During these millinery show days the freedom of the store is extended to the ladies. A. H. Stratton & Co.

The Beehive

We Have Everything a Lady Wears.

COMING TO PETERBOROUGH.

Mr. Lindman, of Montreal, will be at the Oriental Hotel on Wednesday and Thursday next, prepared to relieve sufferers with uncontrollable ruptures. Consultation free. Read the following testimonials:—

Montreal June 22, 1903.

B. Lindman, 130 Peel street, Montreal:

Dear Sir,—I feel it due to you to state in writing the following facts: For years I suffered from scrotal hernia and after using several kinds of trusses which were recommended to me, I was on May 26, 1902, fitted with one of your well-known trusses, and after wearing the same for about nine months I was entirely cured and thereupon discontinued the use of your truss and have not, up to the present time, required its use and feel as if I had never been troubled with hernia. I may add that I am now 67 years of age and have never felt better than I do at present.

Yours gratefully,

(Signed) CHARLES TAYLOR

On this 22nd day of June, 1903, before me, the undersigned notary, appeared Charles Taylor, of the city of Montreal, mechanical engineer, to me known, who solemnly declared unto me that the statements contained in the foregoing letter are true and correct.

(Signed) G. P. W. KITTSON.

Montreal July 2, 1903

John Hamilton, Carpenter and Builder, 249 St. Martin street.

Mr. Lindman: I have used your truss for six months, and I think it is the best truss on the market, as I tried several before I got yours. I was examined by a doctor and he said I was cured of rupture. I have left your truss off for several days and I think that I am completely cured and I would recommend your truss to any one that is obliged to wear one, as yours has given me great satisfaction.

(Signed) JOHN HAMILTON.

United States Counsel Withdrawe Important Claim.

SIR ROBERT FINLAY RESUMES

Quotes Authority to Show That Coast Line Means a Line Measured at Right Angles to Its General Trend—British Views of the Line Were Often Adopted by the United States.

(Canadian Associated Press.)

London, Sept. 22.—Towards the close of Friday's proceedings of the Alaska Boundary Commission Mr. Dickenson, on behalf of the United States, withdrew their claim that the line should be measured from the head of tide water. The term, he said, was intended to be synonymous with the heads of inlets.

Yesterday Attorney-General Finlay resumed his argument, quoting from the reports of Mendenhall to United States surveyors to show that he contemplated a line measured at right angles to the general trend of the coast, which might cut the longer inlets, and proved by reference to United States maps of the survey of 1894-5 that these instructions were observed, and that these surveys were carried only to a point ten leagues from the mouth of Taku Inlet and other points.

Adopt British View.

This is very important, as these surveys were conducted under the treaty of 1892 to acquire information necessary for the delimitation of the boundary. He showed that in their case the United States are sometimes constrained to adopt the British view of the line. Thus they speak of the shore line several times, meaning the general line of the continent. He discussed the meaning of the words coast and ocean coast, which he said were not necessarily the shore. When St. Paul spoke of the coasts of Tyre and Sidon he did not refer to the line where the water meets land, but to those territories. He argued that anyone asked to draw a line along the south coast of England would neglect the small harbors and bays. He quoted from the correspondence to show that the Russians discriminated between the mouths and heads of inlets, the former being in the ocean, the latter within the continent.

An Impossible Line.

He read from Dall to prove that a line drawn parallel to the coast, as the United States contend, for reproducing a very small inlet inland, was an impossibility. Such would cross itself and get inextricably tangled. He showed that twice in the negotiations it was contemplated to adopt a line irrespective altogether of the mountains. We could not suppose they contemplated an impossible line, and therefore must conclude they meant the line asked for by Great Britain, which was perfectly feasible. He took up the barrier theory and showed by many references to the law of territorial waters that Russia's barrier would not be broken by a line crossing the inlets where they narrowed to six miles, because all above that line formed part of their own territory, subject only to the right of innocent passage over them.

Invitation to Settle.

Sir Robert Finlay pointed out that however pre-supposed by the treaty, the mountains were not necessarily continuous, for neither word range nor chain occurs in the treaty. He distinguished between the word "parallelment" in the treaty and the general word "parallel." The former merely called for a general parallelism, a parallelism such as it was possible to observe. He quoted from negotiation to show that if mountains were to be found near the coast the Russians were apprehensive they might be so near that if base were taken for boundary Russia might get no "lisiere" at all, as the mountains might descend by invincible slope to the water's edge. He invited the tribunal to answer question five by a direct negative, and the sixth question by holding that where mountains fall, the width of the "lisiere" should be measured from mainland coast of the ocean, and in case of a deep inlet from a line separating the waters of the ocean from the territorial waters of Russia.

POSTMASTER IS MADE HAPPY

After Years of Sickness Dodd's Kidney Pills Cured Him.

Plain Statement of a New Brunswick Postmaster Whose Kidney Pains Have Gone Never to Return.

Lower Windsor, Carleton Co., N. B., Sept. 20.—Special.—T. H. Belyea, postmaster here, well known and widely respected, is happy in the discovery of a permanent cure for the Kidney pains that have troubled him for years.

"I have been bothered with Kidney Trouble for years," Postmaster Belyea says: "I have tried many medicines and plasters without getting any lasting benefit till hearing Dodd's Kidney Pills so highly spoken of I determined to try them. They seem to have made a complete cure in my case as I feel as well as ever I was.

"I believe that Dodd's Kidney Pills are the right medicine for kidney Trouble and will do all they are claimed to do."

Dodd's Kidney Pills cure the Kidneys and with healthy Kidneys no one can have Bright's Disease, Lumbago, Rheumatism, Dropsy or Pain in the Back. Thousands will tell you this out of their own experience.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases. 22

For Kidney Disorders Take

Trade-Mark **Bu=Ju**

A vegetable compound in the form of pills which acts on the kidneys. It stimulates and invigorates these important organs of the body, and thus assists nature in keeping the blood pure and expelling poisonous matter from the system.

The latest results of scientific discoveries are embodied in this remedy, which is sold in boxes of 50 pills for 50 cents, at all drug stores. Do not waste money in worthless substitutes.

CAN'T MAKE UP DEFICIENCY.

Britain Will Not Look to Canada For Supply of Wheat.

London, Sept. 21.—(C.A.P.)—Thomas Thom of the Liverpool Corn Exchange estimates this year's shortage at 36,000,000 bushels in the world's wheat available for British needs. Canada's average export of wheat to Great Britain during the past six years was only 6,000,000 bushels. Mr. Thom contends that any deficiency can scarcely be supplied from Canada, as the natural outlet for Manitoba and Alberta is the Pacific Ocean, to meet the increasing bread wants of China, Japan and the Philippines. Mr. Thom thinks that those who expect sufficient supplies from Canada's Northwest are doomed to disappointment.

Boy's Odd Death.

Aylmer, Sept. 21.—A very sad accident happened to Chas. McKenny, a young boy about 12 years old. His father was driving a team of colts attached to a wagon with a rack on it. The young lad was sitting behind his father. After driving some distance Mr. McKenny noticed the boy was not on the wagon and went to see what was the matter. When he found him he was holding on to the side of the fence dragging himself off the road. The boy started to explain and then dropped dead.

Printed Bogus Checks.

Boston, Sept. 21.—An extensive fraud perpetrated upon the Boston and Northern Street Railway Company by the printing of bogus transfer checks, their sale to conductors of the road at a nominal price, and by them turned into the company at their full values, was exposed Saturday. Five persons, including the two printers who printed the counterfeit checks, are in custody. More than twenty other conductors will be arrested. It is believed the company's loss will be $100,000.

When you do not relish your food and feel dull and stupid after eating, all you need is a dose of Chamberlain's Stomach and Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by all druggists.

Should Get an Ark.

Lacrosse, Wis., Sept. 19.—Hundreds of families in the district adjacent to Lacrosse are fleeing with what valuables they can grasp to the hills which skirt the Mississippi to escape death in the floods which are sweeping the Mississippi Valley.

Without Foundation.

Paris, Sept. 19.—A despatch from Belgrade says the report of the assassination of King Peter of Servia, is without foundation.

Any Sore That Will Not Heal.

Any Ulceration, Eruption or Irritation of the Skin is Curable by Means of

DR, CHASE'S OINTMENT.

There is no guesswork about the results obtainable from Dr. Chase's Ointment.

With all medicines taken internally there is more or less uncertainty as to the effect, because the condition may not be exactly as indicated by the symptoms, but if you have a sore or wound and apply Dr. Chase's Ointment and heal it you can see with your own eyes the definite results.

It is because of the certain results accompanying the use of Dr. Chase's Ointment that this great preparation has become to be standard the world over. If a dealer offers you any other ointment, does he do so on its merits, or does he not rather try to make a sale by saying "This is just as good as Dr. Chase's"?

As a matter of fact, Dr. Chase's Ointment is now so universally used that few dealers think of offering anything else when a cure is sought for eczema, salt rheum, old sores or piles. There is scarcely a town, village or side line in this whole land but can point to some case in which Dr. Chase's Ointment has made a remarkable cure.

While this ointment is best known on account of its extraordinary success in curing the most torturing skin diseases and the most distressing forms of piles, it is also useful in scores of ways in every home for the cure of scalds, burns, wounds, old sores, chafing, skin irritation, sore feet, pimples, rough skin and everything for which an antiseptic, soothing treatment is needed.

Dr. Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his remedies. 9

FAMOUS ENGLISH BANKS.

Recent Amalgamations—History of One or Two of the Oldest Concerns—Their Founders—Some Checks Drawn.

The history of private banking enterprise is a branch of literature which appears to have been decidedly neglected. Perhaps this is because it has been considered that some of the secrets of the bank parlor, which require to be preserved with such scrupulous care, might possibly be disclosed. On the other hand, in view of the bank amalgamations which are constantly in progress, and of which the latest example is found in the combination between the Union of London and Smiths and the group of enterprises, which for convenience sake, are known as Prescott's, it seems almost a pity that each banking house has not been compelled to keep a chronicle of the leading incidents in its career. Old and famous firms are being absorbed, and their identity runs some risk at least of being obscured by the process. In a few cases, happily, an attempt has been made to place on permanent record the story of old-established private banks. There is Bristol Old Bank, for instance, one of the few commercial enterprises of the kind founded before the Bank of England was created. This was one of the undertakings amalgamated with Prescott's in 1891, and now included in the larger combination already mentioned. There is an interesting account of this and other Bristol banks in an elaborate volume, entitled "The History of Banking in Bristol," by Mr. Charles H. Cave, whose pen covers the period from 1750 to 1899.

An odd thing about the Union Bank of London is that, while it has absorbed or amalgamated with a number of the older banks, including that of Messrs. Smith, Payne, and Smiths, which was originally established at Nottingham as far back as 1658, it is of itself of relatively modern origin. Its prospectus was issued in January, 1839, at which time, it appears, there were only three joint stock banks in the monetary capital of the world. The bank seems to have been largely of Scottish origin. It originally began business at 8 Moorgate street, but in 1845 removed to its present premises, 2 Princes street. The nominal capital of the undertaking at the time it was created was £2,000,000. The recently announced amalgamation will bring the amount up to £25,000,000. It is only of late that the Union Bank has acquiesced in a policy of combination.

Prescott's Bank was first established in Threadneedle street in 1776, under the style of Prescott, Grote & Co. There were, as inevitably happens, a good many changes in the course of years, and eventually the firm came to be known as Prescott, Cave, Buxton, Loder & Co. Dimsdale & Co. took up banking business some four years earlier than the firm with which they were destined soon to amalgamate. They were located at 50 Cornhill, the present offices of Prescott's Bank. This house was originally known by the sign of the Golden Helmet and the Golden Bear, and when Prescott's and Dimsdale's threw their fortunes together it became their joint habitations. One might run through a long list of distinguished names associated with Dimsdale's Bank, but it is sufficient to say that, after absorbing the house of Drewett, Fowler & Co. it was known in 1891 by the title of Dimsdale, Fowler, Barnard & Dimsdale. The name of Prescott naturally occupies a prominent position in the records of the combined firms. Mr. Charles Prescott, who had been a partner for many years, and who died not very long ago, was the first chairman of the amalgamated enterprise. The memory of the Grotes is still affectionately cherished at Cornhill. They were Dutchmen, as the name indicates.

Of the history of the banking house of Smith, Payne, and Smiths a good deal of information has lately been forthcoming, thanks to the industry of Mr. H T. Easton. The firm is remarkable as being until lately the oldest of its kind in the United Kingdom, and as having in the persons of one family carried on business for over two hundred years. The bank, indeed, has had a reputation over a long period of history as second to none. Branches of Smith's bank were established at Lincoln in 1775, at Hull in 1784, and at Newark in 1688, the latter the date of the Nottingham enterprise. The London business was partly attributable to Samuel Smith, a grandson of Thomas Smith, who was a goldsmith in Wood street. As his brother's business in Nottingham was growing in importance, a London bank was resolved upon—truly a unique experiment for a provincial firm. It carried on business at various places, eventually in Lombard street, and finally and for long years close against the Mansion House.

In the "thirties" this bank kept the accounts of some of the biggest firms in the city, and it apparently also had the patronage of publishers, for there is a record of a cheque drawn by Messrs. Longmans, Green & Co. for £10,000 in favor of Lord Macaulay for his "History of England." A couple of other interesting cheques were those drawn by Sir H. M. Stanley in Central Africa, for which he received payment from Arab traders, and, oddly enough, one of the cheques was paid through the Union Bank of London, with which Messrs. Smith, Payne & Smiths were ultimately to be identified.

It is worth observing that while the process of amalgamation necessarily means to some extent the overshadowing of famous names, yet the conditions which have been observed by the Union Bank and its copartners, if the term may be permitted, are calculated in no inconsiderable degree to keep them alive. A leading feature is the maintenance of a system of local Directors, which meets the objection that this kind of combination necessarily involves the centralization of banking in Lombard Street and its vicinity.—London Telegraph.

BRIGHT'S DISEASE

is the deadliest and most painful malady to which mankind is subject. Dodd's Kidney Pills will cure any case of Bright's Disease. They have never failed in one single case. They are the only remedy that ever has cured it, and they are the only remedy that can. There are imitations of Dodd's Kidney Pills—pill box and name—but imitations are dangerous. The original and only genuine cure for Bright's Disease is

Company's Office — Hunter Street, Peterborough, Next Door to the Canadian Bank of Commerce

Health is a magnet which irresistibly draws the man to the woman in life's mating time. Health does more than tint the skin with beauty; it puts music into the voice and buoyancy into the step as well as happiness into the heart. Although many women covet beauty and are constantly seeking aids to beautify them. Let a woman first seek perfect health and all other charms shall be added to her.

There can be no general health for women while there is disease of the delicate womanly organism. The first step to perfect health is to cure womanly diseases by the use of Dr. Pierce's Favorite Prescription. It establishes regularity, dries weakening drains, heals inflammation and ulceration and cures female weakness.

"I used four bottles of your 'Favorite Prescription' and one of 'Golden Medical Discovery,'" writes Mrs. Elmer D. Shearer, of Mountjoy, Lancaster Co., Pa., "and can say that I am cured of that dreaded disease, uterine trouble. Am in better health than ever before. Everyone who knows me is surprised to see me look so well. In June I was so poor in health that at times I could not walk. To-day I am *cured*. I tell everybody that Dr. Pierce's medicines cured me."

FREE. Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 31 one-cent stamps for the book in paper covers, or 50 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

When the Lamp of Life Burns low

the strain on all the delicate organs of the body is very great. The stomach and bowels are weaker—the liver more sluggish. Constipation paves the way for dreaded kidney and liver diseases.

Abbey's Effervescent Salt

Nature's own aperient, is extracted from the pure juices of fresh fruit. It is not a purgative but a gently effectual and insistent laxative. It relieves the system of all impurities and acts upon the most sensitive organism without discomfort. Abbey's cleanses and purifies the blood, regulates the bowels and brings sound refreshing sleep. It cures constipation by removing the cause, and brings the entire system back to healthful vigor. Directions on the bottle. At all druggists 25c. and 60c.

WHISKEY AND SODA.

Chemistry of This Very Popular Drink—Acts as a Sedative.

However the fact may be deplored, whiskey mixed with soda water is a very popular drink. In Pickwickian times the favorite stimulant was brandy and water, later it was whiskey and water, and now plain water is very generally replaced by aerated water. The popularization of aerated waters has undoubtedly had much to do with encouraging the drinking of whiskey. There are many persons who cannot drink plain whiskey and water who will drink, perhaps with indiscreet relish, the same spirit mixed with sparkling water. The Scotchman or the connoisseur of whiskey, not necessarily synonymous terms, on the other hand, invariably prefers plain water with the spirit, and regards the admixture of soda water as a means of spoiling the aesthetic qualities of the whiskey. But in the one case flavor is sought after, while in the other merely an agreeably stimulating fluid is desired.

Some persons believe that soda water reduces the intoxicating effect of the spirit, but probably an effervescing alcholic liquid, judging from champagne, is more easily diffusible than a still liquid. It is well known, at any rate, that very often when plain whiskey and water disagree, and sometimes give rise to a feeling of sickness, the substitution of effervescent water has a quite different effect. There seems to be little doubt that some explanation of this is afforded by the fact that alcohol will dissolve three times as much carbonic acid gas as water will dissolve. Alcohol would thus convey more gas to the stomach, and carbonic gas in solution admittedly promotes the chemical processes of digestion and acts as a sedative in the stomach. Champagne is well known to be useful in sickness in allaying irritability of the stomach by virtue of the carbonic acid gas it contains. Apart therefore from the pleasing sparkling qualities of aerated water and its sharp, agreeable taste, there would appear to be a sound physiological reason why whiskey with soda water is preferred by the many to whiskey with plain water.—The Lancet.

Young Savant's Notable Discoveries.

Mr. John Garstang, the young savant whose archaeological discoveries at Beni Hasan, in the Egyptian desert,, are just now arousing so much interest, deserves the gratitude of his countrymen, not only because his work is regarded with admiration by Egyptologists of all nations, but because of the happy relationships which he has established with his Arab workmen. To these simple-minded children of the desert the power and wisdom of England are personified in Mr. Garstang. Their faith in him has even at times proved embarrassing, notably on one occasion when, profiting by medical knowledge acquired from his distinguished father, the late Dr. Garstang, he healed a dog which had been shot—his milkman's faithful four-footed friend. Like wildfire the news spread through the villages—carried no doubt with the milk—that the young Englishman was a great "medicine man," and from far and near the halt and blind and maimed were brought, that he might at least cast the magic of his eyes upon them. Very sorry are the Mahommedan Arabs that one who is so good to them should be of the wrong faith, but they began to have hopes of him one night when, seated in a circle, they were reciting their religious traditions. Mr. Garstang recognized the Bible story of Joseph, told with much quaint detail as to the names and rank of the dignitaries who were present at various points of the narrative. "And so," he interrupted the reciter, "his brothers put him into a pit?" "Why, how did you know?" they all exclaimed, and felt that one so well-informed in their religion could not, after all, be "far from the kingdom."—M. A. P.

The Ocean Located.

The class in elementary geography was up for recitation. "What is an ocean?" asked the teacher. "You may answer, Janet."

"It is a large body of water situated near Norfolk, Va.," replied Janet, who had once visited her aunt at the seashore.

LOCATING BOER BIBLES.

Plan to Return Those Taken by British Soldiers During Late War.

The officials of the Society of Friends in London are endeavoring to find out and return the Bibles belonging to Boer families which were taken by British soldiers in the course of the South African war and for the return of which an appeal was recently issued by Earl Roberts. The appeal was recently repeated in Canada.

Information has been received of about twenty Bibles which are missing, and some of these have already been located. One is in the possession of the Bishop of Ripon and belongs to Commandant Prinsloo. The bishop has expressed his willingness to return it. Another fine Bible was heard of in the west of England, and a third located is that of the Dutch Commandant Haasboek, who was killed in the war.

Mr. Alexander of the Society of Friends has two Bibles at his office. One is a magnificent volume, a large folio, dated 1660, 18 by 11 inches, belonging to the Van der Merwe family and returned by Captain Werneford, who found it near Ermelo. This contains a pedigree the first part of which is in illuminated characters. In all probability it belonged to one of the old voortrekkers. The other is not so old and apparently belonges to a family named Grant.

Recently an officer living at Newcastle-on-Tyne wrote to say he was returning a Bible he bought from one of his men which belonged, he believed, to one Martinus Els of Sloot Kraal, Heilbron.

A Famous Correspondent.

A man very much talked of lately, on account of his valuable press letters, is Dr. G. E. Morrison, the Pekin correspondent of The London Times, and for a man of only forty or so he has certainly had a crowded and adventurous career. He started it, it seems, while a school-boy, by navigating the River Murray from source to mouth in a little canoe by himself. Then he walked from Melbourne to Adelaide, a sort of trial trip preliminary to his great and perilous solitary tramp of two thousand miles across Australia from farthest north to remotest south. This was the beginning of his connection with journalism, as he wrote a vivid narrative of his experiences in the Melbourne Age. Then he worked for a season among the pearl-shell divers of Northwestern Australia, subsequently shipping as an ordinary seaman on a Kanaka recruiting schooner for a voyage among the Pacific Islands, publishing the results in the Age. Next he led the same paper's exploring expedition into New Guinea, where he was speared by a Papuan cannibal. A portion of the spear remained embedded in his body, and was only removed when he went to Edinburgh to qualify for his M.D. degree. Returning to Australia, he was appointed House Surgeon in the Ballarat Hospital, where he remained for two years, when his roving disposition again asserted itself. This time he chose China, and there he appears to have taken root at last.

Pandora Range

A VENTILATING OVEN THAT VENTILATES:

There is only *one practical way* of ventilating the oven in a range and that way has been adopted in the "Pandora"—is an *actual working feature* and not a mere talking point.

Fresh air is drawn from the outside through small vents into the oven and is quickly heated and disseminated, while the odors and cooking fumes escape through small vents into the smoke flues and up the chimney.

Result is that expensive, juicy roasts retain their rich, natural flavors and are entirely free from cooking odors and taints, to which the palate is so sensitive. Puddings, bread, etc., when baked, are always light fresh and free from taint.

In the production of the "Pandora" range you have all that scientific study, practical experience, skilled workmanship, and an immense and finely equipped plant combined, can produce.

For sale by all enterprising dealers. Booklets free.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay. I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 40c.

300 Pairs Men's, Ladies' and Children's Boots, all new goods, from 15c Pair up.

THE LATEST NEWS OF LOCAL SPORT.

Meeting of Rugby Executive Last Night.

Will Send Representative to Toronto To-night—Turf Notes and Other Sports.

RUGBY.

A meeting of the Peterborough Rugby Club Executive was held last night was held at the Oriental Hotel with the following members present:—Messrs. E. S. Clarry, President; W. Crowley, 1st Vice-President; C. G. Graham, Secretary-Treasurer; A. A. Hollingshead, J. M. Brooks, A. Noble and Pascoe.

The president reported that the Club had been admitted to membership in the O.R.F.U., and that the team would be included in the intermediate schedule of games. A discussion ensued as to the possibility of playing home and home games with the three Toronto teams entered in the Intermediate series. It was decided to ask the Union to arrange the schedule to conform with this suggestion. If this is arranged it will give Peterborough three home games, which will be more than has been played in any one season in the town since the team has been playing O.R.F.U. games. The Union will also be asked to arrange the schedule so that a game will be played here on Thanksgiving Day.

Mr. A. W. MacPherson was appointed to represent the Club at the O.R.F.U. Executive meeting to be held at Toronto to-night, as it was thought that it would be to the advantage of the Club to be represented.

Captain Crowley reported as to the number of members turning out to practice. He said he had plenty of good material in sight, and judging by the form displayed in the practice of Saturday, the team would be a strong one. He urged the boys to turn out to practice regularly. An effort will be made to secure the use of the hockey rink for night practices.

The question as to where the games will be played this season was discussed, and, while it is not definitely decided, it is probable that they will be held on the agricultural grounds, and an efficient bus service will be inaugurated. The Turf Club intends to place the grounds in good condition, and if this is done in sufficient time the games will be played there. A committee was appointed to attend to the question of grounds and report to the Executive.

The affairs of the Club are being conducted in a very business-like manner and the prospects for a successful season in rugby are excellent.

* * * *

All members of the Rugby team are asked to turn out at 7.30 to-night for a run from the Y.M.C.A.

* * * *

At the meeting of the O.R.F.U. to-night it is reported that the Ottawa Rough Riders and the Kingston Limestones will formally withdraw from the Union. This move on the part of the eastern clubs will not cause very much surprise, as it has been apparent for some time that they have not been exactly pleased with the way things are going in the Ontario Union. The new rules do not find favour in Ottawa because it is generally considered that in a game in which beef and brawn is subordinated to skill and speed the Rough Riders would be at a disadvantage when pitted against the Argonauts or any other fast light team.

TURF.

Three running horses arrived at the track to-day and will go into the races to be held during the Fair. The prospects for a good programme of races are excellent and it is almost assured that the best string of trotting, pacing and running horses ever seen on the local track, will be here to-morrow and Thursday. The track is in splendid condition, and some fast time should be made.

"Little Boy," owned by Mr. Henry Snow, of Toronto, also Mr. A. Martin's "Gipsy Girl," will probably be here to-morrow, which will make the races increasingly interesting.

* * * *

Mr. George Powell has bought from Oliver Forsythe, of Stouffville, the pacer, "Red Pat," which makes a valuable addition to the number of horses owned in Peterborough.

MISCELLANEOUS.

A tug of war will take place on Thursday between the "Force" and the "Quaker" teams for the championship of Peterborough. A cup presented by the Turf Club and medals by the Fair Association, will be given the winners. This promises to be a decidedly interesting event, as the "Force" team has been considerably strengthened, and is now prepared to put up a good argument.

SPRINTING.

P. McAuliffe challenges O. Grose to a 100 yds. dash, on Saturady afternoon at 2 o'clock on the Turf Club's track.

TUG-OF-WAR.

The Banner Oats Tug-of-War team hereby challenges any tug-of-war team in the County of Peterborough for a pull in the Exhibition grounds on the afternoon of Sept. 23rd. William Cohoone, captain.

HISTORY OF THE COLDSTREAM GUARDS.

Oldest Regiment in the British Army.

His Majesty King Edward Colonel-in-Chief - Conduct of Guards at Crimea.

To-morrow the famous Coldstream Guards band will visit Peterborough for the purpose of giving a concert and a few words about the regiment to which they belong may be both timely and interesting.

The Coldstream Guards is the oldest regiment in the English army. The present principal officers are: Colonel-in-chief, the King; Colonel-General Sir F. C. A. Stephenson; officer in command, Colonel A. E. Codrington; Lieut.-Colonels, Hon. Henniker Major, C. B., H. C. Surtees, D. S. O., G. Pleydon Bouverie.

The regiment was formed in 1650, under General George Monck, by drafts from the Cromwellian regiments of Sir Arthur Haselrigg and Colonel George Fenwick. As Monck's regiment it fought at Dunbar, at the sieges of Stirling and Dundee. When returning from Scotland on the march to the south Monck's regiment received the name which it now bears from the town of Coldstream. "This town," says the chronicler of the day, "hath given a title to a small company of men, whom God made the instrument of great things by the no dishonourale title of Coldstreamers." This name given in 1660, has not been changed up to the present day although at the beginning of last century the regiment was sometimes called 2nd Foot Guards. This appelation never received official sanction and soon dropped into disuse. At the Restoration the regiment was mustered into the King's service, its Colonel, George Monck, becoming Duke of Albemarle.

Its earliest battles under the royal colours were fought at sea, portions of the regiment being present at the sea battles of Harwich, Dunkirk and the North Foreland in 1665 and 1666. On land it fought at Sedgemoor against the Duke of Monmouth, at the siege of Namur, at the battles of Malplaquet and Fontenoy. At the latter fight, the first battalion lost heavily, both in officers and men. In Egypt and in the Peninsula the Coldstreamers took part in all the principal battles. At Waterloo the second battalion was present and occupied Hougomont. The Duke of Wellington's despatch referring to the defence of that farm states: "I occupied Hougomont with a detachment of Major General Byng's Brigade of Guards. I am happy to say that it was maintained throughout with the utmost gallantry by these brave troops."

Later on in the Crimea the first battalion upheld the traditions of the regiment. "The conduct of the Coldstream Guards at Inkerman," says the Times of November, 1854, "should immortalize their name. The battalion went into action with 17 officers and 400 men; of that number eight officers were killed, five wounded, and upwards of 200 rank and file were killed and wounded." A memorial to those who fell at Inkerman may be seen on the south side of the main entrance of St. Paul's cathedral—a testimony to one of the hardest battles of modern times. Not only at Inkerman but during the whole of the Crimea the regiment suffered from battle and disease, the loss amounting to some 700 officers and men, out of a total of little over 2,000 who took part in the campaign.

A battalion was in active service in 1885 at Suakim, and small detachments took part in the Ashanti expedition of 1895. During the recent South African war the regiment was in long and continuous service, being amongst the first on the field and the last to leave. At the battle of Modder river it was the Coldstreams who were ordered to cross the river first, and the spectacle of the guardsmen swimming and fording the stream under very heavy fire in full view on both sides was an inspiring sight.

OBITUARY.

The Late Lottie Ingram of Doure.

The death took place on Sunday, Sept. 13th, at the residence of her brother, Mr. Henry Ingram, of Doure, of Lottie E. Ingram, at the age of 27 years. Deceased had been ill for the past six months. While in health she was an active worker in the Epworth League of the Methodist church and a member of the church choir, and her death will be greatly regretted by all who knew her.

The funeral took place on Tuesday afternoon to the Lakefield cemetery and was largely attended.

Food, Not Medicine.

Ninety-nine babies out of every one hundred who are emaciated, weak, sickly and almost lifeless, require food, not medicine. When we say food, we do not refer to the poor preparations such as many babies are now fed on, but Lactated Food, that perfect substitute for healthy breast milk—a food that babies love, that builds up flesh, bone and muscle, and that makes the little ones happy and contented. Infants fed on Lactated Food are never sick; they are raised to childhood vigorous and strong. Try it for your baby dear mother if it is not thriving. All druggists.

PETERBOROUGH FAIR OPENED.

First Industrial Fair Now in Full Swing.

THE OPENING CEREMONIES.

Excellent Quality of Exhibits—Addresses by Hon. J. R. Stratton, Hon. Pres.; Hon. A. G. Blair and Mayor Roger—The Inside Exhibits.

The second day of which is announced as the First Peterborough Industrial Fair opened with weather of splendid promise, but as the day wore on, the equinoctial gales began to assert themselves. During the morning although the town was thronged with people, the turnstiles admitted comparatively few visitors, and those were largely exhibitors, who contributed to the bustle of preparation that prevaded the grounds.

The grounds by the way are differently arranged. The division fence between the former grounds and the driving park track has been removed, and by amicable arrangement with the Turf Club, who have met the Fiar Directors generously, the Driving Park and all its conveniences, including the splended speeding track are available for exhibition purposes, and the result of this co-operation has been an increased interest in the speeding events, some very fine and speedy horse flesh being recorded in the entry books. On the old Fair grounds the grand stand has been removed, und separate and ample enclosed paddocks have been provided for judging horses, sheep and swine, and it is worthy of remark that the judges are experts furnished by the Agricultural Department of the Ontario Government. In this and other ways it has been the aim of the directors to make the fair of an educative character, as it has been their aim to improve the quality of the exhibits especially in stock. With this in view, substantial additions have been made to the value of the prizes offered, the increase in some cases amounting to as much as three hundred per cent. For the first time, an entry fee has been imposed in order to discourage the entry and exhibition of inferior animals. The result has been that there is upon the grounds the best exhibit of horses, cattle, sheep and swine ever shown on the grounds, exhibits coming from outside places. In horses the agricultural class especially is splendidly represented, and the entry list for speeding events is large and promising. The horses as a class are generally of a superior kind, the judges, who have made the circuit of fall exhibitions pronouncing the exhibition field of horses the best they have seen at any fair, outside of Toronto and London. The horned cattle exhibition is also exceptionally excellent, especially in quality, though the number is more limited than is desirable, though about equal in this latter respect to the exhibitions of former years.

The poultry exhibition was excellent in regard to quality, some of the birds shown having been exhibited at Ottawa and Toronto. The number, however, was rather small, and the judge, Mr. D. C. Trew, of Lindsay, compained that the arrangement of the coops made judgment difficult, as exhibits of the same class are placed so far apart that comparison is made very difficult.

THE OPENING CEREMONIES.

The first Peterborough Industrial Fair was formally opened this afternoon at 2 o'clock by the Hon. A. G. Blair, ex-Minister of Railways and Canals in the Dominion Cabinet, in the presence of a great concourse of people gathered from all corners of Peterborough County as well as from surrounding counties. A stand had been erected on the grounds facing the pavilion upon which were, Hon. President Hon. J. R. Stratton, President Hughes-Charles, Hon. A. G. Blair, and Messrs. H. Burnham, K. Eardley-Wilmot, L. M. Hayes, Thos. Hunter, R. Fair, C. B. McAllister, G. W. Fitzgerald, Mayor Roger, Aldermen Shortly and Finnie, Mr. Maloney and others.

The President in introducing Hon. Mr. Blair to open the exhibition, expressed his pleasure at the large number present, he welcomed them to the Fair, which was, he felt sure, going to be a success. Of late years he said, the Fair had not been as pronounced a success as would have been liked. This was not due to mismanagement, but he thought the reason was that it had been too local in its character. The directors had increased the amount of prizes given, and the result was that the Fair had reached a new era, and would be a success.

All were glad, he said, that Hon. Mr. Blair had been secured to open the Fair, and immediately introduced him to the gathering.

Mr. Blair, in speaking, expressed his pleasure and gratification at the good fortune which has attended the management of the Fair, in having been favoured with such excellent weather. He paid a high tribute to the salubrious climate of this country, and said that in no country was the climate more desirable than in Canada. He was pleased to receive an invitation from the president to attend this Fair and to make a few observations by way of opening it. He considered it a compliment to be asked to open an exhibition in such a progressive town as he knew Peterborough to be. Mr. Blair then spoke with reference to the condition of Canada in respect to the growth of her trade and quoted figures illustrating the growth made during the last thirty years. He said that the people were but now recognizing the many advantages possessed by the country over others, and in particular he mentioned the fact that Canada's export trade was nearly three times as much per head of the population as that of the United States. A more extended report of Mr. Blair's speech will be given in to-morrow's issue.

Following the address of Mr. Blair, Mayor Roger spoke briefly welcoming the visitors to the town, and assuring them of Peterborough's interest in the exhibition.

Hon. J. R. Stratton, Honary President, was then called upon for an address, and responded by congratulating the Directors of the Society upon the success of the first Peterborough Industrial Fair. He said that not only was the Ontario Government interested in the farmers, but the Directors also were interested, and it appeared that Providence was also working for them, an evidence of which was the weather with which the Fair was being favoured. He also spoke of the prominent position that Canada is now taking among the nations of the world, and it was being amply demonstrated that Canadians were physically, mentally and morally equal if not superior to, the inhabitants of older countries. In respect to trade and commerce that superiority was particularly noticeable, and Canada is now producing almost three times as much per head as the people of the United States. Canada had emerged from her infancy and had promise of a great future in store. The people, he said, were in the main well satisfied with the conditions under which they were living and all were prosperous. He hoped all would enjoy themselves, and once more congratulated the directors on the abundant success of their effort.

Hon. Mr. Blair then in a few words, formally declared the first Peterborough Industrial Fair open.

THE INSIDE EXHIBITION.

Here the same general remark applies — that the numerical lack of exhibits, as compared with former years, was amply compensated by superiority of quality. This applies to all classes of exhibits inside the building.

As was to be expected in this year of plenty, the root and vegetable show was immense. Attention is attracted by the tremendous display of potatoes—in point of size—though the display does not represent many competitors. There is also a display of tomatoes—of excellent quality, carrots, turnips, mangel wurtzel, etc., and two or three exhibitors are present with something new in the line of roots—sugar beets. Some phenomenally large cabbage heads are on view, and the fragrant onion looms up large in the public eye, and presents strong claims to admiration. The department of domestic economy does not bulk very large—a little home-made bread, canned fruit, honey in the comb, and granulated honey are sparingly present.

The grain section is very creditable indeed, the quality being superb. Wheat is a good, if small, showing. Some of it is of prime quality, a specimen of Red Fife, grading according to expert judges, with Manitoba No. 1 Hard. A splendid sample of white oats is shown. It runs through the fingers when lifted, like barley, and no wonder, for it weighed the astonishing weight of 50 lbs. to the bushel—16 lbs. above standard, 34 lbs. A sample or two of timothy and clover seed are also shown. Three boxes of cheese constitute the exhibit in the dairy class.

On the second floor the Ladies' Work Department is most largely in evidence. The collection is very effectively displayed, and though the exhibits might have easily been more numerous, the variety is good, and many beautiful specimens of female handiwork are displayed. Domestic industries are somewhat sparingly represented. Quilts, counterpanes, flannels, rag and wool carpets, blankets, etc. In this department are also to be seen specimens of painting on silk, china, etc, burnt leather work, wood carving, sofa cushions, footstools, etc, etc., etc. A display of Kindergarten work, with penmanship, is shown.

Mr. Mark Spenceley is justifiably proud of the red ticket upon a walking stick, of the size of a Fiji Island war club, of bird's eye maple, shown by him. In sketching its history, he states that the war club was obtained at Buckhorn by Mr. David McGregor.

This department also contained a collection of potted plants and cut bloom.

The display of fruit is disappointingly small, especially for a district where apples, plums and pears are grown extensively, and in a season when apples and other fruits are so plentiful that they are almost a drug on the market. There is a considerable display of apples, two exhibits of pears and a small exhibit of grapes.

The art gallery contains a most meritorious display, though limited in quantity. Every kind of work shown was of superior quality, and it is said that many of the exhibitors were from a distance — Toronto, Belleville, etc. Mr. R. M. Roy, had a magnificent collection of photographic work, including cabinets, framed photographs and coloured work. In

WEDNESDAY, SEPT. 23, 1903.

AN EXAGGERATED STORY.

Globe.

As was surmised in these columns a few days ago the injury to the Northwest crops has not been at all as serious as the first despatches indicated. The experience which the Territorities had in 1900, has been repeated. The appearance of snow so early in the season superinduced gloomy forebodings, which have not been realized. There has been a slight loss, variously put at from three to ten per cent., but in so buoyant a country such a loss will be regarded literally as of no account. The crop this year after allowances are made, be very much better than the predictions of midsummer would have led us to expect. There is a prospect, too, that prices will be well sustained, to say the least of it, so that the returns to the husbandman for his labours are likely to be encouraging to a high degree.

The recent reports of loss through the premature snowstorm suggest the reflection that had they been true it would not have affected the opinion now held of the Canadian west. A few years ago such an event would have been regarded as a serious setback. We have now, however, arrived at a period when the experience of one season cannot affect our estimate of the west from the agricultural standpoint, any more than a season of storms, such as Great Britain has been visited with this year, can affect our estimates of the motherland. The character of the west has been established and cannot again be cast in doubt by sporadic occurrences of any kind whatever.

THE PRESENT RAPID AGE.

Toronto Star.

Flint and steel were used for over four hundred years in striking lights, and there are men and women yet living in Toronto who remember very well the first phosphorous match they ever saw.

Inventiveness was not greatly encouraged in olden times. During the past sixty or seventy years the world has been almost entirely made over, and no doubt electricity is largely responsible for this. Quick communication has greatly stimulated progress of every kind. Roentgen discovered the X ray, and within twenty-four hours after he announced it scientific men in all parts of the world were discussing it, and within a fortnight professors in Toronto University and in similar institutions the world over were grouped around tables working with bulbs and wires, demonstrating the thing for themselves. Ten thousand men are experimenting to turn the discovery to its fullest usefulness. To quick communication the world of to-day owes much. The wisdom of the world in full force addresses itself to questions in their order. Strangers do not need to travel from afar to test the wisdom of Solomon, for his lightest words are cabled over the earth. And while we have the telegraph on land and cables under the ocean, not satisfied with these, somebody thought of wireless telegraphy—almost forthwith it is produced, not by one, but by two or more independent inventors, and is an instant success. Ten thousand men have gone apart to study out the uses to which this invention can be put and to seek the possibly greater revelations to which it may lead. It is an age of investigation, experiment, and invention, and notwithstanding the wonderful facilities that exist for gathering information from all corners of the compass, it is a human impossibility to keep fully posted on the scientific and mechanical advancement going on.

The cause of civilization owes much to quick communication, bringing, as it does, all nations forward and abreast, and if some complain that the age is too practical and given over to material things, the explanation is largely found in the fascination that material progress exerts on men's minds.

SOO SITUATION CALMLY REVIEWED.

Statement by Those who are on the Spot.

The Shut Down but Temporary—Prospects are That it Will Prove of Benefit to Soo.

As a proof of the fact that reports referring to the temporary cessation of work of the plants belonging to the Consolidated Lake Superior Company at Sault Ste Marie are greatly exaggerated, a statement from the Sault Ste. Marie News is published, showing that the situation is not as serious as the sensational reports would have the public believe.

"The property of the Consolidated Lake Superior Company has practically passed from the control of that company and is now the property of the Speyer syndicate. Last night Speyer & Co. notified President Shields of the Consolidated Company that they would decline to enter into any more conferences looking to the financial reorganization of the company. In plain English this means that Speyer and company propose to proceed to take over all of the properties of the company forthwith under the securities given them to secure a loan of $5,050,000 made last fall and which is now some four months overdue.

These securities are in the form of the stock of all the subsidiary companies of the Consolidated company which were put up to secure the notes for the amount mentioned. The payment upon the notes not having been made the Speyer people have practically but to notify the officials of the Consolidated company that the payment having been defaulted under the terms of the loan, they have taken possession of the stock which carries with it all of the assets of the company. This Speyer and company did last night and to-day the syndicate, headed by the New York house, own and control all of the properties of the company.

It was undoubtedly due to this new phase of the situation that the order was issued to-day shutting down all of the operations of the company until affairs could be adjusted upon this new basis.

The effect upon the situation cannot but be for the best, viewed from the standpoint of the two Soos. The property now passes into the hands of a big group of financiers who secure it for but a fraction of its cost or present value and they will be in a position to invest sufficient working capital and put every plant of the company upon an active profitable basis.

The Speyer syndicate who are now the owners of the Consolidated company's properties is composed of Philadelphia and New York capitalists who are among the heaviest financially in the country and are more than able to add enough money to their present investment to place the company upon the soundest sort of a financial basis.

It is the general idea that the Speyer people will take immediate possession of the plants and that all plants that can be operated with a profit will resume operations at once."

STREET RAILWAY FRANCHISE.

In view of the agreement about to be ratified with the Peterborough Radial Railway Company, the following article from the Montreal Herald may be of timely interest:

There are just two approved methods of dealing with Street Railway franchises.

One is the Massachusetts method of revocable franchises, under which a railway holds possession of a street during good behaviour, which is to say as long as it gives an efficient service at a charge low enough to satisfy the public. If it fails to do so it can be told to take up its rails.

The other system is to arrange for the occupation of specified streets, on specified terms, for a period not longer than thirty years, and preferably for not longer than twenty years.

Fifty years franchises are no longer tolerated. Wherever one has been proposed of late it has been opposed in the popular interest, and usually with success.

If the two parties to such a bargain were to exert all their ingenuity in the attempt to foresee what changes in the cost of operation might be expected in might be looked for, and what would be a fair bargain to enter into, recent experience proves that they could not come anywhere near a right estimate. The Toronto contract, which is probably more favourable to the people's interest than any other, certainly more favourable than any other on this continent, was arranged after just such careful consideration of the possibilities. And yet, superior as it is to all other contracts, it has turned out to be a much better bargain for the company than was expected.

Montreal's contract with its Street Railway, is probably the next best, and yet see how well it pays the company. It pays so well that the company want to go on forever on the same terms.

As indicating what the tendency is in these matters, it may be mentioned that when in 1897 the directors of the West End Street Railway Company of Boston voted to lease their system to the Bostin Elevated System for a period of ninety-nine years, the Massachusetts railway commissioners, after a public hearing, refused to allow it, and a lease was executed for less than a twenty-five year term.

In Chicago the whole city was kept in a ferment for years by the attempt of capitalists to secure fifty-year franchise legislation at the State legislature. The attempt was defeated, and the capitalists who tried it left for Europe.

Monkey Brand Soap removes all stains, rust, dirt or tarnish — but won't wash clothes. ot

KING EDWARD AND HIS TAILORS.

Englands Ruler Best Dressed Man in Europe.

HIS TASTE IS FAULTLESS.

Picks out a Dozen Patterns in the Time an Ordinary Man Would Select one.

The relations between Royalties and their tradesmen are naturally invested with considerable secrecy, and it is by no means an easy matter to get a glimpse of a King in the role of a customer. A short time ago, however, the writer was fortunate enough to meet a gentleman who for some years was one of King Edward's tailors, and to learn from him certain facts which can scarcely fail to prove interesting, and which there can be no harm in publishing.

"King Edward," this gentleman said, "may well be called the best-dressed man in Europe, for I have never known anyone who had such a genius—genius is the only word that describes his gift—for knowing what to wear and how to wear it. Under other conditions he might certainly have made a name and a fortune by his sartorial skill.

"While other men will spend half an hour in choosing a pattern for a pair of trousers, the Prince, as he was in my time, would select a dozen in as many minutes, and each one was faultless in taste. It used to be my duty to wait on him by appointment at Marlborough House with patterns, and I can truly say that I was never detained more than ten minutes or a quarter of an hour, although in that short time he would choose patterns for perhaps a hundred pounds' worth of clothes.

"Eleven o'clock in the morning was the invariable time, and on the very first stroke of the hour the Prince would enter the room from his library, and after a cheery 'Good morning,' get to work in the most business-like way imaginable. His punctuality, by the way, was something amazing; I never knew him to be a minute late. Once, indeed, it was just two minutes past eleven by my watch when he made his appearance, and I thought for once I had caught the Prince napping. But I found later that it was my watch and not his Royal Highness that was wrong.

"By the way, I ought to tell you of how he once quietly rebuked me for unpunctuality. I had been detained in the street by an old friend I hadn't seen for years, and reached Marlborough House ten minutes late. The Prince was already awaiting me; but, to my relief, all he said was, 'Good morning, Mr. ——. You see I have beaten you this time.' Of course, I explained the reason for my lateness, and he made the kindest enquiries about my friend.

"Occasionally, as he chose first one pattern and then another, he, would do me the honour of consulting me: 'Don't you think this will make up well, Mr. ——?' or 'This is a pretty cloth, don't you think so?' and it was by no means merely out of politeness that I endorsed his choice, for it was always unimpeachable.

"He would often, too, drop in at my place to look at any new patterns I might have, and would bring one or more of his sons with him. He never attempted to influence his sons' choice, but I always noticed that they followed his lead and chose the same patterns as himself — in which they were very wise. On these occasions he would frequently have a long chat with me on matters sartorial, and the way in which he would discuss the relative merits of cheviots and saxonies, pilot cloths and beavers, diagonals and vicunas, and the knowledge he showed in all the technicalities of my art, used to amaze me.

"Of course the King pays a good price for his clothes, but by no means the fancy prices commonly believed, and he always gets good value for his money. In fact if you were to order the same things you would have to pay just the same prices. For trousers, for instance, he pays from two pounds to fifty shillings a pair; a frock coat and vest will cost him eight to ten guineas; an evening suit perhaps five guineas more; and a tweed suit eight guineas.

"His wardrobe, as you may imagine, is very extensive. He rarely wears a pair of trousers more than three or four times, and he must get through quite a hundred pair in a year; he orders a dozen evening suits yearly, and other clothes in like proportion; so that his clothes, apart from uniforms, must make a big hole in a thousand pounds a year.

"As for the King's uniforms I scarcely believe he could give offhand the number of them, though he could describe each of them down to the minutest detail, and could tell at a glance if anything were wrong. In fact I should say the King has the most remarkable memory in England for many things. His uniforms I should put down their cost at something like ten thousand pounds.

"Fortunately the King is a rapid dresser and can get out of and into his clothes in a remarkably short time. Indeed, of all the customers I have ever had not one of them has displayed such dexterity in this way as the King. In his younger days he had a weakness for pronounced cloths, but for many years his taste has been irreproachable for neatness. The simpler his clothes are the better he likes them, and of them all he prefers his yachting suits of blue serge or a quiet tweed suit, while to frock coats and evening suits he is by no means partial."

Reserve Force.

The healthy body has a certain amount of strength reserved in case of emergency, attacks by disease or unusual physical exhaustion; without this power of resistance a person is an easy prey to every ill that comes along. By enriching the blood and creating new nerve cells, Dr. Chase's Nerve Food keeps the health at high water mark and fills the body with the vigour and vitality that overcomes and defies disease.

Fall and Fair Time

..AT..

H. LeBRUN & CO'S

BOLD RANGE EXISTS

Mountains From 3,000 to 4,000 Feet High Close to the Coast.

ARGUMENT IN BOUNDARY CASE

Attorney-General Finlay Quotes Evidence of Canadian Expert and Shows That He Is Largely Confirmed by United States Experts — Uniformity in Mountain Line Not Expected by Negotiators of Treaty.

(Canadian Associated Press.)

London, Sept. 23.—Yesterday Attorney-General Finlay continued his argument before the Alaska Boundary Commission, dealing with the question of the existence of a mountain range parallel to the coast. He contended that beyond doubt there existed a bold range of very high mountains coming down to within a short distance of the coast. Regarding the head of Lynn Canal, he quoted Gen. Foster to prove the existence there of a well-defined range within a few miles of the head touching that portion between the 56th parallel and Lynn Canal, and showed by the evidence of W. F. King, Canadian expert, that during the whole distance there are mountains 3,000 to 4,000 feet high within five or six miles of the ocean coast.

U. S. Experts Agree

The Attorney-General said the evidence of United States experts largely confirmed King, for Tittman and staff all acknowledge the existence of mountains. He argued further that negotiators of the treaty could not have contemplated or expected anything like uniformity or regularity on the mountain line, and exhibited a series of contour maps of the British Commission under the convention of 1898, on which appeared traced by King a line from peak to peak claimed by Great Britain.

Head of Lynn Canal.

In answer to Mr. Dickinson the Attorney-General observed that King's line crossed the larger inlets, but, even if it went round the mountains, it would be found running round at a short distance from the head of Lynn Canal. He insisted that underlying the fallacy of the United States claim is that it presupposes the necessity for taking a dominant range, while what is required is the mountains nearest the sea.

Mr. Root asked the Attorney-General what he understood by the phrase in the treaty "summit of mountains." The Attorney-General replied that it did not in his view call for a series of continuous summits.

Meaning of Summit.

Mr. Root—Then you interpret the word "summit" as though it were summits?

The Attorney-General replied "Yes," and, continuing, said that, while King's line was on the whole practicable and the one most conformable to the treaty, he did not affirm that in places it might not be necessary to have recourse to the alternative provision of the treaty.

POSTMASTER IS MADE HAPPY

After Years of Sickness Dodd's Kidney Pills Cured Him.

Plain Statement of a New Brunswick Postmaster Whose Kidney Pains Have Gone Never to Return.

Lower Windsor, Carleton Co., N. B., Sept. 20.—Special.—T. H. Belyea, postmaster here, well known and widely respected, is happy in the discovery of a permanent cure for the Kidney pains that have troubled him for years.

"I have been bothered with Kidney Trouble for years," Postmaster Belyea says: "I have tried many medicines and plasters without getting any lasting benefit till hearing Dodd's Kidney Pills so highly spoken of I determined to try them. They seem to have made a complete cure in my case as I feel as well as ever I was.

"I believe that Dodd's Kidney Pills are the right medicine for kidney Trouble and will do all they are claimed to do."

Dodd's Kidney Pills cure the Kidneys and with healthy Kidneys no one can have Bright's Disease, Lumbago, Rheumatism, Dropsy or Pain in the Back. Thousands will tell you this out of their own experience.

Sent Threatening Letters.

Toronto, Sept. 22.—The Retail Merchants' Association have decided to take a firm stand against the Meat Cutters' and Butchers' Workmen's Union, who have been sending letters to employers, in which pressure has been brought to bear to induce them to display union cards and to close their places of business at 7 p.m. It is alleged that these circular letters contained veiled threats and render the senders amenable to the law under a section of the Criminal Code.

F. C. Letts, business agent of the Amalgamated Butchers' Workmen's Union, will be the defendant if a charge is laid.

Fortune For an Editor.

Stratford, Sept. 22.—T. H. Race, editor of The Mitchell Recorder, a son of Elizabeth Race, whose next of kin was advertised for, has been informed that a fortune of £10,000 will be divided among the family of the deceased.

Big Order For Chickens.

Woodstock, Sept. 22.—A giant order for 20,000 chickens has just been secured by one of Woodstock's best known farmers and poultry dealers, for exportation to England.

MUST HAVE PAY SOON

Threats of Violence Heard at Sault Ste. Marie.

MASS MEETING OF EMPLOYES

Labor Union Organized and Strong Resolution Passed Calling on Ontario Government to Bring Pressure to Bear on Embarrassed Company to Induce Them to Pay Wages —Gathering of Stockholders.

Sault Ste. Marie, Ont., Sept. 23.—Matters promise to become very interesting here next Monday if the claims for wages are not then paid, as intimated by the Consolidated Lake Superior officials. At every street corner excited groups of men were gathered yesterday, discussing the situation, and threats of violence were openly hinted at. "Dynamite, dynamite in the canal," an Italian vociferated. The group applauded him in this and thus encouraged he went on breathing dire vengeance.

Men's Mass Meeting.

Another mass meeting was held yesterday afternoon. A resolution was passed demanding the Ontario Government to bring influence on the embarrassed company to induce them to pay the wages, and asking that a fortnightly pay-day should in future be made obligatory upon all companies. During the discussion it was pointed out that the Government could, if necessary, withdraw the franchises of the allied companies, as the terms under which they were granted have not been lived up to. Work on the second power canal, for instance, should have been commenced this year, but not a stone has been turned yet. The company also agreed to settle by this time some 2,000 men along the line of the Algoma Central. Only about 200 of them are here as yet. Thus it goes all along the line. The Government could easily hold these omissions as an effective bludgeon over the company's head, for the threatened cancellation of concessions would decrease the value of their assets when they are put up at the forthcoming mortgage sale.

Stockholders Confer.

Philadelphia, Sept. 23.—The stockholders' Protective Committee of the Consolidated Lake Superior Company, composed of E. C. Miller, W. W. Kurtz, William Ratch Wister and Nicholas Brice, held a conference here yesterday to decide upon a plan of procedure. A member of the committee said: "If Speyer & Co. have decided to foreclose on the property, it is by agreement with the management. A sale is a necessary part of the reorganization plan, and only a sale will put the reorganization in a position in which they can say to the stockholders: 'You must either pay an assessment or lose your interest.'" E. C. Miller said: "I think the influence of the company should be sufficient to offset any unfriendly attitude taken by any large rival steel interest. As to the receivership, I do not see what could be gained by our filing an application at this time."

Mr. Clergue Optimistic.

Ottawa, Sept. 23.—A very hopeful view is expressed by Mr. F. H. Clergue, the famous projector of the Soo industries, who is in the city. Mr. Clergue said: "The plant will resume right away. We will pay all our debts and will have the plant running as in the past. The closing down the other day was done without the authority of the directors."

Speyers Serve Notice.

New York, Sept. 23.—Notice of the intention of the syndicate which underwrote the loan of $5,050,000 to the Consolidated Lake Superior Company to sell at auction the assets of the company held by them as collateral for the loan, was yesterday sent by Speyer & Co. to the officers of the company. The details of the sale have not yet been made public. As far as the situation in New York is concerned, there is little change.

Will Aid Company.

Toronto, Sept. 23.—Hon E. J. Davis stated in an interview that the Government was assisting the Soo companies to procure funds for relieving any immediate distress to employes by the sale of the lumber in their mills.

Actor Fatally Shot.

Bloomington, Ind., Sept. 23.—By the accidental discharge of a property revolver of the "Two Little Vagrants" Company last night, Silas Canada, a 15-year-old boy, was wounded fatally. Bridge Nichols, who has charge of the local properties, was handling the weapon behind the scenes before the curtain went up, when it was discharged accidentally. The bullet glanced on the floor, went through the wall, and entered the head of Canada, who was on the pavement going to the play. Nichols did not know the weapon contained anything and he is frantic with grief.

Killed For 36 Cents.

Hartford, Conn., Sept. 23.—Angered over the loss of thirty-six cents, Paul Misslk, a Pole, employed at a stone quarry in Newington, yesterday shot and killed Charles O'Brien, a brakeman employed on a work car of the Hartford Street Railway.

Suicide by Morphine.

Winnipeg, Sept. 23.—Cecil T. S. Breson of Holland, Man., formerly of London, was found in his room in the Clarendon Hotel yesterday morning struggling for breath and died in a few minutes from effects of morphine.

The Evidence You Value.

By word of mouth from friend to friend Dr. Chase's Ointment has received more unsolicited recommendations than probably any medicine you can mention. The fact that it is an absolute cure for piles has put it in a class all by itself as a preparation of inestimable value and people recommend it knowing that it is a certain cure.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO., Toledo, O.

Sold by druggists, 75 cents.
Hall's Family Pills are the best.

WEDNESDAY, SEPT. 23, 1903.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Miss Leah Hutchinson, of Bowmanville, is spending a few days in town.

Col Sam Hughes, M.P., was in town last evening on his way from Ottawa to Lindsay.

Mr. and Mrs. Robert Scott, of Alviston, are visiting Mr. Wm. Scott, of Ashburnham.

Mr. D. L'Esperance of Cobourg, was in town to-day, the guest of Mr. W. Batten, McDonel street.

Mr. and Mrs. A. A. Fowler have returned from a two weeks' visit at Tweed, in the Georgian Bay District.

Mr. Roland Johnson of Lakefield, was in town this morning attending the funeral of the late Edward Phelan.

Mrs. Hurley, of Rochester, N.Y., has returned home after visiting for some time with Mrs. McCarthy, Simcoe street.

Miss Flo Mason and Della Osborne, of Bowmanville, are in town the guests of Miss Olive Stevens, 193 London street.

Mrs. J. R. Stratton will not be at home to her friends until Thursday, October first and every first and third Thursday thereafter.

Miss Etta Graham, of Perry street, has returned from Buffalo, N. Y., Detroit, Christal Beach, where she has spent the past six weeks.

The wedding of Miss Eleanor Armstrong, of the township of Brighton, to Mr. William Lockhart of the township of Seymour, took place at noon to-day, the ceremony being performed by Rev. W. L. Armitage. Mr. and Mrs. Armstrong will live in Seymour township.

Mr. William Shannon, of Saginaw, Mich., who has been visiting his cousin, Mr. David O'Brien, for the past few weeks, returned home on Monday. Mr. Shannon has achieved a continental reputation as a coon hunter, in fact the animal can detect his coming a mile off.

Mrs. McKibbin leaves on Thursday morning to join her son, Mr. Frederick W. J. McKibbon, on the American side of the line. Miss Edith Garbutt is accompanying her for the trip. Mr. McKibbon will meet them in New York, where they will spend a time seeing the sights of the metropolis and other outlying places of interest.

Mr. Wm. Jeffrey, of Elderslie, Bruce County, is in town on a visit to his sister, Mrs. W. J. Martin. It is forty-eight years since Mr. Jeffrey first left Peterborough to reside in the west, and although he has visited Peterborough several times, he naturally sees a wonderful change in the town. What is particularly noticeable to him is the removal of nearly all the old land marks, especially along the river.

The Coldstream Guards Band will arrive in town this evening from Lindsay per special train at 5.30 o'clock.

Is Your Piano in Tune?

The change of seasons affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

MODERN DRY GOODS ESTABLISHMENT.

Is That of Richard Hall and Son on George Street.

A WELL ASSORTED STOCK.

Description of Different Departments—Admirable Arrangements for Displaying Goods—Millinery and Cloaks on Second Floor.

When it was known that the firm of Richard Hall & Son had secured the premises on George street and were fitting them up for their occupancy it was at once felt that with the progressiveness characteristic of this firm, the store when it was opened would be one which not only would be a credit to the proprietors, but one to which citizens might point with pardonable pride as an evidence of the modern business methods employed by representative Peterough merchants, but whatever may have been their expectations, it is safe to say that any who have given themselves the pleasure of visiting this store have found their expectations surpassed in what they have seen It is an establishment which would be a credit to cities much larger than Peterborough, and it would seem that the belief of the firm that they now possess one of the most modern stores to be found in Eastern Ontario, is well founded. The building has already been described in these columns, and the object of this writing is to deal with the interior fittings since the stock has been placed upon the shelves.

The formal opening was held yesterday, and, to-day, simultaneous with the opening of the Peterborough Industrial Exhibition, the store of Richard Hall & Son will be open to welcome their numerous friends and customers, who are not confined to the town of Peterborough by any means. A visit to the store is an interesting event to one who has an eye for the beautiful, and will well repay one for the time occupied.

DEPARTMENTS WELL ARRANGED.

The entrance from George street is broad and the store easy of access. Entering the store the main aisle presents a most bright and animated appearance, and the excellently arranged departments is accomplished to produce a pleasing effect, which object has been fully attained. To the right of the main aisle the first department is that devoted to linens, and in it, as in all the different departments, the firm carries a heavy stock which is well selected and the goods of the newest, frish linens, comprising table linen, towels, towelling, sheetings, doilies, and fancy linens, make a department which is at once well assorted and abundantly stocked. Following this comes that in which flannels hold sway. The assortment consists of plain and fancy flannels, for waists, dressing sacques, etc., staple flannels are also well represented. In this department may be found flannelettes, shirtings, cottonade, and general staples.

Coming to the left of the main aisle, ribbons, neckwear and belts are seen and the stock shown is worth the prominent position assigned it. Handkerchiefs, collars, laces, draperies, art muslins and sateens also occupy a portion of space to the left of the main aisle.

To the left of the entrance, and occupying the entire front of the store, is the department devoted to gloves and hosiery, including kid and silk gloves, and woollon, cashmere, silk and cotton hosiery.

SMALLWARES AND NOTIONS.

At the centre aisle to the right, is located the smallwares, and notions, to the west of which are the ladies' white muslin underwear and silk departments, in the latter of which a particularly well assorted stock is kept, for dresses, waists and for trimmings, in black and colours.

At the left of the same aisle is to be found ladies' knitted underwear, also a full stock of corsets, and dress trimmings, in all the newest goods, including guimpe and applique. The aisle to the left is devoted to ladies' sutana and silk underskirts, men's underwear and gentlemen's furnishings. Near the elevator, which is located at the extreme south side of the store, a parcel office has been fitted up. The offices are also located at this side. A general office, and private offices for the members of the firm The whole rear of the first floor, which is well lighted, and admirably adapted for their advantageous display, the dress goods are placed. In this department, the firm has a particularly creditable showing. Some of the new fall goods were being shown and the assortment seems to be complete. In suitings, some very pretty flakes in tweeds and mixtures will be worn this season, while in plain goods, broad cloths, curl cloths, cashmeres, serges and satin finished goods will be worn. In the mixtures some very pretty shadings of blue, brown and green are being shown and these colours will be very popular.

MILLINERY AND CLOAKS.

The second floor, however, is the one in which at the present time, the greatest interest is centred. The firm has fitted up millinery and cloak rooms which would be a credit to a much larger city. The millinery opening is now being held, and there are on display some very handsome creations of the milliner's skill Some of the prevailing styles were shown the Examiner, prominent among which was a black silk velvet picture hat, trimmed with old rose point lace, with lattice work, which on the wearer's head made a very pretty effect. A toque made of moleskin fur trimmed with Persian ribbon, lace and medallions was also one of the representative styles. A particularly fetching hat was a turquoise pan velvet trimmed with a cluster of birds, spray and face. Another pleasing effect was produced in a cardinal toque with a large roll at the side and trimmed very tastily with mink fur, lace and metal buckles. A hat which came in for much admiration was a handsome green piece of headwear, trimmed with applique, with a very pretty combination of jet and feather ornaments. A new style is a flat iron toque, trimmed with rabbit's fur and cream mechlin. These are but a few of the many handsome hats on display, and give but a faint idea of the beauty of the styles in which a description is attempted. The leading colours will be green, brown, cardinal, purple and violet, although correct style does not dictate any colour in particular.

CARPETS. CURTAINS AND RUGS.

The Carpet and Rug Department is also located on this floor and considerable space is devoted to what is evidently a very important branch of the firm's business. The entire depth of the store is occupied by these goods, in which a very full stock is kept In carpets, Axminsters, Wiltons, Brussels, Tapestries, Woollens and Unions, are shown, some of the new weaves being worthy of special mention. A very effective design is a Brussels suitable for a dining room, in an Oriental design, and was one of the new importations, while for a bedroom, a green and pink Brussels, with an appropriately designed border, made a very rich effect. In the Axminsters an especially beautiful covering for drawing room floors is a Reseda green with small rose flowers, while for stairs and halls, Axminsters, in Turkish colourings, were prominent for their pleasing colour effects.

In rugs, Axminsters and Wiltons were shown, ranging in dimensions from the smallest door size to that of the largest room.

Curtains and drapes also form an important section of this department, one of the richest effects in curtains being produced in a handsome Arabian point lace. The style for this season in curtains is tending to plainess, with heavy borders. Oilcloths and linoleums are also sold on this floor from samples, the stock being kept in the basement. All carpets bought from this firm are sewed in the building, and for this purpose a special room, 25 feet x 60 feet, has been fitted up. Window shades are also made by them.

AN ESPECIALLY ATTRACTIVE DEPARTMENT.

If any one department of this magnificent store deserves special mention, it would seem that that of the cloaks would most deserve it. It is doubtful if outside the departmental stores in the large cities, any house in Ontario can make a better showing in this respect. Special attention is paid to children's and misses' wear, and this section of the department is replete with the newest productions possible to secure. The great bulk of the firm's stock of cloaks was imported from Germany, which is a guarantee that the garments comprising the stock, will be of the most approved style, and the finish will be of the best. A black beaver coat made in the box style, three-quarter length, with extra full skirt, and cape trimmed with applique, large sleeve, and the entire garment trimmed with satin, was shown as representing one of the dominating styles. A fawn medium length coat, was also shown. The coat was made from very fine box cloth, and was trimmed with embroidered applique. It was a roll front with the new stole effect, and trimmed with silk of self colour. A garment for which considerable admiration was expressed, was a grey Zebeline driving coat, with a standing collar of green velvet, trimmed with braid. It had a cape which was trimmed with fancy medallion buttons. The sleeve was the new large size.

In ladies' suits, two are worthy of special mention. One was a grey ladies' cloth suit with Persian trimming. It had a long skirt, being lined throughout with black silk. The popular stole front was also seen in this suit. The second was a cermel's hair suit with blue mixture, the long skirt effect, and trimmed with Persian trimming.

SHOWING OF RAIN COATS.

In rain coats also, some of the newest styles were shown, prominent among them being a particularly handsome three-quarter length grey coat, with black curl, and small greeen speck. It had the bias back, with belt, and the bell sleeve, strapped.

A principle of this firm's business is the endeavour to supply novelties which are not usually found in the ordinary store, which that of Richard Hall & Son, is not. They state and the impression gained by a visit to the store would seem to bear out the assertion, that the firm possesses good facilities for buying goods, and one cannot help being impressed with the apparent high quality of the goods comprising their very large stock.

A satisfactory feature of the store is the excellent light, in the daytime and during the time when artificial light is used, and the whole establishment, from the basement to the dressmaking establishment on the third flat, is one in which the proprietors have every reason to be proud.

Now is the Time.

Now is the time to join the Y. M. C. A. just as the season's work begins. The fees are within the reach of every young man who has any interest in himself. There was never a time when so many were talking of what the Y.M.C.A. has to offer young men. Many of those who are now members are working to secure others. Many more are asked to join in the present movement to boom the membership. Any member who secures five new ones before Nov 1st will have his own membership extended for 12 months from the time it expires. Now is the time to bring in the new members.

FUNERAL OF THE LATE MR. EDWARD PHELAN

Held This Morning at 10 o'clock From St. Peter's.

The funeral of the late Edward Phelan took place this morning at 10 o'clock from St. Peter's Cathedral, where his remains had been taken from his late residence, corner of Stewart and Simcoe streets. As an evidence of the general esteem in which Mr. Phelan was held a very large number of citizens were in attendance, at the Cathedral, and the procession was the largest seen in a long time. Solemn requiem mass was sung at the Cathedral, the celebrant being Rev. Father Phelan, of Young's Point, son of the deceased. Rev. Father Fitzpatrick, of Ennismore, was Deacon and Rev. Father Scanlon, of Grafton, was sub-Deacon, Father John O'Brien was Master of Ceremonies. In the sanctuary were Fathers McColl, Conway and O'Connell. The pall-bearers were, Mr. Peter Simons, Mr. Thos. Fortye and Mr. Edward Brown, of town, Mr. P. A. Kearney and Mr. J. E. Kearney, of Young's Point, and Mr. John Scollard of Ennismore. The burial took place at the Roman Catholic Cemetery to which the remains were followed by a very large number of vehicles. Among the mourners were many of the relatives of the late Mr. Phelan, as well as those of his late wife. The death of Mr. Phelan removes from Peterborough one of the best known men in the town, and one for whom all who knew him possessed a genuine esteem.

Hunting Season.

The Grand Trunk Railway has issued a very handsome illustrated pamphlet, entitled "Haunts of Fish and Game," giving information regarding season for shooting deer, moose, reindeer, caribou, etc., in the "Highlands of Ontario," and at other points along the line of the Grand Trunk. Copies of the same will be furnished on application at Grand Trunk ticket offices or to J. D. McDonald, District Passenger Agent, Toronto. d68

WM. HENDERSON GORED BY A BULL.

An Incident at the Fair Grounds Yesterday.

Yesterday at the Fair grounds Wm. Henderson, an employee of Wm. Stewart & Sons, of Campbellford, had a narrow escape from being gored to death by a bull which he was tending. The animal is a large thoroughbred and it is learned that Henderson while giving it a pail of water was suddenly attacked and thrown into the next stall. The unfortunate man suffered terrible agonies, which, however, were relieved on Dr. Greer's arrival on the scene. The physician had to put five stitches in the wound. Mr. Henderson, who refused to leave his post, is doing very n[illegible]

COMING TO PETERBOROUGH.

Mr. Lindman, of Montreal, will be at the Oriental Hotel on Wednesday and Thursday next, prepared to relieve sufferers with uncontrollable ruptures. Consultation free. Read the following testimonials:—

Montreal June 22, 1903.

B. Lindman, 130 Peel street, Montreal:

Dear Sir,—I feel it due to you to state in writing the following facts: For years I suffered from scrotal hernia and after using several kinds of trusses which were recommended to me, I was on May 26, 1902, fitted with one of your well-known trusses, and after wearing the same for about nine months I was entirely cured and thereupon discontinued the use of your truss and have not, up to the present time, required its use and feel as if I had never been troubled with hernia. I may add that I am now 67 years of age and have never felt better than I do at present.

Yours gratefully,

(Signed) CHARLES TAYLOR

On this 22nd day of June, 1903, before me, the undersigned notary, appeared Charles Taylor, of the city of Montreal, mechanical engineer, to me known, who solemnly declared unto me that the statements contained in the foregoing letter are true and correct.

(Signed) G. P. W. KITTSON.

Montreal July 2, 1903

John Hamilton, Carpenter and Builder, 249 St. Martin street.

Mr. Lindman: I have used your truss for six months, and I think it is the best truss on the market, as I tried several before I got yours. I was examined by a doctor and he said I was cured of rupture. I have left your truss off for several days and I think that I am completely cured and I would recommend your truss to any one that is obliged to wear one, as yours has given me great satisfaction.

(Signed) JOHN HAMILTON.

My references are the most prominent men of the medical profession.

GUILD OFFICERS FOR COMING YEAR.

First Fall Meeting of George Street Guild Held Last Night.

The first meeting of the George street Young Men's Guild for the season, was held last night in the Guild Room for the election of officers for the year, and considering plans of work for the coming season. Mr. W. B. Warne, president, was in the chair, and presented his address, reviewing the work of the past year.

He said in his address, that the Guild was organized on November 7th, 1902, with twelve members, and the growth since then had been considerable. During the winter months the meetings took the form of social evenings, songs, speeches, etc., usually followed by refreshments. Three very interesting addresses were given—one by Mr. Francis on the Lift Lock; Mr. Jeffries spoke on "Noted Places in and about London," and the third lecture was by Mr. Sorsoleil on "Good Citizenship." The most important undertaking of the Guild during the ing the year was the banquet which was tendered St. Andrew and Charlotte street Guilds on May 8th last. This was voted by all a success. The Guild had also attended to the ushering in the church, and also decorated it for Christmas and New Years. During the short time since its organization the Guild has accomplished a good work and has won the sympathy and co-operation of the other Guilds in the town. It has come to be recognized by the church as a society of considerable promise for the future.

The president then spoke of some of the reasons why the Guild had not been a greater success, and made some valuable suggestions as to how the work might be carried to a more successful issue. These suggestions showed that the president had given the matter serious thought, and that he had the best interests of the Guild at heart.

The election of officers was then proceeded with and resulted as follows:

Hon President—Rev. J. P. Wilson.
Hon. Vice-Presidents—Messrs. D. W. Dumble and T. W. Robinson.
President—Mr. W. B. Warne.
Vice-President—Mr. W. F. Skitch.
Secretary—Mr. B. Boomer.
Treasurer—Mr. Garnet Galley.
Reporter—Mr. Ross Dobbin.

Chairmen of committees were then elected as follows:

Lookout and Visiting — Mr. Geo. Robertson.
Social — Mr. W. Dredge.
Literary and Musical—Mr. B. Turner.
Finance—Mr. Garnet Galley.
Sports—Mr. M. J. Hutchinson.

The suggestions made in the President's address were then discussed and in every instance their adoption was thought to be essential to the success of the Guild, which now starts out in its fall and winter programme with excellent prospects.

BEAUTIFUL ILLUMINED DISPLAY OF GOODS.

Mr. A. W. Cressman's Store Visited by Large Numbers.

Last night numbers of persons were attracted by the beautiful illumined display of Mr. A. W. Cressman's millinery, which was shown in the southern store. Artistically arranged the whole length of the store were hats and coats, and such like goods, the delight and admiration of the weaker sex. The goods were beautifully arranged, all colours blending harmoniously together. This method of displaying goods is practised by the large firms of the big cities, and Mr. Cressman is the only local merchant who has attempted to do it. The illumined display was the work of Mr. J. G. Bowes, to whom very great credit is due.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was taking a stroll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

HIGHEST PRICE WAS 12 1-8 CENTS.

Meeting of Peterborough Cheese Board.

A Number of Factories Remained Unsold—A Salesman Reprimanded.

A meeting of the Peterborough Cheese Board was held on Wednesday morning at 10.30 o'clock in the town council chamber, with the following attendance of buyers:—Messrs. Fitzgerald, Kerr, Gillespie, Cook, Whitton, Rollins and Wrighten.

The following factories boarded: —

Bensford	182
Cedardale	80
Stony Lake	60
Cavanville	245
Mount Pleasant	94
Norwood	180
Fleetwood	225
Oakleaf	60
South Burleigh	70
Brickley	45
Shamrock	95
Dartford	50
Apsley	100
Percy	300
N. Dummer	85
Peterborough	95
Keene	175
Shearer	105
Central Smith	200
N. Smith	130
Warsaw	145
Warmister	180
Oakdale	50
Missing Link	120
Daisy D.	50
Melrose Abbey	120
Lakefield	145
Pine Grove	135
Myrtle	196
Ormonde	200
Lang	190
Frazerville	190
Indian River	150
Maple Leaf	150
Otonabee Union	83
Westwood	180
Villiers	120
Buckhorn	160
Young's Point	140
Ballyduff	61
East Emily	126
Trewern	135

The bidding opened at 11 cents by Mr. Kerr, who was followed by Mr. Whitten at 11 1-4. Mr. Rollins bid 1-3, Mr. Wrighten 3-4, Mr. Whitton 12, and Mr. Wrighten 12 1-8 cents. Mr. Wrighten being the highest bidder had the first selection and called Buckhorn, Bensford, Central Smith, Frazerville, Indian River, Myrtle, Peterborough, Warsaw, Keene, Missing Link, Mount Pleasant, Otonabee Union, all accepting his offer of 12 1-8. Mr. Wrighten took a further selection at 12 1-16, calling Laing, Shearer, Westwood and Trewern, all of which accepted.

Mr. Kerr at 12 cents called Melrose Abbey, Ormondo, Norwood, Dartford and Brickley. Melrose Abbey was the only one to refuse.

At the above price Mr. Wrighten bought Cavanville and Fleetwood.

Mr. Rollins called 11 7-8 and chose, Apsley, South Burleigh, Stony Lake, North Smith, Cedardale, Warmister, Young's Point, Maple Leaf, Pine Grove, and North Dummer. Of the above selections Cedardale and Pine Grove would not sell at the price.

Mr. Whitton at 11 15-16 cents called Villiers, Melrose Abbey and Percy, the latter, however, only accepting.

Mr. Kerr at 11 7-8 cents chose Oakleaf, Melrose Abbey, Oakdale, Ballyduff, Shamrock, Daisy D, Lakefield, Oakleaf. Daisy D. was the only one to accept, the others all wishing for 12 cents. Some of them learned, however, in the gentlest manner in the world, that all us poor human beings cannot get everything we wish for.

Melrose Abbey refused 11 15-16 from Mr. Whitton, while Cedardale later sold to Mr. Rollins at 11 7-8. The remainder were unsold.

President Drummond said he had been informed that one of the salesmen had been selling off the Board, which in his mind was not an honourable thing to do, and which he hoped would never be repeated.

The Board adjourned for two weeks.

The BEEHIVE

WE HAVE EVERY-THING A LADY WEARS !!!

Wrappers

Bargains for Friday and Saturday

On Friday and Saturday we will place on sale a most enticing wrapper bargain.

This wrapper is splendid value, made with a nice full wide sweep in the skirt, 8 inch frill around the bottom, pretty collar trimmed with small frill. These are all made in the popular colourings, among which are black, navy, cardinal and pretty shades. Regular price, $1.25; sale price $1.00

TULLY & MERRELL, Managers.

A DEATH FROM BLOOD POISONING.

More Details Regarding Mrs. Margaret Miller's Sudden Death.

"We, the jury empannelled to consider the evidence in regard to the cause of Mrs. Miller's death, and accordingly, we have come to the conclusion, first, that she came to her death by blood poisoning, brought on by miscarriage, of which she was very anxious to have brought about by medical assistance, but according to the evidence, she failed to procure such assistance."

Such was the verdict which the jury brought in at the adjourned inquest concerning the somewhat strange circumstances which surrounded the death of Margaret Miller, wife of Herbert John Miller, of Otonabee, which occurred on Saturday night, Sept. 19th.

The jury was composed of the following gentlemen:—

Joshua Smithson, Foreman; Robert H. Orde; Richard Nurse; Chas. F. Gracestock; Nicholas F. Swan; John Kindred; Anthony Taylor; Arthur Morgan; Robt. Scholey; Thos. Hunter; Henry Crane; Samuel Redmond; Thomas G. Hazlet and Wm. Shaw.

The Foresters' Hall, Zion, a little wooden building, over the door of which is burnt, Court Zion, No. 227, C. O. F., was the scene of the inquest, over which Coroner Dr. Gray presided. The jurors felt the dignity and seriousness of their position, and, some with eyebrows raised and legs crossed, others with arms folded, chins on their chests and a frown on the faces, listened attentively as each witness gave his evidence in the presence of only jury, officials and press representatives.

The first witness called was Mr. Herbert Miller, husband of the deceased who spoke in a straightforward manner, explaining when his wife took sick and other facts concerning her demise.

Drs Shaw and McWilliams, of Keene, who conducted a post mortem examination presented a signed report stating that the cause of death in their opinion was Puerperal Septicaemia, following an abortion.

The two doctors were also examined as was Dr. Harrison.

Mrs Clara Metheral and Mrs. Walter Dickson, sisters of the deceased were also examined, however, they could reveal nothing of a startling or incriminating nature. Emma M. Bartage, mother of deceased's husband and Elizabeth Perry a young girl in the employ of Mrs. W. Dickson, were the last witnesses examined, with, however, no result of any importance.

The following anti-mortem statement signed by the deceased when in a state of consciousness, in the presence of Maggie Lancashire, created quite a stir. It ran:—

"I, Margaret Miller, do hereby solemnly declare that Dr. Harrison did not do anything either with instruments or medicine to bring on a miscarriage."

The jury then retired and returned the above verdict.

ALL SAINTS' GIRLS' GUILD ELECTED NEW OFFICERS.

Open Meeting Held Last Night Largely Attended.

There was a large attendance at the open meeting of the Senior Girls Guild of All Saints' church, which was held last night, and a number of new members were enrolled. Music and games were indulged in, and a bright start was made in the season's work. At the close of the meeting refreshments were served. Mr. Hooper supplied the ice cream.

The following officers were elected:

President—Miss Cairns.
Vice-President—Miss C. Hutchinson.
Secretary—Miss M. Rickey.
Assistant Secretary — Miss Campbell.
Treasurer—Miss Sabin.

Swell Wrist Bags.

We invite the ladies to call at the Peterborough Bookstore and inspect our handsome samples of new wrist bags, labelled "Made in Canada." They are shown in walrus, crocodile, real seal, morocco and snake skin leathers. The clasps, chains and trimmings combine grace with art, in styles that are distinctly and charmingly Canadian. During these millinery show days the freedom of the store is extended to the ladies. A. H. Stratton & Co.

SOMETHING EXTRA.

We are now receiving the famous Ashland Brand Peaches for which our customers have been waiting. They are extra choice and we would advise buying this week. We are also receiving extra selected Tomatoes. Better have the best—it is always the cheapest.

BORDEN COMPLAINS.

Says Government Ignored One of His Amendments.

AND VOUCHSAFED NO REPLY

Sir Wilfrid Says Argument Is Not New—Mr. Paterson Wonders at Solicitude of Opposition For Quebec to Moncton Section—Some Amendments Accepted and Good Progress Made on G.T.P. Bill.

Ottawa, Sept. 23.—Better progress was made with the national transcontinental railway bill yesterday. Several amendments were voted down and several others were accepted by the Government. When the committee rose there were only five sections remaining open for futher consideration. The chief feature of the debate was a spirited passage at arms, in which Sir Wilfrid Laurier, Mr. R. L. Borden and Hon. Mr. Paterson were the participants. Mr. Borden complained that the Government had ignored an amendment he had submitted, to the extent that its supporters were about to vote it down without any reply being vouchsafed from the Government benches. Sir Wilfrid Laurier's reply, that the Government had not thought it necessary to reply, as no new argument had been advanced, and the old ones had been answered again and again, somewhat annoyed Mr. Borden. Hon. Mr. Paterson's contribution to the encounter was an expression of astonishment at the solicitude concerning the Quebec to Moncton section now displayed by the Opposition, who had so strongly opposed the construction of that section.

The first amendment provided that the Grand Trunk Railway Company should pay in cash the par value of the twenty-five millions of stock which it is to acquire.

Through Canadian Channels.

Mr. Fitzpatrick's amendment to the amendment, which virtually emasculated Mr. Borden's amendment, was then declared carried. Mr. Bordon promptly offered another amendment to Section 7, providing that neither the Grand Trunk nor the Grand Trunk Pacific should directly or indirectly encourage American transportation routes, and that each should do its utmost to carry Canadian traffic through Canadian channels to Canadian ports.

The amendment was lost, and Mr. Borden then moved another which shared the same fate requiring the Grand Trunk Railway Company, irrespective of the Grand Trunk Pacific Railway Company to do its utmost to carry Canadian traffic through Canadian channels to Canadian ports. The section was then adopted without amendments.

Telegraph Revenues.

E. B. Osler proposed an amendment providing that the telegraphs used in connection with the transcontinental line should form part of the railway company, and that the revenues should belong to the country. He pointed out that the telegraph was a very valuable asset to a railway, and precautions should be taken to prevent the formation of an independent railway line. At Mr Fitzpatrick's suggestion the amendment was held over to be considered in connection with a subsequent clause.

During the last hour and a half of the evening sitting of the House, good progress was made. Section 14 was allowed to stand, Mr. Borden explaining that he desired to draft an amendment regarding the construction of the eastern section by a commission.

Other Amendments.

In connection with Clause 19, which prohibits members of Parliament from holding offices of emolument under the construction commission or undertake a construction contract, the Minister of Justice promised to draft an amendment. The amendment will prevent any member of Parliament from being interested in construction firms.

In Section 21, which empowers the Government to stop work at any time, a clause adopted from the Intercolonial Act, Mr. Borden suggested that it should be provided that the suspension should be without compensation. This will be considered.

Section 22, providing for payments to contractors in the order of the commissioners, was adopted, and Section 28 was amended at Mr. Borden's suggestion by making the commissioners' books open to inspection by the Auditor-General or Minister of Finance.

An amendment was also made to section 20, making it necessary for the report of the construction commissioners to be submitted to Parliament each session within fifteen days after the opening of Parliament.

In the Senate.

The Senate met last night after a two weeks' adjournment. Senator Templeman introduced the bill providing for the payment of $50,000 annually for five years on lead smelted in Canada from Canadian ores. Senator Ellis expressed the hope that at an early date the Government would make a statement of its policy concerning bounties. Four bills granting bounties for different purposes had already been introduced. Free traders like himself, Senator Ellis said, would like to have a definite statement of policy in this respect. Sir Mackenzie Bowell, though not opposed to bounties, asked whether the policy of bounties was to be adopted by the Government to encourage the lead industry. Sir Mackenzie said Canada should follow the principle in vogue in the United States. A bounty was only a temporary expendient.

Lever's Y-Z (Wise Head) Disinfectant Soap Powder is better than other powders, as it is both soap and disinfectant. 34

TRADES CONGRESS.

Annual Convention of Labor Men at Brockville — Strong Resolutions Tabled For Discussion.

Brockville, Sept. 23.—Over 150 delegates, representing nearly 200,000 labor men in Canada, gathered here yesterday to attend the Dominion Trades Congress. Mayor Harrison welcomed the delegates. An address was read from the local Trades and Labor Council. Others who spoke were: John Coleman of Buffalo, representing the American Federation of Labor; John B. Tobin of Boston, representing the International Boot and Shoe Makers' Union; Vice-President J. B. Mack of Montreal, A. W. Puttee, M.P., of Winnipeg, and Mark Crawford, past president of the Typographical Union.

President John Flett accepted the greetings offered in a cordial spirit. In his address he pleaded for better wages for laboring men, to keep pace with the increased cost of living. He denounced the hostile attitude of employers and their aims to thwart unionism by means of legislation. He declared trades unions had come to stay, and could not be crowded out by persecution and prosecution. Looking into the future, he placed great faith in the principles of conciliation and arbitration. He laid great stress on the necessity of establishing a legal defence fund for unionism. He favored the abolition of the Senate and the exclusion of the Heathen Chinese.

Resolutions were submitted censuring the Postmaster-General for discriminating against the letter carriers in favor of other branches of his department in which the pay has been increased; asking for a law to prevent the watering of stocks; advising the editor of London Truth that he was misinformed when the Manufacturers' Association stated that 11,000 mechanics were needed in Ontario; and attacking the educational system of Quebec. The resolutions will be discussed to-day.

If the children require physic none acts so nice as Miller's Worm Powders; very pleasant to take.

Irish Look Across Sea.

London, Sept. 23.—Interest has been evoked here by a letter from Secretary O'Callahan of the United Irish League of America to Mr. Condon, M.P., saying that since the passage of the Irish Land Act many evicted tenants now residing in the United States have been making anxious inquiries regarding the possibility of re-acquiring their former holdings.

New Dairy Superintendent.

Toronto, Sept. 23.—At a meeting of the Ontario Cabinet held yesterday afternoon, J. W. Mitchell, B.A., was appointed superintendent of the Eastern Dairying School at Kingston, vice J. W. Hart, resigned. The position is worth $1,500 per year and the appointment dates from Sept. 15.

Any Sore That Will Not Heal.

Any Ulceration, Eruption or Irritation of the Skin is Curable by Means of

DR, CHASE'S OINTMENT.

There is no guesswork about the results obtainable from Dr. Chase's Ointment.

With all medicines taken internally there is more or less uncertainty as to the effect, because the condition may not be exactly as indicated by the symptoms, but if you have a sore or wound and apply Dr. Chase's Ointment and heal it you can see with your own eyes the definite results.

It is because of the certain results accompanying the use of Dr. Chase's Ointment that this great preparation has become to be standard the world over. If a dealer offers you any other ointment, does he do so on its merits, or does he not rather try to make a sale by saying "This is just as good as Dr. Chase's"?

As a matter of fact, Dr. Chase's Ointment is now so universally used that few dealers think of offering anything else when a cure is sought for eczema, salt rheum, old sores or piles. There is scarcely a town, village or side line in this whole land but can point to some case in which Dr. Chase's Ointment has made a remarkable cure.

While this ointment is best known on account of its extraordinary success in curing the most torturing skin diseases and the most distressing forms of piles, it is also useful in scores of ways in every home for the cure of scalds, burns, wounds, old sores, chafing, skin irritation, sore feet, pimples, rough skin and everything for which an antiseptic, soothing treatment is needed.

Dr. Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his remedies. 9

Opposition to Grand Trunk Pacific More Pronounced.

ADOPT BORDEN'S SUGGESTION

That the Government Should Not Guarantee 75 Per Cent of Cost of Western Section Till the Company Has Undertaken to Provide Balance Required For Construction of the Road.

Ottawa, Sept. 22.—The House spent the whole day Monday in consideration of the clause of the national transcontinental railway bill, which deals with the financial relations of the Grand Trunk Railway with the Grand Trunk Pacific Railway Company. Early yesterday morning the Government accepted the suggestion by the Opposition leader, by which the evident intention that the Government should not be required to guarantee 75 per cent. of the cost of the western section of the proposed railway until the Grand Trunk Railway had undertaken to provide the balance required to construct the road was more specifically set forth. The debate, however, dragged along all day upon a further amendment proposed by Mr. Borden, which the Government declined to accept, requiring the G. T. R. to guarantee all the obligations undertaken by the G. T. Pacific.

Hon. Mr. Fielding pointed out that the amendment went altogether beyond the scope of the present agreement, but the debate proceeded. It was apparent that the Opposition to this particular clause was organized, and the arguments so persistently advanced by the Opposition indicated that the members had derived inspiration from a common source.

It is reported that there are twenty amendments yet to be moved by the Opposition, and the feeling is strong in the Government ranks that the obstruction is being fostered by rivals who are endeavoring to block the construction of the road. It was after midnight before the amendment was voted down only to be immediately succeeded by another.

Blame the Weather Man.

Ottawa, Sept. 22.—In the House yesterday Walter Scott, M. P., declared that the recent northwest storm had been greatly exaggerated, and he blamed Mr. Stupart of Toronto for false reports. Messrs. Boyd and Oliver joined in the discussion and declared that not more than one-fifth of the grain area had been affected. He declared a cable had been sent to London saying that only 10 per cent. of the crop would be threshed. Several members hastened to acquit Mr. Stupart of blame.

DIFFERENT NOW.

Canada's Preference Reminds England of Bright's Famous Saying.

London, Sept. 22.—(C.A.P.)—The Telegraph, speaking re. Canada's preferential tariff, in favor of Great Britain, says: "It is only a generation since the deplorable era died, let's hope forever, when John Bright declared in the House of Commons, that the separation of Canada from the Empire would be best for her and best for us, and when Radicals of the penurious school complained of the expense of our North American establishments."

Italian Laborers Riot.

Cooperstown, N.Y., Sept. 22.—A riot by Italian laborers on the Omeonta, Cooperstown & Richfield Springs trolley road yesterday resulted in the death of one Italian and the wounding of the general manager, Tilton, and a deputy sheriff. The trouble grew out of the fact that there is due the Italians two months' wages, for work done before the road went into the receiver's hands.

Equalled Kishineff Massacres.

Koenigsberg, Prussia, Sept. 22.—With reference to the recent rioting at Comel, in the Russian Government of Moghileff, between Christians and Jews, which was suppressed by the military with the loss of a number of lives, the Hartungsche Zeitung of this city publishes an account furnished by an eye-witness, who says the occurrences almost equalled the massacres of Kishineff.

Died in India.

Toronto, Sept. 22.—A cablegram was received yesterday by Dr. R. P. Mackay, Secretary of the Presbyterian Foreign Mission Board, announcing the death by plague of Dr. George Menzies, missionary at Mhow, Central India. Dr. Menzies went to India less than a year ago, and was appointed to care for the famine boys. He was a son of Wm. Menzies of Ailsa Craig.

Killed at Athens.

Brockville, Sept. 22.—The regular Brockville & Westport train killed an old man named Thos. Reid at Athens yesterday. He was 71 years of age, and an inmate of the House of Refuge, which is situated close to the railway. He came from Carleton Place, and leaves a wife and family.

Death of James Latchford.

Ottawa, Sept. 22.—James Latchford, father of Hon. E. R. Latchford, died yesterday morning, aged 94 years. He came to Ottawa in 1846 from Limerick, Ireland, where he was born in 1810. Besides the Minister of Public Works, he leaves two daughters.

Four Years For Theft.

Windsor, Sept. 22.—Nelson Blackwell was convicted before Judge Horne, at Sandwich, of stealing clothing from a boarding car in the Windsor yards of the C.P.R., and was sentenced to four years in the Kingston Penitentiary.

Blood Disorders

are simply kidney disorders. The kidneys filter the blood of all that shouldn't be there. The blood passes through the kidneys every three minutes. If the kidneys do their work no impurity or cause of disorder can remain in the circulation longer than that time. Therefore if your blood is out of order your kidneys have failed in their work. They are in need of stimulation, strengthening or doctoring. One medicine will do all three, the finest and most imitated blood medicine there is

THE LATE PHIL MAY.

Good Reasons for Not Marrying—One of His Delightful Sketches.

Phil May, the artist, whose death was announced on the 6th August, was credited of late years with being able to earn as much as £100 a day by his drawings. He began his artistic career when he was 12 years old, at which time the Grand Theatre, Leeds, opened, and he became acquainted with the son of the local scene painter, and helped to mix the distemper. Here Mr. May used to sketch sections of other people's designs of costumes, and eventually he designed comic masks and dresses. This brought him orders for portraits, and after a year or two the late Frederick Stimpson engaged him to play small parts, and do six sketches a week, as advertisement window bills. He got an engagement to design the dresses for the Leeds pantomime in 1882, but then determined to come to London as a tragedian, his finances at the time consisting of 20 shillings. An aunt had married an actor there, and he sought her out. By his uncle he was next day despatched again to Leeds, but he left the train and walked back to London. Then ensued a time of great privation, and the first turn of good fortune he had was when he met the owner of a photograph shop who took his drawing of Irving, Bancroft and Toole, and published it. At last a drawing by him of Mr. Bancroft in Society brought him to the notice of The St. Stephen's Review, where he was set the task of designing a cartoon, illustrations, cover and initials for a Christmas number. A week was given him to do this in. He worked night and day and finished the whole in time. He was employed on the illustrations of The Review till an agent came from Sydney to secure an artist. He went out to the colonies, later traveled America for The Graphic and subsequently joined the staff of Punch. May was born in 1864.

Good Reason for Not Marrying.

"Phil" May worked, in his youth, on The Bulletin of Sydney, Australia. Occasionally the young man would be assigned by The Bulletin people to the police courts, and from these assignments he would bring back sketches, now humorous, and now pathetic, that were admirable. One of the best of The Bulletin sketches hangs in the library of Mr. Joseph Chamberlain. It portrays a thin hangdog man in the prisoners' bar, talking to a very mild and sympathetic-looking Judge. Mr. May's story of the sketch is that the prisoner had been dragged before the Judge every few months for a number of years.

"Your face is familiar here," the latter now said.

"It is, your Honor—worse luck," returned the prisoner.

"Are you married yet?"

"Not yet, sir."

"Not yet, eh? How long is it, now, that you have been engaged?"

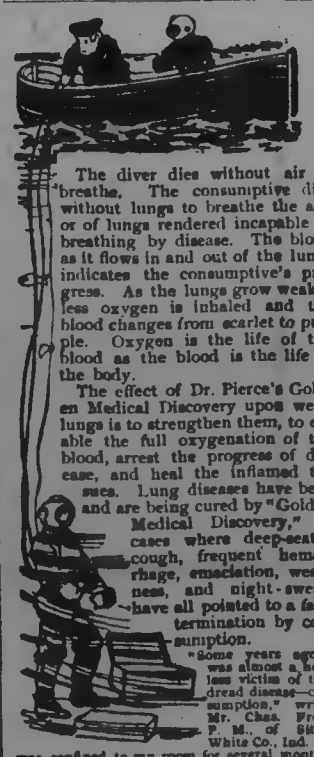
"Seven years, your Honor."

"So long as that? Why in the the world haven't you got married in all that time?"

"Because, your Honor," the prisoner explained, "Ann and I haven't managed to be both out of jail at the same time."

Windsor Tailors' Demands.

Windsor, Sept. 21.—The merchant tailors of Windsor, are considering a demand from the union which embodies a 10 per cent. raise in the rates in piecework. The Cutters' and Merchant Tailors' Association has practically decided to reject the proposition of the union for the 10 per cent. raise.



The diver dies without air to breathe. The consumptive dies without lungs to breathe the air, or of lungs rendered incapable of breathing by disease. The blood as it flows in and out of the lungs indicates the consumptive's progress. As the lungs grow weaker less oxygen is inhaled and the blood changes from scarlet to purple. Oxygen is the life of the blood as the blood is the life of the body.

The effect of Dr. Pierce's Golden Medical Discovery upon weak lungs is to strengthen them, to enable the full oxygenation of the blood, arrest the progress of disease, and heal the inflamed tissues. Lung diseases have been and are being cured by "Golden Medical Discovery," in cases where deep-seated cough, frequent hemorrhage, emaciation, weakness, and night-sweats have all pointed to a fatal termination by consumption.

"Some years ago I was almost a helpless victim of that dread disease—consumption," writes Mr. Chas. Fross, P. M., of Sikta, White Co., Ind. "I was confined to my room for several months; my friends and neighbors had given up all hope of my recovery, until one day a friend advised me to take Dr. Pierce's Golden Medical Discovery, and after I had taken the contents of the second bottle I began to improve. After taking six bottles I was, I honestly believe, delivered from the grave and entirely cured. I am now a strong and hearty man."

Dr. Pierce's Pleasant Pellets cleanse the clogged system from accumulated impurities.

A BROTHER'S SONG.

Up hill the burden must you bear?
O brother, sing, as on you fare!

Nay, nay, the road is rough and steep,
The narrow path I hardly keep—
Already in the noontide heat
I faint, and see, my faltering feet
And trembling hands are scarred and torn
With thistle's whip and sword of thorn.
Too soon shall pass my mete of time,
As up the toilsome height I climb,
Where crags defy, and winds deride,
And foes assail on every side—
The day is short, the night is long,
No voice, no heart have I for song!

Aye, brother, sing, there's one behind
Who lists your voice, the path to find,
Sing loud, and with his answering song
Your fainting courage shall grow strong!

Then rose a voice so brave, so clear
The laggard pilgrim joyed to hear.
Light burst upon his darkened sense,
Hope quickened thought, once dull and dense.
The sullen stream and threat'ning rock,
That seemed his craven soul to mock,
Took up the blithe'ful, buoyant strain
And sang it o'er and o'er again,
Speeding the tardy footsteps on
Until, at last, the goal was won,
And lo! a glad, victorious throng,
Brought hither by a brother's song!

—Zitella Cocke.

Two Brakeman Killed.

Barrie, Sept. 22.—A terrible accident happened in the G.T.R. yards, Allandale, yesterday morning. Wm. Scott, a young yard brakeman, while at work fell from the top of a moving train between two cars. The wheels passed over his abdomen, almost cutting him in two, and causing immediate death. Deceased was the son of Alex. Scott, bridge carpenter for the G.T.R.

Another young Allandale brakeman, named Wallace Tripp, was killed at Burk's Falls on Saturday, being caught between two cars and fatally squeezed. He was unmarried. His parents reside in Sundridge.

Unconscious From Gas.

Sarnia, Sept. 22.—A young couple who registered at the Belchamber House as Mr. and Mrs. R. D. Gordon of Marine City, Mich., were nearly suffocated by gas yesterday morning. The gas was full on and it was only after several hours of hard work by the physicians at the hospital that any spark of life could be found. When the couple became conscious they vouchsafed no explanation.

Died From An Accident.

Woodstock, Sept. 22.—Edward Grant, better known as "General" Grant, died at the hospital at 2.05 yesterday afternoon from the effects of an accident which befel him while working in an orchard at Currie's Crossing just ten days ago.

Conductor Drank Laudanum.

Toronto, Sept. 22.—Walter Young, a street railway conductor, was found dead in bed at his boarding house yesterday afternoon. Three laudanum vials were found in the room. He was 23 years of age and married.

Canadian May Succeed.

London, Sept. 22.—(C.A.P.)—Mr. Andrew Bonar Law is spoken of as the probable successor to Hon. Arthur R. Elliot, as Financial Secretary of the Treasury. Mr. Law was born in New Brunswick.

SURPRISE is SOAP

Pure Hard Soap.

Guessing at the heat of an oven spoils more food than inexperienced cooks. Dainty pastry and delicate cakes are ruined if the oven is too hot or not hot enough. The oven thermometer of the Imperial Oxford Range does away with all guesswork. The least experienced can tell to a certainty when the oven is ready for baking or roasting.

Every housekeeper will appreciate this convenience of the

Imperial Oxford Range

Most cooking failures may be traced to the fact that you don't know your oven. With the Imperial Oxford Range you know that the heat of the oven is evenly distributed and its exact temperature.

Write for the Imperial Oxford booklet. Or better still, will you call at one of our agencies and see the stove itself?

FROST'S

DIAMOND HALL

PETERBOROUGH.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 40c.

300 Pairs Mens, Ladies' and Children's Boots, all new goods, from 15c Pair up.

Oilcloth, 1¼ yards wide, regular 35c, for ... 23c

410 Chatelaine and Wrist Bags, in leather and fancy beads, regular 50c, to $2.00, for ... 15c

124 Ladies' and Gentlemen's Rainproof Raglan Coats, up-to-date styles, regular $6.00 to $14.00, for, from ... $2.75 to $5.00

Men's Blue Serge and Tweed Suits, regular $8 and $10, for from ... $4.90 to $5.50

Job Lot of Boys' Moleskin Knickers, for ages 5 to 12, regular 80c, for ... 15c

Men's Worsted, Tweed and Serge Vests, regular $1.00 to $2.00, for ... 74c

44 dozen Ladies' Wrappers, Night Gowns and Drawers, made from new fall materials and new styles, sold elsewhere for from 40c to $2.00, yours at ... 25c to $1.00

45 dozen Black Silk Spool Thread (only 3 to one customer) regular 5c, for ... 2c

Piles of New Fall Underwear, Hosiery, Boots and Shoes and hundreds of other great bargains too numerous to mention.

Good chance for peddlers and small storekeepers to stock up.

4%

Per annum, payable half-yearly, is allowed on all sums of $100 and upwards left with this Company for from one to five years.

Messrs. E. M. Poussett & Co. have received the following:

New York, September 23rd. —All indications point to the regular dividend at the next declaration of At.

MILLAR.

Town Topics.—The impressment in sentiment caused by early rally yesterday has disappeared and opinion over night has taken a more bearish turn. Heavy selling of Steel bonds yesterday afternoon is regarded unfavourable and traders are no longer disposed to work on the long side with unsettled conditions in steel trade with an active demand for both here and abroad; there is little prospect of an upward movement receiving support. Traders will sell the market to-day and we look for lower prices. Reports of N. Y. C. financial requirements will be used to depress that stock and selling of the Iron and Steel shares will adversely affect the general market. Some support is expected in Atch., R. I., but the Grangers have not yet cut loose. Reading and market as a whole is a sale for a reasonable time... London early market for Americans quiet and somewhat lower.

THE MASTER MECHANIC'S PURE TAR SOAP heals and softens the skin, while promptly cleansing it of grease, oil, rust, etc. Invaluable for mechanics, farmers, sportsmen. Free Sample on receipt of 4c for postage. Albert Toilet Soap Co., Mfrs. Montreal.

SAILSBURY & CO's.

PETERBOROUGH FAIR OPENED.

(Continued From 1st Page.)

the latter a beautiful panel, which might properly be called the three graces, was the coloured photograph, full length, of three charming bridesmaids at a recent fashionable wedding. The work, pose and colouring of this picture is in every way artistic. Oil paintings in figures, landscapes, etc., were most creditably represented. Some very fine water colours are hung and there are some very worthy specimens of pencil and pen and ink work. Some distinctly laboured, and some dashing specimens of the impressionist school of drawing. The art exhibit on the whole, though not extensive, was distinctly good in many ways and from an artistic point of view the best that has been seen for many years.

On this floor there are commercial displays also, contributed by Messrs. A. H. Stratton & Co., wall papers, window shadings and stationery; Gough Bros., a large display of clothing; Cressman, with also a display of clothing, and the Best Stove Company, besides displays of cream separators, "made in Canada," wares. Further reference and more in detail will be made to these exhibits.

SPECIAL EXHIBITS.

The grand stand and the prize animals cannot always assure the success of a fair. Wherever it is possible, Special Exhibits have been encouraged by the directors — trophies of commerce, agriculture, manufactures, etc. — and the number of these displays in the snow building and on the grounds were attractions which competed for public favour and interest.

BUDD & CO'S TEA EXHIBIT.

In a large showy marquee, near the main entrance to the Fair building, an interesting tea and coffee exhibit was made by Messrs. Budd & Co., the hustling new tea merchants, who have just "budded" out at No 174 Hunter street. Several young ladies were kept busy assisting in demonstrating the qualities of the tea and coffee to the crowds of callers. The pure Ceylon tea—green, black, or blended—was infused on the spot, producing a delicately coloured draught, not of a dark shade, but more like a topaz. Mr. Budd and his assistants must have handed out many hundreds of cups of tea and coffee during the day. Mr. Budd affirms that many of the perplexities of life can be alleviated by a cup of soothing and invigorating Ceylon tea. He told your staff representative that he is importing fine teas from London, England, and feels confident he can supply the public with a very superior article at an unusually moderate price. There was also shown a beautiful exhibition of china premiums, which are given away free with teas purchased at their store, opposite the Oriental Hotel, Hunter street, in order to introduce their special brands. An additional drawing card to the exhibit was the presence among the crowd of an attractive little tea cart drawn by a domestic goat, and driven by an expert juvenile, who advertised the exhibit effectively.

PETERBOROUGH BOOKSTORE DISPLAY.

It's not a hard matter to make a home rich-looking, cosy and full of colour—if you know how to choose wall hangings wisely. And it is not necessarily very expensive either. Thoughts like these come quickly as one stood and surveyed the interesting exhibit of the Peterborough Bookstore, which occupies a central position inside the entrance of the main building. Whether the want is to be met by purse of millionaire or pocket-book of limited means, it was manifest that Messrs. Stratton & Co. handle goods in the wall-paper and window decoration line that will amply satisfy judgment and means. This unusually suggestive exhibit to the home decorator was intended merely as an index to the large and varied allied lines of stocks carried in the handsome Peterborough Bookstore's premises on George street. And as a practical exposition for furnishing ideas of the effective combinations it appealed strongly to the visitor. The arrangement of the display was deserving of great credit to the tasteful designer. One could see the artistic adaptation of wall papers and borders, of window shades and cornice poles, combining grace with art in fanciful and attractive taste. There were many charming novelties in the display besides the wall and and window designs. Among the prettiest of artistic fancies was a display of elegant wrist bags, labelled "made in Canada," in walrus, crocodile, seal and snake skin leathers. Some very handsome samples of books were shown in elegant designs and bindings and a collection of high art steel etchings, and water colours, appropriately framed in gilt, oval and square mouldings. A handsome glass case was nicely dressed with a display of elegant fancy goods, embracing ebony toilet sets, gilt candalabra, gilt jewel cases, rich feather fans, purses and chatelaine bags, etc. This stunning exhibit redounded to the taste and skill of the Peterborough Bookstore window dresser and decorator.

THE GREAT CROWD-CORRALLING GOUGH BROS.

With what persistence the big clothing firm of Gough Bros. climb the ladder of success, their comprehensive exhibit in the main building forms a forcible and practical example. Perhaps no better evidence of the growth and enterprise of this firm is wanting than this year's display in the Fair building. They are the wide-awake clothing men, who, seventeen years ago, blazed the path for aggressive competition in clothing in Peterborough and surrounding districts, and have been keeping the pace with Peterborough's prosperity, doing a record-breaking business year after year.

Sound principles must be at the root of a business that grows as Goughs' business has grown. By the splendid support Peterborough has given this firm has built a great business, and as their trade grows larger it keeps expanding at a rapid rate. Each year of its existence has been a move to make the family purse reach further. It is simply stating the facts to say that Gough Bros. occupy a unique position in providing clothing and furnishings, boots and shoes, hats and caps, etc., for men, young men and boys, of safe grades at remarkable prices.

Messrs. Tully & Merrell, the Peterborough managers of Gough Bros.' business, continue to "make things hum." Their exhibit this year was another comprehensive exemplification of the advanced styles in the ready-made clothing trade. It surpassed in variety and completeness any similar display ever made in the building. The originality and skill shown in the arrangement of the exhibit must have impressed the thousands who witnessed it. Whatever expense and trouble the firm must have been put to — and it must have been considerable —they have the proud satisfaction of knowing that it well repaid them.

With an eye single to the interests of all classes, Gough Bros. exhibit included an interesting display of medium and high-class ready-to-wear suits, overcoats, and ulsters for fall and winter wear, marked in plain and convincing figures. Men's, youths' and boys' garments were shown in satisfactory variety. Light fall overcoats, heavy wintor ulsters, men's round and square cut coats, youths' and boys' suits and reefers, in all the various new styles of the season. There were also seen Raglan and rain coats, overcoats, swell long overcoats which are still enjoying so much popular favour; also the "Raglanette," and standard short box coat, in all the most up-to-date styles of fabrics. The display was effectively decorated with attractively designed price tickets, and appropriately lettered show cards. The whole effect was well worked out, To Mr. W. T. Morrell belongs the credit of designing and decorating the exhibit. It was a model, showing of men's, youths' and boys' ready-to-wear garments on an extensive scale.

NEWS NUGGETS.

—The steamer Empress discontinued her trips for the season on the 21st inst.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—The steamer Water-Lily this morning brought a load of excursionists from Rice Lake points.

—The schools are this afternoon enjoying a half holiday to allow the scholars to attend the exhibition.

—Mr. W. C. Kirk of Ashburnham, was this morning the recipient of a box of heather from Argyleshire, Scotland.

—After September 30th the steamer Esturion will discontinue her double trips between Bobcaygeon and Lindsay. After that date she will make only one trip daily.

—Any person requiring a truss should see Mr. Lindman of Montreal, who is at the Oriental Hotel for two days. Read the testimonials in another column.

—The evening service at the Park street Baptist church on Sunday was full of interest and blessing. The church was filled, the schoolroom taking the overflow. Two persons were baptized and seven received into the fellowship of the church.

—A social evening will be held by the Young People's Society of St. Andrew's church on Friday evening in the lecture hall. A feature will be the debate between members of the Young Men's Guild and of the Endeavourers. An invitation is extended to young people. 3d

GREAT MUSICAL DEMONSTRATION.

Was Coldstream Guards Band Concert Last Night.

Visiting Musicians Aroused Tremendous Enthusiasm—Programme was a Cosmopolitan One—Every Nationality Appealed to—Attendance 2,055.

In musical circles, the visit to Peterborough of the now famous Coldstream Guards' Band was looked upon as being a notable event, but it is doubtful if even the most sanguine were prepared for the gigantic success which the concert proved to be. The audience was the largest by far that has ever attended a musical entertainment in Peterborough, and that the band was able to satisfy their musical taste was amply demonstrated by the applause with which the rendition of each number was greeted.

It is safe to say that no musical organization visiting Peterborough has aroused the enthusiasm which the Guards' did last evening. When the special train arrived at the G. T. R. station from Lindsay at six o'clock the platform was completely crowded with a cheering multitude, and, on their march from the station to the Oriental Hotel, headed by the 57th Band, the streets were lined with people who filled the sidewalks.

Before the doors of the big rink, the largest building in town, were opened, at 7 o'clock, a crowd of people estimated at five hundred was waiting to be admitted. Immediately after the doors were opened the rink began to fill, and when Bandmaster Rogan made his appearance on the platform, 2,055 persons were in the building, many of whom, being unable to obtain seats, stood around the railing.

Of the Band and the playing, little need be said, except that by their work last night they fully qualified for all the complimentary notices in the press, of which they have been the subjects. No musical organization has ever been heard here that so thoroughly inspired those that heard it, as did the Coldstream Guards' Band last night. The programme was a varied one and arranged to suit all tastes. Bandmaster Rogan too, was very liberal, and graciously responded to the encores which were demanded after every number on the programme.

The programme was very happily arranged, and music was presented which appealed to the sentiment of every nationality. At the opening the audience was put in rare good humour by the playing of the "Maple Leaf," and it is doubtful if any Canadian band has ever played the Canadian National Hymn in a manner to equal that of the Coldstreams last night.

Every number was played with a style which was perfect and the remarkable control which Bandmaster Rogan has over the band was wonderful. They played as one man; the different sections not only harmonizing among themselves, the bass instruments in the prominet parts like one majestic roll of sound, and the other sections might be similarly described; the effect of the blending of the sections into the whole band was one indescribably beautiful. The selections played, while they were principally of a classical nature, interpreted the mind of the composer so well that by last night's concert, it was amply evidenced that classical music when well played, can be made to appeal to the popular taste.

Not only was the finished playing noticable in the heavy classical selections, but in the popular and lighter selections given as recall numbers, the same artistic taste was evidenced. "Hiawatha" was given with a style and dignity which was new to the audience, and provoked thunderous applause. It would be useless to attempt to criticize the work of the musicians, their playing is beyond criticism.

A very noticable feature of the whole entertainment was the entire lack of self consciousness, which is so prominent in some of the American bandmasters. Mr. Rogan conducted the band without the slightest attempt to make himself appear conspicuous.

Miss Kathleen Howard, the contralto soloist accompanying the band, captured the hearts of the audience before she had sung a note. Her modest and unassuming manner at once placed her in high favour. She sang with a rare artistic taste, and with a voice which for purity of tone and richness of quality has never been excelled here. She pleasingly responded to a demand for an encore after singing the "Song of Thanksgiving," by Allitson. Even then the audience was not satisfied and Miss Howard in response to the applause repeatedly bowed her thanks to the gathering.

Of the programme little more need be said, it was as majestic and finished as the most highly cultivated musician could wish for and included the March Hongroise from Berlioz's "Faust," as an encore to which was played "Tarantalli Del Dephegon," Cornet solo, "The Better Land," played by Corporal Hawkins. This was beautifully rendered, as was also the encore "The Last Chord." Rossini's famous overture to "William Tell" was played for the first time in Peterborough, and those who listened to Mr. Rogan's musicians play it will never forget the sensation which the triumphant quick-step produced. The encore to this overture was the ever popular "Whistling Rufus." The next number was one which appealed particularly to those who came from the "Land of the Heather," and introduced a number of Scotch airs, arranged by F. Godfrey. In response to a request Mr. Rogan gave the famous "1812" overture, prefacing its rendition by a short explanation of the different passages occurring in it. This was so well received that a portion of it was repeated. "Rule Britania" and "Hiawatha" were also included in the encores given. A characteristic piece entitled "In a Clock Store" was given introducing some novel features, such as alarm clocks ringing, cuckoo clock striking the hour, winding up the clock, etc. An "Irish Patrol," of a humorous turn followed by a "Turkish Patrol" along the same line was well received. A plantation sketch, introducing corn dances was thoroughly appreciated. The entertainment closed with a grand patriotic selection introducing a number of National airs, and ending with the "Maple Leaf," accompanying which was a tremendous outburst of applause and cheering, the greatest enthusiasm prevailing.

The management of the Industrial Fair is to be congratulated on the decided "hit" they made by securing the Coldstream Band, in connection with the Exhibition, and the band won a host of admirers by their playing last night.

FACTS ON GROWTH OF CANADA'S TRADE.

Some Interesting Figures Presented at Fair Opening.

Great Increase in Volume of Export Trade—Nearly Three Times that of the United States—Promise of Further Prosperity.

In his address at the opening of the First Peterborough Industrial Fair yesterday, Hon. Mr. Blair quoted some very pertinent facts in reference to the growth of Canada's trade during the past thirty years, and Hon. Mr. Stratton also dealt with the same subject, showing that Canada is becoming a great producing country, and that the prospects for the future are very bright. The facts quoted are such as may well create a glow of pride in every Canadian. They show that while in 1871, the volume of foreign trade amounted to $167,817,921, in 1903 it had grown to $467,061,494, an increase of 64.70 per cent. The mineral productions 30 years ago were valued at $6,043,868, while this year they amount to $64,970,732. In 1871 there were in operation 2,497 miles of railway, which have been increased to 18,864 miles this year, showing the remarkable increase of 870 per cent. These railways in 1871 carried 2,700,000 passengers, while 20,679,974 persons travelled on them during this fiscal year. In the matter of wealth, the increase is still more noticeable. In 1871 there was on deposit in banks, $86,123,931, which has grown to $423,748,777 in 1903. The public revenue thirty years ago was $19,335,561; now it is $82,739,273, an increase of 69 per cent.

These figures are all the more convincing when it is remembered that there has only been an increase in population of 1,714,976 during the thirty years.

The increased trade of the country during this period compares very favourably with that of the United States, for, while the imports of Canada have increased over 70 per cent., those of the United States have only increased 59 per cent. But it is in the volume of foreign trade where our great superiority is more plainly exemplified. Our foreign trade amounts to an average of $87.40 per head of the population, while that of the United States is but $35 per head. Our trade in 1871 was $39.80 per head, which is a most creditable record. It was pointed out by both speakers that this increase had very largely been brought about during the last ten years. By these facts it will be seen that Canada is fast becoming one of the chief trading countries in the world, and, in proportion to the population, the record of Canada is very remarkable.

—The forest trees are taking on their autumnal tints.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

Having bought out the business and stock of the Singer Supply Co., on the understanding that they were leaving for North Bay, I have had another lucky chance to pick up a large consignment of still better bargains. By paying spot cash I bought part of two big Toronto wholesale stocks at such a great discount that I can afford to sell far lower than any other dealer can buy at regular wholesale prices. People ask how I can sell so cheap? The reason is, I keep a buyer in the city who is on the watch for snaps, I pay spot cash, my expenses are light, and I prefer to sell for small profits and double quick returns.

LOOK AT THESE BARGAINS!

Special bargain of 1,000 Yards Dress Goods, consisting of Cheviots, Serges, Cashmeres and other good cloths, suitable for fall wear, regular price from 35c to $1.25 per yard, selling at, per yard, 15c to 40c.
300 Pairs Men's, Ladies' and Children's Boots, all new goods, from 15c Pair up.
Oilcloth, 1¼ yards wide, regular 35c, for 23c
440 Chatelaine and Wrist Bags, in leather and fancy beads, regular 50c. to $2.00, for 25c
124 Ladies' and Gentlemen's Rainproof and Raglan Coats, up-to-date styles, regular $5.00 to $14.00, for, from $2.75 to $8.00
Men's Blue Serge and Tweed Suits, regular $7 and $10, for from $4.50 to $5.50
Job Lot of Boys' Moleskin Knickers, for ages 5 to 12, regular 50c, for 15c
Men's Worsted, Tweed and Serge Vests, regular $1.00 to $2.00, for 74c
44 dozen Ladies' Wrappers, Night Gowns and Drawers, made from new fall materials and new styles. Sold elsewhere for from 40c to $2.00, yours at 25c to $1.00
65 dozen Black Silk Spool Thread (only 2 to one customer) regular 5c, for 2c
Piles of New Fall Underwear, Hosiery, Boots and Shoes and hundreds of other great bargains too numerous to mention.
Good chance for peddlers and small storekeepers to stock up.

SCRANTON and LEHIGH COAL

Egg, Stove and Nut.

Coal in stock, and will be delivered promptly.

Classes in Art

Miss Amy K. Bennet (pupil of Chase) will resume her classes in Oils, Water-Colours and Charcoal.

Saturday, Sept. 26.

Millinery

That's considered to be "smart"—that's termed reasonable in style and price. Millinery with the newest of new American and European ideas, combined with consistent, original and smart designs of our own artists—for a Millinery business could not be successful for more than a few days unless the backbone—the permanent artists—had ability to create "new touches."

Our Millinery Department has better facilities than ever for accomplishing the ever-expanding business that this store enjoys.

A welcome awaits you to avail yourself of another opportunity to wander through this display of artistic beauties.

Mantles

With entirely new features. Great differences prevail in collars and sleeves. Styles of cloths and trimmings are effective and unique.

Every Coat a fitting coat—that's been a study with us, as well as style and quality.

Prices have invariably been found satisfactory in this department. A comparison is appreciated any time convenient to you. Pleased to fit some on you.

"Ever Think"

of the safeguards in buying from this store in the first of the season?

We sell for cash.

Mark in plain figures. (You can "interpret" them.)

Sell only at the prices marked—never break a price.

No indiscriminate discounts. These facts allow us to mark our goods at a much closer margin of profit.

Mrs. Hughson, of Chicago, whose letter follows, is another woman in high position who owes her health to Lydia E. Pinkham's Vegetable Compound.

"Money seemed but poor and paltry compared to health, and yet a few dollars invested in **Lydia E. Pinkham's Vegetable Compound** brought me good health. I suffered for several years with general weakness and bearing-down pains, caused by womb trouble. My appetite was frightful, and I would lie awake for hours, and could not sleep, until I seemed more weary in the morning than when I retired. After reading one of its advertisements I decided to try the merits of **Lydia E. Pinkham's Vegetable Compound**, and I am so glad I did. No one can describe the good it did me. I took three bottles faithfully, and besides building up my general health, it drove all disease and poison out of my body, and made me feel as spry and active as a young girl. Mrs. Pinkham's medicines are certainly all they are claimed to be."—MRS. M. E. HUGHSON, 347 E. Ohio St., Chicago, Ill. —*$5000 forfeit if original of above letter proving genuineness cannot be produced.*

If the slightest trouble appears which you do not understand, write to Mrs. Pinkham at Lynn, Mass., for her advice, and a few timely words from her will show you the right thing to do. This advice costs nothing, but it may mean life or happiness or both.

Daily Examiner.

London (England) office—142 Fleet street, E. C., Central Press Agency Limited, Special Agents.

THURSDAY, SEPTEMBER 24, 1903.

THE SAULT AND BRITISH CAPITAL.

In these times, when the Imperial sentiment is becoming one of peculiar interest, and engaging the attention of some of the most thoughtful, both of Canadians and those whose homes are in the United Kingdom, the statement that there is a possibility of English capitalists obtaining control of the enterprises at the Soo, will be an especially welcome one. The Globe speaks of the proposal editorially, as follows:

"While Canadians would be heartily glad to see the Sault industries taken up for development by capitalists of any nationality, it would give them peculiar pleasure to learn that the enterprise is to pass under British control. What Canada needs and wants, is more capitalistic investment in some of our productive undertakings ,and especially the introduction of more British capital. There is an enormous amount of it to be devoted to the exploitation of natural resources somewhere outside of Great Britain. We have never had our fair share of it, and this seems an excellent opportunity to make a good beginning. If the Sault works were undertaken and made profitable, other investments of a like nature would follow.

"The time seems favourable for such an investment, apart from the impairment of value in the industrial establishments themselves. The construction of the Grand Trunk transcontinental railway, and its branches, totalling probably four thousand miles, will be commenced almost immediately, and will be kept up for several years. An enormous tonnage of steel rails will be required, and the Sault mill is in a peculiarly favourable position to compete for a share of the work. It has a practically inexhaustible supply of cheaply obtainable ore, and it will have a direct rail connection with the transcontinental line at a spot advantageously near its middle point.

"Mr. Clergue's phenomenal ingenuity has been directed to co-ordinating an industrial syndication unprecedented in its character. The various industries are intended to be complementary to each other, so that, as far as may be, the waste products of one may become the raw material of another. While it would be interesting to see how such a scheme would work out on a fair basis of capitalization, it may be found possible to dispose of some units of the system separately. For example, there does not appear to be any necessary connection between the pulp works and the iron works, though there is an ultimate relation between the sulphide pulp mill on the one hand, and the Gertrude nickel mine and Cockburn Island limestone quarry, on the other. The potentiality is great, and it is to be hoped that it may prove captivating."

Was Hovering Between Life and Death

A few days trial of Lactated Food will convince any intelligent mother that it is the right form of nourishment for her weak and puny baby. No other food can give such prompt and happy results at a time when the little one is hovering between life and death. A Montreal lady last August wrote as follows: — "My baby was so weak and sickly a few weeks ago that we despaired of her life. We tried nourishment of every kind, but could not get anything to remain on its stomach. We heard of Lactated Food, and commenced its use. There was an improvement the very first week, and to-day our baby is well and strong. Lactated Food saved her life." Sold at all Drug stores.

RURAL DEANERY OF NORTHUMBERLAND.

Meeting in Lakefield Monday Evening and Tuesday.

The Rural Deanery of Northumberland met at Lakefield on Monday evening and Tuesday, with a fairly large attendance.

On Monday evening at 8 o'clock, service was held, Rev. W. R. Tandy preaching a very powerful sermon, for which he took the text from 1 St. Peter, 2nd chap., verse 5.

On Tuesday morning Holy Communion was held at 8 o'clock.

The Rural Deanery was called to order in the Rectory at 10 o'clock with Rev. G. Warren, Rural Dean, in the chair.

Rev. C. H. Brooks, M.A., gave an interesting Bible reading on I John, chaper 1, which was later discussed.

The assessment of the M. S. U. C. on the Deanery was left to be apportioned by the Secretary, Rev. W. L. Armitage.

Rev. Messrs. Warren, Langfeldt and Armitage were appointed trustees of the Dr. Bray Library, to which new volumnes will shortly be added.

Owing to the absence of some members of the Deanery, the time of the papers was occupied by a general discussion.

The next meeting will be held in All Saint's church, Peterborough, some time in February, when the following programme will be followed out:—

1. Greek Tentament, St. John 10, verses 1 to 18.
2. The Atonement, Rev. W. R. Tandy.
3. Discussion of the Book "Come Home," author, Dr. Langtry, to be led by Rev. E. A. Langfeldt.
4. Review by Rev. W. L. Armitage of the book "Babel and Bible," author Delitzch.

SOME HAPPENINGS IN THE NORTHERN TOWN.

Personal Mention and Other Happenings of Interest at Lakefield.

Mr. Wm. Dinwoodie, of the R .H. Clock Lumber Co., Mattawa, formerly of Lakefield, was in the village on Saturday, visiting his uncle, Mr. John Dinwoodie. Mr .Dinwoodie says he notices many changes in the village since he left here a few years ago.

It is with much regreet that we chronicle the death of Miss Lottie Ingram, which took place at her brother's residence in Douro on Sunday, August 13th. The funeral which was largely attended was held on Tuesday afternoon.

Miss Tanner who has been visiting in Montreal and Toronto for the past couple of months, has returned home, accompanied by Miss T .W. Tanner, of Toronto, who will spend a few weeks in the village.

Mrs .Wigg, of California, who has been visiting her son, Mr .S. P. Wigg, of the village, has returned to her home in California.

Mr .and Mrs .McCullough, of Montreal and Miss Wigg, of California, have been guests at the Craig House for the past couple of weeks.

Mr. John Cooper, who has conducted a livery business in the village for the past seventeen years with a marked degree of success, has sold his entire plant to Mr. John Madill, who is well known throughout the country as a good horse man. Mr. Madill has a thorough knowledge of the business he has taken over, having been employed with Mr .Cooper for about fifteen years. Customers may rest assured that the best service possible will be the aim of the new proprietor of this popular livery.

The remains of the late Sparham Sheldrake, who died at Oakville, Sept. 16th, ware brought to the village for interment in the Hillside Cemetery, on Friday, September 18th. The funeral, which was under the auspices of Clementi Lodge A.F .and A .M., was largely attended.

Many citizens of Lakefield are looking to the council for some form of permanent sidewalks. With the material right at our doors for cement pavement, it is not creditable to our enterprising village that such villages as Millbrook and Keene should lead in putting down cement sidewalks. Now is the time for this matter to be taken up as our present plank walks are in a very bad condition, endangering the life of the public. We understand that it costs only one half more to put down a permanent walk that would be a credit to the village. White plank walks are a continual expense. They have to be repaired frequently and at best only last two or three years.

The concert which was held in the Town Hall, on Friday evening, under the auspices of the Daughters of the Empire was a decided success. Mr. Knowles charmed the audience by his rendition of the Last Phiagon. The programme which was well received was as follows:—

Instrumental, ... Orchestra
Song, ...MissTate
Song, ...Mr. Thomas
Tableau, ...Mitletoe
Reading, ...Dr. J. R. Fraser
Song, ...Miss Montgomery
Instrumental, ...Orchestra
Tableau, ...Mary and Her Lamb

Song, ...Miss Wigg

God Save the King.

Killed at Galt.

Galt, Sept. 24.—Archie R. McAustan, aged about 18 years, was fatally injured while attempting to alight on the platform from the car step of the 8.20 G. T. R. train going north Tuesday night, when the train was moving at the rate of probably twenty miles an hour. He was the son of Archibald McAustan, the well-known building contractor of Galt.

Killed by a Bull.

St. Thomas, Sept. 24.—Peter Hemmingway of Corinth was killed by a bull yesterday morning. While he was attending to some duties in the barn the animal suddenly turned on him, and, although dishorned, it trampled and bruised him. Mr. Hemmingway lived only a few minutes after being rescued

ABOUT STOCKERS.

(Toronto Globe.)

The scarcity of labour has this year greatly discouraged Ontario farmers, and it is not certain, or even probable, that conditions will be more favourable next year or for some years to come. A permanent increase in the cost of labour means a measurable dimunition of profit and a corresponding decrease in the capitalized value of farm lands. When to the list of competitors for what labour there is are added the contractors for the construction of the Grand Trunk Pacific Railway it will be seen that the outlook for the farmer is somewhat gloomy.

Various plans for getting over the difficulty have been suggested, but those devised with a view to increasing the supply of labour furnish little hope of relief. Apparently this must be sought in a different direction, namely, lessening the amount of labour required on the farm and that can be secured only by a change of farming methods. Grain growing in Ontario is too capricious to be safe. Dairy farming involves too much toil, even when the milk is sold to creameries or to cheese factories. Fruit growing cannot be made profitable except in limited areas. Making live stock ready for the British market involves a heavy outlay of labour, but in the production of "stockers" the work and trouble may be reduced to a minimum.

Up to three years of age a steer or heifer gives very little trouble if properly treated. When brought up on an ordinary farm, where the ranching treatment is out of the question, the animals should be dehorned and housed like sheep through the winter in shelters provided with facilities for watering and feeding them without the necessity of tying or otherwise restraining them. The farmer who sets out to raise stockers cannot afford land for pasture. He must raise fodder and cut it for his cattle during the summer, and feed it to them as preserved in silos during the winter. A farm worked in this way will maintain several times as many stockers as it would if allowed to run into pasture. Fodder corn, vetches with oats, clover, alfalfa, rape, and other succulent plants are suitable for this purpose. The farmer will, of course, be kept busy enough, and so will his team, but he will be able to do with less hired labour, which is the thing chiefly to be desired at present.

It is natural to ask what the outlook is for a permanent profitable market for stockers. Not long ago it would have been unwise to undertake such a business, but for the past half-dozen years the risk has been reduced to a minimum, and present conditions seem likely to remain stable. Stockers may be disposed of in several different ways. They may be sold to Ontario farmers who "finish" cattle for the British market; in this case the two classes of operators supplement each other's efforts by a division of labour and risk. They may be exported to the United States to be finished for the canned meat trade. Or they may be sent to western ranches to be finished by a year or more on the nutritious natural grass.

Every industry has its ups and downs and the raising of stockers is no exception. Prices fluctuate and sometimes the very bottom seems to fall out of the market. The farmer who relies solely on stocks, however, is in no danger of being left with perishable material on his hands. If prices are very good he can sell without waiting till his animals are full grown. If they are very poor he can, if he has foresight, keep his animals at least long enough to enable him to set off the increase in weight against the dimunition in price. One precaution he must not neglect is to have the animals well bred. Another is to have them in fair condition. The observance of these requirements makes his cattle readily saleable in the United States, where the urban population is rapidly gaining on the agricultural classes.

OMEMEE.

(From our own Correspondent.)

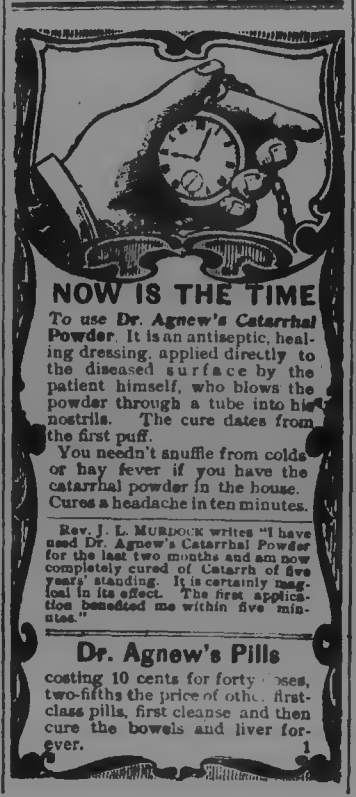
Farmers are very busy threshing and the yield is very good.

Our Choral Society is busy rehearsing for their concert, each and every member having been profited and instructed at the Festival in Peterborough.

Some of the sugar beets grown around here measure 5 inches in diamcter.

Mr. Robinson, an ex-secretary of Y. M.C.A., Lindsay, now at Queen's University, Kingston, most acceptably filled the Presbyterian pulpit on Sunday last, and no doubt a large gathering will come next Sunday to see him.

The induction of Mr. Whitelaw into the Presbyterian Church at Omemee is to take place on Thursday, October 1st, at the Church, Omemee.



NOW IS THE TIME

To use Dr. Agnew's Catarrhal Powder. It is an antiseptic, healing dressing, applied directly to the diseased surface by the patient himself, who blows the powder through a tube into his nostrils. The cure dates from the first puff.

You needn't snuffle from colds or hay fever if you have the catarrhal powder in the house. Cures a headache in ten minutes.

Rev. J. L. MURDOCK writes "I have used Dr. Agnew's Catarrhal Powder for the last two months and am now completely cured of Catarrh of five years' standing. It is certainly magical in its effect. The first application benefited me within five minutes."

Dr. Agnew's Pills

costing 10 cents for forty doses, two-fifths the price of other first-class pills, first cleanse and then cure the bowels and liver forever. 1

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

LAKEHURST.

(From our own Correspondent.)

On Tuesday evening, September 15th, the Presbyterian congregation here held a very successful tea and entertainment. The attendance was good although the weather was threatening. Mr. Pickup, the Minister in charge was assisted by the choir, also Miss Maud Pickup and Miss Malloy, furnished the greater part of the programme and a very enjoyable evening was spent.

Messrs. Archie and Jas. Wilson have placed a new wind mill in their barn. This is quite an addition to their already first-class barns.

Mr. and Mrs. Henry Coons returned on Saturday last from a visit to Toronto, Chatham and other points west.

Mr. T .Carruthers and a friend from Toronto have been visiting friends in the settlement.

Miss Richardson, is visiting her cousin, Miss Edna Shearer, this week.

Quite a number of the people of South Harvey took in the annual fall show at Bobcaygeon Tuesday last.

The South Harvey fall show is to be held on October 1st and 2nd. It promises to be a success again this year. Many special prizes have been donated and the other attractive features with those should make it a success.

If the children require physic none acts so nice as Miller's Worm Powders; very pleasant to take.

Fall and Fair Time

LAKE SUPERIOR CO.

Mr. F. H. Clergue Issues an Important Statement.

APPEALS TO CANADIANS.

Says They Can Assist in Present Crisis, and That Co-operation of Speyer Co. Can Be Depended Upon—Auction Sale of Securities Oct. 1—Stockholders Favor Reorganization on Basis Announced.

Toronto, Sept. 24.—F. H. Clergue, who was in the city yesterday on his way to New York, gave a statement to the press regarding the financial difficulties of the Soo Company. He said he was sure the Speyer syndicate would afford every indulgence, but for the present the company was more likely to be embarrassed by pressure from Canadian creditors who regard their claims as unsecured. These creditors could afford the greatest assistance in the present emergency by a little delay in pressing for immediate settlements, while not at all imperilling their rights, since the Speyer securities will certainly be held subject to the liabilities of current Canadian debts, which, on the whole, do not probably amount to one and a half million dollars.

The works, said Mr. Clergue, represent an expenditure of $85,000,000, and not three-tenths of the capital expenditure has yet come into productive form in operating works, although the entire plant is completed and ready to start up. The small fraction of plant in operation has earned in gross in the last four months over $1,300,000 and in net over $600,000. This is at the rate of $1,800,000 net per annum, with less than one-third of the invested capital productive, and with the various nickel and steel works only now come into operation, having an earning capacity from orders practically in hand of two and one-half millions annually in addition. These facts are evident to any capable investigator, and Mr. Clergue regards it as unaccountable that the company have not been able to provide for the Speyer loan.

Mr. Clergue said it was impossible that the works should prove an economic failure and he was confident the shareholders would be saved their entire investment.

Auction Sale Oct. 1.

New York, Sept. 24.—It was stated yesterday that the Speyer Syndicate probably will sell the assets of the Consolidated Lake Superior Company at auction on Oct. 1. The securities held by the Consolidated Lake Superior Company are to be sold at public auction at 12 o'clock noon on Thursday, Oct. 1, at 181 Broadway, New York. The terms of the sale are that the securities, etc., must be bid for and purchased in one parcel, and Speyer & Co. reserve the right to bid in the properties offered for sale.

Approve Reorganization.

Philadelphia, Sept. 24.—The stockholders protective committee of the Consolidated Lake Superior Company have approved the proposed plan of reorganization, which they say is satisfactory to the interests they represent. The plan provides for a new company capitalized at from $35,000,000 to $40,000,000, and it is proposed to raise that amount by a bond issue of $5,000,000 and an assessment of $3 per share. It is understood that officers of the company are now in communication with financial interests in Canada and New York looking to the carrying out of this plan.

It's a Good Thing.

Ottawa, Sept. 24.—In the House last night, the question of tariff arose, and Mr. Borden declared that the Government was responsible for the closing down of the Clergue industries at the Soo.

Archie Campbell declared that it was a good thing that the industries had been closed down, as they would now be put on a solid basis.

For this expression of opinion, Mr. Campbell was warmly censured by Opposition members, who do not think it was a good thing for thousands of men to be thrown out of employment, and obliged to leave for a foreign country.

Sault Ste. Marie, Sept. 24.—William Coyne, assistant to President Shields, declared yesterday that the employes would not be paid on the 28th, as promised, nor at any other time until after the reorganization.

When you do not relish your food and feel dull and stupid after eating, all you need is a dose of Chamberlain's Stomach and Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by all druggists.

Tired of the Vatican.

Rome, Sept. 24.—The attack of rheumatism from which the Pope is suffering is thought to have been caused by long daily walks in the damp gardens of the Vatican. In future His Holiness will drive instead of walk. He dislikes the confinement, which he complains is telling on his health. The old papal castle at Guadolfo is being restored. This is deemed significant, in view of the assertion of the Pope that he is tired of living in the Vatican.

Lovelace For Lincoln.

St. Catharines, Sept. 21.—Lincoln County Liberals met on Saturday and nominated E. J. Lovelace, editor of The Journal, as their candidate for the Commons.

The Evidence You Value.

By word of mouth from friend to friend Dr. Chase's Ointment has received more unsolicited recommendations than probably any medicine you can mention. The fact that it is an absolute cure for piles has put it in a class all by itself as a preparation of inestimable value and people recommend it knowing that it is a certain cure.

KING TAKES A HAND

Shows That He is An Expert Cabinet Maker.

BALFOUR'S APPOINTMENTS.

Not All to His Liking and He Exercises His Prerogative in Present Crisis—Tory Succeeds on Protection Cry—Birmingham Chamber of Commerce Endorses Chamberlain by Large Majority.

London, Sept. 24.—The political crisis has taken on a phase which lends to the present situation an historical and constitutional importance of almost unprecedented interest. The King has interfered in the exercise of his prerogatives to an extent never dreamed of in the Victorian era. Premier Balfour's continued presence at Balmoral has given rise to much surmise and comment, but the Associated Press is able to state definitely that it is due to the King's determination not to assent to the formation of a new Cabinet until thoroughly satisfied that its personnel and combination is such as to ensure the efficient carrying on of the affairs of the Empire pending the resumption of Parliament.

For years previous Cabinets were formed or Ministerial vacancies filled with the mere formal presentation to the Sovereign of the names of the new Ministers. King Edward has done away with this tradition. He has spent the last few days in constant discussion with Mr. Balfour as to the advisability from the point of view of the national welfare of the latter's suggested appointments of Ministers and those nominated for office have been summoned to Balmoral to join in these conferences, and all have been subjected to a degree of interrogation such as has surprised even those who know King Edward intimately as Prince of Wales.

Kitchener For War Office.

London, Sept. 24.—Premier Balfour is apparently meeting with considerable difficulty in the task of reconstructing his Cabinet. It is stated that Mr. Wyndham has been offered the choice of several portfolios, but has decided to remain as Chief Secretary for Ireland. Rumors are renewed that Lord Kitchener is to be given the War Secretaryship.

Support Chamberlain.

London, Sept. 24.—(C.A.P.)—By a majority of 400 yesterday, the Birmingham Chamber of Commerce supported the proposal to impose moderate duties on products, the exclusive raw material and the manufactures of foreign countries, so long as the colonies granted such a preference as would adquately compensate the Mother Country. The chamber also approved of the principle of the colonial Governments being secured freedom to enter into fiscal relations with the Imperial Government, without detriment to their fiscal relations with foreign powers.

Conservative Victory.

London, Sept. 24.—A bye-election was held at Rochester yesterday to replace Viscount Cranborne, who resigned his seat in the Commons on his elevation to the peerage as a consequence of the death of his father, Marquis of Salisbury. The contest, which was keenly fought on the fiscal question, resulted in the Conservatives retaining the seat, and electing Charles Tuff over Sir Henry Johnston, Liberal. Tuff opposes the tax on food, it is said, although supporting Balfour's retaliatory measures.

Must Deal With Defence.

London, Sept. 24.—(C.A.P.)—The Globe yesterday said that the chief among the matters which press for consideration is the question of the administrative and legislative machinery of the Empire. The representatives of the colonies will have to be welcomed at Westminster and new provision made by which their views may be constitutionally expressed. The question of Imperial defence must be dealt with in concert with, not over the heads of, the colonial Governments.

To Beat the World.

London, Sept. 24.—(C.A.P.)—Sir William Holland, writing to a correspondent, says that the potentialities of Canada, especially in wheat growing, are so enormous that he is fully convinced that Canada will be able to beat the world in her own home markets, without the aid of any preference.

Praise Ross Rifle.

London, Sept. 24.—(C.A.P.)—The favorable opinion expressed by riflemen at Bisley regarding the Ross rifle has encouraged the Ross Rifle Company to make an offer to the British Government with the view to arming some of the regiments with the Canadian weapon.

Fast Mail Service.

London, Sept. 24.—(C.A.P.)—An announcement is expected shortly after Lord Strathcona's arrival from Canada as to what extent the Imperial Government is prepared to support the fast mail service in conjunction with the Dominion. It is said Lord Strathcona has given instructions to bring the matter to a head.

Increased Trade.

London, Sept. 24.—(C.A.P.)—The Scotch woollen manufacturers are almost unanimous in the opinion that Canada's preference has increased and is still likely further to increase their trade with the Dominion.

Canadian Appointed.

London, Sept. 24.—(C.A.P.)—Professor Capper, formerly of McGill University, Montreal, has been appointed professor of the School of Architecture, Manchester.

Prohibition Withdrawn.

London, Sept. 24.—(C.A.P.)—The Board of Agriculture has withdrawn the prohibition regarding the landing of animals other than swine from the Eastern States.

Less Hopeful Feeling.

Sofia, Sept. 24.—A less hopeful feeling prevails in Government circles regarding the general situation, although no actual change is reported. The events of the next two days are awaited with great anxiety. A largely attended meeting of Macedonian sympathizers at Rustchuk, Bulgaria, adopted resolutions appealing to the Bulgarian Government to declare war on Turkey.

The Proper Treatment for a Sprained Ankle.

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is usually two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days. For sale by all druggists.

Valuable Barn Burned.

Exeter, Sept. 24.—The barn of W. H. Penhall, one of the finest in this section, was totally destroyed by fire yesterday afternoon. While the men were threshing sparks from the engine dropped into a heap of chaff. All the implements, two horses and a cow were destroyed. The insurance is about $1,800.

Turkey's Right.

London, Sept. 24.—A singular communication has been made to the Bulgarian Government from Count Lamsdorff, the Russian Foreign Minister, that in the opinion of Count von Buelow, the German Chancellor, Turkey has the right to send troops into Bulgaria, to preserve order.

Chance of a Minto.

London, Sept. 24.—(C.A.P.)—A Minister, referring to Lord Minto having Rideau Hall to himself, says that Lord Minto will be left ample time to steep his head in the fiscal problem, and his grasp of the Canadian case may be useful when he returns to the House of Lords.

Battery Stables Burned.

Kingston, Sept. 24.—Fire at noon yesterday made a stir about B. Battery's quarters in Artillery Park. The stables caught fire and a stiff wind caused quite a blaze. The firemen and battery men after two hours' work subdued the flames. The loss is about $1,000. The stables were almost a hundred years old.

For Kidney Disorders Take

Trade-Mark

Bu=Ju

A vegetable compound in the form of pills which acts on the kidneys. It stimulates and invigorates these important organs of the body, and thus assists nature in keeping the blood pure and expelling poisonous matter from the system.

The latest results of scientific discoveries are embodied in this remedy, which is sold in boxes of 50 pills for 50 cents, at all drug stores. Do not waste money in worthless substitutes.

FIRST PETERBOROUGH INDUSTRIAL FAIR.

Report of Second Day's Programme on the Grounds.

GOOD CARD OF HORSE RACES.

Stock Exhibits are Numerous and of Good Quality—Attendance Yesterday Best for a Number of Years—Notes of Special Exhibits.

The attendance at yesterday's exhibition was very satisfactory, the box office receipts showing in attendance of between five and six thousand persons. The public were greatly interested in the judging events, which were conducted under conditions which permitted a good view to spectators. The speeding events, which were conducted under the auspices of the Turf Club Section of the Industrial Fair, attracted a large crowd of spectators and very good sport was furnished.

The record of the events is as follows:—

The first event was a farmers' trot, over a course of 1-2 mile, in three heats. The four horses which entered were all from Peterborough County.

Summary:

Maud Keawick, Geo. Fitzgerald	1	1	1
Nellie May; J. H. Fowler	3	2	2
Nellie Wilkes, W. F. Taylor	2	3	3
Moonlight Queen, Jas. Fife	4	4	4

Time 1.17; 1.24 and 1.26.

It will be noticed that the second heat left Nellie May and Nellie Wilkes a tie for the second place, naturally the last heat was unusually exciting as both horses were fairly equally matched. Right until the finish it was difficult to say which would come second, however, in the end Nellie May showed her superiority and defeated Mr. Taylor's horse.

The second event was a stallion race of one mile, run off in three heats as follows:—

Hal Forest, O. Forsythe, Stouffville	1	1	1
Black Mack, H. Elmhurst, Keene	2	2	2
Lapidist Chief, J. Clancy, Peterborough	3	3	3

Time 2.20, 2.24 and 2.21 1-2.

In the second heat Hal Forest and Black Mack had an exciting struggle for the first place, however, the Stouffville horse won out.

The third event was a hurdle race of six hurdles over a course of 1 1-2 miles, which ended:—

1. "Cheat'Em," P. Clunan, Peterborough.
2. "Tholan," Murray, Hamilton.
3. "Sarawack," R. H. Wilson, Hamilton.

Time 3.05.

The finish was most exciting. Many persons did not know which had won, and a crowd immediately collected in front of the judges' stand, everyone shouting the name of the horse which he thought had won.

George Graham got first prize and Geo. Fitzgerald second for the best driving horse.

The last event of the afternoon was a tug-of-war between "Force" and "Quaker Oats," the former team Qwinning after a hard pull. The names and weights of the winners are:—

R. H. Shepherd, (Captain)	179
P. Bilevoau	160
F. Felce	180
W. Bradford	182
D. Fowler	170
Rock Briou	192
W. C. Bryan	167
R. Jewell	179
E. Hurtubise, (Anchor)	200

This win gives the "Force" team team the championship of Peterborough, which carries with it the silver cup donated by the Turf Club, also a medal for each man, the donors of which is the Agricultural Society.

EXHIBITION OF STOCK.

The directors are well pleased, and with good reason, with the stock exhibition. The quality of the stock shown is far above the shows of former years, many outside exhibitors being present, an evidence that the aim of the directors of extend the influence of the Fair beyond merely local limits, has been successful.

HORSES.

Breeding Classes.—In the breeding classes the exhibitors were, John Deyell, brood mare and foal, heavy draught and foal; W. H. Staples, brood mare and foal, heavy draught and foal; George Ward, foal.

POULTRY

The exhibitors in poultry, who were not numerous, but who cooped a very fine show of birds were W. Stewart & Son, Harold Wallis, Hugh Wallis, F. O. Sargent, C. H. Curtis, Gordon Cumming, R. Tivey, Chas. Dean, Wm. Howland, Jas. Baptie, J. E. Fowler, and John Howland.

THIRD DAY.

This morning the weather was bright, if a little boisterous as to breeze. The attendance was not very large, the morning being principally occupied with preparations for the afternoon events, and the completion of the judging in the cattle, horse and swine rings, the classes of cattle judged being Ayrshires, Durhams and Holsteins. In swine, the Berkshires, Tamworths and Yorkshires were judged. The president remarked upon the splendid show of young horses, especially in the heavy draught class.

The speeding events this afternoon included the novelty race, the one mile bicycle race, the open trot, the running race, three-quarter mile; two mile bicycle race, men's 220 yards foot race, boys' race, 200 yards; girls' race, 100 yards; and the hundred yards dash for the Schneider Cup.

An instalment of the list of prize winners will apear in to-morrow's issue.

SPECIAL EXHIBITS.

STROUD'S TEAS AND COFFEES.

All over Canada Stroud's Teas and Coffees, are "as familiar as household words." Hardly a town of any importance but has one of Stroud's Tea Stores, and the volume of sales annually must be enormous. Mr. Walter Reid, the pushing agent for the Peterborough branch store, No. 366 George street, made an attractive exhibit in a large tent spread in a good location in the western section. A large stock of Stroud's special blends of black and green Ceylon teas, were shown, special prominence being given to the "Champion" blend, which retails at from 25 cents to 50 cents per pound. Mocha and Java coffees were also shown from 25 cents to 40 cents per pound. Visitors were regaled with a refreshing cup of the infusion of the tea or coffee, brewed on the spot, and the ladies, especially, who are the best judges, smacked their lips and gave expression to the virtue of the "draw" It was a great drawing card, judging by the crowd which surrounded the exhibit. The Stroud Company give coupons with every purchase of tea and coffee, which entitles them to a choice of a wide selection of handsome premiums, in fancy china, glassware, jardinieres, etc., which were displayed in the exhibit. The bright and obliging staff were kept on the hustle, waiting on the thirsty people.

THE "HAPPY THOUGHT" EXHIBIT.

Just inside the south entrance to the main building, the Best Stove Company, of Hunter street, made a splendid exhibit of "Happy Thought" Ranges, etc. It attracted very large crowds not only on account of the effective character of the display, but by the practical demonstrations which were given of its perfect workings. Actual tests of its baking qualities were made on the spot. A qualified baker was busily engaged during the day in going through the delicate and dexterous process of bread-making on a "Happy Thought" range. This exhibition was watched by hundreds of ladies with great interest. Marked attention was paid to the firing, heating of the oven, the deft handling of the bread, the action of the dampers and the instructions for operating the drafts, etc. "Done to a turn" was the remarks of all who saw the bright, brown tint of the bread as it came hot from the oven, perfectly baked—calculated to make glad hearted and sweet tempered cooks.

"Happy Thought" Ranges have stood the test for years, and are approved and praised by expert cooks. Mr. Best states that there are now 150,000 "Happy Thought" ranges in use—and the number is swelling fast, because they are being shipped from every part of the Dominion from Halifax to the Klondyke. There are six different sizes in each style, so that with so great a variety, these ranges cover every desired size and style of cooking appiratus, which the different condition of families as to numbers or purse can make desirable.

These Ranges are made by the well known William Buck Stove Company, of Brantford, who claim that "Buck's stoves set the pace." This collen. display showed a number of the most handsome ranges kept in stock by the Best Stove Company, on Hunter street, gave a good idea of the different shelves, closets, etc., and com-

Expected to Arrive in Canada This Week.

Lieut.-Col. H. Greenwood, of Peterborough, will return to Canada this week with his two little sons; his wife, who was a daughter of Sir Henri de Lotbiniere of Quebec, died about two months ago in South Africa of pneumonia. Mrs. Greenwood was greatly admired and loved by her many friends, and during her residence in Peterborough was an earnest and energetic member of the Woman's Auxiliary in St. John's church.—Globe.

Holland and French Bulbs—six cases just arrived from growers in France and Holland. Prices lower than Toronto or Montreal.—F. Mason, 406 1-2 George and 440 Water streets.

REPORTED WRECKS ON THE GRAND TRUNK.

Three Cars Said to Have Been Smashed at Campbellford.

About three o'clock this morning an accident, it is stated, occurred to a Grand Trunk train at Campbellford, resulting in the wreck of three cars laden with grain. The train was a double header, and was travelling east towards Belleville at the time of the accident, which was caused by one of the trucks of a car in the centre of the train leaving the trails. This threw the car off the track, which wrecked the next two cars.. An auxiliary from Lindsay was sent for and cleared the line, which, however, entailed several hours work.

It is also current talk that another wreck occurred on the same line at Uxbridge this morning, and as a consequence the regular G.T.R. express due here at 11.45 did not arrive until two o'clock.

A BURGLARY AT FRANKFORD.

Jewellery Store Entered and Safe Blown Open.

(Special to the Examiner.)

Frankford, Ont., Sept. 24. — Five burglars entered S. Hadley's jewellery store at 2 o'clock this morning by way of a side window. They drilled the safe which is in the back of the store and blew it open. The explosion was terrific, parts of the door were hurled through the front window into the street. The post office and the boot and shoe store of J. Chapman, being in part of the building, were also damaged. The partition between the two stores against which the safe sat, was partly blown down and boots and shoes were blown about the store. The burglars got away with about $3,000 worth of jewellery. The explosion aroused the villagers and druggist Ostrom who was in his door when the party passed was fired at by the gang three times. The men crossed the river and went towards Trenton with Messrs. Hadley and Ostrom in pursuit.

St. Luke's Church.

To-morrow—Friday—evening at 8 o'clock, the annual Harvest Festival will be held, at which the Rev. Canon Sweeney, D.D., Rector of St. Philip's church, Toronto, will be the special preacher. Mrs. K. Eardley-Wilmot will assist in the musical service and sing a sacred solo. The choir has prepared special music. Choir practice at St. Luke's church, to-night at eight o'clock.

Scotch Bulbs, Hyacinths, Tulips, etc. French Bulbs, Narcissus, Daffodils, etc. Six cases direct from growers. Prices low. Bulbs No. 1. Come and see.—F. Mason, 406 1-2 George and 440 Water streets.

Now is the Time

To take a trip to the Highlands of Ontario, as the beautiful Muskoka Lakes, Lake of Bays and Georgian Bay are now at their best. Tourist tickets are on sale daily. For tickets and information as to train service, etc., call at Grand Trunk ticket offices. 5d68

MISS FRANCES H. AGAR MARRIED YESTERDAY.

Mr. D. M. Somerville was the Groom—To Reside in Chicago.

Yesterday, at Davenport, Miss Frances H. Agar, of Peterborough, only daughter of the late Rev. John Agar of the Western New York Conference, was married to Mr. D. M. Somerville of Orono. Under a beautiful floral arch of white geraniums, asters and dahlias, the ceremony was conducted by Rev. E. Middleton, uncle of the bride, in the presence of her near relatives. The bride, was given away by her uncle, R. P. Hopper, Claremont, was in a navy blue travelling suit, with hat to match. After the ceremony Mr. and Mrs. Somerville left for Sarnia and points west. They will reside in Chicago. Among the guests were Mr. and Mrs. J. E. Middleton, Mrs. Kitely, Mrs. Mitchell, Mrs. Shortiss, Miss Shortiss, Mr. T. Shortiss, Mrs. Hudson, Mrs. Denton, sr., Mr. Dalton, Mrs. Frank Dalton, Dr. and Mrs. Geo. Hill, of Toronto; Mr. and Mrs. J. A. Lovell and Mr. J. A. Stokes of Toronto Junction, and Mr. and Mrs. R. P. Hopper, of Claremont. — The Globe.

While in Peterborough Miss Agar was the organist at the Murray street Baptist church. The groom, Mr. D. M. Somerville, who is well known in town was a former dental student of Dr. M. A. Morrison.

SEPTEMBER WEDDING.

An Interesting Event at Park Street Last Night.

A very pretty wedding took place at seven o'clock last night, in the Park street Baptist church when Mr. Joshua F. Pollyblank, of Lakefield, was united in marriage to Miss Georgina Gertrude Hicks, of Peterborough. Miss Nelly Smith was bridesmaid and Mr. Alex Kidd acted as groomsman. Despite the heavy rain the church was nearly full. As Miss A. Brace played the wedding march, the bride and bridesmaid walked up the west aisle, the groom and groomsman walking up the east aisle. The two parties met in front of the Rev. A. H. Brace, who performed the ceremony. The bride wore a dress of crepe de chine (mauve), white silk yoke trimmed with white silk medallions and duchess satin ribbon, and carried a beautiful bouquet. The bridesmaid carried a bouquet and wore a costume of white tucked muslin. The invited guests assembled at the home of the bride's parents for the wedding feast which was timed for nine o'clock and to which the merry party did ample justice. The presents were valuable and well selected. The happy couple take up their abode in Peterborough.

THE SOCIAL WORLD.

Squires; Mr. and Mrs Bruce Squires, Miss Maye Andrews, Miss Kate Sperry, Misses Jean, Emeline and Etta Fraser, Mr. and Mrs. Fraser, Mr. and Mrs. R. J. Stuart, Mr. and Mrs. Jas. Cummings, and Miss Ethel Cummings, Miss Eva Patterson, Mr. Adam Patterson, Miss Beatrice Tucker, Mr. and Mrs. Powell, and Messrs. Gerald Roxburgh, L. H. Kirkpatrick, W. Campbell, W. Packenham, C. Jones, John Andrews, Russell Pearce, Geo. Howson, and W. Ghent.

THE LATEST NEWS OF LOCAL SPORT.

BASEBALL.

A baseball tournament took place at Orono on Monday. Newcastle won from Newtonville by 12 to 7, Kendal won from Orono by 12 to 6. In the paly-off Kendal won from Newcastle by 11 to 3, Kendal using Flaherty, Peterborough's wonderful pitcher, while Lacombe pitched both games for Newcastle, and his work on the slab was excellent; and had it not been for the errors by the Newcastle team, would have won his game. Newcastle played under protest, as Kendal was only allowed a three mile limit.

LACROSSE.

A report of a game played in Chicago between Detroit and the Chicago Calumet team has been received. On the line-up of the teams and opposing each other were two former Peterborough boys. Dr. Lionel King played first defence on the Detroit team, while Mr. Percy Rubidge was an inside home on the Chicago braves. The report says that "Percy Rubidge did grand work in the field," and scored one of the three goals which the Chicagos got. The Detroit team defeated the home men by a score of 5—3. It was described as "the fastest and most scientific game of lacrosse ever played in Chicago."

GOLF.

The draw for the first round for the Hon. President's prize, is as follows:

Mrs Campbell vs Mrs Matthews.
Mrs R S Davidson vs Mrs Hill.
Miss Archer vs Miss McGill.
Mrs A H Stratton vs Miss P Lundy.
Miss Edwards vs Miss G King.
Miss J Dennistoun vs Miss H Hall.
Miss L Davidson vs Miss B Moore.
Miss G Hall vs Miss F Burritt.
Mrs R M Dennistoun vs Miss Clementi
Miss D J Hall vs Miss Gwen Hall.
Mrs. Rich. Hall vs. Miss A. Kingan.
Mrss. R. R. Hall vs. Mrs. N Hill.
Miss Halliday a bye.

This is an eighteen hole handicap round match play. The first round must be played off by Saturday, Oct. 3rd.

* * * *

The Ladies' Golf Team, which was to have gone to Port Hope to play this afternoon, did not go on account of the train being delayed, but will make the trip to-morrow.

RUGBY.

All members of the Rough Riders football club are requested to turn out for practice at 7.30 sharp to-night in the rink.

* * *

A meeting of the Executive Committee of the C.F.R.U. was held at the Rossin House Tuesday night with Pres. Ferguson in the chair. The other members present were Vice-President A. W. McPherson, Peterborough; F. H. Thompson, Argonauts; A. Magee, London; F. Coffee, Torontos; G. S. DuMoulin, Hamilton Tigers, and H. Hayes, West-end Pleasure Club, Hamilton, and Secretary Frank D. Woodworth.

WE'RE MAKING THINGS HUM AT GOUGH BROS.

TULLY & MERRELL, Managers.

The first question before the Executive was the senior series and what action should be taken owing to the withdrawal of the Peterborough Club. It was decided that the Western section should remain as drawn in the original schedule, and that Ottawa and Limestones, of Kingston, should play a double schedule of home-and-home games

The application of the Peterborough club for admission to the intermediate series was then considered. The Eastern club was admitted, and the following schedule drawn up:—

Eastern Section.

October 15.—Wellesleys at Peterborough.

October 24.—Peterborough at Wellesleys

Western Section.

October 15.—Argonauts at Victoria.

October 24.—Victoria at Argonauts.

Finals to be arranged by the Executive.

The Laurentian Club,
Lac la Peche, Champlain county,
September 21st, 1903.

Messrs. J. J. Turner & Son., Peterborough, Ont:

Gentlemen,—I wish to say that you are very prompt in filling your orders. I wired for two large tents Friday last and had them here Saturday afternoon and I am delighted with them.

I remain yours truly,
A. R. BOSTWICK,
Secretary.

A Bargain for Book Lovers.

500 paper bound books, the best selection of titles ever issued in a cheap series, your choice for only 10 cents. Your choice of 5 splendid 75c. books for 25c. Your choice of 12 good titles worth 50c for 20c. Cloth bound books worth 40c, for 25c Cloth bound books, gilt edge, worth 50c for 33c. All the poets, bound in cloth, worth 50c. for 33c. A. H. Stratton & Co.

Labour Men Appreciated.

At the last regular meeting of Local Union, No. 191, Iron Moulders, a hearty vote of thanks was tendered by the members to Mr. Wm. Hamilton, of the Wm Hamilton Manufacturing Company, and also R. Micks & Co., for the use of material and courtesies extended to them for the Labor Day celebration. (Signed,) R. McHigan, President; John Robertson, Secretary.

MR. E. M. ROBINSON'S VISIT.

Mr. E. M. Robinson, intermediate boys secretary, will conduct a conference in the Y.M.C.A. to-morrow afternoon and evening.

From 3 to 4, Mr. Robinson will address the ladies in the parlour. All who are interested in work for boys are invited.

From 4 to 9 a conference for men will be conducted, tea being provided at six o'clock in order to make the most of the time. All men and Y.M.C.A. workers especially invited.

NEWS NUGGETS.

—All Saint's choir will practice to-night at 7.30.

—A meeting of the Finance Committee is booked for this evening.

—The Committee of the Whole Council will meet this evening at 8 o'clock.

—Division No. 1, Ancient Order of Hibernians, will meet this evening in the T.A.S. rooms.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—After September 30th the steamer Esturion will discontinue her double trips between Bobcaygeon and Lindsay. After that date she will make only one trip daily.

—The Canadian Government Railway private coach, "Ottawa," in which Hon. A. G. Blair travelled to Peterborough to attend the opening of the Fair, was attached to the midnight express last night, when Mr. Blair left town.

The Coldstream Guards Band concert in the new rink, which was presented under the auspices of the Industrial Fair directors, was an immense success, the gross receipts amounting to $1,340, of which the society netted 25 per cent representing an attendance of about three thousand persons.

—A small boy in his eagerness to hear the Coldstream Band last night broke a pane of glass in the south end of the rink and managed to crowd through. In doing so he cut his hand, and, going to the doorkeeper, asking for a check as he wished to have his hand dressed His request as complied with, and the boy returned shortly afterwards with the wound dressed and he was able to enjoy the concert.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron went aking a stoll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

LOST.

LOST—YESTERDAY AFTERNOON Along Reid, Charlotte, Rubidge or King streets, a brown and white rug; Information of its whereabouts will be gladly received at this office or at Robinson's Livery. 2d70-168

THESE FAIR DAYS

Are Formal Opening Days in our Millinery Store—days of splendour—days that tell of our leadership in exclusive Headwear.

Here you may enjoy a comprehensive showing of the best Millinery creations of the day, as well as the creations of our own workrooms, which, as you know, are always chic, always charming and never unreasonable in cost.

Do not miss any part of our Exhibition. American novelties—Walking and Dress Hats, Carriage Hats, Reception Hats are waiting to be admired.

MISS DELANEY

The first Americans had a hard time keeping warm. Their trials are unnecessarily carried into many homes of to-day. For it is unnecessary to put up with the uneven heating of stoves, the dust and impure air of the hot air furnace, and the many other inconveniences of imperfect heating systems when you can get the

Oxford Hot Water Heater

and Oxford Radiators which form the perfect system of home heating.

The accompanying illustration shows where the water is introduced into the fire-pot at the rear and is thrown by a diaphragm from the rear towards the front of the fire-chamber and then passes over the surface of the horizontal sections. Thus the coldest water of this system is kept on outside of heater preventing the radiation of heat into the cellar.

Write for our booklet on home heating.

P. P. YOUNG,
W. H. WHITE.

SIR ROBERT FINLAY

Concludes Argument for Britain in Alaska Boundary Case.

DRAWS FORTH COMPLIMENTS

President Lord Alverstone Says His Presentation of Facts Will Be of Great Assistance to the Commission in Arriving at Conclusion—Counsel For the United States Opens—Mr. Aylesworth's Remarks.

(Canadian Associated Press.)

London, Sept. 24.—Sir Robert Finlay, Attorney-General of England, yesterday concluded his argument in the boundary case.

Regarding the establishment of Dyea and Skagway, he acknowledged that, had they been founded in unclaimed territory, such occupation might be important, but argued that their significance depended altogether upon whether these acts had taken place with the knowledge and acquiescence of Great Britain. He traversed the United States contention that this was so, and showed by reference to correspondence that as long ago as 1872 Canada pressed for demarcation of this boundary; that in 1875 General Cameron, in 1887 G. M. Dawson, and in 1888 Sir John Macdonald, distinctly claimed, on behalf of Canada, the heads of inlets, and particularly the head of Lynn Canal, and that long before there was any settlement at Dyea or Skagway the United States Government were perfectly aware of Great Britain's claim to that locality and had published it in their official documents.

After recapitulating his points the Attorney-General concluded as follows: "I am deeply sensible of the importance of this case and that the eyes of the people of Canada are fixed upon this tribunal. I know, too, that many interests may be deeply affected by the decision. I trust that Canadian interests will not suffer from any imperfection of my presentation of the case, and I commit the question into the hands of the tribunal with full confidence in the wisdom of their judgment."

The president expressed on behalf of their tribunal their cordial appreciation of the Attorney-General's careful presentation of the case.

Case For the U.S.

Mr. Watson then proceeded to open the case for the United States. He began by stating that in 1867 Russia offered to sell Alaska to the United States, and showed her title in various ways—by discovery, by occupation and by general consent of the nations, and finally by the treaty with Great Britain. Russia asserted that the line went round the heads of all bays and inlets. The maps of the period confirmed this, notably the Russian map of 1826, made when recollections of the negotiations of 1825 must necessarily have been fresh. Mr. Sumner of the United States Senate, minutely investigated this title, and, satisfying himself of its authenticity, purchased the property. The President formally announced the fact, yet neither Great Britain nor Canada raised any objection or questioned Russia's title.

Mr. Aylesworth here remarked that in 1867 Canada had no concern in the question, nor any right to interpose any objections, as her territory did not extend to the Pacific till 1871.

APPENDICITIS.

Increase of this Terrible Disease Charged up to Indigestion—Dodd's Dyspepsia Tablets the one Sure Preventive

So eminent an authority as Dr. Sir James Crichton-Brown has declared that Appendicitis, the terror of the present age, is caused by Indigestion. In a lecture delivered recently in London, England, he said:

"The increase of Appendicitis is largely due to Indigestion resulting from imperfect mastication and the hurried methods of living."

In plain words this means keep you stomach right and you need have no fear of Appendicitis. And Dodd's Dyspepsia Tablets will make and keep the stomach right. That's the experience of eveyone who has used used them. Rene Trudel, a student of Three Rivers, Que., says:—

"I had Indigestion so badly that I was discouraged and had resolved to give up my studies when an advertisement induced me to try Dodd's Dyspepsia Tablets. They made me better. To-day I have no headache, no pain, no weariness. I am cured."

Take these two statements together and they prove conclusively that Dodd's Dyspepsia Tablets are the one sure safeguard against Appendicitis.

Want Reciprocity.

Niagara Falls, N. Y., Sept. 24.—Among the important subjects to be considered by the Farmers' National Congress is agricultural reciprocity with Canada. There appears to be a strong sentiment in favor of reciprocity with Canada on farm products.

Boston, Sept. 24.—At the convention of the Carriage Manufacturers' Association yesterday, Mr. Knappf said that Western Canada was increasing by 100,000 people a year, and that a stream of American money was flowing into the country. The result would be a very valuable market in which Americans should share. He urged influence in Congress for reciprocity with Canada.

Five Hundred Strike.

Montreal, Sept. 24.—Nearly five hundred builders' laborers went out on strike yesterday because their employers would not sign the agreement which they had presented. Over half the bosses signed, and the men in their employ, numbering about twelve thousand, have remained at work.

Fined For Crying "Scab."

Kingston, Sept. 24.—Yesterday the police magistrate fined a citizen $5 and costs for calling a Scotch workman in the locomotive works. "A dirty Scotch scab."

MARKET REPORTS.

Liverpool Wheat Closed Unchanged, Chicago 1-8c Lower—Live Stock Reports—Latest Quotations.

CHEESE MARKETS

Stirling, Sept. 23.—At Stirling cheese board today 700 boxes were boarded; sales: Hodgson, 500 at 11⅝c; balance refused at 11¾c.

Woodstock, Sept. 23.—At the cheese board here to-day 2215 white and 2234 colored were offered; 11½c bid; no sales; 12⅛c asked.

Chinese Stabbing Case.

Moose Jaw, N.W.T., Sept. 24.—A serious stabbing affair occurred in the kitchen of the Windsor Hotel. The Chinese cook ordered the assistant, a young Chinaman, to do a small chore and he refused, which led to strong language between them. When the cook's back was turned the young fellow picked up a butcher knife and stabbed him in the back. Doctors cannot say if the wound will prove to be serious or not. The young fellow was arrested.

Reserve Force.

The healthy body has a certain amount of strength reserved in case of emergency, attacks by disease or unusual physical exhaustion; without this power of resistence a person is an easy prey to every ill that comes along. By enriching the blood and creating new nerve cells, Dr. Chase's Nerve Food keeps the health at high water mark and fills the body with the vigour and vitality that overcomes and defies disease.

RICHARDSON ON TRIAL.

First White Man Charged With Killing Negro in Ontario.

Windsor, Sept. 24.—For the first time in the history of the Province of Ontario, according to Attorney J. H. Rodd of Windsor, a white man was yesterday morning placed on trial, at Sandwich, for the murder of a negro.

The defendant is Oliver Richardson, the Colchester South farmer who is charged with murdering Edmund Matthews, his colored neighbor. The extraordinary situation is attracting attention not only through Essex County, but all over the country. Against Richardson there is said to be evidence of the most incriminating character, but a natural race prejudice is expected to help him.

The composition of the jury will aid Richardson materially, it is said. The majority of the jurors come from the South Riding of Essex County, where the feeling against the colored race is particularly strong. The defence will try to show that Matthews was the aggressor in the fatal quarrel, and that he threw a number of big stones at Richardson before the latter used his revolver.

The trial will be resumed to-day.

Be Quick.

Not a minute should be lost after a child shows symptoms of cholera infantum. The first unusual looseness of the bowels should be sufficient warning. If immediate and proper treatment is given, serious consequences will be averted. Chamberlain's Colic, Cholera and Diarrhoea Remedy is the sole reliance of thousands of mothers and by its aid they have often saved their children's lives. Every household should have a bottle at hand. Get it to-day. It may save a life. For sale by all druggists.

Peculiar Case.

Barrie, Sept. 24.—Andrew Waddell, who claims to have come from Toronto, is in jail here and although he has been pronounced perfectly sane by the jail physician he is unable to talk intelligently or give any account of himself or his relatives. He was picked up on the railway track some time ago with a bad gash in his throat, indicating that he attempted suicide while despondent or possibly suffering from slight sunstroke.

Tailors Get Increase.

Windsor, Sept. 24.—The striking journeymen tailors of Windsor returned to work yesterday afternoon after an all morning conference. Their request for a 10 per cent. increase will not be granted, but they will receive 2½ per cent. more.

Will Not Strike.

Morrissey, B. C., Sept. 24.—A settlement of the difficulty in the mines controlled by the Crow's Nest Pass Coal Company here has been reached and the men will not strike.

Found Dead.

Guelph, Sept. 24.—Frank King, of Elizabeth street, a well-known figure on the streets of Guelph, was found dead yesterday morning in the washroom of the Royal Hotel.

Is There Poison In Your Blood?

Then the Liver and Kidneys Have Failed to Perform Their Mission and You Need

DR. CHASE'S Kidney-Liver Pills.

If you are not well there must be a reason for it. Most of the common ills of life arise from poison in the system. If you would be well you must remove the cause of disease.

The work of the blood is two-fold. It supplies nourishment to the body and collects the impure and poisonous waste matter. This poisonous material is removed from the blood by the action of the liver and kidneys. When these organs fail the poison is carried back through the system in the circulation of the blood and causes disease.

Where is your weak spot? Just there you may expect to feel the effects of poison in the system. It may be stomach trouble or lung trouble, kidney disease or heart disease, but the beginning is with the inaction of the great filtering organ—the liver and kidneys.

Nine-tenths of the ills of everyday life may be cured by Dr. Chase's Kidney-Liver Pills, because they set the liver, kidneys, and bowels right, and so cleanse and invigorate the system.

Have you come to realize the importance of keeping the bowels regular and the liver and kidneys active? You will appreciate Dr. Chase's Kidney-Liver Pills, not only on account of their wonderful promptness but also for their lasting effect on the system. They get at the very foundation of ill-health and by removing the cause, bring thorough cure.

Dr. Chase's Kidney-Liver Pills, the comfort of old age, one pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 11

DISTRESSING ACCIDENT.

William Thompson Caught in Belt of Stone Hoist.

St. Mary's, Sept. 26.—A distressing accident occurred at the Horse Shoe quarry on Monday which will probably result in the death of Wm. Thompson, who attended the stone hoist. He was caught in the elevator belt, the result being that he was quickly drawn in between the revolving drums that elevate the buckets which carry stone to the cars for shipping. The resistance of his body stopped the machinery from working, and it was truly a miracle that the unfortunate man was not killed instantly. It required 15 minutes to cut belts and extricate him. His left arm was terribly lacerated and he was injured internally.

Silver Spray Again.

Erie, Sept. 25.—The fishing tug Silver Spray, which on Aug. 13 had an exciting brush with the British patrol-boat Petrel, narrowly escaped capture Monday. According to Capt. Schau, the Silver Spray was out looking for lost nets and "might" have been in Canadian waters. Late in the afternoon the lookout saw the Petrel loom up in the fog and veer in toward the shore. After a sharp brush the Silver Spray escaped. The Silver Spray landed 1,600 pounds of fish.

Severe of Ingratitude.

London, Sept. 23.—(C.A.P.)—The Scotsman says: "The assumption that Canada's position is to stand alone and that undue interference or pressure from the Home Government might lead to a declaration of independence, is foolish in the extreme and savors of ingratitude to boot. Canadian independence would involve a Canadian fleet and army on a scale scarcely less than that of the United States, and that is a large order."

Blood Disorders

are simply kidney disorders. The kidneys filter the blood of all that shouldn't be there. The blood passes through the kidneys every three minutes. If the kidneys do their work no impurity or cause of disorder can remain in the circulation longer than that time. Therefore if your blood is out of order your kidneys have failed in their work. They are in need of stimulation, strengthening or doctoring. One medicine will do all three, the finest and most imitated blood medicine there is

PEACE OR WAR?

Question May Be Settled Within Next Twenty-Four Hours.

Sofia, Sept. 23.—Within 48 hours the question of peace or war will probably be settled. Premier Petroff had an interview yesterday with Ali Feruh Bey, at which the whole Macedonian situation was discussed. As a result a much better feeling prevails, and confident hopes are expressed that a satisfactory adjustment will be reached. This view is strengthened by a report from Constantinople that the council of Ministers is within measurable distance of an agreement on the chief points at issue.

Sounded Chamberlain.

London, Sept. 23.—The Canadian Manufacturers' Association, before sending an informal invitation to Mr. Chamberlain to visit Canada, are said to have instructed sympathizers in this country to discover if possible how it would be received. They have been empowered to assure Mr. Chamberlain of an enthusiastic greeting and sympathetic hearing.

Some people here are inclined to resent the colonial telegrams of sympathy with Mr. Chamberlain, considering them as a breach of constitutional etiquette and an attempt of the colonies to interfere with the domestic concerns of the kingdom.

Strike Threatened.

Morrissey, B.C., Sept. 26.—A strike is threatened in the mines controlled by the Crow's Nest Pass Coal Company here if existing differences are not adjusted. Over 1,200 employes of the company at Michel, Coal Creek and Morrissey are members of the United Mine Workers of America. If a strike is brought on it is probable that Coal Creek and Michel miners would be called out in sympathy. The coal company refuses to recognize the United Mine Workers' Association organization, which makes the situation serious.

Mills Will Shut Down.

St. John, N. B., Sept. 23.—If there is not a fresh supply of logs in the near future, St. John's chief industry, the manufacture of lumber, will receive a severe setback. There is now an actual famine of logs, and operations at the booms end for the season next week. There are four or five big mills giving employment to over a thousand men, ready to shut down.

An Inconsistent Husband.

Allegan, Mich., Sept. 23.—James Allen, of this town, has been arrested at Chicago for eloping with his wife's stepmother, on information supplied by the deserted wife. Allen has been married only a year, and it is said that up to the very moment of the wedding he did not know for which of the two women he cared most.

Death of Conrad Ditzer.

Berlin, Sept. 23.—Conrad Ditzer, B.A., chairman of the High School Board, and a former Mayor, died last night after an illness of two weeks of typhoid fever. He was a Liberal and in 1900 received the nomination to oppose Mr. Seagram, but resigned. He leaves a widow, five sons and one daughter.

Windsor Tailors on Strike.

Windsor, Sept. 23.—Sixty-five union tailors in Windsor, Walkerville and Sandwich went out on strike yesterday for an increase of about 2 per cent. over their present wages. The master tailors gave the men a big increase a year ago, and declare they will not yield again.

Nine Sailors Jailed.

Quebec, Sept. 23.—Nine sailors of the steamship Manchester Trader, which recently went ashore near Anticosti, were sentenced to fifteen days in goal each by Judge Chauveau yesterday morning. The men refused to leave port in her claiming that the vessel is not seaworthy.

Without His Uniform.

Cobourg, Sept. 23.—When the Coldstream Guards Band arrived here yesterday, Bandmaster Rogan found his boxes, containing his uniforms, had gone astray. It was necessary before he conducted in civilian clothes to get permission from the Governor-General.

Fantastic stories have been written of magic mirrors in which the future was revealed. If such a thing were possible many a bright-faced bride would shrink from the revelation of herself, stripped of all her loveliness. If there is one thing which would make a woman shrink from marriage it is to see the rapid physical deterioration which comes to so many wives. The cause is generally due to womanly diseases.

Lost health and lost comeliness are restored by the use of Dr. Pierce's Favorite Prescription. It cures irregularity and dries weakening drains. It heals inflammation and ulceration, and cures female weakness.

"It is with the greatest pleasure that I tell you what Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery' have done for me," writes Mrs. Emma L. Bankes, of 1932 North 7th Street, Harrisburg, Pa. "They have done me a world of good. I had female weakness for six years, sometimes would feel so badly I did not know what to do, but I found relief at last, thanks to Dr. Pierce for his kind advice. I have this medicine still in my house and will always keep it."

If you are led to the purchase of "Favorite Prescription" because of its remarkable cures of other women, do not accept a substitute which has none of these cures to its credit.

Free. Dr. Pierce's Medical Adviser, paper covers, is sent *free* on receipt of 21 one-cent stamps to pay expense of customs and mailing *only*. Or for cloth-bound volume send 50 stamps. Address R. V. Pierce, Buffalo, N. Y.

A WONDERFUL MEDICINE.

PAY OF LETTER CARRIERS.

Trades and Labor Congress Favor Yearly Increases—Observance of Sabbath and Inspection of Barber Shops.

Brockville, Sept. 24.—Guelph, St. John, N. B., and Montreal have invited the Trades and Labor Congress for next year and the question will be decided this afternoon. Yesterday Rev. T. Albert Moore, general secretary of the Lord's Day Alliance, headed a deputation which appeared before the Congress on behalf of the observance of the Sabbath.

The resolution calling upon the Government to grant letter carriers yearly increases up to a period of six years' service, when a salary of $2.25 a day will be due by the efluxion of time, and not be left at the discretion of the Minister or other official, was carried.

Direct Legislation.

The resolution rejoicing that the Farmers' Association has officially accepted and endorsed the principle of direct legislation by the initiative and referendum, and pledging the Congress to co-operate with the newly-organized Direct Legislation League, and press the principle upon municipal representatives for adoption was unanimously carried.

Delegate Sanderson presented a resolution, which was carried unanimously, favoring the establishment of a Government printing bureau for the Province of Ontario.

The Congress decided, upon motion of Delegate Draper, to refer back the resolution providing for Government regulation of barber shops, so that it might be drafted without providing for the incorporation of the barbers, which was declared to be contrary to the policy of the Congress.

A storm arose over the resolution instructing the Dominion Executive to list the names of candidates for Parliament who are favorable and unfavorable to organized labor, and send copies to all the affiliated bodies just before the elections. This division of the sheep and goats was vigorously opposed by Delegate R. Glocking, who contended that it was not the place of the executive of the Congress to determine for the whole body, who was or what was not eligible for the support of the labor unionist.

The resolution condemning the Manufacturers' Association for the statements they caused to be sent broadcast throughout the country to the effect that 11,000 mechanics were needed in Canada brought forth some strong speeches denouncing the conduct of the association named.

An important resolution the Congress will be asked to adopt to-day will be one from John F. Barnett, Toronto, of the Moulders' Union, in which he calls upon the Congress to bring power to bear to restrain employers from inducing Old Country laborers to come to this country under misrepresentation, and subject them to persecution when they refuse to work for them under the conditions

Tried to Wreck Train.

Ottawa, Sept. 23.—An unsuccessful attempt was made Monday night to wreck the C.P.R. train from Toronto and Smith's Falls about eighteen miles west of Ottawa. Two planks had been placed in a culvert, with the ends projecting at an angle three feet above the track. The pilot of the engine broke over the planks, otherwise the train would have been derailed. Michael McGrath, who gives his place of residence as Montreal, has been arrested in connection with the incident. He was seen walking on the track a few miles from the point where the obstruction was laid.

Pay British to Keep Out.

London, Sept. 23.—(C.A.P.)—A reputable business man who has been in Canada seeking a market for British goods, says he learned that Canadian manufacturers of shovels and spades pay £1,000 yearly to the British combine not to compete against them in the Canadian markets. He quoted a price for shovels and a large Canadian firm promised to order 50,000. If the shovels can be supplied at the price quoted, he will endeavor to get some manufacturer here to make the shovels.

Canada's Loyalty.

London, Sept. 23.—(C.A.P.)—Sir William Holland speaks in the highest terms of the reception the delegates of Chambers of Commerce received in Canada. They were particularly struck by the loyalty displayed everywhere in Canada, and were deeply impressed by the potentialities of Canada as a food producing country.

Acquitted on Second Trial.

Ottawa, Sept. 23.—Emery Noel, who last April was sent to Kingston penetentiary for five years for shooting with intent to kill, and was subsequently granted a new trial, was yesterday acquitted by a jury and set free. Mr. Justice MacMahon did not take kindly to the jury's finding.

Radicals Triumph.

Belgrade, Sept. 23.—The elections to the Skupshtina (National Assembly) resulted in unexpected victories for the Extreme Radicals, of whom 65 were elected. The House otherwise is composed of 78 Radicals, 15 Liberals and two Socialists. All the party leaders are elected.

Rate Goes Up.

Montreal, Sept. 23.—The Canadian railways will on Oct. 1 make an advance of 25 cents per thousand feet on seasoned soft wood lumber destined for New York by rail and water over the barge route on the Hudson River.

Russian Divorce Valid.

Chicago, Sept. 23.—A Russian decree of divorce has been held to be valid by Judge Gibbons of the Circuit Court of this city. The judge held that in the absence of any proof of fraud, a decree was valid and must be recognized by the courts of Illinois.

Holman Acquitted.

Windsor, Sept. 23.—Ben Holman, ex-C.P.R. and Dominion Express agent in this city was acquitted at the Essex County Assizes yesterday afternoon on two charges of embezzling the sums of $800 and $30.

Demands an Apology.

London, Sept. 23.—Rear-Admiral Lambton has demanded an unreserved apology of General Sir Archibald Hunter for the latter's strictures regarding the efficiency of the naval guns at Ladysmith.

"SALADA"

CEYLON Tea is "Supreme." Sealed lead packets only. Never sold in bulk. 25c and 40c per lb. By all Grocers.

Pandora Range

What more appropriate or acceptable present than a "Pandora" range can you give a bride? Pleasant and grateful memories of the giver will be re-kindled every day in the new home, and will live for a generation.

The "Pandora" range has many qualities which make it specially suitable for such a gift—is entirely new and therefore modern in every respect, has a handsome, graceful outline, heavy body and leg base; bold, rich carving and a lavish but tastefully arranged nickel dress; all of which combine to give it a beauty and attractiveness not seen in old style ranges—is an ornament in the best furnished home.

Its inner construction is based upon the most scientific principles and all working parts are made extra heavy and durable.

Is fitted with thermometer, enameled reservoir, and has a special flue construction which makes it a perfect baker and a perfect cooker at the same time.

Sold by all enterprising dealers. Booklet free to any address.

Sales to noon, 300,100.

Messrs. E. M. Poussett & Co. have received the following:

Waldorf notes,—As is usually the case following a weak market the feeling in the trading circles last night was depressed. The fact that neither earnings nor favourable crop reports cut any figure in speculation, has spurred operators for the decline to renewed efforts. The latter, however continue to buy stocks on scale down, and what with this demand and steady increasing short interest in stocks like B. O., Atch., M.O.P., U.P., and in fact all the active issues, they say that manipulation ist largely responsible for the heavy decline. Brokers who were of the floor throughout the day's session, say the decline in A. C. P., was the result of an onslaught by the Wall crowd, and that latter succeeding in forcing liquidation of a weak long account of considerable importance. The ease with which this was accomplished led to an aggressive selling movement in some of the railroads.

At Boston yesterday Dom. Coal closed bid 73 3-4, asked 74; and steel bid 32 3-4 asked 13.

Control of Consolidated Lake Superior will probably revert to Speyer syndicate.

Car and foundry expected to declare regular dividends on common and preferred early in October. Since last Friday banks have gained from the treasury $351,000 railroad earnings. Toledo net for August increase $5,531. N. Y. C., Sept 31st, quarter part'y estimated surplus after charges and dividend $1,-338,300 decrease $179,130. M. & M. says —"There is no reason to doubt that fairly good trade conditions and railroad earnings will follow the marketing of our crops, which are being sold at good prices and in addition to this fact our securities list should be on a basis tempting investment, even if not speculation. The problem must work itself out but for the time being even with an incentive to work on, the long side of the market does not seem to respond to favourable influences.—Millar.

Stocks and Grain.

FIRST PETERBOROUGH INDUSTRIAL FAIR.

(Continued From 1st Page.)

binations of same, the transparent oven door, by means of which the cooking process can be watched without opening the door; the hot water reservoirs; the water fronts, etc. A recently patented corrugated oven is another strong feature which has many advantages, such as precluding all danger of warping or cracking of the oven plates and affording additional radiating surface. The Company gave away hundreds of useful fans, during the Fair, advertising their goods, on the backs of which was the practical injunction: "Start married life with a 'Happy Thought' Range, and everything will go smoothly."

THE TURNBULL COMPANY'S CARPET FLOAT.

The Turnbull Company's house-furnishing department was well represented on the grounds by a very creditable turn-out, which proved an excellent attraction. It was a cleverly designed representation of a cottage crowded with effectively arranged samples of housefurnishing goods, carpets, oilcloths, rugs, curtains, etc. It was drawn by four spirited horses in gay regalia, decorated with banners and bannerettes, with expressive letterings. The float showed a miniature furnished house, the mirrors being hung with lovely bobinette curtains, while fancy portiers and figured velvet velores were draped around the building. The four corners standards supporting the cottage, were made of rolls of pretty-patterned floor oilcloths, and reclining against each were samples of cornice poles, window shades, carpet sweepers, etc. main floor of the float was spread over with richly coloured rugs, mats, and other luxurious floor coverings, on which were piled great rolls of elegant patterns of English carpets in velvets, Brussels, Axminsters and all-wools. It was a novel exhibit and impressed one with the special attention which the Turnbull Company give to these lines of goods. The originality and ingeniousness of the display will no doubt have the effect of influencing those who are thinking about the furnishing of their homes, to commit the matter of selection to the care of the Messrs. Turnbull Company, George street.

FINE BUGGY DISPLAY BY MESSRS. FITZGERALD & CO.

The biggest display of buggies seen at the Peterborough Fair for several years was made this year by Messrs. Fitzgerald & Co., whose well known carriage works occupies the corner of Brock and Water streets. The exhibit was made under a large spread of canvass, in the western section of the grounds. The company showed six handsome types of buggies, all hand-made, and built in their own workshops—the wood work, iron work, upholstering and finishing having been done by the company's own well-shilled mechanics. The buggies shown were samples of the every-day work turned out of their factory and were not specially gotten up for the exhibition. The excellence of the finished outfits was greatly praised by the hundreds attracted to the exhibit. Some very new improvements were shown in the gear, bodies, tires and tops. Three graceful top-covered rigs were exhibited, showing the steel tire, the rubber tire and the pneumatic tire. The body of one was fitted with inlaid steel corners for extra durability; it had a rubber top with steel tubulars and was leather trimmed. Another was fitted with extra spring backs and cushions in leather, and silver-plated rails and guards. And another, with wheels and gear painted in strong carmine was cloth trimmed and decorated with silver-plated rails, etc. There were also two spindle-seated road waggons, one with cushion tires, the other with pneumatic tires and patent feather wings and dashes. The swellest outfit of the lot was a "Stanhope," popular as a professional out-fit, with high sofa back and fitted with Dunlop pneumatic tires. The panels were finished in Merrimac green and the gear in black trimmings. Second growth hickory is used throughout in all the wood work, including the shafts. The artistic work of the painter and decorator was much admired. Mr. John Gibbs had chargo of the exhibit, and volunteered the gratifying information that four out of the six buggies were sold. Trade has been very brisk this season at Fitzgerald & Co's, with an extraordinary demand for pneumatic tired vehicles.

DE LAVAL "DAIRY" CREAM SEPARATORS.

Mr. Storey, the local agent for the De Laval Cream Separator, made an exhibit at the east entrance to the main building, which was closely inspected by many of the farmers and dairymen from different parts of the country. As is now generally known the purpose of the cream separator is the quick and complete separation of cream from milk in the simplest and most profitable manner possible. This is successfully accomplished by the De Laval process — centrifugal separation through the application of mechanical science. Gustaf de Laval, the inventor of this process, is often fitly termed the "Edison of Dairying." The whole-milk is continuously fed into a rapidly revolving cylindrical steel bowl, the separation almost instantly effected within it, and the cream and skim-milk continuously and separately discharged from it. The machine may be used for a few minutes or as many hours—at a time—as may be necessary, according to the amount of work to be done. The De Laval Separator has received so many testimonials, prizes, medals and diplomas that it is impossible to enumerate them. There are many practical farmers in this county who have them in use and can be referred to. Every butter maker, big or little, should learn all about the De Laval, and its splendid record, before buying a separator. Mr. Storey, the agent, whose agricultural warerooms are on Water street, will furnish any information desired.

Hunting Season.

The Grand Trunk Railway has issued a very handsome illustrated pamphlet, entitled "Haunts of Fish and Game," giving information regarding season for shooting deer, moose, reindeer, caribou, etc., in the "Highlands of Ontario," and at other points along the line of the Grand Trunk. Copies of the same will be furnished on application at Grand Trunk ticekt offices or to J. D. McDonald, District Passenger Agent, Toronto. d68

Sisters Sent to Mercer.

Toronto, Sept. 24.—Edith and Mary Davis, or Pogue, two young and prepossessing women, were given six months in the Mercer, for obtaining money under false pretences. They worked a begging game on a pathetic trumped-up story, and fared well until arrested. A year ago Edith masqueraded as a daughter of Lady Kirkpatrick, and secured goods from local firms.

NEAR PROROGATION

Grand Trunk and Redistribution Bills Through Committee.

COUNTY OF WATERLOO.

Remains in Its Present Shape and Some Changes Made in Hastings Boundaries —Mr. Maclean's Motion For Two-Cent Passenger Rate—Members Excluded From Financial Benefits.

Ottawa, Sept. 24.—With the national transcontinental railway and the redistribution bills out of committee, as a result of yesterday's labors of the Commons, prorogation is brought within reasonable distance. The chief topic of discussion in committee was the proposal of Mr. Maclean to compel the Grand Trunk to carry passengers from Toronto to Montreal at the rate of two cents per mile. Numerous amendments by Mr. Fitzpatrick were adopted, including one making clearer the intention that members of the House and Senators cannot become shareholders in construction companies.

The Government acceded to the request of the Opposition in reference to South Waterloo, which reverts to its former shape, and some changes were also made in Hastings. Grey county remains as recommended by the conference. Several Government resolutions were also dealt with.

Mr. R. L. Borden asked if it was intended to introduce any measure with regard to the election law this session.

Hon. Mr. Fielding replied that the matter was before the House, in the form of a report by committee.

Negotiations With Germany.

Mr. Borden then drew attention to the London cables in the morning papers that the Canadian Government had kept the Colonial Office in ignorance of negotiations which they carried on with Herr Bopp of Montreal, representing the German Government, and asked the Premier if he had any information to give.

Sir Wilfrid Laurier replied that all he know of the matter was a despatch which the Government had recently received from the Colonial Office about negotiations which the Canadian Government had with Mr. Bopp. He had no objection to laying the correspondence before the House.

Suit Against Mr. Preston.

Mr. E. F. Clarke read a despatch from London stating that Mr. W. T. R. Preston, Commissioner of Immigration, had been sued by an employment bureau for £4,000 damages as a result of his securing through the bureau workmen for the coal mines at Fernie, B.C. After the men had started the strike was settled, and they had to return. It was also stated that it was on account of this suit that Mr. Preston was recently recalled from Canada.

Sir Wilfrid Laurier replied that so far as he knew the Government had not been informed of the intention of Mr. Preston to leave England to come to Canada. However, he did come and went back immediately. On the subject of the suit he had no information, and as it was only a charge as yet he would make no comment.

The House again went into committee on the railway bill, resuming consideration of clause two.

TRADES CONGRESS.

Knights of Labor Barred From Membership—Grand Trunk Policy Condemned—Election of Officers.

Brockville, Sept. 25.—The chief subject of discussion at yesterday morning's session of the Trades Congress, was on a resolution introduced by the District Trades Council of Toronto, to re-admit the Knights of Labor into the ranks of the Trades Congress.

The resolution was defeated after a very spirited debate. The chief objection came from Quebec.

The committee on the President's address, recommended the establishment of a legal defence fund, and the engaging of a solicitor, who will look after legislation passed in the Dominion and Provincial Houses affecting labor.

The policy of the Dominion regarding the Grand Trunk Pacific Railway was condemned, the Congress believing that the proper policy would be the construction of the system under the direct control of the Government. The Congress believe that the Government was wrong in denying the right to the people of Canada to decide by referendum vote whether the road should be constructed or not.

The Congress unanimously endorsed Mr. Harvey Hall's resolution to ask Sir Wilfrid Laurier to recall Mr. W. T. R. Preston, Dominion Emigration Agent in London, who is being sued for four thousand pounds passage money of miners engaged to take the places of strikers in the Fernie Mines.

The report of the secretary-treasurer showed receipts of $3,858 and expenses $3,863. The membership increased 4,686 during the year.

John A. Flett, Hamilton, was re-elected president; James B. Mack, Montreal, vice-president, and P. M. Draper, secretary-treasurer.

First Land Sale.

Dublin, Sept. 25.—The negotiations for the first land sale on a large scale under the new Land Act have been completed between the Duke of Leinster and the tenants of his estates in the Athy and Maynooth districts of County Kildare. The tenants are given a 25-years' purchase. The transaction involves $6,250,000.

Shot by a Friend.

Winnipeg, Sept. 25.—C. S. B. Burley, a prominent man of Portage la Prairie, was accidentally shot by a friend, when out shooting chickens Wednesday. The wound is serious, but it is thought he will pull through.

Anti-Boycott Bill.

Montgomery, Ala., Sept. 25.—The House of Representatives yesterday passed an anti-boycott bill, which provides severe punishment for the publishing of black-lists, picketing or boycotting.

Killed Striker. Acquitted.

Morristown, Pa., Sept. 25.—William Ronemus, a mine guard, who confessed to the killing of Patrick Sharp, a striking miner, during the recent strike, was yesterday acquitted by a jury.

Editor Carman Dead.

St. Catharines, Sept. 25.—J. W. Carman, formerly editor of The Kingston Whig, died here yesterday. He was a prominent citizen and a private banker.

PRETTY WEDDING AT PORT HOPE.

Nuptials of Mr. Wm. Brent and Miss Daisy Deyell.

At St. John's Church on Wednesday Noon—The Dresses.

At St. John's Church, Port Hope, a very pretty wedding took place Wednesday at high noon, when Mr. William Charles Brent, son of the late Mr. Chas. Brent, of Port Hope, was married to Miss Daisy Deyell, daughter of Mr. Robert Deyell. The Rev. E. Daniells, the rector, officiated. The bridesmaids were Miss Deyell, sister of the bride, Miss Muelman, Toronto, and Miss Wood, Millbrook, who wore pretty pale pink silk organdies over pink taffeta, large black picture hats and carried bouquets of pink roses with long streamers. The bride was given away by her father and wore a beautiful gown of white silk crepe de chine, trimmed with lace, a long tulle veil held with orange blossoms, and carried a shower bouquet of white roses and lillies of the valley. The best man was Mr. H. Brent, Toronto, brother of the groom. The church was very beautifully decorated with asters of various shades and handsome palms. After a reception and dejeuner and warm congratulations, Mr. and Mrs. Brent left for a trip to the west. The travelling gown was a smart tailor-made, in blue cheviot, with a tiny broken stripe of grey, a white vest to the long coat, which opened over a handsome white waist, a chic-looking hat of white and blue was also worn.—Toronto News.

YOUNG MENS GUILD OF GEORGE STREET.

Anniversary Services to be Held Durin October.

The Young Men's Guild of George street church will start the season's programme with an anniversary which will probably be held on Sunday and Monday, October 25th, and 26th. On Sunday special sermons will be preached by the pastor, or possibly an outside minister, and it is probable that the other guilds of the town will be invited to attend the evening service in bodies. On Monday it is proposed to hold a fowl supper followed by a programme of a musical and literary nature.

The guild was organized on November 8th, 1902 and the dates mentioned above are thought to be suitable ones on which to hold the anniversary services, and at the same time give the season's work a good start. A meeting of the Executive was held at the Y. M. C. A. last night, when the above decision was arrived at, subject to the consent of the pastor.

—The town automobile is doing some much-needed work on McDonel street west of the railway track.

More than half the battle in cleaning greasy dishes is in the soap you use. If it's Sunlight Soap it's the best. 6B

Classes in Art

Miss Amy K. Bennet (pupil of Chase) will resume her classes in Oils, Water-Colours and Charcoal.

Saturday, Sept. 26.

Millinery

That's considered to be "smart"—that's termed reasonable in style and price. Millinery with the newest of new American and European ideas, combined with consistent, original and smart designs of our own artists—for a Millinery business could not be successful for more than a few days unless the backbone—the permanent artists—had ability to create "new touches."

Our Millinery Department has better facilities than ever for accomplishing the ever-expanding business that this store enjoys.

A welcome awaits you to avail yourself of another opportunity to wander through this display of artistic beauties.

Mantles

With entirely new features. Great differences prevail in collars and sleeves. Styles of cloths and trimmings are effective and unique.

Every Coat a fitting coat—that's been a study with us, as well as style and quality.

Prices have invariably been found satisfactory in this department. A comparison is appreciated any time convenient to you. Pleased to fit some on you.

"Ever Think"

of the safeguards in buying from this store in the first of the season?

We sell for cash.

Mark in plain figures. (You can "interpret" them.)

Sell only at the prices marked—never break a price.

No indiscriminate discounts. These facts allow us to mark our goods at a much closer margin of profit.

J. SUTCLIFFE & SONS

FRIDAY, SEPTEMBER 25, 1903.

THE GOOD ROADS MOVEMENT.

Agitation for the Establishment of a Dominion Division to Look After the Interests of Improved Highways.

In connection with the agitation that has been in progress for over a year to lead the Dominion Government to establish a Dominion Division for Good Roads, a strong deputation waited on the Government at Ottawa last week. Among the members of this deputation were the Wardens of all the counties in Eastern Ontario, representing the Eastern Ontario Good Roads Association, members of the Union of Canadian Municipalities, whose annual convention was in session at the time in Ottawa, representatives of the Canadian Wheelmen's Association and of the Ontario Municipal Association. Several city and county councils were also represented.

While this agitation was first started by representatives of the rural districts, the cities have taken the matter up in the belief that such a department can be of great value to them. Every year cities expend more or less money experimenting in the construction of pavements and roadways. It is believed a Dominion Division could take steps to collect particulars showing the cost of construction and durability of roads built not only by various cities in Canada, but by cities in the United States and Great Britain as well. This information could be prepared in such form as to be available for any city desiring particulars concerning such work. In this way it is believed thousands of dollars could be saved. Many cities in the States are at present experimenting with upwards of 15 to 20 different kinds of roadways, and find it very expensive. A Dominion Division such as is desired could save Canadian cities this expenditure.

County districts are anxious for a division for much the same reasons. Very few counties in Ontario have as yet constructed stone roads. It is believed that if particulars were readily available to county and township councils concerning the cost and the best methods of constructing not only stone and gravel roads, but graded earth roads as well, they would be the more ready to take the matter up. These particulars could be supplied much more fully by a Dominion than by a Provincial Division.

The Good Roads Associations throughout the Dominion are agitating for good roads legislation, but have not funds or means to conduct a thorough investigation concerning the success of the various forms of legislation that have been tried not only by certain provinces in Canada, but by many of the states in the American Union as well. Were this information to be carefully collected, it is believed it would be of great value, particularly to Provincial Legislatures, when they come to deal with the subject of good roads.

It is also believed demonstrations in the construction of good roads could be given at many of the large exhibitions throughout Canada. Good Roads associations could be assisted in their efforts to hold large conventions; reduced rates could be secured over railways for the transportation of road making materials; classes of instruction could be established in the various provinces, as regards the proper method of building roads; and much other work of a similar nature could be carried on. In view of the large sums that are being expended by the Government for the improvement and construction of railways and canals, it is felt more attention should be given to the improvement of common highways throughout the country. A National Division, similar to that desired in Canada has been doing splendid work in the United States for several years.

So wide has the agitation become that cities all through Canada have adopted resolutions favouring the establishment of such a division. Among the cities are Ottawa, London, Winnipeg, Victoria and others, besides numerous county councils. The Ontario Municipal Association, which represents nearly every city and town in Ontario, passed a strong resolution at its recent convention in Guelph.—Family Herald.

57TH REGIMENT COLOURS FUND.

Amount Desired Nearly all Subscribed.

Officials of the Regiment Help it on—Other Contributions.

The officers of the 57th Regiment have contributed the undermentioned sums towards the regimental colours fund, as a mark of their appreciation of the energetic and successful efforts of Miss Barlee, the treasurer of the fund:

Lt.-Col. Miller	$5 00
Major Stevenson	3 00
Surg.-Major Halliday	3 00
Major Dennistoun	3 00
Major Hayes	3 00
Capt. Eastwood	2 00
Rev. J. C. Davidson	2 00
Capt. Clegg	2 00
Capt. Bennett	2 00
Capt. Mills	2 00
Capt. Cluxton	2 00
Capt. Hounsell	2 00
Capt. Walker	2 00
Capt. Matthews	2 00
Capt. McPherson	2 00
Capt. McWilliams	2 00
Lieut. Hamilton	1 00
Lieut. McLean	1 00
Lieut. Langford	1 00
Lieut. Watt	1 00
Lieut. Clarke	1 00
Lieut. Glover	1 00
Lieut. J. A. Wilson	1 00
Lieut. Brundrette	1 00
Lieut. Smith	1 00
Lieut. J. G. M. Wilson	1 00
Lieut. Hicks	1 00

The following amounts have also been subscribed, which have not previously been acknowledged through the press:—

Mr. T. F. Matthews	$1 00
Mrs. Matthews	1 00
Miss Isabel Hay	50
Miss Helen Hay	50
Mrs. W. H. Moore	1 00
Mrs. Edge. Pearse	1 00
A friend	25
Mr. Alex. Elliott	50
Miss M. F. Brown	1 00
Mr. F. D. Kerr	1 00
Mrs. Thos. Bradburn	1 00
Miss Mabel Bradburn	1 00
Mr. H. A. Morrow, ex-Capt. 57th Regiment	1 00

Only a few months back the ladies of the town organized to attempt to raise $300 to purchase and present the 57th Regiment, Peterborough Rangers with a new stand of colours. Already $217.51 is on hand. Comment is superfluous.

KEENE.

(From our own Correspondent.)

Mr. Jas. A. Campbell has returned to Toronto, to commence his fourth year at medicine.

Mr. and Mrs. Chas. Hartley, of Rochester, and Miss Jennie Hartley, of Peterborough, are this week the guests of Mrs. John MacFarlane.

Miss Kathleen Powell has returned home after spending six weeks with her sisters at Norwood. She was accompanied by Miss Lizzie Powell, who will return to Toronto in a few weeks to resume work at Trinity.

Miss J. McWilliams, and niece, Helen Harper, Peterborough, are visiting Mrs. Wm. Campbell.

Miss Susie Campbell of Peterborough, is spending a few days with Miss Read

Mrs. Stuart, Calgary, with her little son, Roxburgh, was in the village on Monday renewing old acquaintances. Her many friends were very much pleased to see her.

Next Sunday, the 27th, will be Children's Day in the Presbyterian church when the service will be specially adapted to the children. Miss Florence Miller, soloist of St. Andrew's, Peterborough, will sing.

Mr. T. J. Drain, Norwood, was here to-day on business.

Mrs. J. Londerville, of Toronto, is visiting friends here. This week she is with Miss Mary Hope.

Mr. and Mrs. Parks left on Monday for their new home at Park Hill. They will be greatly missed by their many friends here, who will wish them happiness in their future sphere of usefulness.

Mr. Fred Walsh left on Monday to assist at station work in the north.

Mr. Will Anderson is here for a week with his old friend, Bob Campbell.

Mrs. Frank Bradley of Buffalo, is visiting with her mother, Mrs. K. Roache. She is accompanied by her cousin, Miss May Burnett, and Miss Gemmie, of Buffalo.

Mr. Fair and Miss Faint of Peterborough, spent Sunday, with Mrs. Wm. Plunkett.

The Keene Fair will be on the 29th and 30th inst.

The funeral of the late Mrs. Herb Miller was held here on Monday afternoon, when a large number of friends accompanied the remains to the Keene cemetery. Mr. Miller has the sympathy of the community in his untimely bereavement.

Quite an informal and unique religious service was held at the Indian encampment at Sugar Island on Sunday afternoon, conducted by the Methodist minister of Alderville. The exhortations and singing were in the Indian language. The dusky braves seated around on the grass and rocks, the golden brown foliage of the picturesque grove, the salubrious air of the lovely afternoon, the babblings of the wee one yet too young to have a thought for eternity, all lent a charm to the scene. Several white folks were attracted by the fame of these meetings, which are always interesting. Among the pioneers, whose genial faces are familiar, were: Moses Smoke, Hulbert Smoke, Professor Crowe, Ebenezer Comego, Joseph Loucks, Paul Elm and Willie Crowe.

Reserve Force.

The healthy body has a certain amount of strength reserved in case of emergency, attacks by disease or unusual physical exhaustion; without this power of resistence a person is an easy prey to every ill that comes along. By enriching the blood and creating new nerve cells, Dr. Chase's Nerve Food keeps the health at high water mark and fills the body with the vigour and vitality that overcomes and defies disease.

HENDERSON BEARING FOR RAILWAYS.

Will Revolutionize Methods of Transportation.

TRAINS WILL RUN EASILY

On Hamilton, Grimsby and Beamsville Railway.

Striking Success of Their Use Shows That the Revolution Has Already Begun.

The days of stiff, ordinary journals for railway axles are numbered. The problem of the application of roller bearings to railway rolling stock is solved, and the strain of starting heavy trains can now be reduced to a minimum. As the old fashioned railway train has given place to the modern travelling palace of luxury, so will the friction-inducing, oil-devouring axle box disappear before the smooth running, noiseless, frictionless roller bearing.

The Henderson Roller Bearing Manufacturing Company, Limited, is now turning out a bearing that is a revelation of ease and comfort in propulsion. On the car "Winona," running on the Hamilton, Grimsby & Beamsville Electric Railway, there is in operation an equipment of these roller bearings that is attracting such general attention as to amount almost to a sensation; passengers are so struck with the improvement upon the old system that inquiry as to the secret is general.

The bearing by its solution of the end-thrust problem, so long a baffling difficulty, has achieved an acknowledged triumph.

In starting, so remarkable is the saving of power that the inert mass of the ordinary trainload is put in motion with surprising and instantaneous facility. The bearings require so little lubrication that they may fairly be said to work without oil, a single application of the very smallest quantity being sufficient to keep them in perfect order for many thousands of miles. They have never been known under the most severe railroad tests, to run hot, and in this particular they commend their excellence especially to the railway manager, who is by their adoption assured of immunity from the vexatious delays due to this cause, and is able to run his trains on time and keep faith with the public. The roller bearing, by its formation, is equally adapted for carrying heavy or light weights, and its capacity in this respect is the great consideration with the scientific mind; this important fact places it far above any other bearing before the public.

There is a great future before the Henderson Roller Bearing, inasmuch as it can earn greater dividends for holders of railway stock, and as long as economy and utility are the chief factors in determining the success of any device or invention the bearing must force its superiority of design, durability, economy and safety upon the attention of those responsible for railway management. In these respects the bearing is admitted by the best mechanics to be without a peer. These facts provide ample reason for the striking interest that is developing in this invention, not only among investors, but also among the ablest engineers and railway men of the day.

Attention is particularly drawn to the following letter:—

Hamilton Sept. 17, 1903.

Hamilton, Grimsby & Beamsville Electric Railway Co., corner Main and Catherine streets.

Henderson Roller Bearing Co., Toronto, Ont.

Dear Sirs,—We have had placed upon our car the Henderson Roller Bearings which have run for the last two weeks to the extent of over 2,000 miles without the least sign of heat. This car was run 216 miles in one day without any relief and upon examination of the bearings we could not detect the slightest evidence of heat.

We have curves upon our road to the extent of 45 degrees and find the end thrust perfect.

It is our intention to equip our whole system with these bearings.

These bearings have been placed upon one of our largest passenger coaches, some 58 feet in length, weighing about 22 tons and carrying at times as many as 150 passengers.

We find the saving of power by meter test to be from 45 to 50 per cent. In all this time the bearings have required no attention or oil whatever.

We can heartily recommend them to all railroads. Yours truly.

(Signed) C. J. Myles, President; F. Baker, Director; George E. Waller, Manager, Hamilton, Grimsby & Beamsville Electric Railway Company.

In accordance with the intention expressed in the above letter, the Hamilton, Grimsby & Beamsville Electric Railway Company have placed their order with the Henderson Roller Bearing Manufacturing Company, Limited, at 66 Esplanade street west, for the immediate equipment of some of their cars. Several other electric railway companies have also requested to have the bearings applied on their systems.

The result as shown in the tests already made will mean that instead of spending large sums of money to increase their power plant, the electric railway companies by applying these bearings will be able to almost double the number of cars in use, without further expenditure for increased power.

Newark Walks.

Newark, Sept. 25.—The trolley road employes left their cars at the busiest hour last night completely tieing up the system. They ask 22 cents an hour; no split runs and the recognition of the union.

Fall and Fair Time

..AT..

H. LeBRUN & CO'S

Great preparations have been made at the City Clothing Store for a rousing trade as Fair time approaches. Never have we had so extensive and varied a Stock of New Fall and Winter Clothing, in Ready-to-wear Suits and Overcoats, Hats and Furnishings for men and boys.

READY-TO-WEAR DEPT.

Our display of MEN'S FALL SUITS and TOP COATS is a credit to the town. No store can boast of higher styles—no better values anywhere.

FURNACES and PLUMBING—Estimates given for Furnace Heating by hot water and steam. Also estimates for Sanitary Plumbing. Every job guaranteed.

Adam Hall

NO. 407 GEORGE STREET.

YOUNG'S POINT.

(From our own Correspondent.)

The steamers plying between Lakefield and Stony Lake points have discontinued their regular passenger trips, and the mail is now being carried to Young's Point by Mr. P. A. Kearney, by stage. The Majestic will make irregular trips for some weeks yet.

The farmers of Dummer ran an excursion to Fenlon Falls on Thursday, Sept. 17, by the Majestic. The trip was a very pleasant one and was participated in by many farmers from the Township of Dummer. A number of Young's Point residents also enjoyed the trip.

It becomes the sad duty to chronical the death of Miss L. Ingram, which occurred on Sept. 15th. She had been ailing since last May, and took a trip in an endeavour to secure better health. She was not benefitted, however, and gradually became worse, until last week when she died. The funeral was largely attended, attesting to the high esteem in which she is held. She was buried in Ray Cemertery, Smith township. Her age was 27 years.

Mr. R. Heard's cider mill is again in operation, and being visited by large numbers of the youngsters.

A "Large" party has been visiting at the Lakeview House, Young's Point, from Rochester, N.Y. The combined weight of four members of the party is 802 pounds. Those comprising it are, Charles Brock, 254 lbs.; Chas. Mayen, 219 lbs.; J. West, 202 lbs., and Thos. Aspenleiter, the light weight of the bunch, whose weight is but 187 lbs. Mrs. Brock is not one of the smallest, she weighs 240 lbs. They were a jolly crowd, and made things lively around the Point during their 10 days' visit. All were sorry to see them leave, and hope next season will see their return.

Manitoba Protests.

Winnipeg, Sept. 25.—The Conservatives have filed a protest against the election of Martin O'Donoghue as Liberal member for St. Andrew's and Kildonan. Thirteen Conservatives and seven Liberal seats have been protested. The time for filing protests has expired.

Britain Can't Dictate.

London, Sept. 25.—(C.A.P.)—Sydney Buxton, M.P., thinks that when the principle of preference is once admitted it will not be in our power to dictate to each colony in what way she shall receive the preference.

Must Handle Our Own Grain.

London, Sept 25.—(C.A.P.)—The St. James Gazette, referring to the United States being in a position to suspend the bonding privileges, says Canada will never be really secure until she handles her grain herself.

Much Needed Lesson.

London, Sept. 25.—Telegraphing his congratulations to the Unionist Association of Rochester on the success of the bye-election held there Wednesday for a successor in the House of Commons to Viscount Cranborne (now Marquis of Salisbury), Joseph Chamberlain said: "This great victory strengthens the Government, and will give the free importers a much needed lesson."

Is There Poison In Your Blood?

Then the Liver and Kidneys Have Failed to Perform Their Mission and You Need

DR. CHASE'S Kidney-Liver Pills.

If you are not well there must be a reason for it. Most of the common ills of life arise from poison in the system. If you would be well you must remove the cause of disease.

The work of the blood is two-fold. It supplies nourishment to the body and collects the impure and poisonous waste matter. This poisonous material is removed from the blood by the action of the liver and kidneys. When these organs fail the poison is carried back through the system in the circulation of the blood and causes disease.

Where is your weak spot? Just there you may expect to feel the effects of poison in the system. It may be stomach trouble or lung trouble, kidney disease or heart disease, but the beginning is with the inaction of the great filtering organ—the liver and kidneys.

Nine-tenths of the ills of everyday life may be cured by Dr. Chase's Kidney-Liver Pills, because they set the liver, kidneys, and bowels right, and so cleanse and invigorate the system.

Have you come to realize the importance of keeping the bowels regular and the liver and kidneys active? You will appreciate Dr. Chase's Kidney-Liver Pills, not only on account of their wonderful promptness but also for their lasting effect on the system. They get at the very foundation of ill-health and by removing the cause, bring thorough cure.

Dr. Chase's Kidney-Liver Pills, the comfort of old age, one pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box. 11

PETERBOROUGH'S FIRST INDUSTRIAL FAIR.

Record of Prize Winners in the Several Classes.

Those who Have Been Found Worthy of Prizes.

The following is the prize list of winners at the first Peterborough Industrial Fair:

HORSES.

Breeding Classes.

Brood mare, with foal at foot, heavy draught — John Deyell, W. H Staples.

Foal, heavy draught—John Deyell, Geo Ward, W H Staples.

Brood mare, with foal at foot, agricultural—T H Graham, Jno Miller, Jas Lang.

Foal, agricultural — Jas Lang, T H Graham, John Miller.

One Year Olds.

Filly or gelding, best suited for draught purposes—Levi Bowles.

Filly or gelding, best suited for agricultural purposes—H A Mallock, David Darling.

Filly or gelding, best suited for roadster purposes—F W Kennedy.

Two Year Olds.

Filly or gelding, best suited for roadster purposes—W. McKnight, Alex Elliott.

Three Year Olds.

Filly or gelding, best suited for agricultural purposes—J H Garbutt, J O Bell.

Filly or gelding, best suited for carriage purposes—Albert Carpenter & Son, W McKnight, M Breckenridge

Draught Horses.

Single draught mare or gelding, to be shown in single wagon—Geo Ward, John Elgar, Geo Ward.

Single agricultural mare or gelding, to be shown in single wagon—F H Graham, John Miller, J O Ball.

Pair heavy draught mares or geldings, to be shown to wagon—George Ward, W H Staples, John Elgar.

Pair agricultural mares or geldings to be shown to wagon—J O Ball.

Horses in Harness.

Mare or gelding, 15.3 or over — Dr King, L F Staples, R Vance & Son.

Mare or gelding, under 15.3 —G N Graham, F J Hetherington, R Hanbidge.

Pairs, mares or geldings, 15.3 or over—Geo E Garbutt, W McKnight, L F Staples.

Pairs, mares or geldings, under 15.3—R H Leary, R A Deyell, J F Jory.

Roadsters.

Mare or gelding, 15.3 or over—Geo H Graham, G W Fitzgerald.

Mare or gelding under 15.3—F J Hetherington, Dickson Hall, J N Johnson.

Pairs, mares or geldings, 15.3 or over—W. McKnight.

Pairs, mares or geldings, under 15.3—C J Lewis, R H Leary.

Saddle Horses.

Best saddle and harness horse, mare or gelding—Percy R Price.

Ponies.

Pony in harness, 12.2 and under —Miss Alberta Gooding.

Pony in harness, over 12.2, not exceeding 14 hands—Katie Leary, W H Down.

Specials.

Best single four wheeled turnout, horse, harness and vehicle to be considered; the driver to be accompanied by a lady; horse 50 per cent., carriage and appointments 50 per cent—G H Graham, Dr King, F J Hetherington.

Best lady driver, single horse — J N Johnston, (Miss Edna Fitzgerald of Smith, driver), Roland Johnston, (Miss Nathan McIlmoyle, Lakefield, driver,) Mr and Mrs W Cornell.

Novelty race, one half mile heat, one heat only, horse to be hitched and driven at a trot for half mile, and then unhitched—T Graham.

CATTLE.

Durhams.

Bull, 2 years and over—G J Jopling & Son.

Bull, 1 year and under 2—G J Jopling & Son, G H Simpson, Arnott Bros.

Bull under 1 year—Jas Rennie & Son, R C Grandy, Jas Rennie & Son.

Cow, 3 years and over—R C Grandy 1st and 2nd, G J Jopling & Son.

Heifer, 2 years and under 3—R C Grandy, Wm Stewart, W H Staples.

Heifer, 1 year and under 2 — W H Staples, W R Stewart, J F Jopling.

Heifer, under 1 year—Jas Rennie & Son, 1st and 2nd; J G Jopling & Son.

Herd—J G Jopling & Son.

Galloways.

Bull, 1 year and over—W R Stewart, 1st and 2nd.

Bull, under 1 year—W R Stewart 1st and 2nd.

Cow, 2 years and over—W R Stewart, 1st, 2nd and 3rd.

Aberdeen Angus.

Bull, 1 year and over—W. R Stewart, 1st and 2nd.

Bull, under 1 year—W R Stewart.

Cow, 2 years and over—W R Stewart.

Herd—W R Stewart.

Grades.

Cow, 3 years or over — Jas Rennie & Son, 1st and 2nd; W R Stewart.

Steer, 3 years or over—Jas Rennie & Son, W H Staples.

Heifer or steer, 2 years and under 3—Jas Rennie & Son, 1st and 2nd; Wm Stewart.

Heifer or steer, 1 year and under 2—Jas Rennie & Son, 1st and 2nd; Wm Stewart.

Heifer or steer under 1 year — Jas Rennie & Son, 1st and 2nd; Geo W Stewart.

Fat export steer or heifer, 3 years old—Jas Rennie & Son, 1st and 2nd; W R Stewart.

Best three fat cattle—Jas Rennie & Son 1st and 2nd; W R Stewart.

Ayrshires.

Bull, 2 years or over — Stewart & Son, W J Bullock.

Bull, 1 year and under 2—Stewart & Son, 1st and 2nd.

Bull, under 1 year—Stewart & Son, W J Bullock, Stewart & Son.

Cow, 3 years or over — Stewart & Son, 1st and 2nd; W J Bullock.

Heifer, 2 years and under 3—Stewart & Son, 1st and 2nd

Heifer, 1 year and under 2—Stewart & Son, 1st and 2nd, W J Bullock.

Heifer, under 1 year—Stewart & Son 1st and 2nd

Herd—Stewart & Son, 1st and 2nd.

Holstein-Friesians.

Bull, two years or over—R. Honey.

Cow, 3 years or over—R. Honey.

Heifer, 2 years and under 3—Rich. Honey.

Heifer, 1 year and under 2—Rich. Honey.

Herd—Rich. Honey.

Jerseys.

Cow, 3 years or over—W Gray.

Cow, 4 years or over—Walter Stocker, 1st and 2nd.

Heifer, 1 year and under 2—Wm Stewart.

SHEEP.

Southdowns.

Ram, 2 shears and over—R L Holdsworth, 1st and 2nd.

Shearling ram—R L Holdsworth.

Ram lamb—R L Holdsworth.

Ewe, 2 shears or over—R L Holdsworth, C H Curtis.

Shearling ewe—R L Holdsworth.

Ewe Lamb—R L Holdsworth.

Oxford Downs.

Ram lamb—R L Holdsworth.

Ewe, 2 shears and over—R L Holdsworth.

Shearling ewe—R L Holdsworth.

Ewe lamb—R L Holdsworth, C H Curtis, 2nd.

Shropshire Downs.

Ram, 2 shears and over — A E Meadows, C H Curtis.

Shearling Ram—A E Meadows, 1st and 2nd, C H Curtis, 3rd.

Ram Lamb—C H Curtis, A E Meadows, C H Curtis.

Ewe, 2 shears and over — C H Curtis, A E Meadows, C H Curtis.

Shearling Ewe, A E Meadows, C H Curtis, A E Meadows.

Ewe Lamb—A E Meadows, C H Curtis, A E Meadows.

Leicesters.

Ram, 2 shears and over—W McKnight, L F Staples, Allen Bros.

Shearling Ram — Allen Bros., 1st and 2nd.

Ram Lamb—L F Staples, W McKnight, L F Staples.

Ewe, 2 shears and over — Allen Bros., W McKnight, 2nd and 3rd.

Shearling Ewe—W McKnight, Allen Bros., W McKnight.

Ewe Lamb — Allen Bros., L F Staples.

SWINE.

Valuable Dog Destroyed.

Mr. Pete Simons' big St. Bernard dog "Jack" was recently destroyed owing to the fact that of late he had been showing ferocious symptoms. "Jack" was a very valuable dog besides being a handsome one and a general favourite.

Rev. Mr. Lewis at Round Lake.

Rev. Mr. Lewis preaches anniversary sermons at Round Lake church, near Havelock next Sunday. The church was built during his pastorate. He has returned on several occasions to the anniversary. These visits are especially attractive as it is in the vicinity of his early home.

Murray Street Mission Band.

The annual meeting of the Murray street Baptist church Mission Band will be held this evening at 8 o'clock. Reports of the year's work will be read, and an interesting programme rendered by members of the band. A cordial invitation is extended to all.

Ancient Order of Hibernians.

Division No. 1, Ancient Order of Hibernians, met last evening in the T.A.S. rooms, and thirty-four candidates were initiated into the society. A special meeting will be held on Thursday evening next, Oct. 1st, when the bylaws of the Division will be considered and the balance of the county officers elected.

Rev. Mr. Potter Appreciated.

The Northern Advance, published at Barrie, has the following regarding sermons preached by Rev J. G. Potter: "Rev. J. G. Potter of St. Andrew's church, Peterborough, occupied Rev. Dr. McLeod's pulpit on Sunday last, and his earnest and timely discourses were followed with close attention and were productive of much favourable comment. Mr. Potter is not only an eloquent pulpit orator, but possesses a personal magnetism which lends an additional interest to his sermons."

57th Band at Norwood.

The 57th Band is attaining a provincial reputation, and seems to be in popular favour with managers of Fall Fairs. The Norwood Register of this week says:—"Arrangements have been made with the 57th Regiment Band of Peterborough to give a grand concert in the palace rink on the evening of Wednesday, Oct. 14, (second day of fair.) This band, which is one of the best in the province, is under the direction of Mr. Rupert Gliddon through whose efforts the organization has attained such widespread fame. This, no doubt, will be the musical treat of the season."

FAIR'S GLOVE EVENT TO-MORROW.

Only 40 doxen, that's all. Startling Ribbon event in the evening at 7 o'clock. Robt. Fair & Co.

FIRST PETERBORO' INDUSTRIAL FAIR.

Highly Successful and Satisfactory Outcome.

SURPLUS OF ABOUT $1,000.

Total Income of Nearly $5 000—Prize Lists to be Paid in Full—A Generally Satisfactory Result—Closing Speeding Events.

The First Peterborough Industrial Fair closed yesterday, and the general result has been such as to give great satisfaction to the directors, and all who have by means, or effort, or sympathy, contributed to the results which have been achieved The present management entered into the enterprise with zeal and energy, and were fortunate in eliciting the sympathy and co-operation of town and country, and the result has been a successful exhibition, especially from the farmers' standpoint, and the visitors have not been disappointed.

Of course in an exhibition's success, the financial element cuts a considerable figure. In this respect the management stands in a very comfortable condition, with a cash surplus of about $1,000, after all pending claims are paid, to be carried to the credit of next year's account. The total receipts from all sources amounted to $5,000, in round figures. This total was composed of the town grant, $200; county grant, $100; Government grant, $380, Turf Club, $150; contributions by merchants and others, $1,300; gate receipts, $2,500; entry fees on stock, $350, a total of $4,980. This will enable the directors to meet all claims, including prize lists in full, and have the comfortable balance mentioned. This is all the more gratifying in view of the conditions in financial matters that have attended some previous exhibitions, which to some extent contributed to lessening the success of the present exhibition.

The third day was favoured with good, if a little chilly weather, and though the morning gate was small, the afternoon attracted an attendance of between 1,500 and 2,000 persons.

There was little doing on the grounds till the afternoon, though the stock pens and stalls were visited by many persons, who were greatly pleased with the splendid exhibits made, these visits resulting in some rather important sales of stock.

The speeding events were the closing attraction, and were run off with the promptitude and clock-like accuracy that had marked previous events. The programme was so arranged that events followed each other in regular order, without tedious waits, with the result that there was continuously something to interest the spectator.

THE SPEEDING EVENTS.

Owing to the somewhat heavy rains of Wednesday night, the race track at the Driving Park on Thursday afternoon, was fully from two to three seconds slow. However, some very good speeding, both trotting and running, were witnessed by about 2,000 people, who, notwithstanding the bitter wind which prevailed, crowded the grand stand and railing near the finishing post.

The programme of events yesterday afternoon was better than that of the previous day, including, besides horse speeding, bicycling and foot contests.

The opening event was a bicycle race of one mile, in which Messrs. Young and Akey took part, the former winning.

One Mile Trot.

Hal Forest, O. Forsythe, Stouffville	1	1	1
Sphinx B. G. Powell, Peterborough	2	2	2

Time, 2.17 3-4, 2.17, and 2.20.

In the first heat the Peterbrough horse led to the three-quarter post, where Hal Forest caught up and won on the home stretch.

It was the opinion of some that "Sphinx B's" driver was pulling his horse, consequently he was cautioned by Mr. J. Noble. The driver, however, denied having held "Sphinx B," saying that she had been sick, and that this was her first race since the occurrence.

In the two next heats, the local horse led for the three-quarter mile, but was beaten out on the home stretch.

3-4 Mile Running.

Tholan, Murray, Hamilton	1	1	
Sarawack, R H. Wilson, Hamilton	2	2	
Cheat-Em, P. Cluman, Peterborough	3	3	

Time, 1.22 1-4, 1.24.

Sarawack and Tholan on both occasions ran neck and neck, but Cheat-Em was out of it.

The following owners were considered as having the best driving horse in single four wheeled runabout:—1, Mr. Geo. H. Graham; 2, Dr. King; 3, Mr. T. Hetherington.

'1-2 Mile Trot, 2.24 Class.

Rob Roy, O. Forsythe, Stouffville	1	1	1
Red Pat, Geo. Powell, Peterborough	2	2	3
Black boy, J. M. Brooks, Peterborough	3	3	2

In the two last heats Red Pat pushed Rob Roy closely, but in the last shied and was overtaken by Black Boy, who gave a very creditable showing.

For being the best lady driver, Miss Edna Fitzgerald, of Smith, got first. Mrs. N. McIlmoyle of Lakefield, second, and Mrs. Wm. Corneil Peterborough, third.

A bicycle race over a course of two miles resulted: 1st, Young; 2nd, Akey. Time, 6.10.

The footrace, 200 yards, resulted as follows: 1st, Belland; 2, Laybourne; 3, Crowley Time, 19 seconds. It will be noticed that the time is record. This may be owing to the fact that the course was not an official 200 yards.

Boys' footrace, under 15 years of age, 200 yards — 1, W. Elliott, 2, G. Houston. Time, 24 seconds.

Girls' footrace, 200 yards, for girls under 15 years: 1 J. Spilsbury; 2, C. Kennealey. Time. 28 seconds.

Schneider Cup race over a course of 100 yards, run off in two heats:

Belland	1	1
Laybourne	2	2
Crowley	3	x

Time, 11 1-2 and 11.

This event, which created considerable interest, concluded the afternoon's programme, and brought to a close the first Peterborough Industrial Fair.

The starter was Mr. J. Noble of Toronto, while the official timekeepers were Messrs. F. Peck, Campbellford, R. J. Munro, Peterborough, and E. G. Patterson, Peterborough.

The list of prize winners appears on page three.

AN OLD LANDMARK TO BE REMOVED.

Mr. John Britton to Demolish his Cooperage.

Mr. John Britton, after a business ness of 40 years manufacturing of staves, heading, etc., on Harvey street, has resolved to retire and has sold his boiler, engine and coopering machinery to Mr. Stevens, of Napanee. Mr. Britton intends to remove the present buildings and offer the property occupied by them as building lots. The removal of one of the old landmarks of that part of the town will no doubt give place to modern residences as the site is very conveniently situated for such.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Miss Alice Gray is visiting in Peterborough, the guest of Mrs. Symons.

Mrs. D. Weese is the guest of her daughter, Mrs. G. Armstrong, of Peterborough.—Havelock Standard.

Mr. and Mrs. W. B. Huyck left for Peterborough yesterday morning, where they will spend a few days.—Tweed News.

Mr. and Mrs. Jno. Johnston, of Peterborough, were the guests of Mrs. Thos. Wood this week.—Havelock Standard.

Mr. and Mrs. Thos. Osbourne, of Cannington, were guests of Mrs. Robt. Wright, of Albert street, during the Fair.

Master Gerald O'Brien, Gilmour street, has returned to resume his studies to the Belleville Institution for Deaf Mutes.

Mr R. F. McWilliams, accompanied by his bride arrived in town on Wednesday, after an extended trip through the west.

About twenty persons from Marmora attended the Fair and band concert, among whom was Mr. J. A. McDonnell, President of the Marmora Agricultural Society.

Mr. T. E. Boddy, the popular uptown ticket agent of the C.P.R., has returned from a three weeks' vacation very much improved in health, and will be in his office again on Monday.

The Rev. R. C. Tibb, B.A., of Knox College, Toronto, is in town to-day making all arrangements for the proposed visit of the British delegation to the annual meeting of the local branch Bible Society, Tuesday, Oct. 6th, in St. Paul's church.

Dr. Arthur V. Jolliffe, of Philadelphia, son of Rev. J. W. Jolliffe, B. C. L., is in town spending two or three weeks with his parents. Dr. Jolliffe is convalescing from an attack of typhoid fever. Dr. A. Yale, of Philadelphia, accompanied him, the latter left for home this morning.

NEWS NUGGETS.

—The Committee of the Whole Council met last night.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—The Killin-Keough Concert Company passed through town to-day before giving a concert in Millbrook this evening.

—At the Police Court this morning Alfred Cooney was remanded for a week charged with the non support of his wife and family.

—The pastor's Bible class of the Park street Baptist church was given a social evening by the Misses Booth, of Perry street, on Thursday.

—After September 30th the steamer Esturion will discontinue her double trips between Bobcaygeon and Lindsay. After that date she will make only one trip daily.

—On Monday the ratepayers of Orillia, by a vote of 558 to 14, declared in favour of granting concessions as to free site and tax exemption, to the Dominion Linen Mills Co., to induce them to locate their works at that town.

FOR SALE.

A Good Young Driving Horse. Inquire at 376 George street.

Distinguished Visitors.

A British delegation composed of the Ven. Archdeacon Madden and Rev. G. H. Bondfield is touring Canada in the interests of the Centenary of the British and Foreign Bible Society. The Executive of the local Society has arranged to have the annual meeting of the Peterborough Bible Society on Tuesday, October 6th, so as to give everybody an opportunity of hearing the Rev. G. H. Bondfield, who is spoken of as a capital speaker. These men have been greeted with full houses wherever they have been. Keep the date open, Oct. 6th, in St. Paul's church. This is for the general public. No admission fee.

Holland and French Bulbs—six cases just arrived from growers in France and Holland. Prices lower than Toronto or Montreal.—F. Mason, 406 1-2 George and 440 Water streets.

AN AGED ORANGEMAN DEAD.

Mr. Wm. Moncrief Died at the Age of 99 Years.

By the death of Mr. Wm. Moncrief, the Orange Order in Peterborough County loses its oldest member. He died at the residence of his daughter, Mrs. Lane, at Young's Point, at the age of 99 years, and although he had reached such an advanced age, his health until quite recently had been good. At the Orange Demonstration held at Lakefield on July 13th, Mr. Moncrief occupied a place on the platform and appeared to be in good health. He stated then that he had attended 80 Orange parades, and had only missed three in 83 years. Had he lived until December he would have been 100 years of age, and, judging by his apparent good health on July 13th, he seemed likely to live a number of years yet.

Mr. Moncrief has been for some years living with his son, Joseph, in Otonabee township, near the lift lock, but at the time of his death was at Young's Point.

The Price of Bread.

Apropos of the raise in the price of bread in Peterborough, the following from the Ottawa Free Press may be of interest:—The Ottawa bakers have resented Montreal's challenge for the supremacy of place in supplying the most highly priced bread in the Dominion. Montreal had raised the price of the staff of life to ten cents per two pound loaf, bringing up the price to the Ottawa level. The challenge put the Ottawa bakers on their mettle. They have now intimated to their customers that the price is to be twelve cents. In Winnipeg and in Halifax the same loaf is sold for five cents. These cities are of course out of the running, but Toronto comes up panting with the figure at nine cents, while Hamilton, with characteristic modesty, is content with seven.

MATTHEWS COMPANY'S EXHIBIT AT LONDON.

One of the Prominent Canadian Firms Showing Goods.

At the International Grocers Exhibition, now in progress at the Agricultural Hall, London, England, one of the principal firms exhibiting is that of the George Matthews Company, of Peterborough, according to a special cable despatch to the Montreal Star. It adds that "owing to the neatness of the Canadian patent butter boxes, and the attractiveness of their canned goods labels, Canadian goods for the first time, are largely used for ornamentation on nearly every stand in the hall. The whole display is private enterprise, showing that the general trade in Canada is at last alive to the splendid openings here, seeing that there are 120,000 British grocers shops, every one of which will be influenced by this display, the results will be of the highest importance to Canada. Cape Colony buyers are much in force buying Canadian produce."

It is pleasing to know that a local firm is creating such a favourable impression in the British markets.

OBITUARY.

Miss Mary Devine of Marmora Passed Away.

Mr. D. J. Devine is in Marmora, where he was called on account of the death of his sister, Miss Mary Devine, which occurred yesterday. The Marmora Herald has the following referring to her death: — "Word was received in town this morning of the death of Miss Mary Devine, daughter of Mrs. M. Devine. She had suffered from tuberculosis for the past three years. To the last she displayed extraordinary fortitude and determination to live. Her death has caused universal sorrow as she was deservedly popular for her kindness of heart. A brave good life is lost to the community. The burial will take place on Saturday morning at nine a.m."

NEW OFFICE FOR TOWN TREASURER.

Adjoines the Town Clerks Office and is Well Fitted.

The Town Treasurer, Mr. Felix Brownscombe, and his staff, are now comfortably settled down in their new office, adjoining that of the Town Clerk, which was recently vacated by Mr. W. J. Green, the Tax Collector. The office has been thoroughly renovated and adapted to the requirements of the new inmates, under the supervision of the Property Committee, of which Mr. Jos. Batten is the efficient chairman. Two large vaults have been built at the back of the office, which is in communication with the rest of the town offices by a door leading into the clerk's sanctum.

The new office is well lighted, in day by a large plate-glass window, and by night by electric light. It is more spacious than the old one, and will be much better, and more convenient, in every way.

Persons who have not bought their canine pets the necessary tag, are cordially invited to visit the new premises of the Town Treasurer.

Annual Western Excursions, Sept. 24, 25 and 26.

Remember the Grand Trunk is the most convenient and up-to-date service to the west for those taking in the annual Western Excursions. Return tickets will be issued at single fare for the Round Trip to Port Huron, Detroit, Saginaw, Bay City, Grand Rapids, Chicago, Dayton, Cleveland, Columbus, Indianapolis. Tickets good going September 24th, 25th and 28th, valid for return until October 12th. For further information and tickets call at Grand Trunk offices. 5d68

THE LATEST NEWS OF LOCAL SPORT.

Y. M. C. A. Field Day at Nicholls Oval To-morrow.

Annual Day of Sport for Association Members—Rugby Team Turning Out to Practice—Other News of Interest in Sporting Circles.

GOLF.

A team chosen from the Ladies' Golf Club will go to Port Hope to-day to meet a team from the Club of that town.

LACROSSE.

Durham and Wallaceburg play at St. Marys this afternoon in the last semi-final game in the Junior C.L.A. series. The winners will go up against the Elora "Rocks." Durham is generally looked upon as being the winners in to-day's game, and the "Rocks" will pretty nearly win out from either.

• • • •

Fergus are hot favourites for the final game for the intermediate championship and this fact may tend to their undoing. If everybody thought the Scotchmen didn't have a chance they would just set their teeth, and put up a game that would put them on top by a large majority. But when everything looks easy the defence acts as if a goal or two against them didn't count, and the home starts in as if there was no hurry. Twice the Thistles have lost the championship this fall and then pulled it out of the fire while the other fellows were figuring on how they were going to trim the next team. This may happen once too often and the Thistles had better have a care.—Telegram.

RUGBY.

According to the Citizen the Rough Riders should be scheduled with themselves, for, according to the Citizen, there is no club in the O.R.F.U. able to cope with the amateurs from the Capital. There may have been several reasons for the turning down of the Rough Riders, but the principal one was, no doubt, that the O.R.F.U. determined not to go broke paying railroad fares. — Telegram.

The Citizen, however, is out in its reckoning, as it is pretty safe betting that had Peterborough decided to remain in the Senior series, the Rough Riders whould have had to go some.

• • • •

About 25 or 30 members of the Rough Riders and All Saint's Rugby teams were out in uniform at the rink last night for practice. Unfortunately, however, the current for light was not available, so the boys had to content themselves with a run. It is expected that in future the rink will be kept lighted for the purpose of practice. It is very encouraging to see the interest being displayed by the players, inducing so many of them to turn out to practice.

• • • •

There seems to be a possibility of another senior team dropping out of the O.R.F.U., as the following resolution adopted by the Argonaut Club will indicate:— "The Argonaut Football Club strongly protests against the action of the executive committee of the O.R.F.U., in reinstating Green and Morrison. That, in their opinion, such action is not in the best interest of football or of amateur sport, and the Argonauts, as an amateur club, are strongly opposed to reinstatement under any circumstances, where professionalism or misconduct has been previously well established, and that if the O.R.F.U. will not reconsider their action, they feel that they will be obliged to withdraw from the union."

• • • •

All members of the Britannia Rugby club are asked to turn out to practice to-night at 4 o'clock, at the T.A.S. grounds.

BASEBALL.

Louis Bruce, the popular little Indian who has played on the Toronto Eastern League team for some years, has been purchased by the Philadelphia American League Club, and will no longer delight the fans in Toronto with his work for that team. He is one of the most popular players that ever donned a Toronto uniform.

• • • •

The race in the Eastern League for second place is becoming very interesting. The Buffalo team now leads the Torontos by one point only, and, if the latter continues its winning streak, should land in second place.

FOOTBALL.

St. John's choir boys will send the following team to Lakefield to-morrow to play a game with The Grove team:

Back—A. Mulhern.
Halves—E. Weller, capt.; J. Seymour, F. Sawers.
Quarter—E. Wood.
Centre—G. Cumming.
Forwards—D. Stone, G. Strickland, H. Wallis, V. Craig, C. Ray, F. Halpany.

MISCELLANEOUS.

ASSOCIATION FIELD DAY.

The annual Y.M.C.A. Field Day events will be run off to-morrow afternoon, at the oval, starting at 2.30 sharp. A fair number of entries have been made and the contest is likely to be keen. There will be 18 events in all, six in each class. Medals and association buttons will be given to those taking first and second place in addition to the chance of obtaining the trophy. Entries open to members of the association, to be made not later than Friday evening.

HOCKEY.

Although the summer sports are scarcely out of season, hockey interest throughout the district is being aroused. Mr. E. S. Clarry, Sec.-Treas. of the Trent Valley Hockey League, has received a communication from G. E. Jackson, secretary of the Victoria Hockey Club, of Port Hope, applying for admission to the League. The Victorias are a swift aggregation and would make matters interesting in the Trent Valley Series. It is the intention of the Peterborough Hockey Club to devote considerable time to their T. V. L. team and altogether a successful season is promised for the nursery of amateur hockey in this district.

• • • •

Hockey clubs are organizing all over the country in a way that indicates that the winter end of the national game is prepared to take up the good work the moment its summer sister shows signs of weariness —Telegram.

MARK STREET ANNIVERSARY

Will be Held on October 4th

The anniversary services of Mark street Methodist church take place on Sunday, October 4th. By means of a free will offering the people are undertaking to greatly reduce the debt on the church. A wide interest in being taken in this scheme and it is believed that, by all responding to the call more than the amount asked for will be realized.

The pastor will preach at the morning service and a prominent minister from a distance in the evening. There will be special music for the occasion, the choir being assisted by outside talent. Next Sunday Mr. Williamson, Y. M. C. A. secretary, will preach in the morning and Rev. Mr. Kilgour in the evening.

MONEY IN BELGIAN HARES.

Flesh Like Spring Chicken and Fur of Fine Quality.

Mr. R. Tivey, of Ashburnham, was an exhibitor of Belgian hares at the Industrial Fair and captured all the prizes. He also succeeded in disposing of one doe to a gentleman from Sault Ste. Marie at the handsome figure of $10. Mr. Tivey is an enthusiast in hares. He says that breeding them is more profitable than sheep raising. Their flesh, he says, is delicious, much resembling spring chicken. The fur of the Belgian hare is valuable for fur and is, he says, coming into fashion. He has no trouble in selling dressed pelts for $1.00 a piece.

The Zans Psychic-Phrenologist and Palmists. Hotel National. Readings 9 a. m. to 8 p. m. Rooms 41 and 43.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron wast aking a stoll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

Hunting Season.

The Grand Trunk Railway has issued a very handsome illustrated pamphlet, entitled "Haunts of Fish and Game," giving information regarding season for shooting deer, moose, reindeer, caribou, etc., in the "Highlands of Ontario," and at other points along the line of the Grand Trunk. Copies of the same will be furnished on application at Grand Trunk ticekt offices or to J. D. McDonald, District Passenger Agent, Toronto. d68

ALASKA BOUNDARY.

Mr. Watson Resumes Argument for the United States.

RUSSIA'S TITLE TO COAST.

Britain Said to Have Made No Claim to Territory North of Fifty-Five Degrees —Russian Coast Settlements and the Rescript Theory Main Points in Exhaustive Argument Covering Whole Day.

(Canadian Associated Press.)

London, Sept. 25.—Mr. Watson, continuing his argument on behalf of the United States, dealt with Russia's title to the northwest coast, founded on discovery and occupation, which, he argued, was never seriously questioned south of 55 degrees. Emperor Paul's ukase of 1799, asserting sovereignty down to that latitude, was undisputed by England. When in 1821 the Russian Emperor issued a further ukase, claiming jurisdiction over the ocean and extending the territorial claim four degrees farther south, England protested, chiefly against the maritime claim. Early in the consequent negotiations England acquiesced in Russia's sovereignty to 55 degrees.

Russian Settlements.

Mr. Watson traced the progress of the early Russian coast settlements north of 60 degrees south. He admitted they were few and far between. Russia, however, had settlements on the island opposite and used the mainland coast for purposes of hunting, fishing and trading with the natives, asserting and exercising exclusive ownership thereof. During this period England made no claim. He quoted the Duke of Wellington to show that in September, 1829, he did not know if England had any interest in those parts. In 1839 the Hudson's Bay Company asserted general claims, but when it came to particulars they could not show any post or occupation higher than 55 degrees nor nearer any portion of the "lisiere" than 100 miles. He quoted Sir George Simpson to show that up to 1839 the company had no posts or commerce on the coast as high as Portland Canal. In those days the U. S. disputed Russia's claim on the ground that Spain was the original discoverer of those regions and that they had acquired Spain's rights by the treaty of 1819.

The Rescript Theory.

Mr. Watson devoted the afternoon sitting largely to the presentation of the barrier theory. He argued that the primary idea in the minds of the Russian negotiators was the establishment of barriers to prevent the advance of British traders from the east, while the British, in addition to the withdrawal of the offensive pretension to maritime jurisdiction, desired such an interval between Russian territory and the eastern Hudson's Bay posts as would secure the freedom of the operations of the latter company and preclude collisions. He argued that these purposes would be completely frustrated if the British were to possess the heads of inlets. He quoted from the negotiations to show that both the Hudson's Bay Company and George Canning originally contemplated a "lisiere" to 100 miles in breadth.

The President here interposed the remark that this was in course of negotiation, but was agreed to and did not appear in the treaty.

Mr. Watson, continuing, emphasized his point. If the British were to have ports and harbors on the mainland affording free access to the coast and islands the objects of the Russians would be destroyed. The "lisiere," he argued, was to be wholly on the continent, not partly on land, partly on water.

APPENDICITIS.

Increase of this Terrible Disease Charged up to Indigestion—Dodd's Dyspepsia Tablets the one Sure Preventive

So eminent an authority as Dr. Sir James Crichton-Brown has declared that Appendicitis, the terror of the present age, is caused by Indigestion. In a lecture delivered recently in London, England, he said:

"The increase of Appendicitis is largely due to Indigestion resulting from imperfect mastication and the hurried methods of living."

In plain words this means keep you stomach right and you need have no fear of Appendicitis. And Dodd's Dyspepsia Tablets will make and keep the stomach right. That's the experience of everyone who has used used them. Hene Trudel, a student of Three Rivers, Que., says:—

"I had Indigestion so badly that I was discouraged and had resolved to give up my studies when an advertisement induced me to try Dodd's Dyspepsia Tablets. They made me better. To-day I have no headache, no pain, no weariness. I am cured."

Take these two statements together and they prove conclusively that Dodd's Dyspepsia Tablets are the one sure safeguard against Appendicitis.

Incendiary Fires.

Kingston, Sept. 25.—Within twelve hours Kingston lost two historical military buildings by fire. The first blaze occurred in the forenoon Wednesday when the old cavalry stables on Bagot street were almost wholly wiped out. The second blaze broke out during the night, when the old gun shed in Artillery Park was found to be on fire, and before the flames were subdued the shed was damaged beyond repair. The loss is over $6,000. The evidence all points to incendiarism.

The Evidence You Value.

By word of mouth from friend to friend Dr. Chase's Ointment has received more unsolicited recommendations than probably any medicine you can mention. The fact that it is an absolute cure for piles has put it in a class all by itself as a preparation of inestimable value and people recommend it knowing that it is a certain cure.

FRANK SCARED.

Another Slide From Turtle Mountain and People Desert Town.

Nelson, B.C., Sept. 24.—Passengers arriving over the Crow's Nest report that another tremendous slide occurred at Turtle Mountain, near Frank, Alberta. So far as known no lives were lost, but all the people of Frank have deserted the town again. The slide occurred just as a train was nearing Frank. The brakes were applied as quickly as possible, and the train was backed for several miles. After waiting over an hour the train was run to Frank, and the people who were all waiting in the station were taken on board.

May Go to the Falls.

Niagara Falls, Sept. 24.—The Farmers' Co-operative Harvesters' Company is considering the establishment of a large factory here. The city may offer inducements. This is the venture promoted by Col. McGillivray and Inventor Clokey.

Will Visit Canada.

London, Sept. 21.—(C.A.P.)—The Honorable Artillery Company of London, intends visiting Toronto and Montreal about the middle of October.

Blood Disorders

are simply kidney disorders. The kidneys filter the blood of all that shouldn't be there. The blood passes through the kidneys every three minutes. If the kidneys do their work no impurity or cause of disorder can remain in the circulation longer than that time. Therefore if your blood is out of order your kidneys have failed in their work. They are in need of stimulation, strengthening or doctoring. One medicine will do all three, the finest and most imitated blood medicine there is

END NOT IN SIGHT.

Numerous Amendments to Grand Trunk Pacific Bill Again Offered by the Opposition.

Ottawa, Sept. 24.—For another day the Government's bill relating to the construction of the national transcontinental railway has been under consideration, and when the House rose at 1 a.m., the end of the labors of the committee was not visible. Numerous amendments were again offered by the Opposition, and for the purpose of rendering, as the Minister of Justice expressed it, superabundantly clear that which was clearly the intention of the bill and contrast respecting the payment of duties upon the material and supplies imported for the construction of the road, an explanatory clause was inserted. An amendment offered by Mr. Clancy to defer work on the Winnipeg-Moncton division until the surveys were completed and plans and estimates submitted to the House, was rejected. The Minister of Justice pointed out that its adoption would probably result in making a reality that improbable diversion of traffic from Canadian routes, which the Opposition had striven so strenuously all the previous day to render impossible. The desultory debate was enlivened at a late hour this evening by a brisk encounter between Hon. Mr. Fielding and the leader of the Opposition. The Minister of Finance took the ground that the Government relied upon the patriotism of Canadians to patronize the Canadian route where the rates were the same as by other lines. Mr. Borden taunted Mr. Fielding with having once proposed that the Maritime Provinces should secede from confederation. Mr. Fielding retorted that Mr. Borden had once supported a candidate for Parliament who was opposed to the National Policy, and that his own conduct had been endorsed by the electors of Nova Scotia, who had constantly increased the *Liberal* majority.

Proses With English.

Law Notes says that the following letter was written by a Canadian advocate in behalf of his client:

"Dear Mister,—I have the honor to tole you that the Reverend Messieurs of the Seminary have ordained me with instructions to poursuivre you for the scandalous nuisance that was caused to that vicinity by the Paroquet which you have on your residence when was make such abominable fracas.

"The Reverend Messieurs are interfered with in their devotions, and when the band of the Grande Seminary of 111 pupils begin to play and your dam Paroquet was begin screech, it is dreadful. Also, one of the neighbors on the same Street with yourself was very mad and can't sleep on the afternoon, and when he go for play the piano your bird yell and spoil his improvisions. Altogether you must put away that bird. Please give me some undertaking without delay, otherwise I must institute the procedures.

"Receive the assurance of my considerations.

"Your obedient servant,

"————."

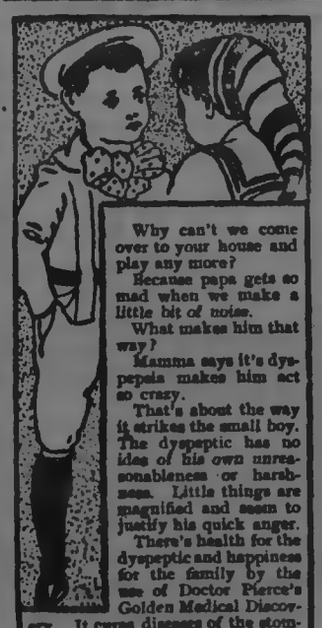
—Canadian Law Review.

Drawn by the Light.

Locomotive engineers running engines with electric head lights have some strange experiences with wild birds and animals that happen to get within range of the powerful rays, says The Winnipeg Free Press. They become confused, and stand glaring at the light until they are run down. A few days ago in the Rainy River section of the C.N.R. a large moose was run down in this way. Another engineer on the same road nearly had his head battered by an immense owl that flew up from the track in front of his engine, and, being blinded by the light, came direct at the engine, which was running at a rate of 35 miles an hour. The engineer had his head out of the window, and the big bird came so close that it knocked his hat off. Had it struck his head he would undoubtedly have received serious injuries.

Electricity and Vital Action.

Dr. Loeb says electricity is the underlying cause of vital action, but he has not as yet made a fair demonstration of it.



Why can't we come over to your house and play any more?
Because papa gets so mad when we make a little bit of noise.
What makes him that way?
Mamma says it's dyspepsia makes him act so crazy.
That's about the way it strikes the small boy. The dyspeptic has no idea of his own unreasonableness or harshness. Little things are magnified and seem to justify his quick anger.
There's health for the dyspeptic and happiness for the family by the use of Doctor Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition, and restores perfect health and strength, by enabling the perfect digestion and assimilation of food.

"I have taken one bottle of Dr. Pierce's Golden Medical Discovery for indigestion and liver complaint," writes Mr. C. M. Wilson, of Yadkin College, Davidson Co., N. C. "Have had no bad spells since I commenced taking your medicine — in fact, have not felt like the same man. Before I took the 'Golden Medical Discovery' I could not eat anything without awful distress, but now I can eat anything I wish without having unpleasant feelings."

Dr. Pierce's Pleasant Pellets cleanse and regulate the bowels.

Abbey's Effervescent Salt

Taken every day means bright eyes, clear complexion, sweet breath and perfect digestion.

Spring Lambs—Prices easier at $3.50 to $4.12½ per cwt.

Hogs—Best select hogs, not less than 180 lbs. nor more than 200 lbs. each, of cars sold at $5.90 per cwt.; lights and fats at $5.65; fowl, $4 to $4.25 per cwt., and stags at $2 to $3 per cwt.

Toronto Junction Live Stock Market.

Receipts of live stock at the Union Stock Yards amounted to 24 car loads, composed of 670 cattle, 615 sheep, 109 hogs and 14 calves.

MONTREAL LIVE STOCK.

Montreal, Sept. 24.—About 300 head of butchers' cattle, 50 calves and 400 sheep and lambs were offered for sale at the east end abattoir to-day. Trading was rather slow, the butchers bought freely yesterday and no sales to-day exceeded 4c per lb., but they were only medium good steers. Ordinary medium sold at from 3¼c to 3½c and the common stock at from 2c to 3c per lb. Canning beasts sold at from 1¾c to 2c per lb. A few milch cows were sold at from $18 to $40 each, but a pair of superior milkers were sold lately for $107. The milch cow trade is rather slack at present. Calves sell at from 2¼c to 4¼c per lb. Sheep sold at from 2¾c to 3½c per lb. Lambs sold at from 3½c to 3¾c per lb., but they were all bucks. Good lots of fat hogs sell at about 5¼c per lb.

EAST BUFFALO CATTLE MARKET.

East Buffalo, N.Y., Sept. 24.—Cattle receipts 700 head; nothing doing. Veals, receipts 75 head; 25c higher $3.25 to $8.00.

Hogs—Receipts, 3000 head. Steady; others 5c to 10c lower; heavy and mixed, $5.45 to $5.50; yorkers, $5.40 to $5.45; pigs, $5.25 to $5.30; roughs, $4.75 to $4.85; stags, $3.50 to $4.75; dairies and grassers, $5 to $5.40.

Sheep and Lambs—Receipts, 5000 head; sheep, steady; lambs, 5c lower; lambs, $4.50 to $5.05; yearlings, $4.25 to $4.75; wethers, $4.75 to $4.90; ewes, $4.75 to $4.00; wethers, $4 to $4.25; sheep, mixed, $3.50 to $4.00.

NEW YORK LIVE STOCK.

New York, Sept. 24.—Steers, receipts 68 head, mainly consigned direct. No sales reported. Dressed beef, steady; city dressed native sides, general sales, 6½c to 8½c; calves, receipts 238. Veals and grassers, almost steady; western calves, lower; about 100 calves unsold; veals sold at $5.00 to $6.00; a few grassers at $3.25; western calves at $5.25; city dressed veals, 9c to 14c.

Sheep and Lambs—Receipts 2160; sheep, slow and weak; prime lambs, steady; others, slow and weak. About 400 cars of stock unsold. Sheep sold at $3.25 to $4.00 per 100 lbs.; lambs at $4.87½ to $5.12½; culls at $3.75 to $4.50; dressed mutton, 6c to 8c per lb.; dressed lambs, general sales, 7½c to 10½c.

Hogs—Arrivals 4700; market slightly easier. Reported sales included a few Jersey hogs at $6.75 per 100 lbs. A deck of western pigs at $6.50.

CHICAGO LIVE STOCK.

Chicago, Sept. 24.—Cattle—Receipts, 12,000; strong to 10c higher; good to prime steers, $5.35 to $6.10; poor to medium, $3.50 to $5.20; stockers and feeders, $2.40 to $4.20; cows and heifers, $1.40 to $4.00; canners, $1.40 to $2.70; bulls, $2.00 to $4.00; calves, $3.00 to $7.00; Texas steers, $3.25 to $4.35; western steers, $3.00 to $4.40.

Hogs—Receipts, to-day, 15,000; to-morrow, 18,000; choice steady, others, lower; mixed and butchers, $5.40 to $6.22; good to choice heavy, $6.15 to $6.20; rough heavy, $5.40 to $5.70; light, $5.75 to $6.17½; bulk of sales, $5.75 to $6.15.

Sheep—Receipts, 23,000; steady to 10c lower; good to choice wethers, $3.60 to $4.25; fair to choice mixed, $3.25 to $3.40; native lambs, $3.50 to $5.15.

CHEESE MARKETS.

Tweed, Sept. 24.—Seven hundred cheese were boarded here to-day; 11¼ c was bid; no sales. The board adjourned for one week.

Milner Declines.

London, Sept. 25.—A King's messenger who was sent to Lord Milner, who is at Carlsbad, returned to London yesterday with an answer, and as no announcement is made it is inferred that Lord Milner has declined to accept the portfolio of the Colonies.

The public is beginning to display impatience at the prolongation of the Cabinet crisis.

Died on a Lounge.

Arthur, Sept. 25.—Charles Edmonson, a retired farmer, residing in this village, went to the express office Wednesday night for a crock of butter. On returning home about ten o'clock he complained that the crock was very heavy, and lay down on a lounge, and was dead in a few minutes, before a doctor could arrive.

Ship Burned at Sea.

Aden, Arabia, Sept. 25.—The Russian steamer Trouvor has arrived here with the passengers and crew of the French steamer Admiral Gueydon, which was practically destroyed by fire after leaving Ceylon and is now beached on the Arabian coast. With the exception of one man, killed by an explosion, there was no loss of life.

Restrict Coal Output.

Wilkes-Barre, Pa., Sept. 25.—Orders for a restriction of the anthracite coal output has affected nearly all the collieries in this region.

Messrs. E. M. Poussett & Co. have received the following:

Yesterday's severe decline has intensified the pessimistic feeling with which the rank and file of traders have so long regarded the market. Nothing so discourages the average traders as a fall in prices without any apparent cause. Rumors of important failures are revived, the names of the best houses in the street being bandied about in a way that recalls the early days of August when gossip had everybody in trouble. Well-informed people say that while there may be some chance of a stray house going up, it is not likely to have much effect on the market. It is believed that nothing less than a great failure, which is considered improbable, would put the market down. Indeed there are shrewd observers who predict that a shark rally may take place any moment.—Waldorf Notes.

M. & M. say:—"The tone of the market yesterday was more gloomy than at any time recently and the declines among important issues was impartial and indicated a class of selling which does not usually seek a depressed condition on which to liquidate. It is quite evident that the market is going through a form of liquidations which will not likely lead to positive disaster but will more likely produce stability even if at prices not materially over the present range. There is just this one thing to say in favour of the situation that there is no talk of any serious results beyond the loss in values and most of trading public seem to be either out of the market or prepared to stay to the finish. The market is certainly shaping itself to receive even a moderate return of confidence with great vitality, though there is no immediate prospect of its realization. It is quite likely that to-day will mark a halt in the decline for a time, particularly as selling of market has been rather individual than general in its character."

TWO WRECKS ON THE GRAND TRUNK.

Freight Trains Meet Mishaps at Campbellford and Uxbridge.

Trains Yesterday Running Late by Reason of Accidents—No Lives Lost but Valuable Freight Destroyed.

Further particulars of the two accidents which occurred on the Grand Trunk yesterday, are supplied by the Lindsay Post as follows:

"Two very serious accidents have happened on the Midland division of the G. T. R. during the last twenty-four hours resulting in the destruction of about twenty box cars and damaging freight and live stock to the amount of several thousands of dollars. One of the accidents happened near Campbellford on the Peterborough-Belleville section and the other at Uxbridge station.

A double header train, comprising 30 cars loaded with grain, left Lindsay Wednesday morning at 4 o'clock for Belleville, in charge of Conductor William Hodgson and Engineers Wickett and Lytle. When near Campbellford the train separated, and, as it was going down a grade, the rear end pitched into the front end, with the result that six cars were derailed and others damaged, the debris being piled high. The mishap happened about midnight and a half-hour later the Lindsay and Belleville auxiliary crews were sent to the scene of the disaster. Fortunately no one was injured but the crew had a narrow escape. The line was not cleared till about eight o'clock Thursday morning causing the Belleville mail train to be late on reaching Peterborough, and No. 21 from Port Hope did not reach Lindsay till 10.30, being over an hour and a half late.

No particulars as to the Uxbridge wreck are available, but we understand the train was the second section of the Toronto mixed, which arrives in Lindsay every morning from Toronto about 5 o'clock. The train this morning was carrying considerable freight, perishable goods, etc., for Lindsay merchants, also a carload of race horses coming to the Central Fair. The train was in charge of Conductor Frank Shaw, with Engineer Moffatt at the throttle, and left Toronto at 2.35 a.m. We have been unable to find out the cause of the accident, but it is supposed that an axle of one of the trucks broke. Thirteen cars were piled high in the air at Uxbridge station, and among them the car containing the horses. The crew fortunately escaped injury, but we are informed the leg of one of the horses was broken and the animal will have to be destroyed.

The Lindsay auxiliary crew returned from Campbellford at 11 o'clock, and left immediately for Uxbridge, the York auxiliary crew being also called into service. No. 21 train only went as far as Uxbridge and transferred her passengers to No. 22, which returned to the city."

The Examiner learns that the Uxbridge accident was caused by the train running through an open switch, and detaching the thirteen cars. The 11.45 train yesterday was delayed until about 2 o'clock by reason of the block on the line.

CANADIAN PACIFIC TO MAKE EXTENSIONS.

A Line Proposed From Blairton to Toronto.

Toronto, Sept. 23.—The News says it is stated upon good authority that the Canadian Pacific Railway has determined to compete with the older lines in Ontario. The leasing of the Pontypool, Lindsay and Bobcaygeon Railway is pointed out as a first step in the new policy of the Canadian Pacific, in view of the fact that the C. P. R. is entering Lindsay, at which extensive G. T. R. shops are located, and doing so without a bonus.

The contemplated new lines are said to be as follows: The extension of the Guelph branch, from the Royal City to Goderich, through Elmira and Milverton. The construction of a new line from Kleinburg on the Toronto, Grey and Bruce division to Sudbury. A new line is proposed from Blairton in Peterborough County to Toronto, via Warkworth, Cobourg, Port Hope, Bowmanville, Oshawa, and Whitby. It is also stated that the Teeswater-Orangeville branch of the Toronto, Grey and Bruce will likely be extended to Kincardine. In addition there is the projected line along the west shore of the Muskoka Lakes, with a branch to Midland.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity. All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

MERIT MAKES IT FAMOUS.

The Only Remedy in the World Except a Surgical Operation, That Will Certainly Cure Piles.

The study of physicians, the experiments of chemists, the loudly advertised pretensions of quacks, have been for years expended in one direction; to find a pile cure that would cure.

The results have been a number of harmless and in most cases useless ointments, suppositories and even internal remedies, which the public have weighed in the balance of experience and found wanting; nearly all of them gave some relief, but nothing approaching a radical cure resulted from these preparations.

The remedy required is one which will immediately stop the pain so severe in many cases of piles, and then by contracting the small blood-vessels (capillaries) to their normal size, produces a radical cure by reducing and finally absorbing the tumors and healing the inflamed, raw mucous surfaces.

Until a few years ago, no such remedy had been produced, but at that time a suppository was placed upon the market, which has since proven itself to be the long-sought permanent cure for this common and distressing trouble; it has rapidly become famous throughout the United States and Canada, and is now sold by all druggists under the name of Pyramid Pile Cure.

It is now the best known, because its merit and safety have advertised it wherever used. It has been advertised by word of mouth, from one sufferer to another; people who have tried everything else, even submitting to painful and dangerous surgical operations without avail have finally found that piles can be cured without pain and without exposure practically, as the pyramid Pile Cure is sold for the nominal price of 50 cents and $1.00 per package.

The Pyramid instantly stops all pain and at the same time contains no cocaine, morphine or narcotics; the acids and healing properties contained in the remedy speedily remove, cause a healthful, natural contraction and absorbtion of the tumors. It will cure any form of rectal trouble except cancer and advanced fistula, which, by the way nearly always results from neglecting proper and timely treatment for piles.

A book on cause and cure of piles sent free by addressing Pyramid Drug Co., Marshall, Mich.

Canada's Enterprise.

Commenting on the Trent Valley Canal and other inland waterways in Canada, the Buffalo News says:—"While a large portion of the citizenship of New York is engaged in opposing canal construction on the ground that it is not sufficiently modern, the citizens of Canada, wiser in their day, though not more experienced than those in this state, are pushing by all means in their power to gain control of the traffic of a continent by furnishing it barge ways through their territory. It means wealth all along the way. Canada is getting the business that her enterprise justly commands."

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address

BRODRICK FOR INDIA.

Lord Milner Definitely Declines Post of Colonial Secretary.

London, Sept. 26.—The Associated Press is able to state definitely that Lord Milner has been offered and has declined the Colonial Secretaryship. Further pressure is being brought to bear on him urging him to reconsider his determination; but, if the forecast of his friends is correct, he will not accept.

Mr. Brodrick has accepted the Secretaryship for India, and in the event of Lord Milner yielding to pressure, the Duke of Marlborough, who is now Under Secretary for the Colonies, will become Under Secretary for India, precedent ordaining that both the Secretary and Under Secretary shall not sit in the same House.

No definite announcement of the composition of the new Cabinet is expected before Monday.

Will Go After the Cup.

London, Sept. 26.—Capt. Wales of Sydney is in England with a view to arranging for a yacht to be built for the purpose of contesting for the America's Cup next year. Capt. Wales is well-known in Australia as the inventor of twin circular keels.

MACEDONIA'S HOPE.

Is in Continued Co-Operation of Russia and Austria.

WRITES PREMIER BALFOUR.

Says Britain Has Not Been Precluded From Offering Suggestions But There Are Times When Two Powers Are Better Than Three—Rumored Ultimatum From Bulgaria Denied by Sofia Officials.

London, Sept. 26.—Premier Balfour, in a lengthy letter to the Archbishop of Canterbury, discusses the Macedonian situation. He says he is in entire sympathy with the feelings of horror and indignation expressed concerning the unspeakable atrocities that have been perpetrated in Macedonia and adds:

"The instrument whereby the situation may be dealt with is the concert of Europe. But this, even were they all in harmony, is necessarily slow, and may be ineffective if the problem is complex."

Mr. Balfour goes on to say that he believes the best hope in dealing with the question lies in the continued co-operation of Russia and Austria, strengthened with the support and aided by the advice of the other signatories of the Treaty of Berlin.

"Great Britain has not been precluded from offering suggestions, which has already been done, and she will continue to do so. But it would be folly to forget that there are occasions when two powers are stronger than three."

Bulgarian Ultimatum.

Sofia, Sept. 26.—Sensational rumors are current here that Bulgaria has sent an ultimatum to Turkey announcing that unless satisfactory assurances are received that the Ottoman troops will be withdrawn immediately from the frontier Bulgaria will forthwith mobilize her whole army. The reports, however, are categorically denied at the Foreign Office here, which declares that no such ultimatum has been sent. The officials add that the situation is unchanged.

Wants Ships Withdrawn.

Constantinople, Sept. 26. — The Porte has expressed a wish for the withdrawal of the American warship now off Beirut "so that the settlement of the questions pending between the United States and Turkey can be proceeded with." It is thought here that the United States will not consent to withdraw her ships.

Filipinos Starving.

Manila, Sept. 25.—Governor Taft has just received additional reports of distress among the natives of Batangas, negroes, Tayabas and Cebu, the result of failure of the crops, owing to the ravages of locusts. The Government is now distributing $350,000 worth of rice among the afflicted districts, which is paid for in work.

Killed at Barn Raising.

Burk's Falls, Sept. 26.—While assisting at the erection of an addition to one of his barns Thursday afternoon, a sleeper fell upon Mr. Hugh Hunter, striking him on the head, crushing his skull in and killing him instantly. The deceased was a very popular man, and has been Reeve of Armour Township for a number of years. He was 68 years of age.

Will Withold Land Grant Earned by Algoma Central Railway.

The Globe this morning has the following, referring to the situation at the Soo":—

"Last night the Hon. G. W. Ross handed out the following statement regarding the payment of wages to the workmen and others connected with the Lake Superior Consolidated Company at Sault Ste. Marie:—

"The Ontario Government has received, through Mr. C. N. Smith of Sault Ste. Marie, a memorial from the workingmen engaged in the various works in the Lake Superior Consolidated Company, asking such protection as the Government could afford in the event of their wages not being forthcoming on the 28th inst.

"It has been the practice of the Ontario Government, where railway subsidies have been granted, to withhold such subsidies until the workingmen, and all others who supplied the material for the construction of the railway, were fully paid. This rule was enforced last year in connection with the Canada Central Railway, and some years previously in connection with a short railway running through the county of Prescott.

600,000 ACRES EARNED

"In the Algoma Central act an appropriation of 7,400 acres per mile has been made for the construction of the railway, but the final disposition of the land grant was dependent upon the carrying out by the syndicate of various other works, such as the erection of smelters, pulp works, and shipping facilities between Sault Ste. Marie and the chief ports on Lake Huron. About 80 miles of the Algoma Central Railway have been completed, and the syndicate therefore would be entitled to about 600,000 acres of land, providing the condition of the land grant were fulfilled.

"Following out the policy of the Governemnt with regard to other appropriations, the decision has been arrived at that the land grant should be withheld until the wages due and payable to the workingmen in all the enterprises associated with ther ailway are paid. Instructions have been issued by the Government to communicate with the Workingmen's Committee at the Sault to this effect."

The action of the Government in declaring its intention to enforce the rights of the wage-earners is to be commended, and will no doubt do something to ameliorate their condition."

Receiver Appointed.

Philadelphia, Sept. 26.—Announcement was made here Friday that at the instance of Speyer & Co. of New York, the Canadian courts had appointed B. F. Frackenthal, jr., the president of the Thomas Iron Co. of Easton, Pa., receiver of the Canadian subsidiary plants of the Consolidated Lake Superior Company. The receiver will have charge of all the plants of the company, excepting the trans-St. Mary's Traction Company and the Michigan Lake Superior Company. Mr. Frackenthal was in this city, but would neither confirm nor deny his appointment as receiver. It is said the receiver was secured to arrange for the payment of wages of the employes of the plants.

Wages Must Be Paid.

Toronto, Sept. 26.—Premier Ross last night gave out a statement regarding the payment of wages to the workmen and others connected with the Lake Superior Consolidated Co. The statement was to the effect that instructions had been issued that the land grant to the company would be withheld until the wages due to the workingmen in all the enterprises associated with the railway are paid. Over 600,000 acres have been earned by the Algoma Central.

BILL GOES TO SENATE.

Motion to Refer Redistribution Measure Back Lost by 89 to 65 and It Now Goes to the Senate.

Ottawa, Sept. 26.—After weeks of debate the redistribution bill was given its third reading at a late hour last night and sent up to the Senate. Numerous amendments which had been lost in Committee of the Whole were again moved by the Opposition and voted down. It was noticeable, however, that with respect to Toronto in only three cases did the Opposition propose specific changes in the delimitation of the constituencies as reported by the special committee.

Mr. Haggart's Amendment.

Hon. John Haggart moved an amendment to refer the bill back, with instructions to amend the schedule in accordance with the principles set forth in the motion made by Mr. R. L. Borden in the special committee, and stating that the redistribution had been carried out in defence of the professed objects of equalising as far as possible the population of the electoral districts, and without regard to the convenience of electors, particularly in the rural districts, and without regard to the compactness of the ridings.

Mr. Chas. S. Hyman, in reply, pointed out that there had not been a departure from county boundaries that had not been unanimously accepted by the special committee. It might be there would be some gain to the Liberal party by the redistribution, after the previous condition of the ridings, but he was content to rest his case there.

The division on the amendment was 28 yeas and 65 nays. The bill was then passed.

A Disgraceful Incident.

Before adjournment Mr. E. F. Clarke called attention to reports published respecting the indignities to which two of the delegates to the Chambers of Commerce of the Empire had been subjected at Newport, Vt. The incident was, he said, disgraceful.

Hon. Mr. Fielding replied that however much we might regret that these gentlemen had been subjected to any discourtesy, he was not by any means clear that the Government could do anything in the matter. However, he would look into it.

The House adjourned at 12.45.

Dispute Over Mails.

London, Sept. 26.—General indignation has been aroused here by a dispute between the postoffice authorities and the management of the London and Northwestern Railway over the payment for the transportation of mails. The railroad disputed its liability to carry to London a larger portion of the Atlantic mail than can be stowed away in an ordinary boat train, without extra payment.

Indian National Day.

Brantford, Sept. 26.—The Indians of the reserve, 12 miles from this city, celebrated their national day by holding a great council at which speeches were delivered by some of the Chiefs and some of the white brothers from this city. A lacrosse match during the afternoon was a bloodless affair. The Indian children sang patriotic songs and waved Union Jacks during the ceremonies.

More than half the battle in cleaning greasy dishes is in the soap you use. If it's Sunlight Soap it's the best. 43

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

The business formerly carried on by the Singer Supply Company, which I bought on the understanding that they were going to North Bay, is being continued by me in the same place. I am increasing the business and you will be surprised to see a much larger variety of stock and bigger bargains as follows:

Millinery

That's considered to be "smart"—that's termed reasonable in style and price. Millinery with the newest of new American and European ideas, combined with consistent, original and smart designs of our own artists—for a Millinery business could not be successful for more than a few days unless the backbone—the permanent artists—had ability to create "new touches."

Our Millinery Department has better facilities than ever for accomplishing the ever-expanding business that this store enjoys.

A welcome awaits you to avail yourself of another opportunity to wander through this display of artistic beauties.

Mantles

With entirely new features. Great differences prevail in collars and sleeves. Styles of cloths and trimmings are effective and unique.

Every Coat a fitting coat—that's been a study with us, as well as style and quality.

Prices have invariably been found satisfactory in this department. A comparison is appreciated any time convenient to you. Pleased to fit some on you.

"Ever Think"

of the safeguards in buying from this store in the first of the season?

We sell for cash.

Mark in plain figures. (You can "interpret" them.)

Sell only at the prices marked—never break a price.

No indiscriminate discounts. These facts allow us to mark our goods at a much closer margin of profit.

J. SUTCLIFFE & SONS

LINDSAY. PETERBOROUGH. OSHAWA.

Motherhood is woman's natural destiny—actual barrenness is rare — comforting words to childless women.

Many women are denied the happiness of children simply because of some curable derangement of the generative organs.

Among the many triumphs of **Lydia E. Pinkham's Vegetable Compound** is overcoming cases of supposed barrenness. Thousands of children owe their existence to **Lydia E. Pinkham's Vegetable Compound.** This great medicine is so well calculated to regulate every function the generative organs that its efficiency in this respect is vouched for by multitudes of women.

Nine Years Without a Child.

"DEAR MRS. PINKHAM:—We had been married nine years and never had children, and now we have a little baby girl nineteen months old, the joy of our life. She owes her existence to **Lydia E. Pinkham's Vegetable Compound.**

"Before taking **Lydia E. Pinkham's Vegetable Compound** I was a constant sufferer. I had pains in my back and sides, especially before menstruation. I had doctored but received no benefit. Hearing so much about the Vegetable Compound I decided to try it, and after taking six bottles was cured."—MRS. T. H. GOULBEY, 1223 Nevada St., East Toledo, Ohio.

Portrait of a Baby Girl Who Owes her Existence to Lydia E. Pinkham's Vegetable Compound

"DEAR MRS. PINKHAM:—I wrote to you some time ago asking why I could not have a child. I explained that I had displacement of the womb and ovarian trouble, and suffered with backache and headache. You sent me a nice letter in reply giving me full instructions how to treat myself, and in accordance with your directions I took your Vegetable Compound, and followed your kind advice faithfully in every respect, and now I have a little girl, the joy of our home. I never would have had my baby if it had not been for your advice and medicine.

"I cannot praise **Lydia E. Pinkham's Vegetable Compound** enough for what it has done for me. I hope other childless women will see this letter."—MRS. JOHN UEBERLACKER, 1111 Broadway, Cleveland, Ohio.

Another Happy Case in Brooklyn.

"DEAR MRS. PINKHAM:—I wrote to you a year ago telling you of my troubles. I had pains in the ovaries, menses were painful, and I **had never borne children.**

"You answered my letter and I followed your advice. I was completely cured. Have just given birth to a fine, healthy babe, and during chi'dbirth had a very easy time.

"Lydia E. Pinkham's medicines are a God send to women who want to be mothers."—MRS. SCHULTZ, 12 Luzner St., Brooklyn, N. Y.

Many women whose letters we print were utterly discouraged, and life lacked all joy to them when they wrote Mrs. Pinkham, Lynn, Mass., without charge of any kind. They received advice which made them strong, useful women again.

Daily Examiner.

London (England) office—143 Fleet street, E C., Central Press Agency Limited, Special Agents.

SATURDAY, SEPTEMBER 26, 1903

TO OUR OWN PORTS.

(Toronto Star.)

Short of absolutely prohibiting the Grand Trunk Pacific from carrying any export freight to a United States port, the restraints imposed by the Government do everything you can think of. The flow of the traffic of the new railway is to be to Canadian seaports; the company is required to influence traffic to our ports, and to no other, unless freight is specifically routed by the shipper through an American port, it is to be carried to our own ports.

What more is necessary? It cannot be advisable to make our legislation dealing with new companies of this kind needlessly hostile to the adjoining country. So long as we serve own own ports and guard our own interests, it is unnecessary to employ language in excess of what will meet these ends. One of the amendments offered by Mr. Borden on this phase of the Grand Trunk Pacific Bill contained a blunt and impolitic declaration against American ports and transportation ways that might have been attributed to a legitimate business preference for our own channels of trade.

NOT A SECOND CHICAGO.

Winnipeg Already Exceeds That City and Duluth in Wheat Shipments.

The figures of the Dominion Grain Inspector of the grain inspected at Winnipeg for the year ended August 30th, are announced as follows: Inspected in Winnipeg—Wheat, 51,823,000 bushels; oats, 3,054,000 bushels; barley, 565,200 bushels; flax, 655,000 bushels; spelz, 1,000 bushels; total, 56,117,200 bushels.

Referring to these figures Secretary C. N. Bell, of the Grain Exchange, has issued a statement, in which he says he does not think the Canadians fully realize the volume of grain being shiped from Western Canada. The figures show that Winnipeg receipts of wheat greatly exceed those of Chicago or of Duluth. The figures are: Duluth, 42,046,923 bushels; Chicago, 37,940,953 bushels; Mr. Bell says: "It will now be in order, so far as relates to grain arrivals at least, to abandon the trite saying 'Winnipeg will some day be a second Chicago,' for Chicago makes but a poor show compared with this market in wheat handling."

A SAMPLE ONE.

(Ottawa Journal.)

The winding up of the English Canadian Company, Limited, of Britain and Canada is a sample of the style of financing that has given Canada such a bad name in certain circles in England.

In this proposition families whose wealth had been invested in gilt-edge securities for generations withdrew it, to invest it in certain stone quarries in Canada, called by courtesy mines in the printed prospectuses.

Historical families and historical fortunes were almost dragged into the dust. It was that little word Limited that saved them.

And naturally now there are a few big families in Britain who with reduced incomes, declare to all who run that Canada's population is like unto that between Dan and Bersheba.

And one annoying feature to Canadians is the fact that the same little circle of Canadians are at the bottom of every loose and fake proposition that has been unloaded upon the British public for the last five years.

If half a dozen well-known names had accidentally been put in jail about half a dozen years ago, the British Isles would have been millions of pounds ahead.

The law really ought to do something to protect those who seem, in the grasp of a hypnotic-eyed, smooth-talking, well-stored company promoter, unable to protect themselves

For Kidney Disorders
Take

COAL FOUND ON THE ABITTIBI.

Soft Coal Found at Black-smith Rapids.

Sometimes of Great Thickness and on Both Sides of the River—Mattagami Iron Deposits Examined—Letter From J. M. Bell.

Mr. J. M. Bell, who is in charge of the exploratory party in search for coal in northern Ontario, writes to the Crown Lands Department regarding a trip on the Abittibi River as follows: "In all, at three distinct points, boring operations were carried on, but at no point were these carried on, but at no point were these successful save at the Blacksmith Rapids, and even there it was not comparable with the Someska. The deposit occurring at this point is too extraordinary to be discussed in the compass of this letter, but, in brief, it may be said, that soft coal of excellent quality, occurs on both sides of the Abittibi River, and sometimes of great thickness. At several points it was 24 feet thick, and, if I remember rightly, it appears continuously, as shown by our *test pits*, for some 350 feet on the west side and higher up on the same shore for about as much again. The outcrop on the opposite bank is much smaller. Unfortunately no boring operations could be conducted in the interior owing to the thick coating of boulders overlying Though not a continuous deposit as on the Someska, there is a great deal of fine coal in sight, and if not fit or in a large enough deposit for export, (and I do not say it is not), it will certainly be of value for local consumption when the north country is opened up. The coal on the Blacksmith Rapids, as that on the Someska, burned freely in the open air.

"From the Abittibi a trip was made on foot by myself across to the Grand Rapids of the Mattagami, and the iron deposit there occurring carefully examined. This splendid deposit, which consists of limonite, or brown hematite of good quality, occurs on both sides of the river; on the west side for 1100 feet, and on the east side for 325 feet At low water the limonite also appears in the river bottom.,

FATTENING CHICKENS.

The crate fattening of chickens is a profitable business for almost every farmer to engage in. It is a simple undertaking that can be managed by a member of the farmer's family who is sufficiently interested and enterprising to study the work and construct the fattening crates. No special building is required in which to place the crates. Grain on hand, with the exception of corn or peas, when finely ground and mixed with skimmilk or buttermilk, is fed with profit to the chickens. If it is necessary to buy grain, fine ground oats is preferable. The cost of the food for fattening averages ten cents per chicken. It is advisable to produce chickens with white-coloured flesh, as white-coloured flesh is more palatable than yellow flesh; it is firm, fine in grain and exceedingly tender. There are globules distributed throughout the flesh and under the skin. When the chicken is cooked, the particles of fat melt into and increase the juiciness of the flesh. With unfatted chickens, water takes the place of the majority of the fat globules. When the chicken is roasted the water evaporates and leaves the meat dry. The muscles of the crate fatted chicken are more edible through lack of exercise. To kill a lean chicken is wasteful. The proportion of edible meat to bone and offal is so small.

All breeds of chickens, with the exceptions of Leghorns, Minorcas and similar small chickens, can be fatted in the crates with profit. Fatted chickens can be marketed in Canada and Great Britain for ten to sixteen cents per pound, plucked weight. A great number of farmers have engaged in the fattening business and are preparing their chickens for the home markets or for export. The following letter was received by the Department last week, showing the satisfactory results of the first year's chickens business and the encouragement offered to engage in it more extensively.

"Last year I experimented on a small scale with crate-fed chickens and the result was so satisfactory that this year I am going to prepare all my fowls in that manner. I should like you to send me the names of some reliable dealers in Ottawa or Montreal to whom I can ship the fatted chickens when ready."

Mr. F. C. Hare, Chief of the Dominion Poultry Division in this article will give directions for construction of the fattening crates and feeding the chickens. A subsequent article will contain information about killing and marketing the chickens. The fattening crates in use at the Illustration Stations are six feet long, sixteen inches wide and *twenty inches high, inside measurements.* Each crate is divided into three compartments. Each compartment holds four chickens. A frame is built of one inch by two inch lumber and covered with slats. The slats are placed lengthwise on three sides—bottom, back and top—and up and down in front. The slats are one inch wide and half an inch thick The spaces between the slats in front are two inches wide to enable the chickens to feed from the trough. The bottom, back and top slats are one and a half inches apart. The top slats are cut above each partition and three doors are formed. The doors are hinged to the rear of the frame. The crates are placed on stands sixteen inches from the ground. A light "V" feed trough, two and a half inches inside, is placed in front of each crate and is carried on brackets nailed on the ends of the the crate.

If only a small number of chickens are to be fatted, packing boxes can be adapted for the purpose. The open top of the box should become the bottom of the crate, and one side should be removed for the front. Slats should be nailed up and down the front; also lengthwise of the crate to form the floor. A board should be loosened in the corner of the top of the crate to remove the chickens, and a feed trough arranged in front. During the fall the crates can be placed outside in a sheltered position or in a vacant shed or barn.

Plymouth Rocks, Wyandottes, or chickens of a similar type, weighing from two and a half to four pounds each, are preferable for fattening. Chickens of medium size and of a broad square shape, with short straight legs set well apart, fatten the most profitably

A suitable fattening ration is one that is palatable and that will produce a white coloured flesh. Ground oats, ground buckwheat, ground barley and low grade flour are meals that have been fed with profit at the stations. The chickens are fed a mash exclusively. No whole grain is given. Several meal mixtures are given to illustrate how a ration can be formed: (1) Ground oats, coarser hulls removed. (2) Two pounds ground oats, two pounds ground buckwheat, one pound ground corn. (3) One pound ground oats, one ground barley, one pound ground buckwheat. (4) Two pounds ground barley, two pounds low grade flour, one pound wheat bran. The ground meal should be mixed to a thin porridge, with thick sour skim-milk or buttermilk. A small quantity of salt should be added to the mash.

The chickens should remain in the fattening crates for about twenty-four days. Before the chickens are placed in the crates they should be dusted with sulphur to kill the lice. The first week the chickens should be fed the mash sparingly three times a day in order to accustom them to the change of diet and the confinement. After the first week the chickens should be given twice a day as much mash as they will consume. For one week before the chickens are killed a small quantity of tallow should be added to the mashes to increase the juciness of the flesh. Fresh water should be given in the trough twice a day and grit or gravel twice a week. At all the illustration stations the chickens are fed from the trough throughout the fattening period. The cramming machine has not been used for feeding chickens for two years.

W. A. CLEMONS,
Publication Clerk.

Saved the Baby Girl.

A London, Ont., mother grateful for the preservation of her baby's life, writes thus:—"My baby girl was very sick during the summer, and the doctor said it was almost impossible to save her. Diarrhoea had reduced her very much, and for days she lay in her cot helpless and weak. I fortunately read about your Lactated Food, and determined to try one can for the baby. Two or three days after feeding it to baby, I noticed an improvement. She gained strength and slept naturally. The food agreed with her stomach, and she seemed to like it. For a month, Lactated Food was the only nourishment I gave baby. To-day, I am happy to say that my child is bright, strong and in good health. I wish I could talk to every mother in Canada who has a sick infant; I would certainly advise the use of Lactated Food."

JUSTICE AWAKENING.

It appears that New York State is being benefitted by the example set by Canada in meting out justice to offenders, as the following from an exchange will show:—

"Seventeen months ago three men young in years but old in wickedness went to the residence of an aged uncle, near Newburgh, N. Y. called him to the door, just as the Biddulph crowd did John Donnelley twenty-four years ago, and shot him dead. They were caught, tried and convicted, and great have been the efforts to save them, but in vain. In the face of an aroused public opinion Governor Odell has been proof against all pleas and against all political influence. The law must take its course If the law was always as inflexible as in the Van Wormer case, life and property would be much safer in the United States."

The Proper Treatment for a Sprained Ankle.

As a rule a man will feel well satisfied if he can hobble around on crutches two or three weeks after spraining his ankle, and it is usually two or three months before he has fully recovered. This is an unnecessary loss of time, for in many cases in which Chamberlain's Pain Balm has been promptly and freely applied, a complete cure has been effected in less than one week's time, and in some cases within three days. For sale by all druggists.

Sir Edmund Barton Resigns.

London, Sept. 25.—(C.A.P.—Sir Edmund Barton, Premier of Australia, has been appointed one of the judges of the Federal High Court. He has resigned the Premiership, and Minister Deakin is now Premier.

Jewish World Congress.

Highest prices paid for all kinds of Lumber. Apply to H. C. STABLER, 364 George street, or box 436, Peterborough.

STIFF QUESTIONS.

Propounded by Mr. Aylesworth in Boundary Case.

FOR WATSON TO ANSWER.

U. S. Counsel Takes Up Seriatim Questions Proposed to Tribunal—Says He Admires the Ingenuity Which Was Exercised in Preparation of Case For Great Britain—Disposition of the Line.

(Canadian Associated Press.)

London, Sept. 26.—Mr. Watson yesterday took up seriatim the questions proposed to the Alaska Tribunal. On the first question there was no dispute. The second, he said, would be dealt with by his colleagues. Regarding the third, he asked the tribunal to answer and decide that the line starting from Cape Muson should proceed easterly along the parallel of 54.40, the mouth of Portland Inlet. Quoting the words of the treaty of 1825, he admitted that the southernmost point of Prince of Wales Island did not coincide with 54.40.

Mr. Aylesworth asked which he considered the point of departure, the point or the parallel.

Mr. Watson answered—"The point."

Mr. Aylesworth—How does the line get from the point to the parallel?

Kept to the Parallel.

Mr. Watson—By the shortest way. He argued that, while the line started from the point, it left Prince of Wales Island on the parallel, and kept to it, otherwise what object was there in naming the parallel in the treaty? He quoted Nesselrode to Lieven to show that Russia proposed to carry the frontier down to 54.40. Lieven showed the letter to Lord Canning, who put this latitude in the draft sent Bagot. Mr. Watson said: "If you take the British line you overlap the boundary established between Russia and the United States the previous year. Again, if the British contention be accurate, who owns the piece of water intervening between?"

Disposition of the Line.

On the two boundaries question he argued that the line should be drawn from the head of Portland Channel northeasterly along the valley until it reached the 56th parallel, which was the objective point called for by the treaty. He had great respect for the ingenuity which could evolve such arguments as those made by Great Britain, that the line should start from the head of the canal and go southerly (sic) to meet the 56 degrees. In answer to questions 5, 6, 7, he said they were included in the answer to the fifth, which, stripped of its verbiage, simply asked whether the line could go round the heads of inlets. He contended that Great Britain and Russia desired that the line from 56th latitude to Mount Elias should follow the crest of the well-defined range on the maps, particularly Faden's map, which undoubtedly was before them, and which showed the mountains, as Canning says, parallel to the coast and appearing to follow all its sinuosities. He argued that they had in mind this distinct, definite range, which they supposed to exist, and that, therefore, Faden's map shows to a demonstration that they intended the line to follow round the heads of all the bays and inlets.

Had Recourse to Maps.

Mr. Watson read from correspondence to show that the negotiators constantly had reference to the maps, and that when they were determining the mountain line they must have had recourse to them to find where the mountains ran. He quoted Lord Salisbury's instructions to the High Commissioners of 1898, wherein he spoke of the continuous range which the treaty appears to contemplate. He repeated that nothing could be clearer than the fact that the negotiators proceeded on the assumption that a persistent, continuous, dominant, fixed, controlling range existed, and that such range ran round all the inlets. He said it was equally true that no such range existed in fact.

Be Quick.

Not a minute should be lost after a child shows symptoms of cholera infantum. The first unusual looseness of the bowels should be sufficient warning. If immediate and proper treatment is given, serious consequences will be averted. Chamberlain's Colic, Cholera and Diarrhoea Remedy is the sole reliance of thousands of mothers and by its aid they have often saved their children's lives. Every household should have a bottle at hand. Get it to-day. It may save a life. For sale by all druggists.

Attacked by Tomatoes.

Dayton, O., Sept. 26.—By the explosion of a can of tomatoes, which she had just sealed, Mrs. Mary Rapp was perhaps permanently blinded. She was leaning over the can and passing a hot iron over the sealing wax, when the lid suddenly blew off and the hot contents of the can were hurled into her face.

Fifty Iron-ox Tablets, in an attractive aluminum pocket case, 25 cents at druggists, or sent, postpaid, on receipt of price. The Iron-ox Remedy Co., Limited, Walkerville, Ont.

TRADES CONGRESS.

Action of Robert Glockling on Labor Situation Endorsed—Resolution Demanding an Anti-Contract Law.

Brockville, Sept. 26.—The Trades and Labor Congress yesterday morning endorsed the action of Secretary Glockling in placing before the people of Britain the real position of labor in Canada.

The Committee on Label Legislation presented a report on the work done during the week, but regretted that as long as the Senate is constituted as at present it will be impossible to secure such legislation.

A resolution was passed demanding the enactment of an anti-contract labor law, so that manufacturers shall not be able to induce workingmen to come from Europe upon false pretences and under contract.

The efforts of the stationary engineers were endorsed to secure legislation to require that all in charge of boilers of over 25 horsepower should have Provincial certificates.

The bill to regulate barbering by appointing a board of examiners and regulating the sanitary condition of barber shops was withdrawn, after some discussion.

Resolutions were adopted asking the Government to include mechanics in the increase of salaries given to other civil servants, approving of a free and compulsory system of education, favoring the abolition of assisted immigration, approving of straight independent labor candidates for all Parliamentary and municipal elections.

A secret meeting of the Congress was held in the afternoon to discuss the attitude of organized labor towards certain questions affecting workmen now in the courts. It was decided to meet next year in Montreal.

A LETTER TO MOTHERS.

Mrs. Jas. E. Harley, Worthington, Ont., gives permission to publish the following letter for the benefit of others mothers who have young children in their homes. She says: "I have many reasons to be grateful to Baby's Own Tablets, and to recommend them to other mothers. Our little girl is now about fourteen months old, and she has taken the Tablets at intervals since she was two months old, and I cannot speak too highly of them. Since I came here about a year ago, every mother who has small children has asked me what I gave our baby to keep her in such even health, and I have replied 'absolutely nothing but Baby's Own Tablets.'' Now nearly every child here gets the Tablets when a medicine is needed, and the old-fashioned crude medicines, such as castor oil and soothing preparations, which mothers formerly gave their little ones are discarded. Our family doctor also strongly praises the Tablets, and says they are a wonderful medicine for children. Accept my thanks for all the good your Tablets have done my little one, and I hope other mothers will profit by my experience."

Baby's Own Tablets can be given with absolute safety to the youngest, frailest child, and they are guaranteed to cure all the minor ailments of little ones. Sold by all medicine dealers or mailed at 25 cents a box by writing the Dr. Williams' Medicine Co., Brockville.

Fire at Hanlan's Point.

Toronto, Sept. 26.—The second big fire in two weeks at Hanlan's Point yesterday afternoon destroyed the wharf, power house, waiting room and offices. The cause of the fire is unknown. Manager Solman estimates the loss at $80,000 of which 75 per cent. is on the power house and equipment. The plant was erected ten years ago at a cost of $80,000. The insurance risks, it was stated, would not cover five per cent. of the damage.

First Sealer Arrives.

Victoria, B.C., Sept. 26.—The sealing schooner Casco, first of the fleet to arrive from Behring Sea, returned yesterday with 645 skins. She brought the first news from the sealers. No seizures were made.

Crawled Under the Car.

Niagara Falls, N. Y., Sept. 26.—Early Friday an unknown man was killed at the terminal station in this city. During the night he crawled under an electric car and went to sleep. When the car was started the man was so badly injured that he died on the way to the hospital.

Appreciated in Canada.

Toronto, Sept. 26.—The executive of the British Empire League in Canada adopted a resolution to convey to Mr. Chamberlain its appreciation of his vigorous and determined advocacy of the principles for which the league in Canada has so long contended. Another resolution was passed calling on the Government to establish a naval reserve in Canada.

Evidence Barred Out.

Montreal, Sept. 26.—In the Court of King's Bench yesterday Judge Ouimet gave decision in the Margolius' case refusing to allow evidence taken in New York before Judge Desnoyers, as it had been taken irregularly. He, however, allowed the Crown to apply for another commission to go to New York to take evidence over again.

Look on the Bright Side.

The sufferer from nervous exhaustion is generally blue and discouraged. He looks on the dark side of things and expects paralysis, locomotor ataxia or insanity. All this is changed by the persistent use of Dr. Chase's Nerve Food, which gradually and naturally rekindles and revitalizes the wasted nerve cells and instills new vigour and energy into the whole system.

SKIRT PROTECTOR

Peculiar Wearing Qualities and Perfectly Straight Selvage.

Corticelli Skirt Protector is of firm and even texture. When soiled a sponge or brush makes it clean again, and no damage done. Corticelli Skirt Protector is a great favorite with fashionable and careful dressers.

If you are not already a subscriber to Corticelli Home Needlework Magazine, become one now. Full information on application to Corticelli Silk Company, St. Johns, P. Q.

Pandora Range

What more appropriate or acceptable present than a "Pandora" range can you give a bride? Pleasant and grateful memories of the giver will be re-kindled every day in the new home, and will live for a generation.

The "Pandora" range has many qualities which make it specially suitable for such a gift—is entirely new and therefore modern in every respect, has a handsome, graceful outline, heavy body and leg base; bold, rich carving and a lavish but tastefully arranged nickel dress; all of which combine to give it a beauty and attractiveness not seen in old style ranges—is an ornament in the best furnished home.

Its inner construction is based upon the most scientific principles and all working parts are made extra heavy and durable.

Is fitted with thermometer, enameled reservoir, and has a special flue construction which makes it a perfect baker and a perfect cooker at the same time.

Sold by all enterprising dealers. Booklet free to any address.

Probabilities.

Strong winds and gales from the south-west and west; fine and warm, Sunday — Scattered showers in the early morning, followed by strong northwesterly winds, and a change to much cooler again.

Opening Reception at the Y.M.C.A Tuesday, September 29th, from 7 to 10 p.m. for all young men.

For Young Men.

At the Young Men's Meeting in the Y.M.C.A. Hall to-morrow, at 4.15, Rev. L. McKinnon, of the Gilmour Memorial church, will give an address. A hearty invitation to all young men.

Charlotte Street Guild Concert.

Opera House, Friday, Oct. 9th. The Killin-Keough Concert Company. Mr. J. Potter Keough, N.Y., basso; Mrs. Killin-Keough, N.Y., soprano; Miss A. Hobart Terry, Boston, reader; Miss Brown, Peterborough, pianist. Tickets 25, 35, and 50 cents.

Diamond Ring Lost.

About a month ago a lady in town lost a valuable diamond ring and an advertisement appeared in the Examiner at the time offering a reward for its recovery. In the hope that it may have recently been found, she again offers a reward to any one leaving it at this office. 3d

Peterborough Rifle Association.

The semi-annual meeting of the Peterborough Rifle Association will be held in the Court House on Monday evening, September 28th, at half past seven, for the purpose of making arrangements for the Association's rifle matches which are to be held in the near future. It is hoped that all members of the Association and any persons who wish to join the Association, or who take any interest in rifle shooting, will attend this meeting.

Murray Street Choir Entertained.

A very pleasant evening was enjoyed at the residence of Mr. and Mrs. C. B. Routley, last night, when the choir of Murray street Baptist church was entertained by them. Mr. and Mrs. Routley have always evidenced a deep interest in the choir, and the entertainment provided last night was but another evidence of that interest. The evening was spent in games and music, all present thoroughly enjoying themselves. Before dispersing a hearty vote of thanks was passed to Mr. and Mrs. Routley for their hospitality.

Tickets good going September 24th, 25th and 26th, valid for return until October 12th. For further information and tickets call at Grand Trunk offices. 5d66

THE AUBURN WOOLLEN MILLS

Partially and Temporarily Closed Down Owing to Lack of Orders.

In a despatch from Ottawa to the Toronto World, purporting to deal with the woollen industry situation the following paragraph occurs:

"The two mills at Carleton operated by the Canadian Woollen Company have closed down. Hawthorne and Gillies' mill has closed its doors. Within two weeks the Auburn Woollen Co., of Peterborough, will suspend operations. This Peterborough mill has been running without interruption for twenty-five years. The Excelsior Woollen mills of Montreal, will, it is stated, close down in a short time, and other mills are at a standstill."

In regard to the Auburn mills the Examiner is informed by a director of the company that a portion of the woollen mills close down to-night—the departments connected with the work of finishing necessarily being operated till work in hand is completed. Lack of orders is the cause assigned for the partial closing down. The closing of the mills is not thought to be permanent, but nothing more definite can be learned till the president, Mr. Kendry arrives in town.

A PERMANENT ORCHESTRA.

Meeting on Monday Night to Arrange for its Organization.

Next Monday evening a meeting will be held in the parlours of the Albany Club, to consider and arrange the organization of a permanent orchestra under the leadership of Mr. Rupert Gliddon. This is a project that should be heartily entertained. Apart from the desirability of having a permanent orchestra in Peterborough, and from the fact that sufficient good material is in existence here, the fact that Mr. Gliddon's services as conductor, are secured, make the prospects roseate. We all know what fine results have followed the co-operation of Mr. Gliddon and the members of the 57th Band. Similar results can be achieved with an orchestra, if as good material for an orchestra, as we have in the band, is available. Music lovers, practical and amateur, are urged to keep in mind the date of the meeting — next Monday night, Albany Club Rooms, (Opera House entrance.)

OBITUARY.

Mrs. Geo. Garlick Died Suddenly in North Monaghan.

The death of Mrs. George Garlick occurred very suddenly on Wednesday night at her home in North Monaghan, at the age of 72 years. The cause of her death was heart failure, and her demise is all the more to be regretted on account of its suddenness. She retired in her usual health on Wednesday night, and was found dead in the morning. Mrs. Garlick, whose maiden name was Mary Clemens, was born in England, but has lived in this country for the past forty-five years. She has been a widow about seven years.

Mrs. Garlick leaves seven children to mourn her loss, Vis., Mrs. William Douglas, of Warsaw, Mrs. Jas. Bestard, North Monaghan, Mrs. Lapworth, and Miss L. Garlick, Germantown, Philadelphia, Mrs. F. Barrett, Rochester, Mrs. Robeson, Gananoque, and Mr. Geo. Garlick, North Monaghan. Two sisters and one brother of the deceased are living in the old country, while one brother, Mr. John Clemens, Yeo, and one sister, Mrs. J. Saunders, of Dummer, also survive her.

The funeral will take place from her late place of residence, lot 13, concession 12, North Monaghan, on Sunday, and proceed to the Warsaw cemetery.

THE SOCIAL WORLD.

Interesting Personal Items Gathered by Reporters.

Mr. W. J. Green leaves on the 5.10 train to-night for London.

Miss Sabin, of Coe Hill, is in town visiting friends and may remain here.

Mr. W. Jayes, son of Mr. J. Jayes, is down from Toronto visiting his parents.

Mr. and Mrs. W. Harstone of Roseneath, are the guests of Mrs. W. J. Green, Brock street.

Mr. R. W. Scott, Mayor of Listowell, with Mrs. Scott and family, are visiting at his brother's, Mr. Wm. Scott, Ashburnham.

Mrs. J. A. Aylmer has returned to Gamebridge after spending a few pleasant days in town, the guest of Mrs. R. S. Davidson.

Mr. Will Brooks and wife of Round Lake, have returned home after spending a few days with their cousin Mrs. J. Hooey, Edinburgh street.

Mr. A. D. Towle, town, has returned from Ottawa, and other cities, where he has been having a successful season attending the big fairs with his electric machines.

Mr. John Brooks, of Round Lake, formerly of Saginaw, Mich., is spending a few weeks with his niece, Mrs. J. Hooey, Edinburgh street. It is 20 years since he has visited Peterborough and no doubt sees a great change in the place.

NEWS NUGGETS.

—The Charity Board will have a meeting on Monday night.

—The Legal Committee of the town council will meet on Monday night.

—Piano tuning promptly attended to. Satisfaction guaranteed. A. F. Hoover. 'Phone 199.

—Enlarged photos and sacred picture frames are specialties at the "Framery," 428 George street.

—Regular meeting of Typographical Union, No. 248, will be held this evening at 8 o'clock. All members requested to attend.

—The Smith street bridge will be closed on Monday morning, and will remain closed for a few days while repairs are being made.

—After September 30th the steamer Esturion will discontinue her double trips between Bobcaygeon and Lindsay. After that date she will make only one trip daily.

—The Trusts and Guarantee Company, Limited, Toronto, has been appointed executor of the estate of Thomas McLean, senior partner of the firm of McLean, Ogilvie and Lockhead, drygoods merchants of Brantford. Mr. McLean, who was a prominent business man in Brantford, left a will appointing the company his executor and trustee. The estate amounts to about $45,000.00.

MURRAY STREET MISSION BAND.

Annual Meeting Held Last Night—New Officers Elected.

At the annual meeting of the Murray street Baptist church Mission Band, held in the school room last night, there was a large attendance, the school room, which was prettily decorated for the occasion, being well filled. Mrs. Dr. Scott presided.

The report of the Nominating Committee was read by the Secretary, Miss Ada Bradshaw, after which the election of officers took place, resulting as follows:

President—Mrs. G. K. Martin, (re-elected.)
Vice-President—Mrs. Bastow, (re-elected.)
2nd Vice-President—Miss Croly.
Treasurer—Miss Ella Cochrane, (re-elected.)
Secretary—Miss Ada Bradshaw, (re-elected.)
Organist—Miss Vieva Hunter, (re-elected.)
Executive Committee — Bessie Elcome, Minnie Ellis, Luther Cross and Wilbert Yelland.

On the conclusion of the transaction of business the following programme was given:

Chairman's address ... ...Mrs. Dr. Scott.
Scripture reading...Miss Edna Yelland
Secretary's report...Miss Ada Bradshaw
Treasurer's report...Miss Ella Cochrane
Recitation... ... Miss Mabel Brooks
Song, "Abide with Me...Francis Routley
Recitation... ... ...Miss Florence Scott
Address...Miss Lough, assistant secretary Y.W.C.A.
Song... ... ...Miss Emily Quiller
Exercise, "Canada, Little Children," Members of the Band
Recitation... ... ...Miss Gladys Yelland
Reading, "Lent to the Lord"...Miss Muriel Martin
Recitation... ... ...Miss Annie Whelm

The secretary's report showed that there were 93 names on the Mission Band roll, and that $82.12 had been raised during the year, this being an increase of $36.00 over last year's amount.

AN IMPORTANT SCIENTIFIC DISCOVERY

Made by Dr. Lane President of the Executive of the Ontario Association of Medical Health Officers.

Dr. Lane, the portly and popular president of the executive of the Ontario Association of Medical Health Officers, is justifying his selection of president made at the recent meeting in Peterborough. He is pursuing his scientific researches and has succeeded in discovering in the waters of the St. Lawrence, a new microbe, a new form of colon bacillus of the benign character. It is the intention of the doctor to make an heroic experiment in the interests of science. The new bacillus will be introduced into the intestinal tract with the confidence scientific knowledge gives that no evil results will follow. The other day he was fishing in the St. Lawrence, when he hooked a fish said to be entirely new in those waters. Upon examination by experts it was diagnosed as a salt water salmon. The name proposed for this new discovery is the salmococcus Lanel.

REV. J. G. POTTER ORGANIZES GUILD.

A Society of Young Men Instituted at Barrie.

Rev. J. G. Potten is attaining a provincial reputation for his success in connection with Young Men's Guilds, and is in demand wherever such a society is being formed. The Barrie Examiner speaks of his visit to that town as follows:—

"A meeting was held in the Presbyterian church, on Monday evening to consider the formation of a Young Men's Guild. Rev. J. G. Potter, in whose church in Peterborough such an organization has been very successful, gave the meeting a very interesting account of the sort of work done by it and the success it achieved. A Guild was formed with thirty members and the following officers were elected:—President, J. J. Gibson; Vice President, J. A. MacLaren; Secretary, T. R. Black; Treasurer, Geo Brown."

LAKEFIELD FAIR.

The annual exhibiton of the Township of Smith & Ennismore and Village of Lakefield Agricultural Society will be held in the Society's grounds, in Lakefield, on Tuesday and Wednesday, Oct. 6th and 7th, 1903. This Fair is now open to the province and the directors are doing all in their powur to have a successful exhibition. Prize lists, entry forms, etc., can be obtained by applying to the Secretary, W. Sherin, Lakefield. 3d1w

POLICE COURT

The unusual spectacle of two women, charged with being drunk and disorderly was seen at the Police Court this morning. It is assumed the homes were in the same condition This too frequent absorption of stimulants of a highly intoxicating ability cost one of the accused $5.35 and the other $6.15. The women came rushing up to the reporters asking for the withholding of their names from the papers and offering "filthy lucre" in exchange. The reporters, however, not liking to price the reputation of the "drunks" consequently refused the money, but nevertheless had compassion.

Now is the Time

ST LUKES FESTIVAL COMPLETE SUCCESS.

Thanksgiving Festival was Held Last Night.

Sermon by Rev. Canon Sweeney D. D. of Toronto—Church Beautifully Decorated.

St. Luke's church last night was well filled on the occasion of the annual Thanksgiving Harvest Festival, and the service was in every way appropriate to the spirit of the gathering. It was indeed a service, of which the keynote was thankfulness, and the hearty manner in which the congregation joined in the responses, of which praise and thanksgiving were the theme, showed that it was in reality a service of thanks.

Some of the reasons for thanksgiving were suggested by the decorations seen in the church. The products of the field, orchard and garden were displayed in artistic profusion, and it certainly must have seemed fitting to render thanks for the gathering in of a plentiful harvest, when the heads of golden grain, with all the other evidences of nature's bounty, were seen.

The decorations, which had been placed in position by the ladies of the congregation, were very beautiful, and represented many hours of labour. At the entrance to the church the porch was liberally adorned with a pleasing combination of flowers, grain and fruit, large stalks of grain and rustling corn nestling in the corners. Just inside the door the screen was fringed with ripened oats in the straw, and was arranged to produce a very pretty effect. Then on the scarp of each window were heaped flowers and fruit, making a very effective combination. The altar and pulpit also shared in the general scheme of decoration, and were literally a mass of flowers. The whole plan was one admirably thought out and showed that it was the result of an artistic taste. The ladies of St. Luke's may well feel a pride in the result of their labours.

The music, too, was a part of the service which was particularly enjoyable. The choir was a strong one, and, in the anthem, "O Clap Your Hands Together," sang well. The solo was taken by Mr. Jos. Legg, and in it he fully sustained his reputation as a soloist. The especially pleasing feature of the musical service, however, was a solo by Mrs. K. Eardley Wilmot, who sang "Hosanna," by Gainier. This was a distinct musical treat. Mrs. Wilmot, who possesses a remarkably clear, rich, mezzo-soprano voice, had in the "Hosanna" a selection to which her voice was admirably suited, the pleasure of listening to which was accentuated by her perfect ennunciation, and the particularly well-conceived idea of proper expression.

The sermon was preached by Rev. Canon Sweeney, D.D., St. Paul's church Toronto, and assisting in the service were Rev. J. C. Davidson, of St. John's; Rev. W. L. Armitage, of All Saints; and Rev. Rural Dean Warren, of Lakefield, with the pastor, Rev. E. A. Langfeldt.

Prefacing his sermon, Canon Sweeney spoke a few words referring to the cause of Missions, to which the offering of the evening was to be devoted. The church in Canada is aiming to raise $75,000 this year for this branch of the work and he urged the parishioners of St. Luke's to sustain the reputation which they had made for themselves: that of being very generous in their support of the missionary cause.

Canon Sweeney's sermon was one very appropriate to the occasion, the subject of it being "Thanks Living," and the text in Psalm xxxiii, 1, "Rejoice in the Lord, O ye righteous, for praise is comely for the upright." The preacher said that the Psalms are full of prayer and praise, and that these two, with thanksgiving, comprised a trio, which was invariably found in all the ancient Scriptures. The same emotions characterized the hymns of the church, and he cited the "Te Deum" as an example. The spirit of thanksgiving should, he said not be merely from the lips, but should be evidenced in our lives. His topic "Thanks-living," was a word which was larger, grander and more embracing than Thanksgiving, because it includes all the emotions that influence our lives.

He spoke of (1) what thanksliving does, and (2) what it does not.

It realizes the personal relations of God to the creatures of His hand.

He called attention to the difference of the belief in God held by the Christian church and that of the heathen. The latter have the idea that God is a being who is to be dreaded, and one who wreaks His vengence and wrath on the people in the form of thunder bolts, in contradistinction to which was the idea held by the Christian that God is a "Father," and not far off; one who opens His hand and supplies His children with all things necessary for their well-being.

Thankskiving also makes us venture upon the Divine Adviser, and enables us to depend in providence and not worry

Speaking of the things which Thankshiving does not do, he said that it does not ascribe to whim or chance, the conditions in which we find ourselves, but attributes it to God. There is no chance, because God rules over all, and directs all. Neither does it divorce the two worlds in which God moves. Wherever we are, we are still in part of His creation. He urged his hearers to see how they stood on this question of Thanksliving, whether they were more thankful now than they were a year ago. If we are truly thankful, this will be evidenced by a d esire to express it. Thanksgiving should be brought into the smallest detail of human life, and should influence thought and action.

Canon Sweeney's sermon was a scholarly effort, and was at the same time very practical.

The Rector asked for an offering of $50 for missions, the amount to be used entirely outside of the parish, and the congregation displayed its generous disposition by contributing $50.00, which amount will be supplemented by the offering on Sunday morning, which will also be devoted to this cause. The Rector is much pleased with the unselfishness of his congregation.

Mr. Armstrong, the organist, assisted very materially in the success of the Festival, and his work in accompanying Mrs. Wilmot in her solo was freely remarked upon.

The service, in its entirity was a complete success, and as such was most satisfactory both to the Rector and the congregation.

A PLEASANT DANCE.

Held in Foresters Hall Last Night, as a Farewell Party.

A very enjoyable dance was held in the Foresters' Hall, Simcoe street, last night, arranged as a farewell to Miss Eileen Rogers and Misses Sybil and Helen Stethem, who are leaving town. The dance was attended by between ninety and one hundred young people, all of whom thoroughly enjoyed the evening. The ladies chaperoning the dance were Mrs. C. B. McAllister, Mrs. J. Crane, and Mrs. A. W. Spence.

The music for the evening was provided by the Misses Hurley, and was of a high order of merit. Dainty refreshments were served to the party by Mr. Harry Long in his usual style.

A pleasant feature of the assembly was the presence of a number of young people from out of town, who are visiting here

FALL ASSIZES.

Only one Case for Hearing and That Transversed to the Spring Assizes.

The only case set down for the Assizes which open here on the 28th is the libel suit of Kearns vs. Ireland-Stratton. The result of certain comments made by the plaintiff and the defendant during the last provincial general election. The former seeks $15,000 damages each from Mr. Ireland, Inspector of Licenses, Muskoka and Hon. J. R. Stratton.

The defendants practically plead justification. The case, however, has been set over until the Spring Assizes owing to lack of proper notice to the defendants.

Since the above was in type, at a conference between the respective solicitors and parties concerned, an amicable settlement of the suit was arrived at.

OBITUARY.

Mrs. Wm. Quinn Formerly of Peterborough Died at Sarnia.

The following taken from the Sarnia Observer refers to the death of Mrs. Wm. Quinn, wife of Mr. Wm. Quinn, formerly district manager of the Bell Telephone Company, with headquarters at Peterborough. Mrs. Quinn's many friends here will learn with regret of her death. She was a sister of Miss Rachel Moscript, late of the Richard Hall & Son, staff.

Universal expressions of sorrow and sympathy were elicited on Wednesday last by the announcement of the death of Mrs. Quinn, wife of Mr. Wm. Wm. Quinn, manager of the Bell Telephone Co.'s office here, which took place at St. Margaret's Hospital on Wednesday morning of typhoid fever. Mrs. Quinn was taken ill some three weeks or so ago, and, her case appearing serious, she was removed to St. Margaret's hospital for treatment. But all that professional skill and care could do was unavailing, and Mrs. Quinn passed away as above stated.

Mrs. Quinn was a native of Milwaukee, but was brought up in Peterborough, where she was married to Mr. Quinn eight years ago. Mrs. Quinn was a lady of most engaging qualities and amiable disposition and had made a host of friends during the four years of her residence in Sarnia. She was in her 33rd year, and leaves to her husband the care of three children, two sons and a daughter. The funeral took place on Friday last to Lakeview cemetery, and by a sad coincidence, occurred on the anniversary of her wedding day.

The pall bearers were A. J. Chester, Wm. Smart, S. E. Cornell, D. W. H. Lucas, H. A. Couse, and W. E. McKelvey. The service was conducted by Rev. Mr. Eadie.

Canada's Enterprise.

Commenting on the Trent Valley Canal and other inland waterways in Canada, the Buffalo News says:—"While a large portion of the citizenship of New York is engaged in opposing canal construction on the ground that it is not sufficiently modern, the citizens of Canada, wiser in their day, though not more experienced than those in this state, are pushing by all means in their power to gain control of the traffic of a continent by furnishing it barge ways through their territory. It means wealth all along the way. Canada is getting the business that her enterprise justly commands."

Is Your Piano in Tune?

The change of seasons affects pianos as well as everything else. Mr. Geo. Gumpricht, practical piano maker and tuner, with twenty-eight years' experience, attends to all orders left at Mr. H. S. Macdonald's drug store.

THE CHURCHES.

ST. JOHN'S CHURCH.

The services at St. John's to-morrow will be conducted by the Rector, Rev. J. C. Davidson, and will be the regular services.

CHARLOTTE STREET CHURCH.

The pastor, Rev. W. J. Jolliffe, will conduct both services to-morrow. Morning subject—"Forgetting the past." Evening subject—"How we may know the doctrines of Christianity are true?" Miss Belleghem and Mr. E. A. Frowde will sing solos. All are welcome.

Morning—Anthem, "The Lord is My Light," Earle; Solos by Miss Belleghem and Mr. Davis.

Solo, "My Redeemer and My Lord," Dudley Buck, Mr. A. Frowde.

Evening — Anthem, "Sun of My Soul," Holden, Solos by Miss Belleghem and Mr. Mitchell.

Solo, "Abide With Me," Lidale, Miss Belleghem.

GEORGE STREET METHODIST.

The services to-morrow will be conducted by the pastor. In the afternoon, Rally Day exercises will be held in the Sunday School, the session of which will be addressed by Messrs. Dumble, Armstrong and Kidd. A portrait of Dan Spence, presented to the School by Mr. Geo. Whiton, will also be hung. Last Wednesday was the anniversary of Dan Spence's death and the Sunday School of which he was a member, will take this means of remembering him.

ST. PAUL'S CHURCH.

To-morrow being Children's Day, there will be special children's service at 11 o'clock. Rev. J. A. Wilson will preach.

Service at 7 p.m. will be conducted by Rev. Dr. Torrance.

ST. PAUL'S MISSION.

Rev. Dr. Torrance will preach in the morning and Rev. J. A. Wilson in the evening.

GEORGE STREET METHODIST.

Mrs. Mowat will play by request the organ voluntary "Jerusalem the Golden," at the evening service at George street church to-morrow.

ST. ANDREW'S CHURCH.

The Rev. J. G. Potter will preach in St. Andrew's both morning and evening. At 11 a.m., subject, "The Relation of the Spiritual to the Worldly Life;" 7 p.m., subject "A Great Modern Problem—a Lesson for every Home." Miss Bryce will sing at both services. At 3 p.m., a pleasant afternoon service has been arranged for the families and friends of the church to which all parents and children are invited. Solos will be rendered by Mr. E. A. Froude and Miss Bryce. A cornetist will assist the church organ in the leadership of praise.

MURRAY STREET BAPTIST.

The pastor, Rev. J. Bastow, will conduct the services to-morrow. The subject of morning sermon will be "Our duty to the Church," while at the evening service the pastor will speak on "Reconciliation." The public is cordially invited.

ST. LUKE'S CHURCH.

The Harvest Festival will be continued to-morrow, and the special music will be repeated.

In the afternoon at 3 o'clock a Harvest service will be held for the Sunday School children. Rev. H. W. Langfeldt will officiate at all services.

PARK STREET BAPTIST.

Rev. L. McKinnon, of the Gilmour Memorial changes pulpits with the Rev. A. H. Brace at the Baptist church, Park street, for morning and evening to-morrow. Seats free. Short hearty service. Hymn books provided.

MARK STREET CHURCH.

The services to-morrow at Mark street Methodist church will be taken by Mr. G. H. Williamson in the morning, and Rev. Mr. Kilgour in the evening, in the absence of the pastor at Round Lake.

Scotch Bulbs, Hyacinths, Tulips, etc. French Bulbs, Narcissus, Daffodils, etc. Six cases direct from growers. Prices low, Bulbs No. 1. Come and see.—F. Mason, 406 1-2 George and 440 Water streets.

GENERALLY SPEAKING

A SPLENDID START has the Peterborough Industrial Fair made, and the success that has been accomplished proves that a purely agricultural exhibition can be made attractive to the public, without the aid of side show effects. The management of the "First Industrial Fair drafted a new programme, with a view of realizing the fundamental object of exhibitions — the presentation, under proper conditions, of a healthy and legitimate competition between farmers and stock growers, with such rewards for superiority, as would constitute, at least, a reasonable sort of indemnity. While the capture of a money prize should not be made the chief incentive, this should be sufficiently substantial to be worthy of the animal represented. The exhibition of inferior stock has no educative value, hence the imposition of an entry fee had the effect of attracting stock which could hold its own in almost any competition. The consequence has been that this year there has been some of the best stock present ever shown on any grounds in this district. True, the number of entries was not large, but under similar conditions, this fault will be remedied in the future, when exhibitors see that the management appreciate the presence of good stock, and offer liberal prizes, promptly paid in full. The future will look out for itself.

THE PRESENCE of so many outside exhibitors shows what success has met the aims of the management to make the Peterborough Industrial something more than a local affair. With our splendid facilities for transportation, the centre of a fine farming district, and with the continued application of energetic and enterprising methods, there is no reason why the Peterborough Industrial should not develop into one of the most important fairs between Ottawa and Toronto.

BUT TO REACH THIS, we must have good, live management, and the earnest co-operation of all the elements that would benefit by a first-class fair. Primarily, the object is the benefit of the farming and stock growing industry, but the town's people have an equal interest. There is not only the direct profit represented by the presence of thousands of visitors in town for two or three days, but the benefit of the farmer is to the advantage, not only of that class, but of all the interests of his market town—the shops where he purchases his wares, the banks where he does his business, and all with whom he deals. The closer these two great classes can be brought together, the better for both.

THE RECENT FAIR has shown these two elements working together harmoniously, and with gratifying results, the officials and Board of Directors being of a very representative character — the banker, the business man, the farmer, the merchant, and the manufacturer, all pulling in harness together.

THE FINE SPIRIT of co-operation thus shown, has had a very encouraging outcome, which can be bettered. To this end we must have a continuance of energetic and enterprising management. The last Fair presented lessons which must be taken to heart, and the mistakes incident to all human undertakings must be avoided. Faith must be religiously kept with the public; promises made to the public must be met as promptly as a note in the bank. If the public are assured that good and sufficient meals and other provision for their comfort and convenience will be available, this must be done. This is but a type of the care that must be used.

THIS LEADS up to the fact of the necessity of the best possible administration on exhibition days. Bad management only shows itself in little matters of friction and ill-feeling, perhaps not much noticed at the time, but little seeds that may ripen into a crop of trouble for another year. There should be perfect organization. The result of forethought and consultation. Every officer should have a definite duty, and special place, and do that duty, and fill that place faithfully. The running of an exhibition is not like a clock that can be wound up and will run itself. Still an exhibition is like a clock—it will stop if allowed to run down.

THE INDUSTRIAL FAIR directors have done well this year. But if they expect to repeat the bill in 1904, they must begin now to prepare for next year. Every director should consider himself on duty till he is re-elected or his successor is appointed. He should talk Industrial Fair from now till next September. When the directors meet to square up this year's work—to balance the ledger—the little mutual admiration society meeting, we may properly expect, should resolve itself into a conference on ways and means, and work for next year should begin.

IF THEY HAVE made a success this year they have a better chance for next—they can profit by their little mistakes and experiences, and the conditions will be better. By that time we should have a street railway running. If it had been in operation this week the directors would have had a good deal bigger bank account. And they start this year with a solid credit balance, a good name and everything favourable, if conditions are wisely used, to make next year's Industrial Fair a big advance on the very creditible record of this.

BUT THERE WILL have to be a lot of hard thinking and prompt action.

THE TOWN COUNCIL, the County Council and the public generally, are as much interested as the directors. The better Peterborough Industrial Fair can be made, the better for all. Considerable improvements to the grounds and conveniences are needed, and it's not a day too early to begin now to think matters out. The winter wheat which will take first prize next September is sown already. We send the sluggard to the ant for a lesson. Why not send the directors and the friends generally of the Peterborough Industrial to the farmer who begins at the end of one harvest to prepare for the next.

THE Coldstream Guards' Band is to the world what the 57th Band is to Canada, if not the best, one of the best. A man would better appreciate the good wife who sits at the head of his table every day, if he had to send out to some other house to get a good wife to tidy his house and make him comfortable. We should appreciate our band better if we had to send to some other town for good exhibition music, as other towns are doing with our band—which is engaged to play at the Bowmanville and Norwood Exhibitions.

BOWMANVILLE FAIR.

This Year's Exhibition Intended to Surpass Former Shows.

The Examiner acknowledges complimentary tickets for the West Durham and Darlington Exhibition to be held at Bowmanville, the directors of which are determined, with fine weather on Oct. 6th and 7th, to make this year's exhibition a record breaker. They are paying $150 for attractions and besides the four Government expert judges they are bringing professional judges from Toronto and elsewhere. They are trying to eclipse the Model Fair. As a stock show they claim to have surpassed it last year. This year they say will be better. The 57th Regiment band has been engaged for two days, Tuesday night's concert, Wednesday afternoon and Wednesday night's grand concert. Durham Old Boys' Re-union is announced for Wednesday, Oct. 7th, the big day of the fair, when a crowd from Toronto and elsewhere is expected. Single fare for return ticket on G.T.R. from any station within 25 miles of Bowmanville, good going Oct. 5th, 6th and 7th and to return up to night of 8th. Thousands of dollars' worth of Thoroughbred stock will be offered for sale. Buyers come from great distances, such a reputation Bowmanville fair has for splendid stock.

—Large quantities of marl are being taken to Lakefield by train each day.

BOYS' WORK.

Conference Held Yesterday at the Y. M. C. A.

The visit of Mr. E. M. Robinson, of New York, Boys' Secretary for the Y. M. C. A.'s of North America, to the Peterborough association yesterday will result in greatly strengthening the local boys' department and the information imparted by Mr. Robinson's addresses being remembered by those who were privileged to hear him.

Mr. Robinson is a native of Nova Scotia and is no doubt the best posted on boys and boys' work of any man on the continent.

He may be properly called a specialist in his line, as one soon finds out after listening to him for a short while, for he is full of his subject.

The ladies' meeting at three o'clock in the parlour was very largely attended, and Mr. Robinson's main point was the proving by means of charts and very valuable data that the most critical period of a man's life was from twelve to eighteen years, being the very ages at which the Association strives to reach him and throw about him character-forming influences. The task of prevention, though not as particular was better than that of rescue. The criminal classes were recruited from the ranks of those of the adolescent age.

After speaking of the strong boys' work in Peterborough, Mr. Robinson said that the department was really responsible for the thousand or more boys of the town and should be reaching a much larger number of them—which it could do with a greater expenditure of work and money.

At the close of the afternoon address Mrs. Jas. A. Hall offered prayer. Mr. Williamson, secretary, presided at the meeting.

The conference for men interested in boys' work began at 4.30 and continued until 9 o'clock when Mr. Robinson was obliged to leave for Sherbrooke, Que., where he holds a conference to-day.

At six o'clock the ladies provided a very enjoyable tea, Dr. W. D. Scott, presiding.

The conference was continued in the evening and was attended by a representative business men, teachers and others interested in boys.

The discussion centred on the part the boys, themselves, were to do in working out the plans of the boys' department.

The Zans Psychic-Phrenologist and Palmists. Hotel National. Readings 9 a. m. to 8 p. m. Rooms 44 and 45.

Y. W. C. A. NOTES.

The anniversary services of the Y. W. C. A. will be held Sunday afternoon at 4.15 p. m. Miss A. C. Macdonald, B. A., will speak and Miss Carolyn Hall will sing.

On Tuesday evening, Sept. 29th, the formal opening and educational rally will be held. A good program and social evening will be provided and Miss Macdonald, travelling secretary, for the Dominion Council, will speak. All young women and those interested in association work are very cordially asked to be present at both meetings.

Miss Edith Moodie, physical directress will return to Peterborough Tuesday, and is prepared to arrange for classes on and after September 29th. Miss Moodie has been continuing her studies along the line of medical gymnastics, paying special attention to the important branches, and has of late been teaching in the Children's Hospital, of Boston. Classes will be arranged for morning, afternoon and evening.

Miss I. Fisher has been appointed assistant secretary and either she or the general secretary will be found in the rooms during the office hours, 9.30 to 12.30; 1.30 to 6.00; 7.30 to 9.30. The secretaries will be very glad to welcome to the rooms all young women and friends of the work.

There will be a meeting of the board on Monday afternoon at 3.30, which will be preceded by a bible study reading given by Miss Macdonald at 3 p. m.

Kidney-Wort Tablets

Are Free From Alcohol and Other Injurious Ingredients.

They Positively Cure.

If you have just discovered the first symptoms of deadly kidney disease, we warn you to shun all liquid kidney preparations for the good reason that they are largely composed of alcohol. Such medicines are poisons to the kidneys and urinary organs and hasten death.

When you are convinced that the symptoms you experience pertain to kidney disease, make immediate use of Dr. Pettingill's Kidney-Wort Tablets; they will free you from danger and suffering. They bring relief and cure when physicians fail. Price 50 cents a bottle or six bottles for $2.50. Guaranteed by all druggists.

FURNITURE SALE

GUILTY OF MANSLAUGHTER.

Oliver Richardson Sentenced to 15 Years at Kingston.

Windsor, Sept. 26.—"Guilty of manslaughter" was the verdict returned by the jury in the case against Oliver Richardson for the murder of his colored neighbor, Edmund Matthews. The jury deliberated an hour, one of the jurors holding out for a verdict of murder. Chancellor Boyd immediately sentenced the prisoner to fifteen years in the Kingston Penitentiary. Richardson wept bitterly when sentence was pronounced. The verdict was received with satisfaction by the white people, but the negroes declared openly that Richardson would have been found guilty of murder had he killed a white man.

Spoiled a Pugilist.

The Bishop of Manchester, whose fighting speeches in the House of Lords on the Education Bill were so much commented on, was in his youth a skilful boxer. He tells a tale of how, when he was young, he had a cousin at Harrow, a sixth form boy, who prided himself very much on his boxing. The bishop was persuaded by the lad to put on the gloves and test his skill. The result of the contest was that the Harrovian was soon vanquished, when he remarked admiringly: "It is a pity you are a parson, you would have done for the ring."

TISSUE BUILDING.

Tissue building practically means the development of the body generally, and is consequently a matter of the first importance. A man's hapiness as well as his usefulness in after life depend largely upon a healthy development of every part of his body. Given an absolutely healthy parentage, a life "near to nature's heart," with proper diet and nature may be depended upon to produce a well developed man, but all these conditions rarely exist and nature requently requires assistance.

For an all round tissue builder nothing yet discovered by science compares with FERROL which contains in a palatable and readily assimilated form all the constituents necessary for the perfect development of flesh, muscle, bone, nerve and brain.

In infancy and childhood when tissue building is most active, FERROL can always be depended upon to produce splendid results. Children like it and it always agrees with them.

RUPTURE

Forty years' successful treatment of Rupture has given us the experience that enables us to do for you more than any other firm can do.

WE SUCCEED WHERE OTHERS HAVE FAILED.

We can fit you with a truss that will retain your Rupture under all conditions.

When we say, your money back if not satisfied we mean just what we say.

MORGAN MAY BUY.

Hopes to Secure Control of Canadian Markets For Steel Trust by Bidding in Soo Works.

New York, Sept. 26.—In spite of the story that Vickers & Maxim are negotiating to buy up the Soo works, the impression grows there that J. Pierpont Morgan and his steel trust will gobble up the Canadian properties.

Now, it is said, that at the auction sale on Oct. 1 the United States Steel Corporation will be on hand with the millions necessary to secure the property, and with so little opposition that the trust will have made itself stronger than ever. Even Francis H. Clergue, the original promoter of the "Soo" enterprises, now is accused of working in the interests of the Steel Corporation, and his sudden disappearance from the "Soo" is construed by many to confirm this idea.

The immediate advantage of the securing of the Consolidated by the trust would be the gaining of control of the Canadian markets. Just at present the Grand Trunk and Canadian Pacific are heavy buyers of steel rails. With the preferential tariff the American mills of the steel trust cannot compete with rails made on the Canadian side. Therefore it is important for the trust to have mills across the border. The foreclosure under the debt due Speyer & Co. in this city will not be unopposed.

A Philadelphia director of the steel trust, Mr. Widener, has said that it is necessary that the trust should seek foreign markets. Canada is a foreign market which, so far as steel rails go, it is quite possible to capture entirely.

The reason the Soo company never was able to sell steel rails to the Canadian Government in quantity was due to the fact that it never was able to give all that was wanted. Consequently the Canadians had to import from the United States. If the steel trust takes the Soo properties it will be able to overcome this physical difficulty and give the Canadian roads all the rails they need, and, by having the preferential tariff raised, completely shut out all rails from the United States.

The Canadian legislators undoubtedly would aid to make the Soo a strictly Canadian industry by raising the present slight tariff on rails.

Cabinet Met.

Ottawa, Sept. 25.—The Cabinet met yesterday and considered the situation at the Soo. The question will be again taken up to-day. It was admitted that the Government had endeavor?d to devise protective measures.

In the Senate last night when the bill respecting iron and steel bounties was under discussion, Sir MacKenzie Bowell said that if the duties had been increased instead of a bonus being given, the Soo works would not be closed to-day.

Gun Makers Want It.

Toronto, Sept. 25.—It was stated yesterday that representatives of the Vickers-Maxim Corporation, gun manufacturers, are negotiating for the purchase of the Soo industries.

Mr. James Bicknell of Laidlaw, Kappile & Bicknell, left yesterday for the Soo to take possession of the properties of the Lake Superior Consolidated on behalf of Speyer & Co., who hold a mortgage for $5,050,000.

Was Hovering Between Life and Death

A few days trial of Lactated Food will convince any intelligent mother that it is the right form of nourishment for her weak and puny baby. No other food can give such prompt and happy results at a time when the little one is hovering between life and death. A Montreal lady last August wrote as follows: — "My baby was so weak and sickly a few weeks ago that we despaired of her life. We tried nourishment of every kind, but could not get anything to remain on its stomach. We heard of Lactated Food, and commenced its use. There was an improvement the very first week, and to-day our baby is well and strong. Lactated Food saved her life." Sold at all Drug stores.

Kossuth Revolt Possible.

London, Sept. 25.—The Daily Mail's correspondent at Berlin telegraphs the sensational statement that there is a possibility of a Kossuthist revolution in Hungary. He says that as a result of the German Emperor's visit in Vienna, Germany has promised to assist Austria with troops should Austria face the necessity for sending an army to Macedonia and simultaneously of suppressing a Hungarian revolution.

Stormy Scenes in the Diet.

Budapest, Sept. 25.—The session of the Diet yesterday was marked by stormy scenes, which became so boisterous as to necessitates it's suspension. Barabbas, a member of the Kossuth party, went so far as to say his party no longer believed the statements of the Emperor-King, Francis Joseph.

Monkey Brand Soap removes all stains, rust, dirt or tarnish — but won't wash clothes. ad

TURKEY'S SINCERITY

Reply to Bulgarian Note Regarded As Manoeuvre.

ATTITUDE OF THE POWERS.

Macedonian Revolutionary Committee Have, It is Alleged, Fomented a General Uprising by Methods of Outrage and Terrorism—Six Hundred Turks Killed in an Encounter at Kotchani.

Paris, Sept. 25.—The French Foreign Office official's doubt the sincerity of the Porte's reply to the Bulgarian note, believing it is merely a manoeuvre to impress the powers with the idea that Turkey is doing her utmost to effect a settlement before going to war. A similar impression seems to prevail at Sofia, since Bulgaria, in answering, requires Turkey to cease mobilising, stop the massacres and withdraw her troops from near the frontier before she will consider the proposals.

Attitude of Powers.

St. Petersburg, Sept. 25.—The Russian Government has issued an official note reiterating that the attitude of the powers in regard to the Austro-Russian reform scheme for Macedonia is unchanged and that consequently neither Turkey nor Bulgaria can expect support from any quarter in the event of open or secret resistance to that scheme. The note adds that the Macedonia revolutionary committees have fomented a general insurrection by methods of outrage and terrorism which has brought upon the Christians in the Turkish vilayets grievous oppression which will only end when the incursion of insurgents from Bulgaria and the activity of the committee cease.

Six Hundred Killed.

Sofia, Sept. 25.—According to a telegram received here yesterday from Kostondil, six hundred Turks were killed in a fight at Kotchani on September 18th. The Turkish force numbered 7,000. After the fight the troops, enraged at their losses, pillaged and burned a number of Bulgarian villages.

Hold Their Positions.

Constantinople, Sept. 25.—The battle of Krasna Pass, according to the latest advices received here, is still in progress. The insurgents are successfully holding strong positions and their casualties are light, only a score being killed or wounded, while the Turks, up to the present, have lost five officers and 320 men killed or wounded.

APPENDICITIS.

Increase of this Terrible Disease Charged up to Indigestion—Dodd's Dyspepsia Tablets the one Sure Preventive

So eminent an authority as Dr. Sir James Crichton-Brown has declared that Appendicitis, the terror of the present age, is caused by Indigestion. In a lecture delivered recently in London, England, he said:

"The increase of Appendicitis is largely due to Indigestion resulting from imperfect mastication and the hurried methods of living."

In plain words this means keep you stomach right and you need have no fear of Appendicitis. And Dodd's Dyspepsia Tablets will make and keep the stomach right. That's the experience of eveyone who has used used them. Hene Trudel, a student of Three Rivers, Que., says:—

"I had Indigestion so badly that I was discouraged and had resolved to give up my studies when an advertisement induced me to try Dodd's Dyspepsia Tablets. They made me better. To-day I have no headache, no pain, no weariness. I am cured."

Take these two statements together and they prove conclusively that Dodd's Dyspepsia Tablets are the one sure safeguard against Appendicitis.

DESPERATE AFFRAY.

One Man Killed and Two Wounded in Attempted Hold-Up of Express on Oregon Railway.

Portland, Oregon, Sept. 25.—The Atlantic Express on the Oregon Railroad and Navigation Line, was held up by four masked men near Corbett Stage. One of the robbers was shot and killed and another seriously wounded, while the engineer was wounded by a bullet from the express messenger's gun, after passing through the heart of the highwayman. The two other bandits escaped without any booty.

Two of the robbers boarded the train at Troutdale, and as soon as it started crawled into the cab and covered the engineer and fireman with guns. They stopped the train near Corbett, where the second pair of highwaymen joined them. The robbers then started for the express car, and, mistaking the baggage car for the express, threw sticks of dynamite at the doors. Express Messenger Kerner heard the explosion and opened fire and killed one robber, the bullet passing through his heart and wounding Engineer Barret over the heart. After the shooting the three robbers made their escape, but later one was found seriously wounded.

The Evidence You Value.

By word of mouth from friend to friend Dr. Chase's Ointment has received more unsolicited recommendations than probably any medicine you can mention. The fact that it is an absolute cure for piles has put it in a class all by itself as a preparation of inestimable value and people recommend it knowing that it is a certain cure.

100 Miles in an Hour.

Berlin, Sept. 25.—Another speed trial of electric traction has been made on the Zossen military road, when 108½ miles was covered in one hour. On the previous trial, Sept. 16, the electric car attained a speed of 106 4-5 miles.

Halifax's Fire Chief.

Halifax, Sept. 25.—The City Council Wednesday evening asked Fire Chief Broderick to surrender his liquor license or resign within ten days. He is the proprietor of a saloon known as "Pat's Place."

WELL AND STRONG.

After Eleven Years of Great Suffering.

A Wonderful Tribute to the Power of Dr. Williams' Pink Pills to Cure Stubborn Diseases.

Proof upon proof has accumulated that Dr. Williams' Pink Pills will cure when doctors, hospital treatment and all other medicines fail. Paralyzed limbs have been restored to strength, rheumatic sufferers made well, weak, anaemic girls and women made bright, active and strong; neuralgic pains banished, and the poor dyspeptic given a new digestion when it seemed almost hopeless to expect a cure. Here is a bit of strong proof that Dr. Williams' Pink Pills bring health and strength after years of suffering. Mr. Louis Brien is a well known resident of St. Didace, Que., and tells of his years of suffering as follows: "Eleven years ago, while working in the bush, I strained myself and brought on terrible pains in my stomach and back, where the trouble seemed to locate. I had frequent fits of vomiting, which caused much distress. Sometimes I could work, and then again for months at a time I would be wholly unable to do anything; but even at the time I could work I was always suffering. At different times I was treated by three doctors, but they were unable to help me. Then I went to Montreal and put myself under the care of a doctor there. His medicine relieved me while I was inactive, but as soon as I attempted work or exertion of any kind, the pains returned worse than before. All this time I was growing weaker and less able to resist the inroads of the trouble. Then Dr. Williams Pink Pills were brought to my notice, and I began to use them. From that time I began to regain my health and by the time I had used thirteen boxes I was once more a well, strong man. The proof of this is that I can do as hard a day's work as anyone and never have the slightest symptoms of the old trouble. I am only sorry that I did not know of the pills sooner —they would have saved me much suffering and money as well."

With such proof as this, that even apparently hopeless cases can be cured, there can be no reasonable doubt that Dr. Williams' Pink Pills will restore health in all cases where given a fair trial. These pills are sold by all medicine dealers or will be sent by mail at 50c. per box or six boxes for $2.50, by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont. See that the full name, "Dr. Williams' Pink Pills for Pale People," is printed on the wrapper around every box.

Separation Ratified.

Montreal, Sept. 26.—At the meeting of the shareholders of the Dominion Iron and Steel Company, held yesterday, the action of the directors sanctioning the abrogation of the lease of the Coal Company by the Steel Company was formally adopted, a stock vote being taken. The shareholders gave the directors the authority to issue second mortgage bonds to the extent of $2,500,000. Of this amount the directors have already subscribed for $1,500,000, and the remainder may be issued later on. At a subsequent meeting of the directors it was decided to declare the annual dividend, which is due Oct. 1.

Killed by Dynamite.

Washington, Pa., Sept. 26.—Dynamite was exploded under the buggy of Contractor Ferguson of the Wabash Railroad, near West Middleton, last evening. Ferguson was killed, and his bookkeeper, Mr. Martin, was badly hurt. Mr. Ferguson had with him the weekly pay for his men, amounting to about $5,000, in a satchel. The satchel is missing. Two men suspected of the outrage have been arrested, and two other suspects are surrounded.

New G.T.R. Bonds.

London, Sept. 26.—(C.A.P.)—Subscriptions are invited for the Grand Trunk's issue of £750,000 of 4 per cent. guaranteed bonds. The stock is issued at the price of £97 10s per £100, £10 on application, £25 on allotment, £30 on Dec. 1, 1903, the balance on Jan 1, 1904. Interest at the rate of 4 per cent. allowed on the above payments, will be paid from Jan. 1, 1904.

Six Months For Theft.

Cornwall, Sept. 26.—A young man from Charlottenburg Township, named J. Turcotte, recently stole a fine brood sow owned by Farmer Ward, Williamstown. He disposed of the hog to a Lancaster drover. Judge O'Reilly sentenced him to six months in Cornwall jail.

Will Round Up the Tramps.

Milton, Sept. 26.—County Attorney Matheson has issued instruction to all Halton county constables to arrest all the tramps whom they can catch, and bring them before magistrates.

Reserve Force.

The healthy body has a certain amount of strength reserved in case of emergency, attacks by disease or unusual physical exhaustion; without this power of resistence a person is an easy prey to every ill that comes along. By enriching the blood and creating new nerve cells, Dr. Chase's Nerve Food keeps the health at high water mark and fills the body with the vigour and vitality that overcomes and defies disease.

Breach of Promise.

London, Sept. 25.—At the Fall Assizes, which open here on Monday next, Miss Ida E. O'Neill, a young lady who resides with her parents in this city, is seeking $5,000 damages from Dr. Silk, a practising dentist here for breach of promise.

Unfurled a Flag.

Woodstock, Sept. 25.—Yesterday afternoon Lieutenant-Governor Clark unfurled a flag at the Chapel street school and gave an address on patriotism.

Report in January.

Dawson, Sept. 25.—The Treadgold Commission will report about the first week in January. The season's output of gold will be $10,000,000.

When you do not relish your food and feel dull and stupid after eating, all you need is a dose of Chamberlain's Stomach and Liver Tablets. They will make you feel like a new man and give you an appetite like a bear. For sale by all druggists.

Against Reciprocity.

Niagara Falls, N.Y., Sept. 25.—At the session of the Farmers' National Congress the Resolutions Committee endorsed resolutions favoring Government ownership of railroads, and a postal telegraph system. Unrestricted agricultural reciprocity with Canada was voted down by the committee.

Standard Cure for Itching Piles.

When Doctors and Surgeons, Medicines and Operations Fail, You Can be Cured by

DR. CHASE'S OINTMENT.

There is always some standard by which the merits of an article are measured. Among ointments the standard is Dr. Chase's. If a dealer tries to sell you any other kind he tries to clinch his argument by saying "This is as good as Dr. Chase's."

Don't be satisfied with substitutes or imitations, for Dr. Chase's Ointment is the only positive and guaranteed cure for every form of piles.

Rev. Wm. Thomas, Bowmanville, Ont., writes: "As a man of seventy years I am grateful to God and to Dr. Chase's Ointment for a cure of piles which had caused me endless annoyance and much misery. The itching and burning was almost beyond endurance, but Dr. Chase's Ointment brought quick relief, and as the trouble has not returned, I have reason to believe that the cure is lasting."

Mr. Duncan MacVicar, Caledonia Mines, N.S., writes: "For a number of years I have been troubled with bleeding and protruding piles. I tried several salves and ointments, which only afford me temporary relief. Sometimes I would be laid off from work for weeks. One day last winter one of your books came into my hands, and after reading the testimonials of Mr. Donald MacLean, of Tarbot Vale, N.S., and Rev. S. A. Duprau, of Belleville, Ont., I decided to give Dr. Chase's Ointment a trial. After using two boxes of this ointment I found myself completely cured. What I suffered from that awful disease would fill a big book. You are at liberty to publish this, as it may be the means of convincing some poor sufferer, such as I was, that there is a cure for piles. To all sufferers from piles in any form I would recommend Dr. Chase's Ointment as the only cure."

Dr. Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box of his remedies. 12

Munyon's Great Work.

"I have had Rheumatism for 17 years, and have been in bed for three months at a time from this terrible disease. I have tried many different doctors and medicines, but they did me no good at all. The pains affected the muscles in my shoulders and neck, and they were in such a chronic, painful condition that I despaired of ever getting well. At times I could not stand on my feet, the pains were so frightful. The first bottle of Munyon's Rheumatism Cure gave me great relief, and the second bottle cured me."—Madame E. Gadbois, 904 Berri street, Montreal.

If you are sick, if you have indigestion, if you are nervous, if your liver or blood is out of order, if you have any kidney disease, if you have piles, or any ailment, ask your druggist for "Munyon's Guide to Health"; it is free and will tell you how to cure yourself for 25c. Thousands of testimonials. 365

THE TOWN OF YAFA.

Famous in History and the Most Interesting Spot in Palestine.

Yafa is a little town that was many times destroyed alike by Jews, Assyrians, Egyptians, Greeks, Romans and Turks. It was to Yafa that Hiram, king of Tyre, sent the cedar wood "in floten" which from there were taken to Jerusalem for Solomon's temple. Jonah sailed from this little town to Tarshish when fleeing from the face of the Lord. It was in Yafa that the humble Dorcas lived her life of good deeds and upon her dying was raised to life by Peter. To this shore the great Richard Coeur de Lion swam, girded in armor, fighting for Christendom, and won a victory for the crusaders over the Arab. Bonaparte left a memory of his cruelty here by his massacre of several thousand prisoners and the poisoning of some persons afflicted with the plague. Simon the tanner's house, where Peter learned that all nations were acceptable before God, is one of the few sights to be seen in Yafa. In the courtyard there is a large well of spring water, and from the roof of the house a most beautiful view of the surrounding country presents itself. Another site of interest in the tomb of Tabitha, which stands in the garden of the Greek monastery, close to an old fountain, among the orange groves and fruit orchards. Of all towns in Palestine, Yafa is one of the most interesting for its antiquity and its strange mixture of the oriental in its most primitive form with European civilisation gradually admitted.

Their Mutual Fervent Wish.

She—I trust, Jack, our marriage will not be against your father's will.

Jack—I'm sure I hope not. It would be mighty hard for us if he should change it.—Town and Country.

Rheumatism..

is Uric Acid in the blood. Unhealthy kidneys are the cause of the acid being there. If the kidneys acted as they should they would strain the Uric Acid out of the system and rheumatism wouldn't occur. Rheumatism is a Kidney Disease. Dodd's Kidney Pills have made a great part of their reputation curing Rheumatism. So get at the *cause* of those fearful shooting pains and stiff, aching joints. There is but one sure way—

THE SCOT IN CANADA

LORD DUNDONALD TALKS TO THE MEN OF GLENGARRY.

Their Place in Canadian History—Debt to Auld Scotia—Bravest of Scotland's Sons, Men Who Helped to Create the British Empire—Tribute to the Macdonells—The Garb of Old Gaul.

The Earl of Dundonald, G.O.C., was the guest of the Scots of Eastern Ontario recently at Alexandria. The address of welcome presented to Lord Dundonald recounted the deeds of his ancestors in British history, and eulogized the General's services to the Empire in the recent South African war.

The General's Address.

After thanking the citizens of Alexandria, the people of the County of Glengarry, and the other prominent Scotsmen present for the address, Lord Dundonald spoke as follows:

"No one could come into this historic portion of Canada, nor could anyone have witnessed what I have seen to-day in this great assemblage without being deeply moved. It is as if a portion of Scotland had been detached and placed down in the middle of the New World, but inhabited by the descendants of the bravest of Scotland's sons, the men who helped to create the British Empire. Fellow-countrymen, your history and your glorious traditions are of romantic and absorbing interests. Your ancestors, after fighting for the ancient and Royal house of Stuart, when the cause was hopeless, thronged the Highland regiments and fought for, and were largely instrumental in building up the British Empire in various parts of the world.

"Coming here at the close of the American Revolution, you settled in this beautiful portion of Canada. You were joined a few years afterwards by a Glengarry regiment of Highlanders, who had been raised to fight for Britain in the Old World.

A Tribute to the Macdonells.

"In all of the fighting which has taken place in Canada the members of this military colony have ever been in the forefront. You have provided Canada with many of her most distinguished statesmen, soldiers, priests, and divines. One has only to recall to your memory such noted Canadians as Col. John Macdonell, who died at Queenston Heights; his brother, Col. Hugh Macdonell, the first adjutant-general of militia for Upper Canada, who, I may say, in passing, served with my grandfather, Lord Cochrane, in 1810; the great Bishop Alexander Macdonell, from whom this town takes its name; Bishop Strachan, Dr. Bethune, Sandfield Macdonald, and many others.

"In eighteen hundred and thirty-seven when a rebellion broke out in this country his Lordship Bishop Macdonell, who raised the Glengarry Fencibles, and brought them out to this colony with that indomitable spirit of loyalty which actuated him sent round the fiery cross and the clansmen assembled to a man to uphold the British Crown. I remember my father, who was fighting here at that time, telling me many years ago that one of the most wonderful sights he had seen in Canada was the Macdonell and other Glengarry clansmen formed up as volunteers, fathers in front, with their sons behind. When I heard him tell me this story I little thought that one day I should come out here and be in command of the descendants of the very men whom he so admired in 1837.

The Garb of Old Gaul.

"I have inspected your 59th Regiment at Kingston camp. I must congratulate you on the sons being worthy descendants of their fathers. I hear—indeed it is unnecessary for me to say that I hear—for the air is surcharged with the feeling that the Glengarry men want to wear the dress of their fathers. They do not ask for an expensive uniform. I hear that they are quite content with the simple kilt and bonnet such as their ancestors wore at Culloden. I hear that they want this, and mean to have it, for their regiment. Well, all I can say is, gentlemen, that they won't find the general officer-commanding the Canadian militia, standing in their way. And I hope some day to come again amongst you, and to find the tartan plaids of your different clans represented on your pipes. There were some short time ago fully thirty-one Scottish clans represented in this locality. The Macdonells and the MacDonalds, numbering over three thousand; the MacKinnons, Campbells, Camerons, MacLennans, MacLeods, MacMillans, McIlacs, and Frasers, all going into the hundreds; besides other well-known historic clans and Scottish families. My mother, I may say here, was a MacKinnon, of Skye, that little island which has sent more fighting men forth than any similar sized portion of the British Empire, and which is largely represented by those here to-day. I think that we Scotchmen ought to be all deeply grateful to the various Scottish societies in Canada, such as the Sons of Scotland, the society under the auspices of which we meet here to-day, the St. Andrew's Society, the Caledonian Society, and other associations of Scotchmen, for the way in which they have worked to perpetuate our sacred traditions.

Canada's Debt to Scotland.

"Traveling as I do over Canada, and seeing what I see, I cannot but feel pride in the great work which Scotsmen have carried on in developing this country. Take the fur traders of the Northwest and Hudson's Bay, with their forts, the earliest outposts of our civilization. Who organized these associations. Who commanded their forts. Who were their rank and file? Scotsmen; who founded the great Allan Line of steamers? Who was it built the great Pacific Railway of Canada? Who founded our chief universities over the country? Who established our splendid banking institutions, which have become bulwarks of our commerce and examples of honorable dealing? To a large extent Scotsmen. Turning to statesmen, who stands higher in the hearts of Canadian people, and not only the Canadian people, but the British race over the world, than the great Empire builder Sir John A. Macdonald, Prime Minister of Canada, a Highland Scotsman; than Mr. Alexander Mackenzie, Prime Minister of Canada when Lord Dufferin was here, also a Highland Scotsman. Then have we not still with us that great Highland Scotsman, Lord Strathcona, who at his own expense sent a magnificent regiment out to South Africa, who by their gallantry in the field splendidly fulfilled their mission and carried out the great ideas of this patriotic Scotch-Canadian.

A Scottish-Canadian Centre Needed.

"Gentlemen, these are facts connected with the history of this country, and facts are stubborn things. And it is only right and proper that I should refer to those matters, for it gives me an opportunity of expressing my deep regret that Scotsmen have not got any great central national building where the records of their past history in Scotland could be contained, where the portraits and the mementos of Scotsmen who have served Canada could be safely deposited, and where a general record and history of the Scottish race in Canada might be preserved. Such a building might also serve as a centre for Scottish societies in Canada, and as a meeting place for Scotsmen in Canada and representatives of the clans and other societies in the Motherland; a building which might be the headquarters of an organization which in common with the Canadian-Scottish and clan societies of the Old Country might direct Scottish emigration.

The Influence of Sentiment.

"Gentlemen, people are influenced largely by what they see. Who, for example, can enter an historic house and pass along the portrait galleries representing men who took their part centuries ago in the history of their country, without being deeply impressed? Who can see a Highland regiment march on parade with pipes playing, without thinking of the glorious past? Thus it will ever be.

"Those who cannot be moved by pride of country, and pride of race are inaccessible to those great sentiments which stir men to great deeds. Men may acquire gold, but they cannot take it to the grave. It may be squandered by descendants. It may even do harm, but personal service to the State such as was given by the Highland soldiers of Glengarry has a firmer foundation.

"Fellow-countrymen, the glorious traditions of your ancestors have survived the grave, and can neither be squandered nor lost. Yes, if I read aright the faces before me, your glorious traditions will never be allowed to fade, but will be perpetuated so long as Canada remains a country, and there are Scotsmen to stand by the old flag under which your forefathers fought and died, and for which you, their sons, are ready also to fight and to die."

Why Foam is White.

The question as to why all foam is white is not an easy one to understand, but the fact is that foam is always white, whatever may be the color of the beverage itself. The froth produced on a bottle of the blackest ink is white and would be perfectly so were it not tinged to a certain extent by particles of the liquid which the bubbles hold in mechanical suspension. As to the cause of this whiteness, it is sufficient to say that it is due to the large number of reflecting surfaces formed by the foam, for it is these surfaces which, by reflecting the light, produce upon our eyes the impression of white.

If we remember that all bodies owe their colors to the rays of light, which they cannot absorb, and all bodies which reflect all the light they receive, without absorbing any, appear perfectly white, we shall be prepared to understand how the multitude of reflecting surfaces formed by the foam, and which do not absorb any light, must necessarily give the froth a white appearance. It is for the same reason that any very fine powder appears white, even the blackest marble, when ground to dust, losing every trace of its original color.

The Doctor Knew Best.

A Pennsylvania farmer named Hans was subject to some kind of fits which rendered him totally unconscious for hours at a time and on several occasions convinced his good wife that she was a widow. It was pretty generally known that she was by no means averse to the widowed state, for she and the doughty Hans did not live in peace and amity.

One day Hans was stricken as usual. The good wife applied the usual remedies, but this time they failed to revive the unconscious man. A doctor was called, and after a thorough examination he shook his head and said solemnly:

"Dot iss su bed. Hiss iss todt (dead)."

The widow pretended to be overcome with grief, and, leaning over the prostrate form of her husband, she wailed:

"Oh, mein Hans iss todt! Mein Hans iss todt!"

But Hans, reviving suddenly, exclaimed:

"Nein, nein! Ich ben nit todt!"

"Hans," said his wife reprovingly, "lie still. Der doctor knows best."

London's Progress.

It is curious to look back and recall the fact that it was not until 1823 that cabs began to ply for hire in the London streets, says a correspondent. Prior to that time the great thoroughfares were obstructed in all parts of town by toll gates. Six years later omnibuses began to run. In 1838 the first railway train from London to Birmingham steamed out of Euston station. Four years later the Thames tunnel was completed. The old Houses of Parliament were burned down in 1834, and the present magnificent pile was not completed until 1857. The notorious Fleet prison was standing until 1845. Only in 1862 Parliament passed an act for the formation of the Thames Embankment.

The World Over.

London, in proportion to population has more shade trees than any other city.

Southern Rhodesia's gold output in May was the biggest recorded, being over 19,500 ounces.

CURE SICK HEADACHE.

A WOMAN'S RISK

As a trapeze performer is greater than a man's. She must have a man's courage and a man's muscle to succeed. But she must also work under conditions of which a man knows nothing. Many an accident to women acrobats must be attributed to the sudden weakness to which all women are subject at certain times.

Dr. Pierce's Favorite Prescription heals the womanly diseases which cause weakness. It establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"With pleasure I write to-day in praise of Dr. Pierce and his medicines," says Mrs Mary Conway, of Appleton, Lawrence Co., Tenn. "Was troubled with female disease; the back of my head hurt me so I could not lie in bed and I would have to sit up, and then I would have such pains from my waist down I could scarcely raise up. My feet and hands would feel almost like ice. Since taking Dr. Pierce's Favorite Prescription I can sleep well all night. Could hardly drag around before I took your medicine, and now can do my housework and help my husband in the field. Words cannot express the thanks I owe to Dr. Pierce."

Weak and sick women are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and secredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Common Sense Medical Adviser, containing over a thousand large pages, is sent *free* on receipt of stamps to pay expense of customs and mailing *only*. Send 50 one-cent stamps for the cloth-bound volume, or only 21 stamps for book in paper covers. Address Dr. R. V. Pierce, Buffalo, N. Y.

Messrs. E. M. Poussett & Co. have received the following:

Notwithstanding support extended the market yesterday speculative opinion is bearish and the market has been weakened by the elimination of a considerable short interest. There has been no improvement in general assurances that the money stringency will not have any effect and we look for a rally in prices during short session to-day, in which a new time of short stocks will be put out. Conditions at Pittsburg have improved but further selling from Philadelphia is expected and we hear of an intended drive against B.O. which will include other coal stocks and check a bull movement. There is a bullish feeling on grangers and the rally is not expected to hold. There is nothing to bull the market on at present and some unfavourable developments are expected next week. The London market was firm with S.R. 1-2 higher and others about the parity but later heavy selling of B.O. broke the market down to about last night's closing figures.

Market comment reflects a decided change for the better in speculative sentiment. The fact that the declins in prices has not been attended by important failures. The opinion taken by observers who feel that the outlook justifies purchases is that the market has been thoroughly liquidated, that prices are too low, that stocks have passed into hands of investors and powerful financiers and the shorts in RI, PA, AT, UP, BO, RG, Erie and US and copper is enormous.—Waldorf notes.

Weather map—Light general showers for the past 24 hours in Manitoba, and Minnesota. Cooler in north-west. Temperature in corn belt about seasonable but cooler; looks like aproach of a rain condition.

Wheat, 1-8 higher, unchanged.

Hunting Season.

The Grand Trunk Railway has issued a very handsome illustrated pamphlet, entitled "Haunts of Fish and Game," giving information regarding season for shooting deer, moose, reindeer, caribou, etc., in the "Highlands of Ontario," and at other points along the line of the Grand Trunk. Copies of the same will be furnished on application at Grand Trunk ticket offices or to J. D. McDonald, District Passenger Agent, Toronto. d68

THE LATEST NEWS OF LOCAL SPORT.

Belland and Knox to Race on October 15th.

Association Field Day This Afternoon at Nicholls Oval—Rugby Season Opens at Toronto This Afternoon.

SPRINTING.

Articles have been signed by representatives of D. Belland and W. Knox, of Orillia, whereby they are to run a hundred mile dash on October 15th, which is Thanksgiving Day, at the Turf Club's track, for a cup to be donated by the club. A side bet of $100 is also to be put up. This amount has been deposited by Belland's backer but up to the time of going to press Knox's backer had not made his deposit. It is expected, however, that this will be made in a few days. This race will be an interesting one, and a prominent local sporting man ventured his opinion that $5,000 will be up on the races.

GOLF.

The Edmison trophy will be played for at the rinks next week.

• • • •

The finals in the Championship Tournament will be held next week between Messrs. Burnham, Ray and Laurence.

• • • •

Yesterday at the links, Mr. Hampden Burnham broke the link record, which was previously held by Mr. Laurence, whose score was 78. Mr. Burnham made a record of 77.

• • • •

Messrs. Miles Hamilton, V. McGill and S. Ray are in Toronto today, but will be home next week.

• • • •

In the Stratton Trophy Match, Messrs. Gracey, V. McGill, Burnham, Crane, Walker, and J. G. Garvin still remain. The finish promises to be an exciting one.

• • • •

A number of the members of the Ladies' Golf Club went to Port Hope yesterday afternoon to play a match, the result of which was a victory for Port Hope by 5 holes. The score was as follows:

Peterborough		Port Hope.	
0	Mrs R M Denniston	Mrs Brown	3
0	Mrs. Campbell	Miss Benson	3
1	Miss J. Denniston	Mrs. Pepler	0
1	Miss Clementi	Mrs. Strathy	0
0	Miss Halliday	Mrs. Burton	3
2	Mrs. Matthews	Miss V. Hudspeth	0
0	Mrs. Hill	Miss A. Burnham	3
3	Mrs. R.T. Davidson	Miss J. Benson	0
3	Mrs. R. R. Hall	Mrs. Bennett	0
0	Mrs. Aylmer	Miss G. Hudspeth	3
15			20

• • • •

At the Toronto Golf links to-day Mr. V. McGill of Peterborough, will play Mr. A. E. Webster, and Mr. R. M. Hamilton is on the draw with T. Brown, of Montreal.

BASEBALL.

The Lindsay Clippers evidently need a little "prodding" to induce them to give the Excelsiors the game which the latter asked for, and which is to decide the superiority of the two teams. The Post proceeds to "prod" as follows:

"Come, come, Manager Simpson, what about that grand challenge game we heard so much about. It is up to you to bring it on pretty soon, before the ball fever leaves the people. The citizens wish to see the two teams mentioned come together, with a foreign umpire holding the indicator."

• • • •

To-days games in the Eastern League end the series, and also decide the winners of second place, which is almost a draw between Toronto and Buffalo, the rivals for first place last year. Toronto plays a double header at home this afternoon with Rochester, while Buffalo plays at Baltimore. Should Buffalo win the game Toronto will have to take both games of the double header to take second place.

TURF.

"Tholan" and "Sarawack," both owned in Hamilton, the former by A. Murray, and the latter by W. H. Wilson, left here last night for Millbrook, where they will run.

THE TRIGGER.

The Eagle Lake Hunting Club, by request of the Captain, Mr. J. Cottingham, will meet at the Commercial House on Tuesday evening at 8 o'clock sharp. All members are asked to be present.

RUGBY.

"Kingston Limestones have backed up and won't play senior football which lays at rest a much mooted doubt as to whether they could or not."—Telegram.

• • • •

To-day the first game of Rugby for the season will be played in Toronto, the teams being the Toronto and Argonauts. They will play under the new rules.

MISCELLANEOUS.

The annual Association Field Day of the Y.M.C.A. is being held this afternoon at *Nicholls Oval*, commencing at 2.30 o'clock. The events are all being well contested and the Field Day is a complete success.

THE MASTER MECHANIC'S PURE TAR SOAP heals and softens the skin, while promptly cleansing it of grease, oil, rust, etc. Invaluable for mechanics, farmers, sportsmen. Free Sample on receipt of 1c for postage. Albert Toilet Soap Co., Mfrs. Montreal.

CUTICURA OINTMENT
Purest of Emollients and Greatest of Skin Cures.
The Most Wonderful Curative of All Time
For Torturing, Disfiguring Skin Humours
And Purest and Sweetest of Toilet Emollients.

Cuticura Ointment is beyond question the most successful curative for torturing, disfiguring humours of the skin and scalp, including loss of hair, ever compounded, in proof of which a single anointing preceded by a hot bath with Cuticura Soap, and followed in the severer cases, by a dose of Cuticura Resolvent, is often sufficient to afford immediate relief in the most distressing forms of itching, burning and scaly humours, permit rest and sleep, and point to a speedy cure when all other remedies fail. It is especially so in the treatment of infants and children, cleansing, soothing and healing the most distressing of infantile humours, and preserving, purifying and beautifying the skin, scald and hair.

Cuticura Ointment possesses, at the same time, the charm of satisfying the simple wants of the toilet, in caring for the skin, scalp, hair, hands and feet, from infancy to age, far more effectually, agreeably and economically than the most expensive of toilet emollients. Its "Instant relief for skin-tortured babies," or "Sanative, antiseptic cleansing," or "One-night treatment of the hands or feet," or "Single treatment of the hair," or "Use after athletics," cycling, golf, tennis, riding, sparring, or any sport, each in connection with the use of Cuticura Soap, is sufficient evidence of this.

Cuticura Resolvent, liquid and in the form of Chocolate Coated Pills, Cuticura Ointment and Cuticura Soap are sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Australia, R. Towns & Co., Sydney; Boston, 137 Columbus Ave. Potter Drug & Chemical Corp., Sole Proprietors.
Send for "The Cuticura Skin Book."

THE UNPLACED DUTIES.

Protectionist newspapers are drawing conclusions that had the Dominion Government done its duty in the way of bounties and steel duties, the big works at the Sault would have been a success.

Regrettable as the collapse is, it would have been still more regrettable had the works at the Sault been kept flourishing by a tax on every man and woman in Canada.

A sufficient duty to enable the big works to succeed would have meant that every corporation and contractor in Canada using steel would have paid more for it, and of course this would have come out of the pockets of people who mostly had never seen the Sault.

It is better that failure should come short and sharp than the people of Canada should be taxed throughout the next couple of generations, to support an industry that could not otherwise live. — Ottawa Journal.

FOR SALE.

A Good Young Driving Horse. Inquire at 376 George street.

BLAIRTON.

(From Our Own Correspondent.)

Mr. Lewis Mack, of this place, has just completed a barn for Mr. Robert McFall, which is a credit to this part of the township.

Mr. Fred Aunger and family are visiting Mrs. Robert Bouter, a sister of Mrs. Aunger, and who is very ill.

Mr. Jones with a traction engine and a separator, is very busy here. It is stated that while at Mr. Brock's on Saturday, Mr. Jones threshed for a while at the rate of six bushels of oats per minute. However, the tally was 750 bushels of all kinds of grain.

Mr. and Mrs. Stevens of Seymour, are visiting Mrs. Mack, Mrs. Stevens' mother.

Mr. Patefer of Campbellford, is spending a week with her many relatives here, Mr. and Mrs. J. Dodge.

Mrs. J. S. Aunger and son, George, visited Mrs. D. T. Young, daughter of the former, on Sunday.

D. T. Young, Esq., Rockdale, recently agreed to furnish a merchant with a number of barrels of choice apples, and on going to the orchard to fill the order he found the apples had disappeared.

At a meeting of the trustees of the C. M. church here, it was decided to make important improvements in the way of beautifying the church.

So strong was the wind here on Wednesday, that damage was done to stacks, etc., and grain not yet taken in was blown in all directions.

Mr. Thomas McLaughlin, of Cordova, is the proud father of a young son.

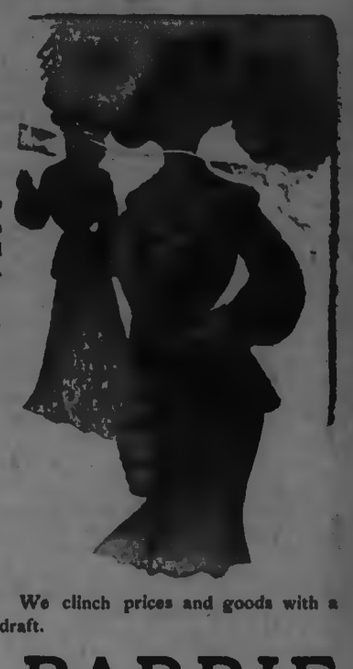
THE best showing of Handsome Fur Garments ever made in Peterborough. Never before in all the years this store has been anticipating your wants, has it had such elegance and excellence in Furs of every sort.

It is easy to see we're not resting on past reputation—this business responds to every wish of well dressed people.

Doing the largest Fur business last year is helping us



double our business now. The conditions are more and more in our favour, with more to see and more worth seeing than anywhere else in town.

We are ready with the very latest styles in

Fur Jackets
Fur Caperines
Fur Scarfs
Fur Coats
Fur Muffs
Fur Linings

in none but really good Furs. We clinch prices and goods with a guarantee as effective as a bank draft.

FAIR WEEK BARGAINS AT ROUTLEY'S

TRUNKS AND VALISES PRESENTS OF ALL KINDS
Wall Papers and Window Shades
CROCKERY, CHINA WARE, WEDDING PRESENTS, DINNER SETS.

Read over the list and ask yourself where on earth you have heard of goods being sold at such marvellously Low Prices. If space would permit we could make the list ten times as long. Suffice it to say our reputation for selling the best obtainable goods at prices which cause our customers to wonder how we sell so cheaply. We answer it in this way: We know how and where to buy and we are content to share our profits with our customers. It will do you good to see the goods we have just received during the past week from Vienna, Japan and New York. We will be pleased to have you look through.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was taking a stroll along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this *inscription*:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

RECEIVER APPOINTED.

John G. Carruth made Receiver for Consolidated L. S. Co.

(Special to the Examiner.)

New Haven, Conn., Sept. 28th.—John G. Carruth, of Philadelphia, president of the International Title and Trust Company, was to-day appointed a receiver for the Consolidated Lake Superior Company, by Judge Platt, in the United States District Court. His bond was placed at $10,000. Judge Lynde Harrison of this city, counsel for the company, said the company consented to the appointment of the receiver.

SITUATION AT THE SAULT REVIEWED.

Letter From Former Peterborough boy now at Sault Ste. Marie.

A letter has been received from a young man in Sault Ste. Marie, well-known here, in which some information regarding the situation there in contained. Some extracts are given below:

The business men of the town have felt the crash coming for a long time, but a few of them who placed implicit faith in the company, are to-day sadder, but wiser men. The hardware firms here lose about $35,000 in the failure, the lumber firms lose about $15,000, and other firms about $35,000. No money has been paid out by the company since August 10th, and arrears in the pay roll amount to between $275,000 and $300,000. About 1,000 of the men to whom this money is owed are at present in town, and looking down the main street one can see groups of them all over.

The company have managed to keep the other 2,500 men in the woods and at the mines, but they will be in next week, as the 28th has been announced as pay day. It would be bad if they were to be paid, which is not probable, and then spend most of it in liquor, but it is worse by far to have that many hungry men walking the streets. The merchants of the town will not give them credit and there are dozens of families in the west end who do not know where their next meal is coming from. There are people who really feel the pinch of the times. A single man can stand to go without a meal or two and sleep in an old shed, but a man will not see his wife and children starve when he has done his best. Some of the American dailies publish accounts to the effect that the men are lawless and rioting is feared. Such is not the case. These men have too much respect for Canada's laws to resort to the bull-headed measures that American workmen frequently employ. The car barns can be used as sleeping quarters, and the company hotel will, perhaps, furnish eatables to those who are without.

There is very little business going on in town. The boats passing up and down create a little business but one by one they are going into winter quarters.

If the works should start up again before next spring it will surprise everyone. The steel plant and rail mill cannot possibly start before July next year unless something wonderful hapens.

The Mail and Empire published an article recently in which it stated that the Dominion Government was being condemned because it did not place a bounty on steel rails a year ago. This is not the fact. The Government allows $7 protection and $5 bounty per ton for steel rails and they sell at from $28 to $30 per ton. That Mail and Empire statement is the most ridiculous thing that has come to the notice of those who are interested in steel rails.

There are half a dozen employment agents in town who will ship the men away next week at a rapid rate. On an average, about 30 men leave town everyday; but that is not very many considering the number that are around.

DUTTON'S MARKET.

Dress Goods...

Novel Parisian effects in French Woven Fancies—the Dots, the Splashes and the "Tony" Splash Stripes.

Rich Weaves in Soft Colours of the Newer Shadings—Soft Cosy Colourings.

Individuality is expressed in these French Cloths. Our European buyer personally selected these novelties in "Dress Patterns" only—no two alike. Their suitability is principally for "Dresses"—some for Suits.

PRICES PER YARD $1.00, $1.25, $1.40.

Suitings

Now for our Canadian Friends. We're pleased to note a growing "Favour" for Canadian-Made Goods and an opportunity will now be given to some ardent Canadian to select a costume of their native-made Dress Woollens.

The patterns are effective, the colourings are good and their weight makes them specially adapted for Suits and Unlined Skirts.

Teeny Tiny Silk Checks, Snow Flake and Fancy Bourette effects, 56 inches wide, per yard..... **$1.00**

Swell "Dash" Stripes in Pretty Mottled Grounds of Gray, with Green and Navy Contrast Colourings, Out-of-the-Ordinary Effects, and "just right" for Long Coat Suits, per yard **$1.25**

An English Suiting

A Pebble Cheviot of Firm Weave Splendid Shades of Black and Navy—a splendid serviceable and stylish suiting, heavy enough not to require lining. Ask to see it. Our Extra Special..... **$1.00**

THE CASH STORE, Peterborough.

AT THE ASSIZES THIS AFTERNOON.

The Grand Jury—Two Criminal Cases up for Hearing.

At the Autumn Assizes held in the Court House this afternoon, before Mr. Justice Ferguson, there were only two criminal cases. Samuel Wynn, charged with horse thieving, and John Miller for stealing a pair of boots from B. Douglas, boot and shoe merchant, George street. D. O'Connell for defendant.

In addressing the Grand Jury Mr. Justice Ferguson outlined their duties in regard to their inspection of the gaols and hospitals, as well as towards the criminal cases set down for hearing.

The Grand Jury was composed of the following gentlemen:

Stewart Benson, Douro; H. G. Buck, Norwood; Wm. John Deen, Dummer; W. J. Elliott, Dummer; W. H. Johnston, Belmont; Wm. Preston, Smith; W. M. Graham, Lakefiled; Thos. Kelly, Peterborough; James Rose, Otonabee; Wm. Stark, Otonabee; Wm. Thompson, Peterborough; John Vanslckle, Havelock; Wm. White, Peterborough.

An action to recover possession of certain lands in Ashburnham, the property of the Rev. Mark Burnham estate, to which the defendant claimed title by length of possession. Judgment for the plaintiffs, without costs. Dennistoun, Peck, Kerr & Stevenson, solicitors, for the plaintiff; Daniel O'Connell, solicitor for defendant.

CANADA'S TRADE HEADS THE LIST.

Exports Increase in Ten Years in Greater Ratio Than in any Other Country.

Ottawa, Sept. 28th.—The following interesting schedule from the Department of Trade and Commerce shows the Canadian percentage of increase in exports of merchandise to be greater than all the other principal countries of the world for the past ten years:

Canada (a) ... ...$	105,488,799	$ 214,401,674
Japan	63,825,743	127,526,158
U. S. (a)	831,030,785	1,392,231,637
Germany	703,078,000	1,113,813,000
Italy	184,930,132	284,174,782
Australia (b) ...	179,212,872	241,791,530
Austria-Hungary ...	293,424,916	387,525,845
India Brit. (c)...	310,074,240	404,431,355
China	107,302,367	124,726,216
U. Kingdom ...	1,105,718,606	1,379,282,731
France	667,923,000	817,725,000
Spain	128,450,186	143,214,824
Russia (d)	278,452,580	368,965,242

(a) Years 1893 and 1903 ending June 30. (b) Years 1891 and 1901 ending Dec. 31. (c) Years 1893 and 1903 ending Mar. 31. (d) Years 1891 and 1900 ending Dec. 31st.

A Peculiar Find at Chemong.

Mr. P. Cameron, of Buffalo, N. Y., has been spending his vacation at Chemong. One day of last week Mr. Cameron was skiing a stoff along the beach, north of the bridge, and he came across a peculiar stone. On it was the words "Turn Me Over" in a clear black type. Mr. Cameron scarcely knew what to do. However, he did as anybody would do—he turned the stone over, and on the other side he saw this inscription:—"Wise Business Men get their Signs Painted by F. Cook, Peterborough's Exclusive sign Painter. 'Phone 119."

OFFENDERS SHOULD BE PUNISHED.

Complaint of Criminal Conduct at Jackson Park.

A condition of affairs, the existence of which is proving to be a serious matter to those who are effected by it, is the fact that Jackson Park, and the vicinity is being made the scene of the misbehaviour of a number of young hoodlums, who gather there evenings and particularly on Sundays, and make themselves very obnoxious to those who live in that neighbourhood. Shooting off fire-arms, robbing orchards, and henroosts, etc., are some of the things complained of, and, when the results which often follow the former are considered, it will be seen that this is a most serious matter, apart from the annoyance caused to those who have gone to the trouble of spraying their orchards, and caring for them, until now, when they are being stripped by boys, and those, who should be young men. It is stated that the names of some of these young hoodlums are known, and if a repitition of these outrages is attempted, an example will be made of the guilty ones.

Probabilities.

Fresh, strong, northwesterly winds fair. Tuesday, Local frosts in the morning; fair, with moderate winds.

B. LASTAR'S Bargain House.

187 Simcoe Street, Opposite Lock Works.

The business formerly carried on by the Singer Supply Company, which I bought on the understanding that they were going to North Bay, is being continued by me in the same place. I am increasing the business and you will be surprised to see a much larger variety of stock and bigger bargains as follows:
